TX5/TX7, MARQUESAS ISLANDS (Update). The international team of operators are now active as TX7M from Hatiheu, Nuku Hiva (OC-027) until November 1st. Just a reminder that the TX7M team will use TX5M during the CQWW DX SSB Contest this weekend. They plan to be active on 160-10 meters (including 30/17/12m) using CW, SSB and RTTY, with 4 stations on at the same time on different bands and modes. As of 0230z, October 28th, the TX7M operation has made 67844/QSOs with 20335 Unique Callsigns (26552/SSB, 38097/CW and 3195/RTTY). For more details, visit the TX7M Web page at: http://www.tx7m.com

UA2, KALININGRAD. Dmitri, UA2FB, will be active as UA2KK from the Keeper Telecom LTD Club Station during the CQWW DX SSB Contest (October 29-30th)

as a Single-Op/Single-Band (40m) entry. QSL via direct to: Ulrich Mueller, 13 Kreutzacker Str, D-35041 Marburg, Germany. No German stamps please! All cards are replied from Russia. No IBRS please! Bureau QSLs go to the UA2 QSL Bureau.

UK, UZBEKISTAN. Fedor, UK9AA, will be active during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (160m)/Low-Power entry using a 5 elemnet full size yagi on 160m (Boom is 153m). QSL via his home callsign direct.

VI6, AUSTRALIA (Contest And Special Event). John, VK6HZ, will be active as VI6XX during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/ All-Band entry. QSL via VK6XX. ADDED NOTE: Over the contest weekend, the VK6 amateurs can use the VI prefix to celebrate the Commonwealth Heads of Government Meeting (CHOGM) in Perth and a visit of Queen Elizabeth II.

VP2, MONTSERRAT (Update). Ron. N0AT, sent out the following on October 25th (edited): "Beginning November 18th through December 6th, look for Gregor/DF7OGO, Tom/K3WT, Ron/N0AT, Vlad/N0STL and Bill/W0OR operating as VP2MGO, VP2MWT, VP2MTA, VP2MTL and VP2MOR, respectively. During the CQWW CW DX and ARRL 160 Meter Contests the group will be signing VP2MWG. Before and after the contests, activity will be on CW, SSB and RTTY on 160 through 6 meters. QSL VP2MWG via N0AT, and all others via their home callsign. Further information and updates can be found on their web site at: http://www.vp2mwg.comeze.com
In 2009, the same core group of operators finished 2nd in North America multi-single from El Salvador as YS4U and have previously participated in CQWW CW contests as 5J0A (San Andres), CP6CW (Bolivia) and TG0AA (Guatemala), holding scoring records for each country. Stories about the above operations can be found in past issues of The Gray Line Report, the official newsletter of the Twin City DX Association.
To read about YS4U (2009)
http://tcdxa.org/Newsletters/December2009Grayline.pdf
To read about 5J0A (2007) http://tcdxa.org/Newsletters/April2008Grayline.pdf
To read about CP6CW http://tcdxa.org/Newsletters/December2004Grayline.pdf
To read about TG0AA (2003)
http://tcdxa.org/Newsletters/March_2004_GrayLine.pdf
Team members N0STL and N0AT also operated from Utila Island, Honduras, in the 2006 ARRL CW DX CONTEST as HQ9H. The story can be found at:
http://tcdxa.org/Newsletters/March2006GrayLine.pdf

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), is once again active as VP9KF from Baileys Bay, Hamilton Parish, between November 2-16th. Activity will only be CW on all bands. Paul states, "Operation will focus on the higher bands where 11 previous trips in the last 5 years have resulted in very few QSOs." QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Please, DO NOT send to the VP9 bureau. Visit his Web page for more information, including logs, propagation and operating times, at: http://vp9kf.com

VU***/F1, INDIA (Special Event). Amateur radio operators from India have received permission from the authorities to use the suffix /F1 at the

end of their callsigns to mark the first-ever Formula 1 race in India this weekend. They are allowed to use the suffix until October 31st. PLEASE NOTE: This may cause some confusion on the air as stations may think that they might have worked a station from France. Each operator is responsible for his/her own activities and QSLs will be as per operator's instructions. For more details about the Indian Grand Prix, see: http://formula1.airtel.in

YB, INDONESIA. Members of the ORARI Daerah Jawa Tengah Contesting Team will be active as YE2R from Semarang on the Island of Java (IOTA OC-021, WLOTA L1660), during the CQWW DX SSB Contest (October 29-30th) as a Multi-Multi entry. QSL via EB7DX. Operators mentioned are: Fan/YB0AI, Djoko/YB1TJ, William/YB1WR, Bobby/YB2BBY, Hans/YB2DX, Seno/YB2LSR, Jon/YB2ECG, Dani/YB2TJV, Deta/YB2VTO (YL), Buntoro/YB3PXF, Adhi/YB3MM, Imam/YB4IR and Joni/YB9WZJ. For more details, look at: http://www.ye2r.wordpress.com

YB, INDONESIA. Members of the ORARI Local Subang will be active from their YE1ZAW club station on Mt. Malang (+1050m ASL) on West Java during the CQWW DX SSB Contest (October 29-30th) as a Multi-Single/High-Power entry. Operators mentioned are Yon/YB1CCF, Joz/YD1JZ, Heri/YB1KAR, Nyoman/YB1NWP, Budi/YB1EME, Terry/YC1KAF, Danu/YD1GCL, Rizal/YD1ORG, Kasmuri/YD1MRI, Jimi/YC1OO, Aris/YD1ARM, Yayan/YC1BTV, Herry/YC1HQQ, Nana/YD1LUX, Sutrisno/YD1OLG and Jo/YC0LOW. QSL via YE1ZAW direct only (QRZ.com address). No LoTW or eQSL.

XV9, VIETNAM. Mike, OM2DX, will be active as XV9DX from Hanoi, and is working for the Embassy of the Slovak Republic. He will be in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (15m) entry. QSL via OM3JW.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 29-30th, 2011)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2011 CQWW DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

WIANEWS WEEK COMMENCING OCTOBER 30 2011.

WIA National Field Day 2012 with WIA Director Philip Adams, VK3JNI

The Centenary Award and VK 100 ARV

VK4RCA REPEATERS permanently removed from Mt Yarrabah.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING OCTOBER 30 2011.

The Australian Communications and Media Authority have issued new draft
guidelines for retransmission of digital television services, including
retransmission of services provided by the new Viewer Access Satellite
Television (VAST) satellite service.

In small or isolated population centres where terrestrial television reception
is poor or non-existent, local organisations such as councils and mining
companies frequently provide television services on a self-help basis.
These 'self-help providers' retransmit the commercial and national television
broadcasting services using their own infrastructure.

VAST will offer all Australians who do not receive adequate terrestrial
television coverage the same number and quality of digital television services

as in the major cities, including all digital multichannels and HDTV.

Self-help providers will be expected to provide all available terrestrial television services using MPEG-2 video coding along with service information such as electronic program guides, channel numbers and captioning.

The ACMA encourages submissions from all interested parties by Friday December Two 2011.

www.digitalready.gov.au
or call the Digital Ready Information Line on 1800 20 10 13.

Whilst on ACMA matters, I'm sure they'll find of interest an article in an Australian on line publication "Lifehacker" which suggests ways to create RFI to your neighbours who play their music too loud!

"Evil genius and electrical guru junkyardmessiah over at Reddit came up with this DIY solution which includes a Cheap CB radio, A linear amp, and a bottom loaded CB antenna, get your antenna close as you can to it and fire up! Amplifier sections are not shielded in these plastic ready-made toys and the resulting AM signal will impact it. In my case I ran a continuous 6khz tone from a signal generator which was more than enough to blow it up good. ENJOY!"

Regional radio censured over lack of local content

the Australian Communications and Media Authority has found regional Queensland radio station 4MIC, which operates out of Mt Isa as Hot FM, failed to broadcast the designated minimum of local content required under its licence.

The rebuke from the media watchdog was the result of an audit of regional radio stations across Australia.

ACMA has agreed on measures to be undertaken by Hot FM Mt Isa.

These include the implementation of enhanced monitoring processes and procedures to ensure the station provides the mandated 30 minutes of local content per business day.

Banyule and Nillumbik Weekly reporter Meagan Weymes has an article well worth a read this week, entitled CFA aims to widen radio coverage.

RADIO coverage that failed during the Black Saturday bushfires could be improved with new CFA radio towers.

CFA has identified 52 locations where radio reception is poor or non-existent.

Several of these so-called black spots are in Whittlesea and Nillumbik including areas around Warrandyte North, Eltham and St Andrews.

The 2009 Victorian Bushfires Royal Commission found one of the major problems on Black Saturday was the shortcomings of CFA radio communication.

The CFA announced last week 12 to 15 new fixed radio repeaters would be built across the state to improve signals.

Kinglake West CFA captain Karyn Norbury said about 25 per cent of the station's area was considered a radio black spot

More than 3500 touch-screen computers will be installed at bedsides in South Australian public hospitals to improve patient care and safety.

The bedside computers will enable clinicians to show the patient relevant health information, X-rays and test results on-screen at their bedside.

Also the computers will offer patients access to all digital TV and radio stations, a range of pay television channels, movies, a phone line and the internet.

XYL BECOMES YL WITH RADIO FREQUENCY TREATMENT.

RF is the latest technique being incorporated into anti-ageing skin treatments.

Dermal Matrix Therapy Radio Frequency is said to help tighten skin on the face and body through the use of heat which penetrates deep into dermis layer and stimulates the production of collagen.

The radio frequency is generated through a machine with various metal attachments. For the face, there are two different sized pads which are massaged over the skin during the 40 minute treatment.

The procedure feels warm on the skin but should be comfortable at all times. After RF the skin can look slightly red but makeup can be applied straight advocates of this procedure say.

Unconfirmed suggestions are that the power of up to 8 watts and a frequency around 13.500 MHz is often used.

Midland On Air.

A COMMUNITY radio station for Midland could be up and running within 12 months.

The station would unite the community and promote local artists, businesses and produce broadcasting to Midland, the Swan Valley and Hills.

Other cities have got their own station, like Joondalup, Rockingham, Mandurah and Gosnells, so why not Midlands asked the committee.

The committee is also looking for a suitable building in Midland from which to broadcast.

No word in yet as to AMAS response and if frequencies exist.

Cyclone Sunday today, Sunday 30.

It is coming up to the time of year in the North when all should be thinking about preparations for the cyclone season.

As the news goes to air the Townsville City Council is holding the annual Cyclone Sunday Emergency Expo and you are invited to head along, regardless if you are new to town, driving through or have lived in the north for many years, to get informed about what needs to be done to successfully 'weather' curly winds, horizontal rain, sudden flooding, panic buying, loss of electrons

and extended shop closing hours.

Cyclone Sunday happens in Strand Park from 9am until noon today Sunday October 30th and entry is free.

WIA National Field Day 2012

Philip Adams - VK3JNI

The date of the next WIA National Field Day is the weekend of the 14th and 15th of April 2012. Providing two days of possible operation will support club requests for some flexibility to suit their local community with operation on either the Saturday or Sunday.

This is not suggesting that the clubs would need to operate their displays over the two days unless they wanted to.

Advertising material will require a little customising by local clubs to match the times and date of the local activity. Acknowledging valuable feedback from clubs, some changes to the rules and guidelines of the 2012 event will be advised to support the two days of operation of this event as it is certainly not a traditional AR contest. The rewarding or recognition of clubs who take pride in their preparation and presentation will still be encouraged.

The objective of the WIA National Field Day is to positively place the hobby of amateur radio in front of the general public, to provide various clubs with an opportunity to promote their activities and increase the awareness of amateur radio training opportunities, either via the local clubs or the amateur radio fraternity as a whole.

Expressions of Interest - WIA NFD Committee

The event will continue to be coordinated and managed by a small committee.

In September, interested parties where invited to express their interest in joining this committee. Please forward your expression of interest via your state WIA Advisory Committee members TODAY!

The chair of each Advisory Committee is asked to forward these nominations during the first week of November to the WIA office. Former committee members are welcome to nominate if they wish to continue in this role.

HAMS ACROSS AUSTRALIA.

E-waste clean-up day.

Amateurs in the inner-west of Sydney are informed that there will be an e-waste clean-up day on Saturday the 12th of November at the rear of the Canterbury Council chambers, Campsie.

This is a good opportunity to dispose of your old CRT monitors and TVs as well as computers, mobile phones and other electronic equipment.

VK3

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

The Centenary Award and VK 100 ARV

The special callsign VK100ARV begins this Tuesday. The Scout Radio & Electronics Unit fires up from Gilwell Park, on HF and Slow Scan TV.

On Wednesday night it will be on the digital ATV repeater VK3RTV, and also the DX bands.

Thursday and Friday will see action from Luke Steele VK3HJ, Terry Murphy VK3UP and Tony Hambling VK3VTH.

Then for five days, the, Western & Northern Suburbs Amateur Radio Club takes its turn.

Every valid contact with VK100ARV earns ten bonus points towards the Amateur Radio Victoria Centenary Award. See www.amateurradio.com.au for more details.

'though each day is allocated there remains some limited flexibility. If you're keen to enjoy the once in a life opportunity it offer contact without the Award Manager Tony Hambling VK3VTH vk3vth@amateurradio.com.au

November 1 - 0000-1300 VK3SGC Scout Radio & Electronics Unit.
November 2 - Keith Proctor VK3FT, Peter Cossins VK3BFG through VK3RTV.
November 3 - Luke Steele VK3HJ.
November 4 - Terry Murphy VK3UP assisted by Tony Hambling VK3VTH.
November 5 until 9 - Western & Northern Amateur Radio Club.
November 10, 11 & 12 - Terry Murphy VK3UP assisted by Tony Hambling VK3VTH.
November 13 - Luke Steele VK3HJ.
November 14 - Keith Proctor VK3FT, Digital SSTV Group (VK3RML 1000z-1300z).

November 15 & 16 - Keith Proctor VK3FT.
November 17 - Luke Steele VK3HJ.
November 18 - Peter Freeman VK3PF.
November 19 & 20 - Terry Murphy VK3UP (Brisbane Ranges National Park).
November 21 - Keith Proctor VK3FT, Digital SSTV Group (VK3RML 1000z-1300z).
November 22 - Luke Steele VK3HJ.
November 23 & 24 - Joe Walsh VK3XH
November 25, 26 & 27 - Sunraysia Radio Group.
November 28 - Keith Proctor VK3FT, Digital SSTV Group (VK3RML 1000z-1300z).
November 29 & 30 - Terry Murphy VK3UP assisted by Tony Hambling VK3VTH.

REPEATERS

Both VK4RCA systems have been permanently removed from Mt Yarrabah and will be resited at VK4RIK - Mt Haren.

IRLP NODE 6163
146.550 DTMF 123Hz

I'm Geoff Emery, VK4ZPP, and I've been thinking.

>From time to time there are issues which come up in our families, our workplaces and our clubs. These can start out as seemingly simple ideas but they can spark a gut reaction which raises the heat above normal.

Part of the process of moving along our club activities is getting people to follow common goals. This can be running a club station in a contest, having a project to build or even arranging a get together for members and their families. There are so many opportunities for group activities in amateur radio.

Part of the trick is to choose activities that will keep the bulk of members involved and excited. The other part of the trick is not to be limited by the will of one or a small group in the club. For club life to work, just as for our personal life to work, we must be prepared to compromise and accept compromise.

When we make our choices is the time for clear heads and cool thoughts and like in fox hunting, it is when we can properly get redfaced and excited in completing the project.

I'm Geoff Emery and that's what I think....how about you?

VK5

Adelaide Hills Amateur Radio Society Inc Hamfest 20 November.

Commercial vendors and second hand sellers in attendance. Displays and demonstrations. Goodwood Community Centre, Rosa St 0930.
Tea, coffee, snacks and BBQ available.
Visit www.ahars.com.au for contact details.

DISCUSSION POINT

What use is an f-call?

Nothing, nothing at all.

Well, that is, unless you practice.

You're sure to have heard the expression, practice makes perfect. In any environment, learning about the task at hand is only a very small part of the process. The learning part for an f-call for me was spent listening to a very entertaining lecture over a weekend.

There was a practical component to be sure - I keyed the microphone a couple of times, adjusted a radio, used a multi-meter and connected a PL259 to it's SO239.

The vast majority of time was spent reading, listening and looking at diagrams.

Another weekend and a few exams and I had a foundation license.

My official practical "air-time" could be counted in minutes on the fingers of one hand.

So, why do I sound so confident on air today, if all of my practical time was so short? Well, I've had experience and practice in another area. I've conducted some 1500 radio interviews, lasting from 5 to 30 minutes each, so my "air-time" is a little higher than five minutes. I also have an aviation radio license which forced me to learn my phonetic alphabet. This means that I will sound confident on air, but it doesn't mean that I have lots of practical experience in all of the Amateur Radio field.

I know that this is an issue, so I set out to practice lots. In different situations and environments, different radios, different locations, different people around, different power, antenna, etc. I try to go out of my way learning about the impacts of settings, connectors, etc. I read the user manual of my radio. I read articles on-line, the IARU Ethics and Operating Procedures for the Radio Amateur, you name it, I'll have a go at reading it.

I was loaned a copy of the Department of Civil Aviation Technical Training Section on Transmission Lines and Wave Guides and for light reading I plan to at least get the gist of what is being discussed.

While I realise that I'm possibly a little eccentric in my thirst for information, you might want to start your own path towards this.

I started with "Practice makes Perfect" and in a technical hobby such as Amateur Radio, that is the best advice I can give you.

Key your mike, terminate a patch-lead, make an antenna, mount a mast, do it all.

If you're not handy, that's you're not really sure of how to crimp a connector, or how to cut a cable, ask another amateur or join an amateur radio club and ask there during practical sessions.

It's easy to sound confident, to look confident, to be confident if you practice.

A teenage friend of mine commented recently that they were not sure if they made the right decision. I pointed out that learning is all about making decisions, both good ones and bad ones.

One final comment. While this is Amateur Radio, that doesn't mean that you cannot be professional in your approach. What I mean is that, the Amateur component of Amateur Radio refers to Commercial Use, not the professionalism of the participants.

Be prepared, practice and most of all, have fun - this is a hobby after all.

I'm Onno, vk6flab

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Fiji Broadcasting Corporation Television has started airing its first free to air programmes this week.

Programmes going to air are just test programmes for the greater Suva and Nausori area and not the final programme of FBC TV.

Education, entertainment, information programmes and viewers in Fiji will be able to watch programmes for free from the same programmes that appear on pay service currently.

The official launching of FBC TV is expected November.

Ex-radio centre will be preserved

A former naval radio communications facility in Nagasaki Prefecture and five other historic sites are expected to be designated soon by the government as important cultural assets.

The facility in Sasebo is believed to have transmitted the fateful coded signal "Niitakayama nobore" ("Climb Mount Niitaka") ordering the Imperial Japanese Navy to attack Pearl Harbour in December 1941 and thus triggered the Pacific War.

The naval structure was built in southern Sasebo in 1922 and is noted for its three 136-meter-tall concrete radio transmitter shafts and for being the only low-frequency radio telecommunications centre in Japan.

It was taken out of service in 1997.

The Japanese Navy was the first navy in the world to use wireless telegraphy in combat, at the 1905 Battle of Tsushima.

Radio Frequency modules made in the United States ended up in the detonation systems of roadside bombs targeting coalition forces in Iraq, according to

the US Justice Department.

The department said it is seeking the extradition of four men who were arrested Monday in Singapore. The department said the men, all citizens of Singapore, falsely told the Minnesota-based firm, Digi International, that made the modules that the parts were for a telecommunications project in Singapore.

The modules, ordinarily used in wireless local area networks, have an encryption capability and can transmit data wirelessly up to 40 miles when configured with certain antennae.

The indictment also charges three of the Singaporean men with a separate fraud conspiracy involving an attempt to acquire two types of military antennae from the United States.

California Adds Sales Tax to Amazon.com

The Governor of California has signed a bill that will allow that state to collect sales tax on all merchandise sold from Amazon.com

Amazon, have until September 15, 2012 to implement state tax on all purchases made within the jurisdiction. Supporters of the new legislation are claiming that this will help small businesses compete with e-commerce companies that need fewer people to fill orders.

Amazon claims that a sales tax will take away their "competitive edge" from their online "bargain" prices.

SoundHound music application for identifying songs.

SoundHound, whose music app can identify songs playing on the radio or hummed by its users, reports that it is processing about 4 million name-that-tune requests a day.

The statistic is interesting because it gives a glimpse of how popular music "searches" have become in the age of computers that can recognize both voice and sound.

Apple iPhone 4S users may be enthralled with the device's Siri application, whose cheeky answers have become a viral staple on about 77,500 videos on YouTube. But the technology behind Siri is something that SoundHound has been developing for the last five years.

What are SoundHound's users clicking on?

All sorts of things: song lyrics, artist biographies, photos and greatest hits lists.

Some even click over to iTunes or Amazon.com's MP3 store to buy the songs.

In an age where there are tens of millions of songs online, finding the tune that your grandmother hummed to you as a child may be like searching for a needle in a digital haystack.

SoundHound is aiming to find that 'needle' for you!

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

IARU Region 3 Operating Award

The award is available to licensed amateurs and SWLs.

Contacts made after April 5, 1982 are eligible.

QSL cards NOT required. Send certified list of eligible contacts from Log Book.

Cost is US $4.00.

Eligible countries are those in ITU Region 3 whose amateur societies are members of IARU Region 3.

These are:
Australia, Bangladesh, Brunei, China (PRC), Chinese Taipei (Taiwan), Fiji, French Polynesia (FO8 only), Hong Kong, India, Indonesia, Japan, Korea, Macau, Malaysia, New Caledonia, New Zealand, Pakistan, Papua New Guinea, Philippines, Pitcain Islands, Samoa, Singapore, Solomon Islands, Sri Lanka, Thailand, Tonga, Vanuatu, Vietnam.

PLUS -
ONE Country credit from US Territories in the Pacific from Guam, Northern Marianas, American Samoa, Wake Island, Baker Howland Group, as represented by ARRL.

or

ONE Country credit from Chago Archipelago (VQ9), represented by RSGB.

Current total of available 'countries' is 34.

Requirements for Award as from January 1, 1986:
Basic, 7 areas;
Silver Endorsement, 15 areas;
Gold Endorsement, 20 areas.

These to be reviewed as considered necessary by the custodian who would recommend appropriately to the Secretariat.

Awards may be endorsed for any mode or band.

Application to NZART Awards Manager.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Five operators are active from Bhutan until 1 November.

During the CQ WW SSB Contest this weekend (29-30 October) look for A52IR
on 80m, A52PC on 40m, A52PP on 20m, A25AB on 15m and A51B on 10m.

Outside the contest times they will work other bands and modes.

Gerard de Jong is now active from Antarctica as ZS7KX.
He is stationed at SANAE 4 Base, Vesleskarvet, Queen Maude Land, Antarctica.

He can be heard on 14,175 MHz from 14:00 UTC, weather permitting.
He will give a call every half hour until 15:30 UTC. Gerard will be at
SANAE 4 until February 2012.

IRLP Ghost Net

The first, and possibly-annual, IRLP Ghost Net will be meeting next week.

The net will meet at 0:00 UTC on Monday, October 31 (5 pm Sunday Pacific time).
It will meet on IRLP reflector 9204.

All are welcome to check in, and kids are encouraged to join in the spooky fun.

Sutter, KI6ZON

U.S. haunted lighthouse op

Look for Dan, KD3CQ, to activate the special event station W3H (Whiskey 3
Haunted) on October 31st, from Maryland's Lighthouses -- Point Lookout
(ARLHS USA-628), listed as one of the USA haunted lighthouses, along with
Point Lookout Light (ARLHS USA-1409), and possibly Solomon's Lump
(ARLHS USA-767), if visible.

Point Lookout was a "Union Prisoner of War Camp" set up to hold Confederate
prisoners after the "1863 Battle of Gettysburg"; the lighthouse was used as
the Infirmary.

Activation will start at 1300z and end at 1345z, on 7270 kHz +/-,
then 14270 kHz +/- and possibly 18150 kHz +/-.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

Development of HAMCALC to cease

Long-standing software developer George Murphy, VE3ERP, has hung up his
keyboard and is retiring from further development on HAMCALC.

For those unfamiliar with the software, HAMCALC is a collection of useful calculators for amateur radio use, widely used throughout the amateur community.

The latest version of HAMCALC can be downloaded at

A further look at Amateur Radio magazine

On this broadcast last week we had the IARU Region 3 ARDF Championships, the New South Wales Department of Planning making radio mast laws more flexible, and what is happening on the bands.

Now we look its technical articles - Porta-Loop MF reception by Peter Parker VK3YE, a Sensitive Field Strength Meter from Tony La Macchia VK2BTL, A Simple Microwave Beeper by Lou Blasco VK3ALB and an Audio Compressor from Dale Hughes VK1DSH.

There's also a switched mode power supply repair from Erich Heinzle VK5HSE and a simple balanced line protector by Justin Giles-Clark VK7TW.

In history the Amateur Operators Certificate and the Morse code requirement is looked at by Lloyd Butler VK5BR and there's a walk through the early days from Alan Elliott VK3AL.

Amateur Radio magazine is part of WIA membership and also at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

WW SPECIAL INTEREST GROUPS - FINAL FRONTIER

One of the leading contributors to our understanding of the universe sits in our rural backyard, says ABC Rural in a great story on the CSIRO's Parkes radio telescope, also known as the Dish, which is located in central west VK2.

The Dish turns 50 Monday October 31, but due to recent upgrades making it 10,000 times stonger than in 1961 it's still ranked among the top ten radio telescopes in the world.

http://www.abc.net.au/rural/telegraph/content/2011/s3349555.htm

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

On November 9, at 2:00 p.m. Eastern time, televisions and radios across the USA will broadcast a series of beeps followed by the message,
"This is a test."

While local and state components of the Emergency Alert System (EAS) are tested on a weekly and monthly basis, respectively, this will mark the first time that the federal government conducts a nationwide, "top-to-bottom" test.

EAS serves as the USA's public warning system.

The test will last for approximately three minutes on all over-the-air broadcasts, cable television systems, wireless cable systems, satellite digital audio radio service (SDARS) providers and direct broadcast satellite (DBS) providers.

While state and local authorities typically utilize EAS for weather-related emergencies and public notices, such as Amber child abduction alerts, it also serves as the primary means for the President to relay critical information to citizens during an emergency.

"Early warnings save lives," explained FCC Public Safety and Homeland Security Bureau Chief James A. Barnett, Jr. in a recent release. "This was demonstrated recently and dramatically during the major earthquake and tsunami that devastated eastern Japan. Except for Japan's early warning systems, loss of life would have been much higher."

HISTORIC CAR RALLY - EAST GIPPSLAND

Amateur Radio Operators will be visiting East Gippsland during the weekend of the 26th and 27th of November to provide support for the Historic Rally Association of Victoria during their conduct of one of the biggest car rallies in Australia, with vehicles coming from all around Australia and New Zealand.

This exercise will operate over two days and one night and will be in the forest area on "back roads" off the Princes Highway between Lakes Entrance and the township of Cann River

An Amateur Radio communication system to provide vital safety reporting of car positions will operate through several 2m repeaters previously established by the East Gippsland Amateur Radio Club, providing communications along the Highway The reporting of vehicle positions will be to one central control point to ensure the safety of all competitors.

If you would like to be an operator at one of these control positions, have a close up view of the event and spend a day in the Gippsland forest, please contact Col Pomroy Email at colinpomroy@bigpond.com or Mobile 0417 305 702 I'm Michael, Clubs publicity officer vk3hau.

Turkey earthquake - avoid 7.092 MHz USB

A magnitude 7.2 earthquake struck the Van region of Eastern Turkey causing great loss of life and hundreds of casualties. Radio Amateurs from the Turkish national amateur radio society TRAC are responding to assist with communications in the area.

There are some frequencies in use on HF, currently used to link with Government resources and this is meaning that some frequencies outside the amateur bandplan and normal usage are being used until more equipment gets to the region. When this happens, more traffic should move to the normal Emergency Communications Centre of Activity frequencies.

Please avoid causing QRM to emergency traffic on 7.092 MHz USB. USB is being used to allow communications with a government station.

REWIND

Radio players to thrill and make audience laugh at Katoomba

FANS of radio plays in Western Sydney will be treated to a thriller and a comedy at Katoomba by the Blue Mountains Radio Players this weekend.

The first play to be performed at Mountain Heritage Hotel and Spa is 'The Voice On The Wire' and the second is 'Fibber Has A Happy Face' from 2.30pm.

The Voice On The Wire is from the Inner Sanctum Mysteries Series first broadcast on November 29, 1944.

The second play from the Fibber McGee & Molly Series was written by Don Quinn Phil Leslie and was first aired on June 8, 1943.

It is based on the theory that the way you feel is reflected in the way you look hence, look happy and you will feel happy.

The two radio plays are performed before a live audience at Mountain Heritage Hotel & Spa, corner of Apex and Lovel Streets.

Phone 47822 155 for 'nformation times etc..

1034. [RAC-Bulletin] RAC Bulletin 2011-034E - RAC Distracted Driving Committee meets with MTO Officials

Newsgroup: rec.radio.amateur.misc
Date: 2011-10-28 22:32:13 UTC
From: rac-bulletins@eton.ca
Message-ID: <4EAB2DCD.2070206@rac.ca>
Source record: 4074
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2011-034E - RAC Distracted Driving Committee meets with MTO Officials
2011-10-27

On October 20th the same day that the Honourable Bob Chiarelli was sworn in as the new
Minister of Transportation, Steve Pengelly, VE3STV former RAC HLC, Jeff Stewart, VA3WXM
Southern Ontario Director and Bill Unger, VE3XT North East Ontario Director met with the
Assistant Deputy Minister Road User Safety Division and the Director Safety Policy and
Education Branch.

One of the questions we were asked is why Amateurs believe we deserve an exemption to
operate while mobile. We explained that in order to be proficient in the use of our
radio systems including mobiles and repeaters, in order to ensure they are always in
working order and in order to ensure we know where they work best and where they don't
work well at all, we must continually test them. This is done by daily usage and by
providing community service to many diverse groups across the Province. They were told
that many communities rely on the Amateur Radio Operators in their areas as part of
their emergency preparedness plans. They were also advised that Amateurs have
installed, at no expense to the taxpayer, a communications infrastructure that provides
a backup to existing telecommunications systems in which authorities can have
confidence.

We demonstrated a 2 Metre radio to them and illustrated the difference between Simplex
using PTT and Duplex with cell phones. We emphasized that to use our radios and
communicate we did not have to remove our eyes from the road.

It was also brought to their attention that we are a relatively small group of private
individuals and for us to continue our public service while having to comply with the
new legislation, could be a financial hardship on some Amateurs.

The Ministry Officials raised several other questions as to why we cannot comply with
the legislation. They were answered with solid technical and operational explanations
as to the difficulties we would encounter in order to do this.

A reasoned set of arguments was presented to allay their concerns regarding safety and
to explain why Amateurs should be treated differently than others and exempted on a
permanent basis.

Ontario has committed to consult with RAC early in the New Year on this matter so a
permanent solution can be found prior to January 2013.

Bill Unger VE3XT
Chair - Ontario Distracted Driving Committee
North/East Ontario Regional Director - Radio Amateurs of Canada

SARL NEWS - SUNDAY 30 OCTOBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

AN ADVANCED LICENCE - JOIN THE DEBATE TONIGHT

2012 ARRL HANDBOOK AND ANTENNA BOOK NOW AVAILABLE

CHANGES AT DEPARTMENT OF COMMUNICATIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

AN ADVANCED LICENCE - JOIN THE DEBATE TONIGHT

You are invited to join the on-the-air debate on the INTECNET this evening, starting at 19:30. An edited (irrelevant discussion outside the subject removed) version of the debate which was held at the RTA in Gauteng last month is available on the web from the SARL TODAY news item on the home page. You may also send your input by email to artpday@satl.org.za before 16:00 today.

Clubs are invited to link their local repeater to the teleconference bridge. Send requests to artoday@sarl.org.za before noon today if had not already been done.

2012 ARRL HANDBOOK AND ANTENNA BOOK NOW AVAILBLE

The hard cover 2012 Handbook and the new hardcover Antenna book of the ARRL are now available from the South African Amateur Radio Development Trust by mail order. Books ordered by Monday 31 October close of business will be shipped on 1 November, orders received after that will be shipped on December 9. Full details on how to order and a review of the content of these two new books can be found on

www.amateurradio.org.za/BOOKS.htm.

CHANGES AT DEPARTMENT OF COMMUNICATIONS

Several journalists writing for the main stream media believe that the Department of Communications (DOC) new leadership is expected to run the department with an iron fist. Dina Pule and Tembisa Stella Ndabeni were both appointed during a cabinet shuffle announced by President Zuma last Monday. Dina is the new minister of communication and Stella her deputy. Both women have been described by MD of World Wide Worx, Arthur Goldstuck and an unnamed official, as "no nonsense" individuals who are likely to implement current and new strategies at the DOC and in the communications sector.

Dina Pule was previously the deputy minister in the Presidency for performance monitoring and evaluation. In a report by the Business Day, she is described as being known as a "pragmatic leftist" by party members. Despite her lack of knowledge and association with the ICT sector upon her initial appointment in 2009, Pule has made a name for herself in the Mpumalanga Provincial Legislature holding several executive council appointments including that of safety and security and agriculture. Her fair amount of administrative and organisational experience is expected to help her meet several of the department's deadlines. The most urgent of which is the switch from analogue to digital TV by next year April, which she warned in 2009 that "South Africa was unlikely to make its 80% coverage target for 2010, and its 100% coverage target for 2011, if it did not receive assistance from industry participants".

Stella Ndabeni is also no stranger to the DOC. She was the ANC's communications committee whip. She became an MP in the 2009 general election. She rose to prominence after being ousted from the national executive committee and national working committee of the ANC Youth League during internal power struggles. Describing herself as a "no-nonsense" person on her Facebook profile, our source believes that Ndabeni's outspoken nature will benefit the DOC, by "acting on the concerns that she might have had during portfolio committee meetings".

US TIGHTENS BPL INTERFERENCE RULES - BUT NOT BY ENOUGH SAYS ARRL

On 25 October 2011, the US FCC released the second report and order in its proceeding - now in its 9th year - to adopt rules for Access Broadband over Power Line (BPL) systems. The Second Report and Order is the final step in the Commission's effort to comply with the directives of the United States Court of Appeals for the District of Columbia Circuit, which in April 2008 ordered the FCC to correct errors it had committed in the course of adopting rules in 2004. The Court acted in response to a Petition for Review filed by the ARRL.

In July 2009, the FCC issued a Request for Further Comment and Further Notice of Proposed Rule Making in which it proposed slight modification of measurement standards for determining whether a BPL system is in

compliance with the maximum allowable levels of radiated emissions. In response, the ARRL argued that coupled with a scientifically valid extrapolation factor for determining those levels, mandatory notching of the amateur bands to a level 35 dB below the general emission limit would reduce the likelihood of harmful interference to amateur stations to a level that would permit any remaining harmful interference to be remedied on a case-by-case basis. The ARRL noted that its request for mandatory notching simply reflected the best practices of the BPL industry.

The Commission decided not to adopt its own proposal and also declined to adopt the ARRL's request for mandatory notching. You can read the full story on the member's section of the SARL web.

COMPETITION NEWS

Come and join in on the fun during the 4th SARL RaDAR contest to be held on Saturday the 5th of November 2011 (See the "Blue book" for details). This contest is for everyone, at home, mobile and in the field. Take on the challenge and carry your field equipment for only one kilometer before setting up a field station and earn the extra points for your efforts. The emphasis is on having fun. This contest is there to test your own readiness in difficult conditions. Please consider operating for the full duration of the contest (14:00 to 20:00). Take some awesome photos of your setup and send them in with your log sheets.

Results of the 2nd leg of the 80 m QSO Party held on the 6th October 2011:

There were 66 stations on the air with the divisional split as follows: Div 1 - 14 Div 2 - 1 Div 3 - 2 Div 4 - 7 Div 5 - 10 Div 6 - 30 Swaziland - 1 Namibia - 1

Scores are as follows: 1st. CHRISTO ZS3R 405 Points 2nd. PIETER ZS6XT 400 Points 3rd. DAWN ZS5ME 365 Points

The combined results of both legs are:

1st - Pieter ZS6XT 910 points 2nd - ZS4SRK 550 points 3rd - Dawn ZS5ME 525 points

Congratulations to the winners. The full results will appear in HF Happenings.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the expected solar activity is slightly down compared to last week but still very favourable for HF propagation. This is due to the many sunspots facing the Earth.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 78.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 30 October at 19:30- Intechnet on proposed advanced license. Till 31 October - ZL-stations with ZM prefixes and ZL4RUGBY and ZL6RWC on the air. 4/6 November - AMSAT NA Space Symposium in San Jose California. 5 November - 4th SARL RaDAR contest from 14:00 till 20:00 CAT. 13 November - Pears HF Competition 12:00 till 16:00 UTC. 19/20 November - SARL Field day competition. 20 November - CW leg of 80 m Club competition. 27 November - Digital competition. 30 November - last day to send logs for Pears HF DX-expedition. 31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, Z6SBWN.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 30th October 2011

IRTS Committee Meeting

The next IRTS committee meeting will take place on 10th December at 11.00 in Portlaoise. Affiliated clubs are encouraged to send a representative. Most welcome.

Turkey Earth Quake

Radio Amateurs in Turkey remain active in the response to the earthquake in Van province on 23rd October.

Assistance has been given by TRAC in setting up VHF/UHF networks to relief agencies and some traffic is also being carried on the 144MHz band. Red Crescent, the Ministry of Health, local law enforcement agencies and the local command centre have been served so far.

The need for HF operations is reducing, however there is still a government station which may operate on 7.092MHz USB. Amateurs are still requested to be careful when operating between 7.092 and 7.095MHz to avoid interference to the ongoing relief operations.

Foyle and District Amateur Radio Rally

The Foyle and District Amateur Radio Club Rally takes place November 6th 2011 at the White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA. Doors open at 12 noon. The usual traders will be present and IRTS will have a stand also on display. Further details from www.mn0aku.co.uk

---

Mayo Radio Experimenters Network

Mayo Chairperson calls for radio enthusiasts to join their local club.

Jimmy Kelly, EI2GCB, was re-elected Chairperson of the Mayo Radio Experimenters, at their recent AGM. This is Jimmy's third consecutive year, and, under the club rues, he will have to step aside at next year's AGM, because of the three year rule. Adrian Healy, EI2HAB, was returned as Treasurer and selected for the first time as IRTS Club Rep.

The other officers elected were: Newsletter Editor - John Corless, EI7IQ, PRO - David Hatfield, EI3ECB, Rally Director - Padraic Baynes, EI9JA, and QSL Manager - Brendan Minish, EI6IZ. Addressing the meeting, the Chairperson Jimmy Kelly, EI2GCB, said the club continues to have a strong and vibrant membership with well attended monthly meetings and is financially solid. He congratulated Adrian Healy on his success in the July theory examination. He said that everyone interested in the hobby should join their local club; the availability of theory classes being one of the many benefits of membership. The club performs well in contests, he said, including winning the portable section of the IRTS 80mts. Counties Contest. He noted that MREN took part in the Lighthouses on the Air event for the first time this year, which proved a very enjoyable event. He added that the club was delighted to support the scouting event, JOTA, again this year. He thanked members who called in to the club callsign, EIMRE/P, which is used in these events. The club organised a number of publicity and promotion events over the summer on an experimental basis. These were public events and he reported limited success, adding that while they were very worthwhile endeavours, the events themselves would need tweaking for next year. The chairperson reminded the meeting that the Rally would be held on November 20th this year at it now established venue of The Welcome Inn Hotel in Castlebar. He thanked the management and staff of the hotel for their continued support of the club. Jimmy also congratulated John Browne, EI7FAB, winner of the MREN annual activity, with half a point margin over Dominic Curtin, EI9JS, in the closest-run club event ever. The annual activity is decided by a cumulative tally of scores recorded in the twelve monthly competitions held by the club for its members.

He concluded his report by thanking his fellow officers and all the members for their attendance at club meetings and events and their support over the year past.

The Connor Shield (for outstanding service to hobby,) was won jointly by Jimmy Kelly, EI2GCB and Dominic Curtin, EI9JS and the Wishing Well Shield (for outstanding service to the club) was won by Padraic Baynes, EI9JA.

CASHOTA

MM0DHQ will be transmitting from Kilwinning Abbey, in Scotland as part of CASHOTA (Castles and Stately Homes on the Air) on Tuesday 1st November 2011. All details can be found at www.cashota.co.uk

---

Tipperary Amateur Radio Group

The Tipperary Amateur Radio Group will hold their Annual General Meeting on Wednesday next the 2nd November in the Raheen House Hotel, Raheen Road, Clonmel at 8.30pm All are Welcome.

Dundalk Amateur Radio Society, EI7DAR

Dundalk Amateur Radio Society, EI7DAR, extends its heartiest congratulation to Jim Daly, 2I0SBI, Treasurer to DAR on passing the recent Amateur Radio examination in Dublin. Throughout the years, Jims' commitment and dedication to DAR has been exemplary and we know he will wear the accolade of an Amateur Radio call sign with great pride.

South Dublin Radio Club

At last Tuesday's meeting of South Dublin Radio Club, Daniel EI9FHB gave a talk on the plans for an ATV repeater to be located at a site in the Dublin Mountains. Daniel described the components to be used in the forthcoming repeater and also suggested a number of sources of equipment suitable for reception of ATV signals. The new ATV repeater will be on the 13 cms band (around 2.4 GHz). It is hoped that the repeater will provide coverage for much of Dublin city and surrounding areas.

DX News

Three separate expeditions will be active during November from the Maldive Islands. From now until 4 November look for 8Q7SO which will be operated by JK1KSB while on holiday there. The others are by G3VDB who will sign 8Q7EJ between 31 October and 13 November and I0WDX who will activate 8Q7CC from 2 - 12 November.

A CW only trip with emphasis on 160m and 80m is being undertaken by two Scottish amateurs GM3YTS and GM0GAV. They will be QRV from Malawi from 31 October to 13 November using the callsign 7Q7GM. QSLs go via GM4FDM and logs will also be uploaded to Logbook of the World.

Easter Island will be available on the HF bands from 3 - 11 November when LA5UF operates as CE0Y/LA5UF. This one counts as SA-001 for the IOTA Award.

LA9DL and LA6VM will be active as A52DL and A52VM respectively from the semi-rare DXCC entity of Bhutan from 3 - 13 November. QSLs go via the home calls.

The T32C DXpedition to East Kiribati has now gone QRT. Operating for just over 4 weeks, the group had well over 200,000 QSOs, covering all bands from 6 metres to 160 metres. This was achieved despite the fact that the equipment they originally planned to use never arrived on the island and they had to make do with smaller rigs, amplifiers and antennas. No doubt Paul EI5DI and Dave EI9FBB, who were part of the team, will have plenty of stories to tell from their weeks on the island.

The DXpedition to South Sudan, call sign ST0R, which took place in July and August of this year, was eagerly awaited by the DX community, as it offered the first opportunity to work this new country. QSL cards for

this operation have now started arriving. To prevent the DXCC checking system from being completely swamped by requests for credits, the ST0R group have uploaded some of the QSOs to Logbook of the World; also, ARRL have announced a "special offer" to encourage DXCC holders to apply for credit for South Sudan only.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1752 - Nov 2, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

7Q, MALAWI
Rob,GM3YTS, and Gav,GM0GAV, have created a blog for 7Q7GM:
http://7q7gm.blogspot.com

7X, ALGERIA
Members of the Algerian radio club (ARA - 7X2ARA) are activating the
the special event station 7U1MA to mark the opening of the new metro
in Algiers in November. See also: http://www.ara-dz.org

8P, BARBADOS, NA-021
Joachim,DL9MS (8P9MS), Frank,DL8YHR (8P9DL), and Hermann,DL2NUD (8P9HP)
will work in holiday style from St. Peter Parish on Barbados (NA-021,
WLOTA 0999, Grid Loc. GK03) from Nov 7-21. They plan to be QRV on HF,
via EME on 6m/2m and also EME on 1296.120 MHz. QSLs via homecalls.

8Q, MALDIVES, AS-013
Cesare,I0WDX, will be QRV as 8Q7CC from Furanafushi Island (AS-013)
from Nov 2-12. QSL via homecall, unfortunately only direct.
Find more information online at: http://www.dxcoffee.com/8q7cc

A5, BHUTAN
Just,A52DL (LA9DL), and Erling,A52VM (LA6VM), will be active on 80m-10m
with IC-7000s and amp from Nov 3-13. A52DL will focus on PSK/SSB and
A52VM on CW. QSLs via homecalls.

Shin,JA2PSV, is working in Bhutan until September 2013. He plans to
work in CW/SSB/RTTY/PSK on 15m, 12m and 10m signing A52SV with 100 W
and a vertical during his spare time. QSL via JA2PSV and LoTW.

CE0, EASTER ISLAND, SA-001
Joe,CE0Y/LA5UF, plans to show up from Easter Island (SA-001) in CW and
PSK31 from Nov 3-11. QSL via bureau or direct to his homecall.

E5, SOUTH COOK ISLANDS, OC-013
Oliver,W6NV, is QRV as E51NNV from Rarotonga (OC-013, WFF E5FF-002).
He has been spotted in CW and SSB on 10m. The length of his stay is not
known. QSL via homecall.

E5, SOUTH COOK ISLANDS, OC-013 / NORTH COOK ISLANDS, OC-014
N7OU will show up as E51NOU from Manihiki (North Cook, OC-014) from
Nov 8-22. Right now he is still working from Rarotonga (OC-014) until
Nov 7. Bill is working only in CW with 100 watts and a vertical for
80m-10m. QSLs via homecall, via bureau is ok!

F, FRANCE
The special event station TM44RT will be activated from Nov 4-6 to mark
the 40th anniversary of the French Army's 44th Transmission Regiment.
QSL via F5KBB.

FG, GUADELOUPE, NA-102
Armin,FG/DK9PY, will be QRV only in CW from Guadeloupe (NA-102) from
Nov 6-25. Listen for him 15 kHz from the lower CW band edge on 80m-10m.

KP4, PUERTO RICO, NA-099
The Shield of Puerto Rico was granted by the Crown of Spain in 1511,
making it the oldest coat of arms which is still used in South America.
This 500th anniversary is celebrated by the Puerto Rico Amateur Radio
League (http://www.prarl.org) with the special event station K4E from
May 5-19. QSL via KP4ES (direct).

P2, PAPUA NEW GUINEA, OC-034
Luk,SQ5RGR, will delight the DXers as P29FM starting in November 2011.
Luk is a missionary and will stay in Lumi, in the Sandaun province,
50 km south of Aitape in the northwest of the island. QSL via SQ1K.
Since PNG has more than 800 islands you can expect activities from
other islands as well.

S2, BANGLADESH
Tom,KC0W (ex ZD7X/XU7XXX/TO0O), will stay in Bangladesh for the next
nine months and is expected to show up especially on 80m and 160m.
More details are not known.

SP, POLAND
The special callsign SN1LH will be active from Nov 2-4. QSL via SP1PBW.

TT8, CHAD
Phil,F4EGS, is working as TT8PK from N'Djamena during his spare time
between Oct 23 and Dec 23. QSL via F4EGS.

V6, MICRONESIA, OC-078
John,KH6DLK, is working on the Ulithi atoll (OC-078) and wants to hit
the bands as V63JB during his spare time. More details are not known.
QSL via homecall (see QRZ.com).
Please send no eQSLs, no Twitter or Facebook.

V7, MARSHALL ISLANDS, OC-028
Neil,WD8CRT, is expected to show up as V73NS from Kwajalein (OC-028)

for the next three years. QSL via W3HNK. Web: http://www.qsl.net/v73ns

VK, AUSTRALIA, OC-001
The special event station VK100ARV is activated during November to
celebrate the 100th anniversary of the Wireless Institute of Victoria.
QSL via bureau. See also: http://www.amateurradio.com.au
VK6 HAMs were allowed to use the prefix VI over the last weekend.

VK9X, CHRISTMAS ISLAND, OC-002 / VK9C, COCOS (KEELING) ISLAND, OC-003
Pekka,OH2YY, plans to be QRV as VK9XM from Christmas Island (OC-002)
on Nov 4 and again from Nov 8-11. In between, he wants to become active
as VK9CM from Cocos (Keeling) Island (OC-003) from Nov 5-7. Pekka works
in SSB on 7-28 MHz with 200 watts. Both QSLs via his homecall.

VP8/A, ANTARCTICA, AN-016
Tomas,CE9VPM, will stay on the Chilean Gab Gonzales Videla base from
November 2011 until March 2012 and wants to work mainly on 20m.
A slide show of CE9XX from 2009 can be found here:
http://www.french-polar-team.fr/CE9_Videla_Station_Antarctica.php
Before that Tomas was regularly active as CE9/CE3VPM from the the
Eduardo Frei Montalva base (South Shetlands) in 2008/2009:
http://www.french-polar-team.fr/CE9_Eduardo_Frei_Montalva_Station_King_
George_Island.php

VP9, BERMUDA ISLAND, NA-005
Paul,W4/VP9KF (G4BKI), is working as VP9KF only in CW on the HF bands
from Nov 2-16. QSL via W4/VP9KF (QRZ.com), unfortunately only direct.
See also: http://vp9kf.com

W, USA
Some 45 of the experimental stations WD2XSH/# (http://www.500kc.com)
plan to become active on 600 meters on Nov 3.

ZD8, ASCENSION ISLAND, AF-003
Tom,ZD8ZZ (K7ZZ), and Al,ZD8F (W6HGF), plan to show up from the Garden
Cottage on the Green Mountain of Ascension (AF-003) from Nov 8-22.
Tom will concentrate on CW while Al prefers RTTY, but both will work
also in SSB sporadically. If the band opens they may work also on 6m.
QSLs via homecall (direct) or LoTW.
Check also their website at: http://www.qsl.net/w6hgf/ZD8F-index.html

VA7DIN/mm • AROUND THE WORLD ON A YACHT!
Dinis,VA7DIN, and his wife Veronica started a circumnavigation around
the world from Richmond (Canada) in July 2010. His sailing yacht
"S/Y Vida Nova" is a Niagara 35, 11m long, build in Ontario. They have
just left the Chesterfield Islands (TX0) and are underway to Australia.
Dinis is very active in SSB on 20m.
Read their blog at: http://www.vidanova35.blogspot.com

CW OPERATOR WANTED

The upcoming DXpedition to French Guyana is desperately looking for another
CW operator. The DXpedition starts in Paris on Dec 26, includes a stay on
Royale Island (SA-020) and ends on Jan 7, 2012. For practical reasons
candidates with some French knowledge are preferred. A valid yellow fever
vaccination is required. The cost is approximately 1.200 Euro.
If you are interested please send an e-mail to f5oqk@orange.fr or to

Jean Paul JOLLY, 6 Chemin des Chaignees, F-85200 Fontenay Le Comte, France.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV,
DJ9ZB, DL1MDV, DL1SBF, DL2BQV, DL6KVA, DL7MAE, DL7VOA, DL9RCF, DO3ME,
HB9FDJ/DL8WPX, F6AJA & Les Nouvelles DX, NG3K and others.

1041. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1320127201@panix.com>
Source record: 4081
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

1042. Weekly Highlights of Solar and Geomagnetic Activity, 24 - 30 October 2011

Highlights of Solar and Geomagnetic Activity
24 - 30 October 2011

Solar activity has been at very low to low levels. Very low levels
were observed on 24 October while low levels dominated the remainder
of the summary period. Despite the large size and magnetic
complexity (Beta-Gamma) of Region 1330 (N08, L=249, class/area,
Eko/560 on 24 October), the region only managed three low level
C-flares on 25 and 30 October. Region 1324 (N11, L=305, class/area,
Ekc/360 on 20 October) was the largest producer of low level C-class
activity with a total of five flares; the largest of the period, a
C3 that occurred at 29/1452 UTC. Four relatively slow-moving CMEs
were observed in association with disappearing solar filaments
beginning at 22/0058 UTC, 26/0800 UTC, and 28/0218 UTC, and finally
28/1652 UTC, observed in SOHO/LASCO imagery. The first event became
geoeffective late on 24 October while a glancing blow from the
second event arrived early on the 30 October, and third CME is not
expected to be geoeffective. The final CME is expected to arrive
sometime on 31 October.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels the entire period.

The geomagnetic field ranged from quiet to severe storm levels. The
period began with solar wind speeds, as measured by the ACE
Spacecraft, steady near 300 km/s with the total interplanetary
magnetic field (IMF Bt) around 6 nT. The geomagnetic field was quiet
during these periods. By late on 24 October, an interplanetary shock
was observed in ACE data at 24/1748 UTC in association with the CME
from 22/0058 UTC. A Sudden Impulse (SI) was observed at the Boulder
magnetometer of 13 nT at 24/1832 UTC. Solar wind velocities
increased from a steady 350 km/s to about 525 km/s. The IMF Bt
increased to above 20 nT from about 24/2000 UTC through 25/1300 UTC
and gradually decreased to about 8 nT by late on 25 October. The Bz
```

component of the IMF reached southward values of -20 nT from about 24/2000 UTC through 25/0000 UTC. The geomagnetic field from 24/1800 UTC - 25/1200 UTC responded with active to major storm periods with an isolated severe storm period observed from 24/2100-2400 UTC. By 26 October, solar wind speed declined to around 400 km/s with the IMF Bt around 7 nT. Solar wind speed continued to decline to approximately 300 km/s by the end of the period. The geomagnetic field was mostly quiet the rest of the period.

Forecast of Solar and Geomagnetic Activity
02 November - 28 November 2011

Solar activity is expected to be at predominately low to moderate levels from 02 November - 15 November as Regions 1338 (S12, L=119, class/area Dao/120 on 01 November) and 1339 (N22, L=117, class/area Dao/180 on 01 November) rotate further onto the visible solar disk. A return to mostly low levels is expected for the remainder of the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the period.

The geomagnetic field is expected to be generally unsettled on 02 November as the effects of a CME wane. Predominantly quiet conditions are expected from 03-04 November. An increase to unsettled to active conditions is expected from 05-07 November as the combined effects of a coronal hole high speed stream (CH HSS) and another CME are expected. A return to quiet levels is expected from 08-10 November. Another small increase to unsettled conditions is expected from 11-13 November, as another CH HSS becomes geoeffective. A return to predominantly quiet levels is expected from 14 - 25 November. Quiet to unsettled levels are expected for the remainder of the period, as another CH HSS becomes geoeffective.

1043. [RAC-Bulletin] RAC Bulletin 2011-035E - New Section Manager for BC/Yukon

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-02 05:19:51 UTC
From: rac-bulletins@eton.ca

RAC Bulletin 2011-035E - New Section Manager for BC/Yukon
2011-11-01

It is indeed a pleasure for me to announce the appointment of Paul Giffin VA7MPG Section Manager for British Columbia/Yukon effective today. Paul has been licensed since 1993 and has been active in emergency communications for the past 47years, over 40 of them as an operational member of the RCMP. He is currently Emergency Coordinator for the City of Nanaimo and the southern portion of the Regional District of Nanaimo. He is also President of Coast Emergency Communications Group and the mid island Assistant Regional Emergency Radio Representative for the BC Provincial Emergency Program. Paul resides in Gabriola Island, British Columbia. Welcome aboard Paul.

In making this announcement, I would like to sincerely thank outgoing Section Manager Drew Watson VA7DR who completed his two year term yesterday. His service to the RAC and the BC/YT Section is very much appreciated.

Paul is eager to receive news from your area along with any ideas or suggestions that you may have. He is also in the process establishing a BC/YT Section Bulletin service so why not drop him an e-mail to be sure that you are included. You can e-mail him at guppy1@shaw.ca or give him a call at 250-247-7965.

1044. Iowa Section Convention - Davenport - This Sunday, November 6th

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-02 14:35:37 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20111102125438.07B5D20FDD@bmail.arrl.org>
Source record: 4084
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

The ARRL Iowa Section Convention is this Sunday, November 6th and will be part of the 40th Annual Davenport Hamfest, sponsored by the Davenport Radio Amateur Club. The hamfest and convention will be held in the Clarion Hotel, 5202 North Brady Street in Davenport. (I-80 exit 294), phone 563-391-1230. Ask if the convention's group room rate is still available.

ARRL Senior Lab Engineer, Zack Lau, W1VT, is our special guest. When making arrangements for Zack to come visit, he said he would like to enjoy dinner with the area hams. We will be dining Saturday, November 5th at 7:00pm at the Iowa Machine Shed, 7250 Northwest Boulevard in Davenport, just off I-80 exit 292. Reservations are required; please contact Tom Brehmer, N0LOH, at n0loh@arrl.org. You will be responsible for paying for your meal, drinks and tips. I hope you can join us for the dinner with Zack Saturday evening.

Here’s the seminar schedule for Sunday, November 6th:

7:00am - Room open for use. (Donuts and coffee!)

8:00am -- “State of the Iowa Section” with Tom Brehmer, N0LOH

8:30am - "How to Build a 2M Beam" with Zack Lau, W1VT

9:30am - “VHF/UHF Spectrum Defense & Band Planning” with Rod Blocksome, K0DAS

10:00am - “ARES & RACES, There is a difference!” with Dan Miller, AC0OF

11:00am - “Digital QST and New ARRL Forums” with Cliff Ahrens, K0CA

11:30am - “SKYWARN” with John Haase, National Weather Service

12:30pm - "ARRL Q & A" with K0CA, K0DAS and N0LOH

1:00pm - "How to Build a 2M Beam" with Zack Lau, W1VT

For more information about the hamfest visit: http://www.arcsupport.com/drac/hamfest.html

Rod, Tom, and I are looking forward to seeing you in Davenport this weekend!

WIANEWS WEEK COMMENCING NOVEMBER 06 2011.

WHATS IN NOVEMBER AR MAGAZINE.

JOB VACANCY, RADIO BROADCAST ENGINEER WANTED.

7 NEW VHF-UHF DISTANCE RECORDS ACHIEVED.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOVEMBER 6 2011.

Here are details of seven new VHF-UHF distance records:

First ever records for the 134 GHz and 243 GHz bands

Michael VK3KH and Alan VK3XPD have set the first Australian distance records
for these bands - 25 metres (21 October 2011).

Alan and Russell VK3ZQB then extended these records to 50 metres
(23 October 2012).

First ever record on 324 GHz

Michael VK3KH and Alan VK3XPD have set the first Australian distance record
for this band - 25 metres (21 October 2011).

(Frequencies above 250 GHz are not assigned to any service by ACMA, so technically there is no 324 GHz band. However amateurs may operate on these frequencies because they are not assigned to any other service).

First records in the new Digital EME record category

On 2 metres, the first Digital EME record is from VK9NA to EA2AGZ 18306.4 km (12 January 2011).

On 1296 MHz, the inaugural record claim is from Mark Swannack VK2AMS and David Scott, VK2JDS - 325.3 km (1 October 2011).

For full details of all past and present VHF-UHF records are available for viewing or download on wia.org.au

(John VK3KM)

In 1928, James Warner joined Australian aviators Charles Kingsford Smith and Charles Ulm for the first trans-Pacific flight.

It was a 'first' for the fledgling aviation industry in other ways as well, most notably the introduction of radio communication on a long distance flight.

A remarkable archive of aero and aviation memorabilia from the private collection of James Warner - arguably one of the most important collections in the history of aviation - will be offered for sale by Leski Auctions.

It is a remarkable tribute to radio and its place in the history and development of aviation.

Items for auction from the James Warner Archive include:

•A magnificent 4oz gold commemorative medal from gold provided by William Randolph Hearst and presented by the Mayor of Oakland, still in its original presentation case.

[The medal presented to Lyon is believed to have been melted-down during the Depression].

•The original letter signed by Charles Kingsford Smith and Charles Ulm and dated 18th June, 1928 in which they write, 'As requested by Mr. Warner, we have pleasure in informing you that we, the undersigned..... are not in any way entitled to receive the whole or any portion of any gifts made to you by the Government or individuals of the United States of America.

•A cigarette case, engraved 'Southern Cross', Lieutenant James Warner and dated June 11th, 1928, which was presented to Warner by the Radio Trade of Australia.

The flight of the Southern Cross marked the first successful use of radio on a long distance flight. Returning to California, Warner and Lyon each was given the 4 oz gold commemorative medal along with $10,000 from the citizens of Oakland and William Randolph Hearst.

About 1930 Warner went to Los Angeles where he opened a radio shop. He also experimented with building an electronic organ and was hired by Hearst to

install a sound system at San Simeon in Northern California

The lots will be offered for sale by Leski Auctions in Melbourne Wednesday, November 16th.

First award issued and plenty of VK100ARV activity

The new limited edition Amateur Radio Victoria Centenary Award has been David Park VK3JDA, who gained it before the special callsign VK100ARV took to air.

Already hundreds of QSO have been made. First up was the Scout Radio and Electronics Unit heard on SSTV and HF. Who can forget televising of it through the VK3RTV digital repeater.

The Western and Northern Suburbs Amateur Radio Group is having a fine time during its five days which end on Wednesday.

Continue to be in the action are Keith Proctor VK3FT, Luke Steele VK3HJ, Terry Murphy VK3UP and Tony Hambling VK3VTH.

Several of these operator and others will operated portable during November the 18th until the 20th from a National Park under the Keith Roget Memorial National Parks Award.

More on next week's broadcast or check out www.amateurradio.com.au

(Jim Linton VK3PC)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Another further look at Amateur Radio magazine for November

The Geelong Amateur Radio Club set-up at Point Lonsdale to be part of the 60-odd Australians stations to join the International Lighthouse and Lightship Weekend.

Some one dozen GARC members took part. More reports on this annual fun event appeared last month.

The Adelaide Hills Amateur Radio Society has officially opened its training and operations 'shack', a full report can be read in this month's WIA journal.

In the Spotlight on SWLing column by Robin Harwood VK7RH reports that Propagation has improved and one never knows from day to day what will pop up.

The theme of improvement is the DX News and Views column by John Bazley VK4OQ who discusses the solar flux hitting 190 for the first time since 2002, that 10-metres should be good for this month's contest.

PSK31 QRP is fun according to Grant McDuling VK4JAZ - he tells how to be involved.

A story of marriage and amateur radio makes an interesting read by Rananda Rich VK2FRAR supported by Alex Taverner VK2RZ.

All part of a WIA membership service and Amateur Radio magazine is also at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

HAMS ACROSS AUSTRALIA.

VK3

Police Roundup http://www.vicpolicenews.com.au/

Great Success at Ballarat Hamvention.

A great day was had by all at the recent Hamvention at Ballarat. Once again the wonderful facilities of the Greyhound Racing Track were used .

A record 74 tables of new and used Goodies tempted the wallets of the large crowd attending. Even Mother Nature turned on the best day possible.

Lots of door prizes were drawn during the day with one still unclaimed. If you have ticket number 162 it could be worth your time to contact Bob, VK3NBV on 03 5336 0998.

If you missed those numbers you can look up the text version of this broadcast on the WIA website.

Once again, this has been a wonderful Victorian Hamvention.

Barg appreciates the support given by all the Commercial Businesses that attend on the day. Also Mr Average Amateur, without you arriving, there would not be a Hamvention at all.

The Ballarat Amateur Radio Group will be running a 40 metre HF Field Day on Sunday November 13 between the hours of 10.30am and 3.30pm. Please look around the band and give the club members a call, the frequencies in use will be between 7050 and 7100 Khz. Club members will be operating portable from locations of their choice.

That's it for now, This has been Bob, VK3NBV for the Ballarat Amateur Radio Group.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Recently I have been taking time to catch up on current trends in amateur radio. The software defined radio is a logical evolution in electronics. More and more computing power is being focussed in dedicated ic's for the commercial and military markets. For the hobbyist, the implementation can be

with simple hardware and free software on the shack PC.

Whilst relaxing in front of the TV, the mind started on a train of imagination as a result of a segment on "intelligent" prostheses. As the demands of war injuries has spurred research, new artificial limbs with functions controlled by body nerve pulses are achieving remarkable results for the users. Even during the 8bit computer era, speech recognition was a topic of great interest. The reported developments in military avionics with speech recognition puts some awesome capacity before the multitasking combat pilot.

The studies into artificial intelligence, spurred by the robotics enthusiasts, are producing interesting algorithms for the development of independently operational machines.

And so what does this have to do with amateur radio? It seems that innovation stirs the mind of many amateurs and all these streams of development could make the ultimate contest station. Imagine keying CW with thoughts alone! Telling the rig what band and mode to operate would make it the greatest "look Mum - no hands" experience.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING - TO SUPPLY AUDIO NEWS ITEMS:-
email qnews@wia.org.au

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

The CQARA first Annual weekend away at Cool Waters Holiday Village on the Capricorn Coast was a complete success.

Many thanks go out to all those who were involved in organising the festivities for the weekend.

Thanks to Jason - VK4FJGS three fox hunts were held on the Saturday and were thoroughly enjoyed by both the participants and the spectators. A trophy was presented to Graham - VK4NFZ who had the most points after 3 hunts and is currently leading the CQARA Fox Hunts for 2011 in points.

A bag auction was held on the Saturday night which was very successful in raising funds for the CQARA and providing enjoyment for all involved. Many laughs were had by all and the weekend concluded on the Sunday with everyone heading for home completely exhausted.

I'm Adam, VK4MTJ on behalf of the Central Queensland Amateur Radio Association Inc.

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
www.vk4wip.com
vk4wip@wia.org.au

This is Allan VK4FABR with an update from the Ipswich and District Radio Club.

Derek VK4MIA has resigned from the position of President of the Ipswich & District Radio Club effective October 25, 2011. This also means Derek is no longer Contest Manager for the Jack Files Memorial Contest.

All emails, websites etc are now controlled by the club Secretary, Darrin VK4FVRX, who now has access to the incoming logs for the contest.

The Contest Manager VK4WIP - The Ipswich & District Radio Club and the email address for all log submissions remains the same but will be honoured and handled by the Secretary and Committee of the Ipswich & District Radio Club.

Paul VK4FPDW has also stepped down from the position of club Vice President.

Members should check the club website - vk4wip.com - for the date and time of the next business meeting.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again from the Atherton Tablelands this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

TREC took part in the CQ World-wide SSB contest last weekend as a club entry. Four members were involved, Jeff - VK4BOF, John - VK4TL, Stuart - VK4SDD and Dale - VK4DMC. Members operated from their respective home QTH and the individual scores were tallied together and submitted as a club score to the CQWW organisers.

The total claimed TREC score was 575,282 points.

The contest went for 48 hours so copious quantities coffee and other refreshments were the order of the day.

Individual scores were as follows:
Jeff 131,066 points (20, 15 & 10M)
John 32,370 points (15)
Stuart 158,046 points (20, 15 & 10M)
Dale 253,800 points (80, 40, 20, 15 & 10M).

This was the first time that TREC had taken part as a club in the CQWW contest and it is hoped that next year more members will become involved and boost the club score. It was simply amazing to see the bands spring into life at 0001 UTC with many rare countries being activated.

Well that's your lot for this week.

Once again don't forget to visit the TREC website, www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to QNEWS. Travel Well!

TARC AGM happening soon - catering numbers needed!

The 2011 Annual General Meeting of theTARCinc happens Sunday November 20th from 7am at Area 2 - Rossiter Park Aitkenvale.

The AGM will start off with a scrumptious Breakfast followed by the meeting and attendance numbers are needed for catering purposes.

Relay your AGM numbers as soon as possible to Don VK4FNQA on telephone 47554510 or via Radio.

Deadline is November 15th Social Meeting.

vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com
http://groups.yahoo.com/group/vk7regionalnews/

Mt Nelson Signal Station Bicentenary

Christian Bell who is one of the organisers for the Bicentennial celebrations of the Mt Nelson Signal Station which is happening on 30 November.

Christian is looking for amateur radio operators who would be prepared to operate a station from Mt Nelson and possibly include CW, voice and digital operation.

What Christian is looking to set up are various forms of communication used at the Station over the last 200 years. They would appreciate it if some Radio Amateurs could assist Coast Radio Hobart to set up some transmitters both (VHF and HF) to demonstrate on the day.

Having some amateur operators who would like to demonstrate Morse code via radio would be good. If you are interested in helping out then please contact Justin VK7TW@wia.org.au who can pass on Christian's contact details.

ABC drive time Local Radio program will be broadcasting live from the Signal Station in the afternoon of the event.

This is the 200th anniversary of the date that Governor Macquarie selected the site for the Signal Station upon inspection.

DISCUSSION POINT

What use is an f-call?

An article in the local paper caught my eye. It described a scenario where a local amateur with a 15m antenna mast was in the process of dealing with a local council who apparently changed their mind about the rules which govern the installation of the mast. There were quotes from neighbours who didn't like the eye-sore and it looks like this might be a challenge.

While I'm not a neighbour of this amateur, I did wonder if their community was aware of the wider community role that amateurs have to play in all manner of situations. I thought about the Boxing Day Tsunami, Hurricane Katrina and the Japanese Earthquake and subsequent Tsunami. In each of these disasters critical infrastructure such as power and communications was wiped out in the affected areas. In each of these areas local radio amateurs provided critical assistance for search and rescue and other life extending situations.

I wondered if the local community where this amateur lives was aware that amateurs can, have and will provide these critical services in case modern infrastructure ceases operation and I wondered if we as amateurs pro-actively go outside and talk to other members of the community and share some of this knowledge and information.

If we ignore these pushes for removal of so called eye-sores, there will come a time where the local amateur radio enthusiast is unable to assist their community because they simply have no infrastructure left to operate their station. One day the question will come: "Where are all the amateurs?"

As a foundation class licensee you have access to a whole raft of information, skills and if you have your kit, hardware, to communicate this to your local community. As a group, we amateurs have skills that might seem outdated, obsolete and out of touch with the Internet connected world today as seen from the perspective of an uninformed public. The reality is that this community of amateurs can and will step in to assist that community if and when the need arises.

In case you're wondering how what you do on air relates to any of what I'm talking about, making contacts, exchanging information, dealing with changing conditions, setting up your station, and doing the things you do as an amateur radio enthusiast, are immediately relevant to emergency communications. You may not be aware of it, but you are uniquely qualified to assist where communications are essential. Just because the mobile phone network works today, doesn't mean that it will continue to work across all situations.

I regularly take my kit on the road to setup my station, in fact, my station is designed to be portable for exactly this reason. Each time I setup my station I learn a little more about things to consider, spares to have on hand, cables I should remember to pack, etc. If you have the ability, I highly recommend that you take your station outside and set it up with limited infrastructure. I'm sure you'll learn something which will be of use at some time in the future.

I'm Onno, vk6flab

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

In Canberra and want to 'ham it up?"

C.R.A.R.C. run regular Foundation Licence courses and upgrade assessments every two months at Mt Mugga Scout Hall.

Next Foundation course is scheduled for the 19th / 20th November which is already close to capacity and which will be the last course for the year.

It is still possible to complete individual Upgrade Assessments with prior arrangement if you are unable to attend these scheduled times.

If you know anyone that might be interested in becoming a ham, twist their arm to contact:

education@crarc.ampr.org

EZARC will be conducting Foundation training on Saturday 3 December, followed by Assessments for all licence levels on Sunday 4 December at Churchill.

Bookings essential.

Applications close 18 November.

Enquiries & bookings to Peter VK3PF vk3pf@wia.org.au

Lisa, PA2LS, appointed IARU Region 1 Youth Co-ordinator

The International Amateur Radio Union Region 1 Executive Committee have appointed Lisa Leenders, PA2LS, as the Youth Co-ordinator

Following the creation of a Youth Co-ordinator portfolio during the Region 1 General Conference at Sun City in August, the Region called for nominations for a Region 1 Youth Co-ordinator.

Three nominations were received, namely Mari Nikkilae, OH2FPK, Lisa Leenders, PA2LS and Georgi Atanasov Vodenicharov, LZ1ZF.

During the teleconference of the Region 1 Executive Committee held on 10 October 2011, it was decided to appoint Lisa Leenders, PA2LS, as the Region 1 Youth Co-ordinator.

Lisa will be working with the Youth Co-ordinators from the various member societies to promote amateur radio amongst the youth in Region 1.

21 year-old Lisa PA2LS first got her amateur radio novice license at the age of 13 and was issued with the call sign PD2LLS.

She recently went on a DXpedition to Ghana
http://www.pe1kl-pa2ls.com/

Lisa's contact details will be made available under the Youth section of the Region 1 web site
http://www.iaru-r1.org/

The Rotuma High School Amateur Radio Station, 3D2RI, was heard active again this past week on 20/15 meters SSB.

Their QSL Manager Stan, KH6CG, reports on QRZ.com (under 3D2RI):

Dennis, who is 16 years old, reports that his operating group will be active on Tuesdays and Thursdays. His operating buddy will be a YL named Maggie.

Joshua, who is 15 years old, will be active with his operating group on Wednesdays and Fridays. His operating partner will be a YL named Lesina.

The school may allow operations on the weekends as well. Look for 3D2RI starting around 0400z ON 15m SSB, on or near 21255 kHz until propagation fades, then they will QSY to 20m SSB on 14253 kHz (+/- QRM) until around 0600z when it is time for the students to head home.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

BBC TV licence fee may extend to iPlayer

The UK television licence fee could be extended to cover catch-up services such as the BBC iPlayer as part of an overhaul of the levy being considered by the Department for Culture, Media and Sport.

British viewers must pay for a £145.50 television licence if they watch or record programmes as they are broadcast, whether viewed via a television, computer, mobile phone or video games console.

However, computer catch-up services such as the BBC iPlayer - via which 153m television and radio programmes were broadcast in September - do not require a licence.

The issue is likely to intensify over the next year, as a rash of new internet-enabled set-top boxes, including the BBC-backed YouView, are expected to launch.

99-year-old Ham Radio operator still tuned in

The Mat-Su Valley Frontiersman carries a report about radio amateur Arlene Clay who's still on the air at the age of 99.

After 67 years living along the Kuskokwim River, in Alaska she moved in January to the Primrose Retirement Community in Wasilla.

She said the reason she chose Primrose was because they let her bring her amateur radio station.

Read her story with a selection of pictures at

http://www.frontiersman.com/articles/2011/10/30/local_news/doc4eacec3a63a91950785002.txt

The Federal Communications Commission has affirmed its rules for Broadband over Power Lines or Access BPL with only minor modifications that do little to protect the Amateur Radio service and other High Frequency users from severe to intolerable interference.

According to the Second Report and Order issued by the FCC, the rules it has created to govern Access BPL provide what it calls an appropriate balance between the dual objectives of providing for Access BPL technology that has potential applications for broadband and Smart Grid while protecting incumbent radio services against harmful interference.

Finally from me this week word that "Internationally Connected" will be the theme of the 2012 Dayton Hamvention. This according to General Chairman Michael Kalter, W8CI, who says that this premise emphasizes how amateur radio continues to build connections among amateur radio operators from all over the world.

W8CI, who is returning for another year as general chairman, noted that many international attendees return each year to meet other hams that they have talked to on the radio. He says that in 2012 the Hamvention is acknowledging

the important role that ham radio plays in promoting this very special international goodwill

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

NZART Straight Key Night

Polish and lubricate that old Morse key and enjoy an evening of old time radio fun. This is an activity night in which everyone can be a winner with a certificate to prove it.

Today, First Sunday in November 2000-2200 NZST in two one-hour periods on 3.5 MHz only CW sent with STRAIGHT KEY i.e. characters formed manually, no system of automatic dots, dashes or spacing permitted.

Send logs by mail by 30 November to: Ken McCormack.

email zl1aih@xtra.co.nz

All (including DX stations) who send a log will receive a certificate.

Winners in each section receive a FISTS Down Under Prize comprising a certificate and one year's subscription to FISTS Down Under

RSGB Commonwealth Century Club Jubilee Award 2012

2012 is the Queen's Diamond Jubilee and mindful that the Queen is the head of the Commonwealth of Nations we are pleased to announce a new operating award for 2012.

To qualify for an attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from www.beru.org.uk/CCCaward/CCCindex.html

G3PJT@btinternet.com

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Nepal DXpedition

A multi-national team, all members of Mediterraneo DX Club (MDXC), will be
active as 9N0MD from Nepal during November on all HF bands and modes.
The team plans to give away trophies and prizes.

Look for more details and updates at:
www.mdxc.org/nepal/topic1/index.html

(SOUTHGATE)

Just a reminder for the prefix hunters that the station LM9L40Y
will be on the air until the end of December.
This call is operated by members of the LA9L radio club in Norway and is
to celebrate the 40th anniversary of the club.

Buddies in the Caribbean heading back to St. Lucia.

The 'Buddies in the Caribbean' DXpedition group which specializes in 100 watt
or less low-power amateur radios and the Buddipole portable antenna systems
will be back again to St. Lucia between December 4-12th.

They say that the north shore Villa location was magnificent on their first
visit in February 2010, and they want to demonstrate 'ultralite' DXpeditioning
into magnificent 'vista' locations, operating a field portable battery-only
radio with backpackable, lightweight antennas and most of all 'having fun'
with a new group of operators who have never experienced the "other side of a
pileup!

There will be 3 villa stations in operation on 160-10 meters using CW, SSB
and RTTY or PSK. At the same time, several teams will be battery-only,
field portable either from St. Lucia beaches or scenic mountain tops.

The group will participate in the ARRL 10m Contest (callsign: J68UN) between
December 10-11th.

For more details, see the following Web site at:

Development of HAMCALC to cease

Long-standing software developer George Murphy, VE3ERP, has hung up his
keyboard and is retiring from further development on HAMCALC.

For those unfamiliar with the software, HAMCALC is a collection of useful
calculators for amateur radio use, widely used throughout the amateur
community.

The latest version of HAMCALC can be downloaded at
www.cq-amateur-radio.com

(RSGB)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

A follow-up on our story of the imminent return to Earth of a defunct German research satellite. According to news reports, the ROSAT de-orbited Sunday, October 23rd and crashed into the Bay of Bengal off the coast of India.

Most parts of the minivan sized research satellite were expected to burn up as they hit the atmosphere. However up to 30 fragments weighing a total of 1.87 tons could have crashed onto the planets surface.

Luckily that surface turned out to be a watery grave.

The team working on reactivating the ageing Prospero satellite would appreciate any recording that can be made of the 137.560 MHz downlink.

If you hear and record transmissions heard on that frequency, please send it by e-mail to rjad@mssl.ucl.ac.uk

More on Prospero is available at
tinyurl.com/prospero-comeback

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Canberra Hams are all still recovering from the double whammy weekend of the NatCap rally & Fitz's challenge, but they have another event in 1 weeks time being the Light Car Club of Canberra (LCCC) "Shannon's Safari Rally" on Saturday 14th November.

This car rally is fairly compact in that they have just 4 stages with each run twice.

The stages are :

Murrays Corner
Mineshaft
Blue Range
Bluetts

HQ - Uriarra Village Hall ("new" Schoolhouse)

To fully support the event CRARC need 11 field stations and 5 people in HQ.

So, once again send an email to wicen@crarc.ampr.org if you can help out with this one, and what preferences and/or restrictions you may have regarding timeframes or equipment.

(Phil Longworth VK1PL \ Matt McNeil VK1MA)

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on
wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and
Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a
range of fascinating and memorable activities.

VACANCY - APPLY WITHIN.

RadioTAB has a vacancy for a Senior Broadcast Engineer.

Applicants should have a knowledge of FM & AM transmission systems as well as
being familiar with Studio Broadcast systems.

The successful applicant will need to demonstrate an ability to fault find
equipment at component level

Think you fit the bill - or wish to find out more?

email careers@tattsgroup.com

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

** EARTHQUAKE EMERGENCY **

Radio Amateurs in Turkey remain active in the response to the earth-
quake that struck Van province on 23 October. Assistance has been
given by TRAC in setting up VHF/UHF networks to relief agencies and

some traffic is being carried on the 144 MHz band. The need for HF operations is reducing, however there is still a overnment station which may operate on 7.092 MHz USB. Amateurs are still requested to be careful when operating between 7.092 and 7.095 MHz to avoid interference to ongoing relief operations.

RAC Bulletin 2011-036E - Alberta/NWT/Nu Director Re-elected
2011-11-03

Congratulations are extended to Mr. J. T. (Mitch) Mitchell, VE6OH who was recently re-elected as the RAC Director for Alberta / NWT / NU. This nomination was unopposed, eliminating the need for a balloted election. Mr. Mitchell started as a Director in January 2010 and has been involved in numerous initiatives including the planning of a major amateur convention to be held in Edmonton, in August 2012. Mr. Mitchell's term will be extended to cover January 1, 2012 to December 31, 2013.
Paul Burggraaf VO1PRB
RAC Corporate Secretary

==> PUBLIC SERVICE: AMATEURS ASSIST WITH COMMUNICATIONS IN AFTERMATH OF RARE OCTOBER NOR'EASTER

A rare nor'easter brought historic snowfall and widespread damage and power outages from the Mid-Atlantic into the Northeast United States on the last weekend of October. Up and down the Atlantic seaboard, radio amateurs provided various critical services to the National Weather Service through the SKYWARN weather spotter program, and provided

communications support to local, state and federal emergency management and non-governmental organizations.

"Amateur Radio operations at the National Weather Service office in Taunton, Massachusetts were active on WX1BOX, the office's Amateur Radio station," Rob Macedo, KD1CY, told the ARRL. Macedo serves as the Eastern Massachusetts ARES® Section Emergency Coordinator and SKYWARN Coordinator for the NWS Taunton office. "Hams in Taunton were active for 21 hours supporting meteorological and damage data that was shared not only with the NWS, but also with the media and local, state and federal emergency management. This brought critical situational awareness and disaster intelligence information in near-real time with many agencies."

In the ARRL Connecticut Section, Section leaders were conducting their Simulated Emergency Test (SET) when the storm hit. "Because of the storm, we truncated the SET operational period and braced for the unseasonable October snow," explained ARRL Connecticut Section Emergency Coordinator Wayne Gronland, N1CLV. "The planned hurricane/earthquake SET scenario was quickly displaced by a real nor'easter! SKYWARN operators across the Section were activated on Saturday afternoon, and nets went late into the evening gathering snow, rain and wind data for the National Weather Service." Read more here <http://www.arrl.org/news/amateurs-assist-with-communications-in-aftermath-of-rare-october-nor-easter>.

==> FCC NEWS: PRESIDENT OBAMA NAMES TWO NOMINEES FOR FCC COMMISSIONER

President Barack Obama has nominated two new FCC Commissioners: Jessica Rosenworcel and Ajit Varadaraj Pai. Rosenworcel has been nominated to replace retiring Commissioner Michael Copps. President Obama selected Pai to fill the seat vacated by Meredith Attwell Baker, who left the FCC in June 2010. If Rosenworcel and Pai are confirmed by the Senate, the FCC would be at its full complement of five Commissioners.

The FCC has been down one commissioner since Baker's departure, and Copps' departure at the end of the year would leave the agency with only three commissioners: two Democrats and one Republican. Only three sitting Commissioners may be members of the same political party. At present, Chairman Julius Genachowski, Copps and Mignon Clyburn are Democrats. If confirmed, Pai will join Commissioner Robert McDowell as one of the two Republicans on the Commission. Read more here <http://www.arrl.org/news/president-obama-names-two-nominees-for-fcc-commissioner>.

==> FCC NEWS: FCC TERMINATES PROCEEDINGS AFFECTING THE AMATEUR RADIO SERVICE

The FCC issued an Order on November 1 that terminated hundreds of proceedings, including six proceedings that members of the public, including the ARRL, had asked not to be terminated. Two of these six

proceedings involved the Amateur Radio Service. This follows a June 2011 Public Notice that sought comments on whether or not it should terminate approximately 800 docketed proceedings.

On July 20, 2011, the ARRL filed comments with the FCC on this matter, explaining that it had no objection to the termination of the proceedings in the Public Notice, save for one item: The ARRL's Petition for Rulemaking (RM-10165) Amendment of Parts 2 and 97 of the Commission's Rules Regarding the 2300-2305 MHz Band. In this Petition, the ARRL requested that the FCC change the Amateur Radio Service's allocation in that band from Secondary to Primary. This Petition was one of the six items to be terminated. Read more here <http://www.arrl.org/news/fcc-terminates-proceedings-affecting-the-amateur-radio-service>.

==> MARK YOUR CALENDARS: IT'S TIME FOR THE NOVEMBER FMT

The Frequency Measuring Test (FMT) returns to the airwaves on Wednesday, November 9. As in April, the format will simulate a roundtable QSO in which all of the stations are close to the same frequency, but not exactly on the same frequency. This time, there will be more time -- about five minutes -- between the transmissions from each station. There will be three test signal stations: Connie Marshall, K5CM, in Oklahoma, Charles Collins, W6OQI, in California, and members of the Midwest VHF/UHF Society, W8KSE, in Ohio. If you have not participated in an FMT before, it doesn't take a room full of test equipment to have fun and make surprisingly accurate measurements. You can read all of the QST articles about the exercises on the ARRL FMT web page. Read more here <http://www.arrl.org/news/mark-your-calendars-it-s-time-for-the-november-fmt>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of October -- takes a look the ARRL's reaction to the FCC's new BPL regulations, how the ARRL is preparing for WRC-12, ARISS activities, new publications, the upswing in the number of licensed amateurs in the US, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-39>.

==> ENFORCEMENT NEWS: FCC ISSUES NOTICE OF APPARENT LIABILITY FOR FORFEITURE AND ORDER TO FLORIDA MAN FOR USING UNAUTHORIZED EQUIPMENT

Michael Perry, of Cross City, Florida, was issued a Notice of Apparent Liability for Forfeiture on November 1 in the amount of $10,000 for operating a radio transmitter without the requisite FCC authorization. The FCC found that Perry "willfully violated section 301 of the Communications Act of 1934, as amended and Sections 95.409 and 95.411 of the Commission's rules."

In response to a complaint of interference, agents from the Enforcement Bureau's Tampa Office used direction-finding techniques on March 31, 2011 to locate the source of the interference to a signal on Citizens Band channel 28 (27.2850 MHz) that was coming from Perry's residence. The same day, agents from the Tampa Office inspected Perry's CB station, which he admitted to using earlier that day. The agents observed a non-certificated CB transmitter and three linear amplifiers as part of Perry's CB station. Perry admitted to the agents that two of the three linear amplifiers were capable of generating a power output of 200 W and 1500 W respectively, and that he had never tested the third. The agents observed that the transmitter and two of the amplifiers were warm to the touch, indicating that the devices had been recently operated. ==> SOLAR UPDATE

Tad "Good day sunshine <http://www.youtube.com/watch?v=nxYdFY94Jek>" Cook, K7RA, reports: We have more good solar cycle news in this week's bulletin, with NASA revising the estimated smoothed sunspot number for the peak of Solar Cycle 24 for the third consecutive month. The estimated value has risen nearly 30 percent since September. In addition, the monthly average of daily sunspot numbers has risen 87 percent in the past two months. The latest prediction for the near term has solar flux at 160 on November 3, 165 on November 4-9, 155 on November 10, 150 on November 11-15, and peaking again at 165 on November 17-18. For November 3-7, the predicted planetary A index is 8, 10, 12, 10 and 8, then 5 on November 8-10, 8 on November 11-13, and 5 again on November 14-23. Look for more information on the ARRL website on Friday, November 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Beatles' Good Day Sunshine <http://en.wikipedia.org/wiki/Good_Day_Sunshine>.

==> ON THE AIR: LOGBOOK OF THE WORLD EXPERIENCING DELAYS

Due to a large number of radio amateurs uploading their logs to Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>) after last weekend's CQ Worldwide SSB Contest, the ARRL's online QSL verification service is experiencing delays. According to ARRL IT Manager Michael Keane, K1MK, there is about a 60 hour wait for the more than 10,000 logs in the queue to be processed. "Logs are processed in the order in which they were received," he explained. "If you have uploaded your log to LoTW, your log is currently queued for processing. It has not been lost in the system. Uploading your log multiple times will only further delay your log and those of others to be processed."

==> ARRL CONGRATULATES: JOE OSTROWSKI, KI5FJ , WINS OCTOBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for October is Joe Ostrowski, KI5FJ , for his article "A Simple Remote Impedance Matching Network. " Congratulations Joe! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the November issue today.

==> THIS WEEK ON THE RADIO

This week:

- November 5-6 -- Ukrainian DX Contest
- November 5-7 -- ARRL Sweepstakes Contest (CW) <http://www.arrl.org/news/2011-arrl-cw-sweepstakes-are-you-ready>
- November 6 -- High Speed Club CW Contest; DARC 10 Meter Digital Contest
- November 9-10 -- CWops Mini-CWT Test

Next week:

- November 12-13 -- Kentucky QSO Party; WAE DX Contest (RTTY); 10-10 International Fall Contest (Digital); JIDX Phone Contest; OK/OM DX Contest (CW); CWops Mini-CWT Test
- November 12-14 -- CQ-WE Contest
- November 13 -- SKCC Weekend Sprint
- November 14 -- NAQCC-EU Monthly Sprint
- November 17 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 6, 2011 -- ARRL Iowa Section Convention <http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20, 2011 -- ARRL Indiana State Convention <http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and-computer-expo>,
Fort Wayne, Indiana

1059. Somewhat off-topic question: Grundig FR200

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-04 00:02:23 UTC
From: Kickin' Ass and Takin' Names <PopUlist349@hotmail.com>
Message-ID: <7la6b79p2r6qfp1t6c8rjt6q2pgfu7jsai@4ax.com>
Source record: 4099

Anyone out there ever removed a Grundig FR200 radio from its case?

The FR200 is one of these "emergency radios" -- AM, SW, FM bands;
battery, AC adapter, or hand-crank dynamo power.

No BFO.

I just built a small 455 Khz BFO and need to install it in the radio.

I removed the five screws holding the case together, including the
one inside the battery compartment, but can't get the thing to open
-- the case opens around the edges but there appears to be something
in the center holding it together -- I've looked and looked and can't
find what's holding it together.

It looks as though the PC board with all the radio innards is attached
to the front of the radio and the back holds only the telescoping
antenna and the batteries, connected by leads.

Thanks for the help.

1060. Amateur Radio Newsline(tm) Report 1786 - November 4 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-04 09:00:14 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <20111104090004.E8B3E33C8E@panix2.panix.com>

Amateur Radio Newsline(tm) Report 1786 - November 4 2011

The following is a closed circuit advisory and not necessarily for air.
With the latest on Amateur Radio Newsline's financial status here is
our producer Bill Pasternak, WA6ITF:
--
Well, the last time I was on here with a financial report I told you
that I thought we had enough in the bank to hold us over the summer
months of July to September, and that I would not be asking for any
contributions unless the sky was falling. Well I'm happy to say that
the sky didn't fall and that I was able to keep that promise thanks to
some frugal spending we made it. However, no matter how conservative
ones spending is, there are still ongoing expenses that have to be met
on a month to month basis, and as of now it will be hard to meet the
bills for October that are piling up. So this time, we are trying
something a bit different. Instead of waiting for the last minute, were
are asking bulletin stations to spread the word that by the end of
November we need to raise about $900 to $1000 so that we will be in a
position to pay the all of the invoices, and hopefully hold us through
to the end of the year. To be candid, I do not like to lead off a
newscast with an appeal such as this, but we have no other method of
getting the word out to you that we need your financial assistance to
keep Amateur Radio Newsline on the air. To all of us involved, each
donation is looked upon as an ongoing vote of confidence in the quality
of the news and information that we provide each week. And for this I
add my personal thank you. Remember, Amateur Radio Newsline is a 501c3,
not for profit corporation and your donations are tax deductible. The
easiest way to donate is by going to our website at www.arnewsline.org
and clicking on the Pay Pal button down the page. Or you can mail a
donation to the address you will hear at the end of this weeks
newscast. Whichever method you choose, the all volunteer Amateur Radio
Newsline team says thank you so much for caring. We promise to do all
that we can to continue bringing you the news and information you want
to hear about amateur radio and personal communications in the coming
years. Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks
newscast.
--
Thank you Bill. Now, Amateur Radio Newsline report number 1786 with a
release date of Friday, November 4th, 2011 to comes your way in
5-4-3-2-1. The following is a Q-S-T. The ARRL makes its first

statement to the FCC's 2nd Report and Order on BPL, the FCC terminates
several long pending matters dealing with ham radio, more unlicensed
broadcasters are fined in Florida, a record setting ham radio test

session is held in California and news of a free resource for all ham's, shortwave listeners and other radio hobbyists, especially those based in the USA. All this and more on Amateur Radio Newsline(tm) report number 1786 coming your way right now.

**

THE BPL SAGA: ARRL ISSUES FIRST COMMENTS ON SECOND REPORT AND ORDER ON ACCESS BPL

The ARRL has issued its first comments to the FCC's Second Report and Order on Access Broadband over Powerline. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

--

To sum it up, the American Radio Relay League is disappointed with the FCC's decision. According to the ARRL Letter and the ARRL's website, the FCC's ruling on the whole issue of Broadband over Power Line missed the mark on the concerns about levels of radiated emissions which would cause interference on the ham bands.

For those who may not have been following this, BPL as the technology is called, is a way electric companies see of getting the internet out to suburban and rural customers, simply by having a customer plug into an electrical outlet in their home or apartment. The access would then be sent down existing electric lines.

But tests by the ARRL and other organizations shows the technology is pretty noise intensive. The ARRL's proposed solution to the FCC was mandatory notching of the amateur radio bands to a level 35 dB below the general emission limit.

The FCC rejected the ARRL's suggestion and those of its own staff and suggested 25 dB notching should be sufficient to handle the problem. That's only 5 dB above the current allowable peak of 20 dB.

The ARRL says the commission also made some changes on the distance for a measurement antenna and a power line being used for BPL for the purpose of extrapolating the level of interference.

The ARRL's Chief Executive Officer Dave Sumner K1ZZ, also is quoted as saying the league feels the FCC grossly mischaracterized the organization's position.

And, the ARRL accuses the FCC of defying the laws of physics in some of its arguments for its position.

But, the ARRL also praises the FCC for one statement in its findings. The conclusion that harmful interference must be corrected under any circumstance.

But Sumner, as quoted by the ARRL, says the FCC's actions don't back up its words, especially with regard to interference complaints. He notes

that the ARRL's own, welldocumented formal interference complaint about BPL has been languishing at the FCC since last December.

The ARRL notes that the FCC's data on how many BPL systems are in operation today is flawed, and states the government agency lists so-called paper systems that were never even built, systems that are still in the planning stage, some in the trial stage, and those that simply were shut off.

The ARRL's Sumner vows a thorough review of the FCCs BPL document and pledges there will be a petition for reconsideration filed.

He notes that while the marketplace has not embraced BPL, there are some smart grid technology applications which could creep in and cause future problems for hams.

Sumner's bottom line according to the ARRL publication and website, is fixing the rules now - making notching mandatory, so anyone else deciding to use the technology will play on the same field as the few existing BPL providers who have acknowledged the need to notch their systems so as not to interfere with the amateur radio bands.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

For those of you new to ham radio and who may be unaware of the kind of havoc that access BPL can bring to the amateur bands and what the League has been doing to protect the ham bands from it, you might want to take a look at the video titled "The ARRL Goes To Washington." You can find it online at tinyurl.com/arrl-bpl-movie. (ARNewsline(tm) from ARRL information)

**

RADIO LAW: FCC CLOSES THE DOOR ON PETITION TO MAKE ALL HAM GEAR FIELD SERVICEABLE

The FCC's Consumer and Governmental Affairs Bureau has terminated as dormant several pending proceedings, several of which involve amateur radio. The first matter terminated is RM-10412. This was petition filed several years ago by Nickolaus Leggett, N3NL, would mandate that all commerciallymanufactured amateur radios sold in the United States be field repairable and among other things would require a minimum component spacing.

In its decision to close RM-10412, the FCC noted that Leggett requested that it keep the matter open to allow various parties to submit additional comments on regulatory steps that would enhance certain aspects of the Amateur Radio Service. However, on April 15, 2004, the Commission released a Notice of Proposed Rulemaking and Order which specifically denied RM-10412. Since, by this action, RM10412 should have already have been closed, the FCC says that it rejects the request

by N3NL to keep it open. (FCC)

**

RADIO LAW: 1991 PETITION TO PROTECT CIVILIAN COMMUNICATIONS GEAR FROM EMP DAMAGE DISMISSED

Yet another long dormant proceeding dismissed by the FCC was RM-5528 that has been going nowhere since it was filed back on October 22nd of 1991. Requested by Nickolaus Leggett, N3NL and Donald J. Schellhardt, KI4PMG, Docket RM-5528 would in essence have required all civilian solid state communications gear to be electronically and mechanically shielded against damage or destruction from Electromagnetic Pulse or EMP effects. Leggett and Schellhardt and wanted RM 5528 to be scanned into the Electronic Comment Filing System and that it be left open for additional public comments stating that EMP is a vital issue that needs to be addressed one way or the other. Now it appears that will not happen as the FCC notes that RM-5528 was closed by this previous action, the FCC rejects the request that the proceeding remain open. (FCC)

RESCUE RADIO: NOVEMBER 9 EAS TEST TO BE SHORTENED

Some breaking news regarding the nationwide Emergency Activation System or E-A-S test slated for November 9th at 2 p.m. Eastern Time.

According to an e-mail distributed by the National Association of Broadcasters to a number of industry leaders on November 3rd the NAB was informed by the Federal Emergency Management Agency that the audio portion of the test will now last 30 seconds, instead of the originally planned two and a half minutes. This should result in a total test time of approximately 45 to 60 seconds, including the data burst tones.

Radioworld on-line says that ths change was reportedly made at the direction of Secretary of Homeland Security Janet Napolitano. The National Association of Broadcasters says that it will be providing more information as it learns the details. (via e-mail from radioworld.com)

**

RADIO LAW: FCC CLOSES ACTION ON FCC PETITION TO MAKE 2300 to 2305 MHZ PRIMARY TO AMATEUR RADIO

Another rules change request being terminated is RM-10165. It was filed by the ARRL on May 7, 2001 and requested that the Amateur Radio Service allocation status in the 2300 to 2305 MHz band be changed from secondary to primary. The FCC says that after 11 years its time to finally bring this one to an end. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details on this one:

--

On October 10, 2002, the Commission's Office of Engineering and Technology issued an Order dismissing ARRL's Petition. But the ARRL claims that the order did not resolve the issue of the allocation status of the Amateur Radio Service in the 2300 to 2305 MHz band, or ARRL's request for a primary allocation in that segment. As such the ARRL maintains that the status of the Amateur Radio Service allocation at 2300 to 2305 MHz remains relevant because of actions taken by the Commission with respect to an adjacent band at 2305 to 2320 MHz; because ARRL has filed a Petition for Reconsideration regarding the actions taken in the 2305 to 2320 MHz band; and due to other unrelated proposals for use of the 2300 to 2305 MHz band.

Regarding the 2305 to 2320 MHz band, on May 2010, the Commission issued an Order that amended certain rules governing the Wireless Communications Service or W-C-S. This to enable W-C-S licensees to provide mobile broadband services.

In doing so, the Commission openly acknowledged that out-ofband emissions that could result from expanded use of W-C-S mobile devices in the 2305 to 2320 MHz band have the potential to increase interference to amateur radio operations in the 2300 to 2305 MHz band. However, during the course of the W-C-S proceeding, the FCC notes that the ARRL did not file any comments raising the issue of whether the Amateur Radio Service allocation status in the 2300 to 2305 MHz band should be modified. The FCC also notes that although the ARRL filed a Petition for Reconsideration of the W-C-S Order, it did not request a change in the status of the Amateur Radio Service allocation at 2300 to 2305 MHz in that filing. In fact, in its Reply Comments to the Opposition to its W-C-S Petition, that the ARRL specifically stated that it was not asking the Commission to revisit any aspect of its past decisions regarding that status.

As a result the FCC says that it believes that the RM-10165 proceeding concerning ARRL's request to change the status of the Amateur Radio Service to primary in the 2300 to 2305 MHz band should be terminated, since its request had already been dismissed and ARRL did not file a petition for reconsideration of that dismissal order.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the happenings in the nations capital from Scottsdale, Arizona.

--

However the FCC did leave open the door to future change. In its termination order the Commission said that if the ARRL still desires a

change in the Amateur Radio Service allocation status in the 2300-2305 MHz band, it can file a new petition for rulemaking. In the meantime, RM-10165 is terminated. (FCC)

RESCUE RADIO: THAILAND FLOODING HAM RADIO UPDATE

We have an update on ham radio assistance in Thailand where severe flooding has already claimed over 370 lives in less than three months. Word is that flood waters have closed in on the capital Bangkok. This as the authorities struggle to divert as much water as possible around the city as possible.

But according to Tony Waltham, HS0DX, for many areas to the north of the capital it is too late. Hundreds of communities are reported to be uninhabitable with flood water more than two or three meters high. 1 meter is the equivalent of 3.28 feet

Amateur radio has been playing an ongoing role in this disaster with operators helping to co-ordinate relief and rescue work using VHF two-way communications and repeaters, HF communications in the 40 meter band from 7 dot 060 to 7 dot 063 MHz on 40 meters. That operation under the direction of the Radio Amateur Society of Thailand continues as we go to air and is expected to be ongoing for some time to come.

There are also several Echolink conference rooms set up to aid in relief efforts. These include one named "Bangkok", "Thailand" and HS0AC. A list of VHF frequencies and repeaters can be found at www.qsl.net/rast.

Ham radio has also seen its share of destruction due to the rains. Among the areas inundated by more than a meter of water is the campus of the Asian Institute of Technology, where the Radio Amateur Society of Thailand's H-F club and contest station HS0ACis located. All the gear there is reported to be under water and may not be salvageable. (VK3PC)

RESCUE RADIO: GLOBESET 2011 TO BE HELD NOVEMBER 12

Headquarters stations of all International Amateur Radio Union Region 2 Member Societies and stations of emergency communications groups are invited by IARU Region 1 to participate in the next Global Simulated Emergency Test. This event will take place on Saturday, November 12th, from 11:00 to 15:00 local time. YV5RNE will be the Region 2 Headquarters Station on the IARU Center of Activity frequencies. More information is on-line at tinyurl.com/globeset-2011. (HR2P)

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA BROADCASTER DINGED $10000

Florida seems to continue to hold the dubious honor as the nations unlicensed radio station capital. This with yet another unlicensed broadcaster being issued a Notice of Monetary forfeiture in the amount of $10000.

This time the recipient of the Commissions proposed fine is one Willis Cernogg, Jr. of Miami. According to the FCC, this past January 21st, March 24th, and April 14th agents from the Enforcement Bureau's Miami Office locate the source of radio frequency transmissions on 90.7 MHz to a residence in Miami, Florida, shared by Cernogg and several others. On January 21st and March 24th, the agents determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license.

On April 14th Miami FCC agents inspected the station after the Miami Police Department executed a search warrant and secured the residence. The agents observed that the station's transmitter display read 90.7 MHz. A person who rented a room at the residence stated that Mr. Cernogg put the radio equipment in the locked area where police found it, and also provided Mr. Cernogg's phone number. Subsequently, an agent from the Miami Office conducted an Internet search and found profile information for user "LadyLuckRadio907FMMiami" discussing an underground radio station on 90.7 FM. They also found a Twitter user called "LADYLUCKRADIO" listing.

Based on the evidence it has gathered the FCC on October 25th issued a Notice of Monetary Forfeiture in the amount of $10000 to Cernogg. He was given the customary 30 days to pay the proppsed fine or to register an appeal. (FCC)

**

ENFORCEMENT: FCC REDUCES $10000 NAL FOR UNLICENSED OPERATION TO $250

Still in Florida, the FCC has affirmed a monetary forfeiture in the amount of $250 to Thomas L. Morey of St. Petersburg. This for what the Commission says was his willful and repeated violation of section 301 of the Communications Act by operating an unlicensed radio transmitter on the frequency 88.3 MHz.

Back this past May 5th the Enforcement Bureau's Tampa Office issued a $10,000 Notice of Apparent Liability for Forfeiture to Morey for his operation of an unlicensed radio transmitter without the requisite Commission authorization. Morey submitted a response to the N-A-L requesting cancellation of the proposed forfeiture, asserting that he was in no position to be able to pay the that amount. He also provided the necessary records to prove this to be the case.

After having reviewed Morey's documentation, the FCC concluded that the forfeiture should be reduced to $250. This they say is an amount within the range determined by the Enforcement Bureau to be affordable by Thomas Morey. Morey was given the customary 30 days from the October 18th release date of the order to pay that amount or the case may be referred to the Department of Justice for further enforcement. (FCC)

ON THE AIR: BARQUE STAR OF INDIA SPECAL EVENT

The oldest active sailing ship in the world, the Barque Star of India, will be on the air on Saturday November 12th and Sunday November13th using call sign NS6OI. This while sailing near San Diego, California to celebrate the vessels 148th birthday.

The Barque Star of India will be accompanied by the HMS Surprise which will also operating using the call sign NS6OI Mobile. H-M-S Surprise is a sailing replica of the 20 gun British Navy Frigate HMS Rose from the year 1757.

Listen out for both on 20 and 10 meters world-wide as well as local repeaters in Southern California. QSL cards with s self addressed stamped return envelope go to the Star of India Amateur Radio Club, NS6OI, 1492 Harbor Drive, San Diego, California, 92101. (NS6OI)

**

HAM TESTING: RECORD TEST ATTENDANCE EXPECTED AT CAL POLY SLO

If you are hearing this newscast after Friday, November 4th, then this event has already taken place. That's because a record number of 150 electrical engineering freshman students from Cal Poly San Louis Obispo were scheduled to take their amateur radio technician class license exam in the largest amateur radio licensing event ever in California's San Luis Obispo area.

Hosted by the Cal Poly Amateur Radio Club, this event will break the clubs previous record of 62 new licensees, set back on October 1st. Special testing arrangements were made with the American Radio Relay League to accommodate this large of a group.

This session is likely the largest amateur radio testing session ever held at the collegiate level and we hope to have the results in next

weeks Amateur Radio Newsline report. (W6AQ, Cal-Poly SLO ARC)

THE SOCIAL SCENE: ARRL CHOOSES PACIFICON FOR ITS 2012 ARRL NATIONAL CONVENTION

The ARRL National Convention is coming to Northern California in 2012. Specifically the event will be held in Santa Clara California in conjunction with the ARRL Pacific Division Convention better known as Pacificon.

The announcement that Pacificon 2012 was made at the recent 2011 Pacificon convention banquet by Bob Inderbitzen, NQ1R, who is the Marketing Manager for the League:

--

NQ1R: "I have a save-the-date announcement for you all today. Add to your Android and your iPhones the following dates: October 12th to the 14th 2012 Pacificon will host the ARRL National Convention." (applause)

--

According to Inderbitzen, Pacificon, which is hosted by the Mt. Diablo Amateur Radio Club, is a already a truly great show. He says that having the ARRL National there should bring a lot of national attention to it next year.

Once again, the dates for the next years joint ARRL National and Pacificon convention is October 12th to the 14th. The venue will again be the Mariott Hotel in Santa Clara, California. We at Amateur Radio Newsline hope to see and to meet many of you there. (ARNewsline(tm))

**

THE SOCIAL SCENE: NCTECH 2011 - NOVEMBER 12 IN AZLE TEXAS

The North Central Texas Emergency Communicators' HamFestival will be held form 7 a.m. to noon Central Time on Saturday, November 12th. The venue is the Azle Community Center in the city of Azle, Texas which to the North-West of Fort Worth. Amateur exams sponsored by both the W5YI VEC and ARRL VEC will be administered beginning at 9 a.m.. Talkin is on the 147.160 Mhz WC5C 2 meter repeater that uses a 110.9 hertz access tone. More information on this event is on-line at www.wc5c.org. (Via e-mail)

**

THE SOCIAL SCENE: NJ OLD TIME RADIO CONVENTION GOES QRT

The annual Friends of Old-Time Radio Convention, that has been meeting for 36 years, has gone QRT.

According to news reports the gathering that has been running each year since 1975. It has folded because of a lack of featured guests who were a part of broadcast radio in its infancy through its hey-day of the 1950's.

The final Friends of Old Time Radio Convention was held October 20th to the 23rd at the Ramada Plaza hotel across the way from Newark Airport in New Jersey. This year's honoree was 88 year old Arthur Anderson who acted as a teenager with the great actor/director/producer Orson Welles.

Also present were the grandsons of 1930's song and dance man Eddie Cantor and descendants of radio actor Brace Beemer. Beemer was the voice of the Lone Ranger for most of its run on radio.

But the stars and voices of that era have almost all fallen silent and with nobody left to tribute to, now so has the gathering that has honored this art form for almost four decades. (Earthlink NewsNet)

**

NAMES IN THE NEWS: PAUL GIFFIN VA7MPG APPOINTED NEW SM FDOR BRITISH COLUMBIA AND THE YUKON

Paul Giffin VA7MPG, has been appointed Radio Amateurs of Canada Section Manager for British Columbia and Yukon Section effective November 1st. Giffin has been licensed since 1993 and has been active in emergency communications for the past 47years. Over 40 of these as an operational member of the Royal Canadian Mounted Police. He is currently Emergency Coordinator for the City of Nanaimo and the southern portion of the Regional District of Nanaimo. Giffin lives in Gabriola Island, British Columbia. (RAC)

ON THE AIR: WORLDWIDE D-STAR QSO PARTY NOV 11 -

13

If you are a user of D-Star, or planning to get a D-Star radio soon, then put aside the weekend of Friday, November 11th through Sunday

November 13th. That's when ICOM will host the 2011 D-STAR QSO Party on a S-STAR repeater near you.

According to Icom, the theme of this Year's D-STAR QSO Party is "Travel the World." You can take this trip vicariously via the D-STAR network, or on 10 or 6 meter simplex, to as many countries as possible using the D-STAR network.

In addition to the fun of meeting new people in the worldwide D-STAR Community, if you submit your log you have a chance to be one of fifteen lucky hams who will be chosen to receive a free model ID-31A or ID-31E D-Star handheld from Icom.

The basic rules are these: Submit your log with a minimum of one D-STAR contact and you are in the running. Submit a log with at least five foreign countries and you will double your chances to win. Submit ten countries, and your chances triple. And if your log has twenty or more unique countries, you quadruple your chances at becoming a winner of the new ID-31 portable.

While Jules Verne wrote about going the around the world in 80-days, you will only have 72 hours to fill your log during the D-STAR QSO Party. For complete rules on how to participate in this fun event, please take your web browser to tinyurl.com/d-star-qso-party. (Icom, Ham Nation)

**

HAM RADIO IN SPACE: AUBIESAT-1 IS ON ORBIT

AUBIESAT-1 and several other satellites are now on-orbit. The birds were launched on Friday, October 28th at 09:48 UTC on board a Delta II booster from Vandenberg Air Force Base in California. Explorer-1, AubieSat-1 and M-Cubed were released at 11:26 UT. The Radio Auroral Explorer 2 followed at 11:27 UTC and the non-amateur Dynamic Ionosphere CubeSat Experiment or DICE satellite at 11:29 UTC. A few hours later, signals from Aubiesat-1 and two other of the cubesats had been heard and confirmed. (ANS)

HELP WANTED: OPERATOR NEEDED FOR FRENCH GUYANA OPERATION

The upcoming DXpedition to French Guyana is desperately looking for another CW operator. The operation starts in Paris on December 26th form where it travels to Royale Island and ends on Jan 7, 2012. For practical reasons, candidates with some French knowledge are preferred and a valid yellow fever vaccination is required. Anyone interested in taking part in this adventure should contact Jean Paul Jolly by e-mail to f5oqk (at) orange (dot) fr. (Southgate)

**

DX

In DX, word that Sable Island is a go for this year. AA4VK, N1SNB and WA4DAN say that they will be active portable CY0 between December 29th and January 6th and that the aircraft to carry the trio to the remote outpost has been chartered. For more details and updates, watch the Web page at www.cy0dxpedition.com.

The Five Star DXers Association T32C DXpedition to Christmas Island is now history. Despite initial difficulties with their container of equipment not reaching the island, the team finished with over 213,000 contacts and this is the first time an expedition has exceeded 200,000 QSO's to that rare location.

DL7DF will be on holiday in Kenya between November 23rd and December 6th. He plans to be active as 5Z4HW and operate on all bands, 160 through 10 meters using CW, SBB, RTTY, PSK31 and SSTV as often as possible. His location will be Diani Beach at the coastline of Mombasa. QSL via his home callsign, direct or by the DARC Bureau.

S01MZ in the Western Sahara has been active in past weeks on 20 and 15 meters. He is usually heard between 12:30 and 18:00 UTC but other details are known about this station. He does say to QSL via EA1BT.

GM3YTS and GM0GAV will be operational from Malawi as 7Q7GM through November 13th. Activity will be CW only with a focus on the low bands, especially 160 and 80 meters. They are hoping to have an online log available. Look for all QSOs to be uploaded to Logbook of the World as soon as they return home. QSL via GM4FDM.

Lastly, JH8PHT will be active as AH0KT from Saipan on the Northern Mariana Islands between November 24th and the 28th. QSL via his home callsign only. Please do not QSL to Saipan.

(Above from various DX news sources)

THAT FINAL ITEM: 2011 NTIA SPECTRUM ALLOCATION WALLCHART NOW AVAILABLE

And finally this week, have you ever wondered what lies just beyond the band limits of your FCC operating license? Many hams have and now theres a free way to find out. Yes we said free and Amateur Radio Newsline's Michael Grebert, N4OZ, is here with the details:

--

The complete US Frequency Allocations between 3 kHz and 300 GHZ are published in a highly detailed, easy to read, color wall chart by the NTIA's Office of Spectrum Management. The new 2011 edition is now available to be downloaded at no charge from the Agency's website.

All US commercial, industrial, medical, military, broadcast and amateur radio frequency allocations are clearly marked and color coded to allow easy identification. Exclusive and non-exclusive bands and allocations are easily seen, as are band limits and different types of service.

The chart is available as a high resolution .pdf file, or as a 68 text based equivalent that may be more convenient for printing at home and keeping in a binder.

No matter how familiar you are with your own small part of our spectrum, this chart is a fascinating mosaic of all the varied and competing uses of this precious resource. Scanner listeners in particular will appreciate the breadth and detail included across the commonly receivable spectrum and beyond.

The National Telecommunications and Information Administration or NTIA is responsible for all US Federal Government frequency allocation and spectrum management. In this regard it is the companion body to the Federal Communications Commission or FCC, who manage the spectrum on behalf of all non Government users.

The NTIA's new chart shows the combined allocations for all users managed by both organizations, ensuring that no approved frequency usage is omitted.

Hams and radio hobbyists outside the US can also benefit from this information, as other regions and countries generally follow a similar allocation scheme, with many bands being used globally among similar services.

Both the full color wall chart and the text version of this excellent resource can be downloaded from tinyurl.com/2011chart.

For the Amateur Radio Newsline, I'm Michael Grebert, N4OZ, reporting from Music City, Nashville, Tennessee.

--

Once again that free NTIA chart can be downloaded free of charge at tinyurl.com/2011chart. And you have to admit that for that price it's a hard offer to pass up. (N4OZ)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in Vero Beach Florida saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 6 November 2011

The news headlines:

* Latest information on RSGB EGM

* New 2E series QSL Manager appointed

* Greek 5MHz beacon returns

The RSGB is holding an Extraordinary General Meeting on 19 November at the NEC in Birmingham. Those not planning to attend can vote on the resolutions using the form in November's RadCom, or by internet. In a letter to clubs, RSGB President Dave Wilson, M0OBW has encouraged everyone to vote on the important matters being proposed by the Board. Remember, if you don't vote, you can't really criticise the outcome.

The Society is keen to form a view of how many people will be at the EGM, for planning purposes. If you plan to attend in person, please would you go to www.rsgb.org/attend and complete the brief information required. If you plan to arrive at Birmingham International by train, there is a free bus to take you to EGM venue. You will need to summon the bus using a courtesy telephone. The phone, which has a Hilton logo on it, is inside the station arrivals hall, next to the Subway restaurant.

The QSL bureau would like to thank everyone who volunteered for the vacant post of 2E series sub manager, which has now been filled. John Russell, 2E0CGT, will shortly take over from Anthony Horton, G0LKG, who has managed the 2E0 series for 12 years. Over that time the 2E0 series grew into one of the largest sub groups .Our thanks go to him and his XYL for their kind efforts. 2E1 callsigns, currently managed by Lloyd Thomas, 2W0LLT are also to be re-combined, making up one single 2E series. All cards and envelopes are currently being transferred. Full details are in the members' area of the RSGB website.

A 5MHz beacon from Greece is now on the air. Operating on 5398.5kHz CW, it runs 30W into a non resonant antenna for the moment. It should be on the air mostly between 1900 and 0600UTC. It may be off on some days due to other HF activities at the test site, so try to listen regularly. Details of the beacon message and timings can be found on the IARU Region 1 website, www.iaru-r1.org.

There will be two talks on the AMSAT-UK FUNcube Dongle VHF UHF software defined radio at the BAA Radio Astronomy Group meeting on Saturday 12 November. The meeting is at The Humfrey Rooms, Castilian Terrace, Northampton, NN1 1LD. Tony Abbey will talk about his experiences of using the AMSAT- UK FUNcube and Dr David Morgan will describe how the FUNcube Dongle raises the prospect of amateurs being able to put together a low-cost radio telescope. Tickets for the main event are available, with or without lunch, from www.britastro.org/radio.

A new digital net to encourage use of these modes on 10m will be held every Saturday and Sunday at 1800UTC. The net will gather on 28.125MHz USB, plus or minus QRM. RS ID and Call ID will be used to help people pick out the net and modes used. Olivia 500/8 mode will be used to call up the net but it may switch modes as needed. Check out www.obriensweb.com/sked for online coordination during each session. The Colorado 6m beacon is back on the air. Having been rebuilt, the operating frequency is 50.065MHz and the callsign is KA0CDN. Further information can be found online at www.rmvhf.org.

And now for the details of rallies and events for the coming week

The Foyle & District ARC Rally takes place today, 6 November, at the Best Western White Horse Hotel, 68 Clooney Road, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, the RSGB QSL bureau and IRTS in attendance.

The West London Radio & Electronics Show, otherwise known at the Kempton Rally, takes place today, 6 November, at Kempton Park racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. Doors open at 10am and there will be trade stands, RSGB bookstall and lectures. More information from Paul, M0CJX, on 08451 650 351.

The Rochdale & District RS Traditional Radio Rally will take place on 12 November at St Vincent's Church Hall, Caldershaw Road, Rochdale OL12 7QL. Note that this is a Saturday rally. Doors open at 10.30am and admission is £2.50 with concessions for under 12s and senior citizens. Attractions include a Bring & Buy. More information from Dave, G0PUD on 07710 243 107.

The Mayo Radio Experimenters are holding their annual Radio Rally on Sunday 20 November at the Welcome Inn Hotel, Castlebar, Co Mayo, where the doors will open at 11am. There will be the usual range of traders, club stands, demonstrations and extensive catering facilities. On Saturday evening, at 7pm, Pat Fitzpatrick, EI2HX will give a talk and demonstration on amateur television. At 9pm Dave Deane, EI9FBB will give a talk on the ARRL DXCC Program and also on the Logbook of the World system. He also took part in the recent T32C DXpedition. Full details of the hotel packages, the lecture programme and rally information are online at www.ei7mre.org.

A D-Star Digital Workshop will be held on 13 November at County Hall, Atlantic Wharf, Cardiff CF10 4UW. Doors open from 10am to 5pm. Bring a copy of your licence to operate the D-Star station on the day. There

will be help with operating D-Star, programming radios, repeater and reflector use and navigating your radio. Newcomers are most welcome. Contact Dave, 2W0RUH by e-mail to dave.2w0ruh@ntlworld.com for further details.

Now for the news of special events

G0BAR will be on air on Monday 7 November between 10am and 12pm, activating Seaview ROC Bunker on the Isle of Wight. All details are available at www.rocbunkers.co.uk.

The Caddington Scout and Cub group are holding a communication week starting on 14 November. Operating from Caddington Scout HQ, Dunstable Road, Caddington, Bedfordshire as GB1CSC, they will be on 40, 20, and 2m and they are hoping for lots of contacts.

On Sunday 13 November GB4WLR will be on the air from the West Lancs Railway as part of the Children in Need fund raising event. And now the HF DX news compiled from 425 DX News and other sources

I0WDX will be on the air as 8Q7CC from the Maldives until 12 November. A web page for this operation is online at dxcoffee.com/8q7cc. QSL via his home callsign, direct only.

LA9DL and LA6VM will be active from Bhutan using the callsigns A52DL and A52VM, respectively, until 13 November. Operations will be on 10 to 80m. A52DL will be mainly on PSK and SSB, while A52VM will be mostly on CW. QSL via their home callsigns.

DL2NUD, DL8YHR and DL9MS will be active as 8P9HP, 8P9DL and 8P9MS, respectively, from Barbados between 7 and 21 November. Their operation will be on the HF bands as well as 6 and 2m moonbounce. QSL via their home callsigns.

9N7MD will be on the air from 13 to 25 November from Nepal. Details at www.mdxc.org/nepal2011.

A CW-only trip with emphasis on 160m and 80m is being undertaken by GM3YTS and GM0GAV. They will be on the air from Malawi until 13 November using the callsign 7Q7GM. QSLs go via GM4FDM and logs will also be uploaded to Logbook of the World.

Easter Island will be available on the HF bands until 11 November when LA5UF operates as CE0Y/LA5UF. This one counts as SA-001 for the IOTA Award.

Now the contest news

The 432MHz UK Activity Contest takes place on 8 November from 2000 to 2230UTC. Using all modes within the 70cm band, the exchange is signal report, serial number and locator.

November is the final month of this year's 80m Club Sprint series, with the SSB leg taking place on 9 November between 2000 and 2130UTC. The

exchange is serial number and name.

The Club Calls Contest is a 160m team event in which a lot of club stations are given an airing. Club stations are encouraged to involve newly licensed members, especially in the latter part of the contest. At that time they are not likely to be on the receiving end of a pileup, so the pressure will be less. Script the QSOs or give them cue cards, so they know exactly what to say and when to say it. Please note that there are rule changes this year, so participants need to make sure they've read them well in advance of the event. This contest is now the second of this season's Super League events. The contest takes place on 12 November from 2000 to 2300UTC using SSB. The exchange is signal report, serial number and club code.

The RTTY leg of the WAE DX Contest takes place for the whole 48 hours of 12 and 13 November. The CW leg was held in August and SSB leg in September, but the rules for RTTY differ because on RTTY everybody works everybody. Single operator stations are limited to 36 hours out of 48. The exchange is signal report and serial number. And now the solar factual data for the period from the 24th to the 30th October, compiled by Neil Clarke, G0CAS on the 31st of October.

First this week the latest smoothed monthly sunspot numbers for January, February and March which are 31.0, 33.4 and 36.9 respectively.

The majority of the sunspot groups visible were small and quiet but several groups were complex enough to produce small C class solar flares. Solar activity was low every day. Only 17 C class flares took place during the period. Solar flux levels declined from 145 units on the 24th to 123 by the 29th. The average was 133. The 90 day solar flux average on the 30th was 124 units, that's two units up on last week. X-ray flux levels declined slightly from B5.4 units to B4.3. The average was B4.6 units. Geomagnetic activity started at sub- storm levels with the arrival of a coronal mass ejection during the early evening of the 24th. Because of the time of arrival, Europe missed out on the best of the auroral propagation - unlike North America. The Ap index on the 24th and the 25th was 23 and 33 respectively. Quiet conditions returned the following day with an Ap of only 2 units on the 28th and the 29th. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 550 kilometres per second on the 25th to a slow 250 kilometres per second by the 29th. Bz was negative by 23 nanoTeslas on the 24th and the 25th but for the remainder of the period varied between minus 4 and plus 7 nanoTeslas.

And now the solar forecast. This week the quiet side of the Sun is expected to rotate out of view. Solar activity should be low most days but could increase to moderate levels occasionally later in the week. Solar flux levels should steadily increase and be around the 140's by next weekend. Geomagnetic activity should be quiet every day as no coronal holes are expected. However, as witnessed last week, a filament eruption or a coronal mass ejection could suddenly increase activity and these events are not easy to forecast. MUFs during daylight hours

at equal latitudes should be about 33MHz for the south and 30MHz for the north. Darkness hour lows are expected to be around 10MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of about 32MHz. The optimum working frequency with a 90 per cent success rate will be around 27MHz. The best time to try this path will be between 0900 and 1400 hours.

Last week mention was made of some very short skip propagation on 28MHz. The propagation mode is not immediately obvious, though backscatter, sporadic-E and tropo have all been suggested. On balance, Sporadic-E looks the most likely candidate. Although this is most common during the summer months and around Christmas it can occur at any time of year. This may well have been a rare unseasonable appearance.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 6 November South Birmingham Radio Society is visiting the West London Radio and Electronics show at Kempton Park. Contact Don, on 01214 581 603.

On Monday 7 November Gloucester Amateur Radio & Electronics Society is having a visit by RSGB Region 5 Manager Vaughan, M0VRR, for a talk on Echolink plus an informal question and answer session on the RSGB. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 7 November South Birmingham Radio Society is on the air and having a review of new committee. Contact Don, on 01214 581 603.

On Monday 7 November Sutton Coldfield Amateur Radio Society is on the air and holding a general meeting with discussions. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Monday 7 November Welland Valley Amateur Radio Society is running a 2m club net on 145.275MHz FM. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 8 November Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 8 November Forest of Dean Amateur Radio Group is having a talk and demo on direction finding. Details on 01594 549 110.

On Tuesday 8 November Loughborough & District Amateur Radio Club is having a talk on pop radio ships, Radio Luxembourg and other stations by Jon Sketchley, G4DCE. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 8 November Mid-Warwickshire Amateur Radio Society is having a video evening with Roy, G8XDL. Details from Don, G4CYG, on 01926 424 465.

On Tuesday 8 November Worcester Radio Amateurs Association is having a BBQ and RF night at Hallow Scout Hut. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 8 November Wythall Radio Club is holding a committee meeting. Details from Colin, M0GJM, on 07598 540 507. On Wednesday 9 November Midland Amateur Radio Society is having a committee meeting. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 9 November Telford & District Amateur Radio Society is having a talk by M0FHM on visiting Eastern Europe. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 10 November Salop Amateur Radio Society is having a talk. Details on the club website at www.salop-ars.org.uk.

On Thursday 10 November South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Thursday 10 November Tamworth Amateur Radio Society is having a talk on ununs and aerials by Simon Poyser, M0GSR, from Snowdonia Radio Company. Bob, G1BCZ, g1bcz@btinternet.com

On Friday 11 November Coventry Amateur Radio Society is holding its great egg race. Contact John, G8SEQ, on 07958 777 363.

On Friday 11 November South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 12 November Wythall Radio Club is taking part in the 160m Club Call Contest. Details from Colin, M0GJM, on 07598 540 507.

NEWS FOR THE NORTH OF ENGLAND On Monday 7 November Angel of the North Amateur Radio Club is holding its AGM. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 7 November Sheffield Amateur Radio Club is having a talk and open forum on the RSGB situation led by the Region 4 RSGB Rep Harold Scrivens, G0UGE. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 7 November Thornton Cleveleys Amateur Radio Society is having a natter night. More information from J Duddington, G4BFH, on 01253 853

554.

On Tuesday 8 November Chester & District Amateur Radio Society is holding a committee meeting. Details from Barbara Green on 07957 870 770.

On Tuesday 8 November Halifax & District Amateur Radio Society is on the air, testing the new aerial and continuing the Foundation and Intermediate training courses. Contact Martin, M0GQB, on 01422 341 317.

On Wednesday 9 November Hornsea Amateur Radio Club is having a club night and participating in the Club 80m Sprint SSB contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 10 November Ripon & District Amateur Radio Society is experimenting with locating hostelries using ARDF. Details from Rob Hall, M0RBY, on 07876 085 631. On Thursday 10 November South Manchester Radio and Computer Club is having a debate on the value of the RSGB. Details from Ron, G3SVW, on 01619 693 999.

On Saturday 12 November Hornsea Amateur Radio Club is taking part in the Club Calls contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Monday 7 November Borders Amateur Radio Society commences its Foundation course. Details from MM0YLG on 07944 912 751.

On Tuesday 8 November Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 8 November Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946 192.

On Wednesday 9 November Ayr Amateur Radio Group is having a presentation on antennas for small gardens. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 9 November Lothians Radio Society is having a talk on how the global positioning satellite system works by Andy Sinclair, GM7HUD. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 10 November Aberdeen Amateur Radio Society is having a talk. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 11 November Borders Amateur Radio Society is having a talk on soldering by Sandy Weddell, GM1JJF. Details from MM0YLG, on 07944 912 751.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 6 November Worthing & District Amateur Radio Club is having a breakfast meeting at the Goring Cafe. Contact Phil, G4UDU, on 01903 816 684.

On Monday 7 November Braintree & District Amateur Radio Society is holding a junk sale. For more information contact John, M5AJB, on 01787 460 947.

On Monday 7 November Burnham Beeches Radio Club is working on its construction project. Contact Dave, G4XDU, on 01628 625 720. On Monday 7 November East Kent Radio Society is having a talk on trapped dipoles by George, G3NIR. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 7 November Southdown Amateur Radio Society is holding its Christmas dinner at the Toby. Details from John, G3DQY, on 01424 424 319.

On Monday 7 November Surrey Radio Contact Club is having a talk. Contact John, G3MCX, on 02086 883 322.

On Tuesday 8 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Wednesday 9 November Fareham & District Amateur Radio Club is holding an inter-club quiz, to which all local clubs are invited. More information from Derek Clarkson, G4JLP, on 01329 823 405.

On Wednesday 9 November Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Sprint CW contest plus having an informal, construction and shack evening. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 9 November Southgate Amateur Radio Club is holding its autumn junk sale. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 9 November Worthing & District Amateur Radio Club is having a discussion evening. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 10 November Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club, NR26 8TU. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 10 November Echelford Amateur Radio Society is having a talk by Roger Western, G3SXW on his quick trip to Hungary, Montenegro & Albania. Contact John, G4GSC, on 01784 451 898.

On Thursday 10 November Edgware & District Radio Society is having short talks by members. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 10 November Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 10 November Reading & District Amateur Radio Club is holding its construction contest, hosted by Robin Caine, G4IWS. Details from Pete, G8FRC, on 01189 695 697.

On Friday 11 November Cambridge & District Amateur Radio Club is having an introduction to time domain reflectometry by Mike, M0BLP. Contact Ron, G3KBR, on 01223 501 712.

On Friday 11 November Itchen Valley Amateur Radio Club A DXpedition presentation. Details from Liz, M0ACL, on 02380 254 599.

On Friday 11 November Mid-Sussex Amateur Radio Society is having a radio night and construction contest. Contact Peter, G4AKG, on 01444 239 371.

On Friday 11 November Radio Society of Harrow is having a talk and demo of the Rig Blaster Pro. More information from Linda, G7RJL, on 02083 868 586. On Friday 11 November Wimbledon & District Amateur Radio Society is holding a discussion on licence training. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 12 November Newbury & District Amateur Radio Society is taking part in the RSGB Club Calls contest. Contact Rob, G4LMW, on 01635 862 737.

On Saturday 12 November Norfolk Amateur Radio Club is participating in the RSGB Club Calls contest. Details from Chris Danby, G0DWV, on 01603 898 678.

NEWS FOR THE SOUTH WEST On Tuesday 8 November Mid Somerset Amateur Radio Club is having a talk by Roger Davis on his career in the RAF and the BBC. Contact Nick, M6NJB, on 01749 346 320.

On Tuesday 8 November Plymouth Radio Club is allocating jobs for the rally. Details from Chris, M0ZCP, on 07834 767 161.

On Tuesday 8 November Poldhu Amateur Radio Club is having a talk on measuring VHF and UHF beam radiation patterns using Polarplot by Keith Holland, G3MCD. Details online at www.gb2gm.org.

On Wednesday 9 November Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 10 November Newquay and District Amateur Radio Society is having a presentation by RSGB Regional Manager Pam Helliwell on the proposed changes to the RSGB. The presentation will begin at 7.30pm at Treviglas School, Newquay. Members of other clubs are welcome to attend.

On Thursday 10 November South Bristol Amateur Radio Club starts its Christmas raffle. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 10 November Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 10 November Yeovil Amateur Radio Club is having a talk on how to make radio equipment by G3MYM. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 11 November North Bristol Amateur Radio Club is having a talk on HF loops by Chris, G0AQL & Charles, G4JQX. More information from Dick on 01454 218 362.

On Friday 11 November Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 7 November Dragon Amateur Radio Club is holding a discussion night. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Thursday 10 November Aberystwyth & District Amateur Radio Society is visiting the Museum of Power at Sarnau near Cardigan. Details from Ray, GW7AGG, on 01970 611 853.

On Friday 11 November Newport Amateur Radio Society is having a talk on how to connect, set up and operate a linear amp by Ross, GW3NWS. More information from Ross Clare, GW3NWS, on 01633 880146.

In this issue:

· From the desk of HQ

· Report from the Administration Liaison Officer

· IARU update

· FMTAG Report

· NZARD (NZ Amateur Radio Day) 2012

· Housekeeping

· Branch 86 Junk Sale 19th November 2011

· Nelson Conference 2012

>From the desk of HQ

Remit time…Well as we are officially on the countdown to Christmas being only 7 weeks away and only 8 weeks until the end of the year, it’s time for all branches and members to formulate any remits they wish to submit to the AGM in Nelson next year.

Council require these for pre-approval by February 2012, therefore the cut off for any submission is the 31st December 2011.

If you or your branch requires the criteria on how to write a remit, please contact me and I will forward the policy.

Officer reappointments…The new Council liaison Stephen Hayman ZL1TPH has now forwarded, via e-mail, NZART Officer appointments. If you have received this letter, can you please complete it and send back to Stephen before 31 December 2011. If there is anyone who does not currently hold such a position within NZART and would be interested in volunteering please contact me and I will forward to Stephen.

There are 33 positions which are required to be filled, a list of these can be found on the NZART web page, together with the name of the current officer. All officers do a fantastic job and many are seeking deputies to assist them in their roles, so this may be an opportunity for you to step in and see if you can help.

HQ Info-line articles…A very gentle but firm reminder, if you want anything included in HQ Info-line, you MUST send it to me by the Friday prior to production. If you are unsure of the dates that it’s due out, they can be found on the NZART web page.

I regret I have no information on any branch activities or contests, that may need to be communicated to the wider membership, however I cannot print what I don’t receive.

Talk soon…Debby ZL2DL

Report from the ALO

Proposed Changes that Affect the 130 to 190 kHz Amateur Band

The MED is proposing to increase the power short range devices are allowed

to use in the 9-190 kHz band.

In particular, they are proposing a power increase from -20 dBW (43 dBµA/m

@10m) to 3 dBW (66 dBµA/m @10m) over the band 119 – 135 kHz – the top end of

which overlaps the lower end of our 130 to 190 kHz Amateur Band.

Details of the proposal can found at

www.rsm.govt.nz/cms/policy-and-planning/projects/proposed-power-increase-for-short-range-devices

NZART is proposing to put in a submission on this proposal. If you would

like to contribute to this, please send an email to the NZART Administration

Officer, (Don Wallace, ZL2TLL) at nzart@wallace.gen.nz expressing your

interest and any views you have (positive or negative) on the MED’s

proposal.

IARU JARL news

fmtag@nzart.org.nz

New Zealand Amateur Radio Day 2012

This will be held on March the 10th from 1000 to 1400 hours.

Branches are encouraged to set up a station in a prominent area in their local community, and to make contact with other NZARD stations and home stations. Make sure you seek the appropriate permissions to establish a station, with the council or businesses as appropriate.

Media inclusion is to be encouraged. Be sure to have pamphlets at hand. Contact NZART HQ for pamphlets.

A good idea is to have some hams operating equipment, and other hams available to talk to public and explain what amateur radio is and our place in the community, and how easy it is to get an amateur licence. After the event follow up with anyone that showed interest, and assist them with gaining their amateur licence.

The purpose of NZARD is twofold. To expose our hobby to the community and to prospect for potential amateur operators.

Please take photos and write a short activity report, and submit to Breakin for publication.

Any questions please send to Warren ZL2AJ at warren@zl2aj.com or 021-649284

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Jan/February 2012 issue of Break-In-closes on 10 January 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.

FEMA, in coordination with the Federal Communications Commission (FCC) and the National Oceanic and Atmospheric Administration (NOAA), will conduct the first nationwide Emergency Alert System (EAS) Test on Wednesday, November 9, at 1:00 p.m. Central. Participating analog and digital radio, television, cable, satellite, and wireline providers will broadcast a single, live-code alert, called the Emergency Action Notification, which will be relayed to the public and stations in their coverage area. The purpose of the test is to assess the reliability and effectiveness of the EAS as a public alert mechanism.

For more information about the EAS test, see:
http://www.fema.gov/emergency/ipaws/eas_info.shtm
http://www.fcc.gov/encyclopedia/emergency-alert-system-nationwide-test

The FCC and FEMA are recommending stations run Public Service Announcements reminding the public that the EAS announcement on Wednesday, November 9, at 1:00 PM Central is only a test.

SARL NEWS - SUNDAY 06 NOVEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with deep regret that it must be announced that the key of Donald John Mackay, ZS6YD, went silent on Friday 12 August 2011 at the age of 78.

We extend our sincere condolences to his family and friends.

In the news today:

INTECNET HOSTED A LIVELY DEBATE ON A POSSIBLE ADVANCED LICENSE

LOGBOOK OF THE WORLD IS EXPERIENCING DELAYS

HUGE SUNSPOT IS CAUSING SOLAR FLARES

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

INTECNET HOSTED A LIVELY DEBATE ON A POSSIBLE ADVANCED LICENSE

The debate on an advanced amateur radio license held on the INTECNET last Sunday was lively and informative. The discussion was part of the SARL's process to get members' input of how they view the idea, what such a license should like look like and what would be required to qualify should such a license be introduced in the future.

The main question was "what would the purpose be of such a license?" Several ideas were suggested which can perhaps be best summed up by Peter Hers, ZS6PHD's contribution to the discussion. He suggested that the main objective of such a license could be "to stimulate a climate

of learning and development amongst Radio Amateurs in South Africa". The recording of the discussion will be analysed and a summary will be published in the next few weeks for further comments.

The question of increased power was discussed by several participants. While the concept of a higher level license is not about higher power, the possibility that such a requirement could be identified, is not excluded.

Your input and suggestions are invited. Send an Email to artoday@sarl.org.za .

LOGBOOK OF THE WORLD IS EXPERIENCING DELAYS

Due to a large number of radio amateurs uploading their logs to Logbook of The World (LoTW) after last weekend's CQ Worldwide SSB Contest, the ARRL's online QSL verification service is experiencing delays. According to ARRL IT Manager Michael Keane, K1MK, there is about a 60 hour wait for the more than 10,000 logs in the queue to be processed. "Logs are processed in the order in which they were received," he explained. "If you have uploaded your log to LoTW, your log is currently queued for processing. It has not been lost in the system. Uploading your log multiple times will only further delay your log and those of others to be processed."

HUGE SUNSPOT IS CAUSING SOLAR FLARES

Spaceweather.com reported on Thursday that a huge sunspot had appeared and that some ionospheric disturbances could be expected. Yesterday NOAA forecasters have upgraded the chance of X-class solar flares to 20%. The source would be AR1339, one of the biggest sunspots in many years. The active region rotated over the sun's eastern limb two days ago and now it is turning toward Earth.

The sunspot unleashed an X-flare on 3 November around 20:27 UTC. The flare created waves of ionisation in Earth's upper atmosphere, altering the normal propagation of radio waves over Europe and the Americas. In Ireland, the flare's effect was felt even after dark.

A cloud of plasma or "CME" raced away from the blast site at 1 100 km per second. The CME is not heading for Earth. It is, however, heading for Mercury and Venus. For updates visit www.spaceweather.com.

CALL FOR PAPERS

This is the first call for papers for presentation at the SARL Radio Technology symposiums to be held in Cape Town, Port Elizabeth, Durban and Johannesburg during 2012. Papers should be of a technical or operational nature and of interest to radio amateurs.

Send a synopsis of a proposed paper to artoday@sarl.org.za. Of interest would be papers on DXing and contesting, antenna design and construction and software application in amateur radio to mention some.

CONTEST NEWS

RESULTS OF THE SARL QRP CONTEST HELD ON 22 OCTOBER 2011

The contest committee received 13 logs. Information from those logs reveal that there were 63 stations on the air. Of these, 19 stations operated both SSB and CW. There were even 2 cross-mode QSOs made which is probably a first time that this has occurred.

The results are: 1st ZS6RJ - Roger 880 points 2nd ZS6XT - Pieter 648 points 3rd ZS3R - Christo 560 points 4th ZS2J - Derek 552 points 5th ZS6ARQ - Romeo 450 points

The overall results after the 4 legs of the contest are:

1st ZS6A - Pierre 2 682 points 2nd ZS6XT - Pieter 2 132 points 3rd ZS2J - Derek 1 577 points 4th ZS6WR - West Rand ARC 1 386 points

The full results have been posted on the SARL forum and will also appear in HF Happenings.

Thanks to all the participants, but, next time will all please submit their logs and congratulations to the winners.

CLUB NEWS

NIGHTLY NETS ON 144 MHz

VHF amateurs in Port Elizabeth have restarted their nightly nets on 144 MHz to encourage more VHF activity in the country and to give beginners a taste of VHF simplex operation. The nets are divided into two sessions; first session is on FM for those who are only equipped for the FM mode, and it could cover distances of about 400 km during very good conditions; the second session is intended for long distance tests on SSB but CW could be tried too. Amateurs will be active on most nights especially when conditions are favourable, and please note that horizontal polarization will be used. Tropo propagation produces the best results on the 144 MHz VHF band especially at night during the warmer months.

The complete schedule is as follows: 19:00 - 19:30 CAT on 144,400 MHz FM beaming west to Mossel Bay area, and 19:30 - 20:00 CAT beaming northeast to the East London area. At 20:00 CAT the frequency is changed to 144,200 MHz USB and the beams are pointing northwards to cover Bloemfontein, Durban or beyond.

VHF and the frequencies above are the experimental and most challenging side of the amateur radio service; the future spectrum of all radio communications.

AWA OPEN DAY

The Southern African Antique Wireless Association will be having an open day and AGM at the Transvaal Aviation Centre (TAC) at Rand Airport on Saturday 12 November from 10:00 the morning.

All interested parties and members are invited to join us for a fun day with radio displays, flea market, restaurant facilities and Cash Bar.

Contact Andy, ZS6ADY, should you require details or directions. Contact details are: 082 448 4368 or andyzs6ady@vodamail.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the largest sunspot in years is rotating over the sun's north eastern limb. Two or three of the sunspot's dark cores are wider than Earth itself. Naturally such a large sunspot has potential for strong flares.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 108, a new high for this solar cycle.

All the bands from 20 m to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13 November - AWA open day at the Rand Airport starting at 10:00. 13 November - Pears HF Competition 12:00 till 16:00 UTC. 19/20 November - SARL Field day competition. 20 November - CW leg of 80 m Club competition. 27 November - Digital competition. 30 November - last day to submit logs for Pears HF DX-expedition. 31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73.

1065. NZART Headquarters Infoline issue 241- Addendum

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-06 05:59:57 UTC
From: "ZL1AMW (infoline)" <infoline@nzart.org.nz>
Message-ID: <D11C670AAC7A4B199FA1A6E1B315ECC7@AlanLaptop>
Source record: 3905
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

NZART Headquarters Infoline Issue 241

06 November 2011
NZART Website: www.nzart.org.nz

ADDENDUM

Oops..

It looks like we managed to lose a vital section of the FMTAG report for this issue of Infoline…. so… here is the missing item (our apologies to the FMTAG team):

PROPOSALS

Reefton-Buller Branch 62 has applied for a 2-metre repeater at Millerton, located at Topo50 BR21 049901. The repeater transmit frequency will be 146.750 MHz and receive frequency 146.150 MHz.

Reefton-Buller Branch 62 has applied for a 2-metre APRS digipeater at Denniston, located at Topo50 BR21 003782. The digipeater transmit and receive frequency will be 144.575 MHz.

Reefton-Buller Branch 62 has applied for a National System UHF Link Station (ULS) at Denniston, located at Topo50 BR21 003782, to link to the Murchison National System station. The ULS transmit frequency will be 439.950 MHz and receive frequency 434.950 MHz.

Reefton-Buller Branch 62 has applied for a National System Repeater at Denniston, located at Topo50 BR21 003782. The repeater transmit frequency will be 439.975 MHz and receive frequency 434.975 MHz, in accordance with the National System Frequency Plan.

Engineering investigations, in accordance with MED PIB38, confirm that the above four stations will not interfere with other stations.

FINAL RECOMMENDATIONS TO COUNCIL

At its November meeting, NZART Council approved the following application, which can now proceed to licensing.

The Auckland VHF Group, Branch 66, has applied for a 850 repeater at North Head, located at TOPO50 BA32 616227. The repeater transmit frequency will be 438.500 MHz and its receive frequency will be 433.500 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

November 7, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NJ1Q & ARRL DX, K2SX, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, WA4DAN, K6IF, KH6BZF, AC7DX, W7KFI, K8GI, K8YSE, W8GEX (60m News), W8MP, W9ILY, W0GJ, 9M6DXX, AT International, DK8JB & The DX News Letter, DL1SBF, DL9WVM, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, I1HYW, I1JQJ/IK1ADH & 425 DX News, ON5NT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, PT7WA, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VE2XB and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-October, through Sunday, 6th-November there were 244 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S0, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2 AND T2 (News Flash). Bill, VK4FW, sent out the following on November 3rd: "Over the last several weeks, as many would know, there have been

numerous problems on some Pacific Islands with water shortages. When we came to Fiji we immediately saw the necessary persons to get assurance that all our equipment would be able to go to Tuvulu. We were assured as best we could get, and told to come back on November 1 to book it all in. Well, that day came and MURPHY struck yet again..... Because of major back logs of very urgent freight (especially water) there are some 600kgs currently waiting to go. This continually rises daily. We immediately searched for shipping by boat with no joy, then tried to charter a vessel and again with no joy. So here is what will now take place..... All operators are permitted just 23kgs of luggage and nil oversize so we will take as many antennas as possible and 2 only complete Elecraft K3 and KPA500 stations. If there are any positive changes then we will, of course, send more equipment as it is all in Fiji with us. We would request the DX community have patience and try to understand that we have absolutely no choice unless we cancel the operation totally. Meantime 3D2A by Eddie, VK4AN, did a Single-Op/Low-Power 10m in the CQWW with some 2822 QSOs. We have also amassed over 5,500 QSOs as 3D2T. Eric, VK4NEF, arrived today so that gives us 3 ops to continue here. We have been very surprised at the 10m openings, but extremely disappointed with nil on 160m and very little on 80m......Cheers"

5Z, KENYA. Sig, NV7E/ZS6SIG, who has relocated from Pretoria, South Africa, to Nairobi, Kenya, is signing 5Z4EE for about the next three years. Sig announced this past week that he will once again be in the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/High-Power entry. Activity outside of the contests will be on all bands 160-10 meters. QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

9G, GHANA. Mark, W8MP, is an airline pilot who travels periodically to Accra for 1-4 days at a time and plans to be active as 9G5MP. He states that the radio and antenna is limited to what he can get in his suitcase, which goes on the flight deck as a carry on and is not checked. Mark is thinking about getting a Yaesu FT-817 or an Icom 7000 and use a dipole. Operations will be sporadic based on when he has a layover in Ghana, and usually he only knows a day or two in advance. Mark mentions that he is also attempting to set up a permanent station in Accra for any visiting or local ham to use. He states, "It is a distant vision, but it is supported by Mr. Joseph Codjoe, the Chief Manager of Broadcasting at the National Communications Authority. My thanks to Mr. Codjoe for making the license 9G5MP possible." QSL via his home callsign. LAST MINUTE UPDATE BEFORE GOING TO PRINT: Sunday afternoon, Mark informed OPDX that he is now in Accra and is about to leave in a few hours. He states, "I finally received the hard copy of my license yesterday in person, so I am officially 9G5MP. I tried to borrow a radio from 9G1RQ, but it won't work for this trip. I haven't figured out how to pull off actually operating from Ghana due to my severe limitations of only being able to bring things in my 'carry on' suitcase. That is everything I need to operate, as well as my normal airline stuff. It needs to pass through security screening, which leaves out tools or anything really odd. And of course, I need to bring a laptop. Easy to run out of room. I am open to any suggestions from you or any readers of the newsletter. I usually

sit in Ghana with literally nothing else to do. It would be a privilege to give out 9G in any mode or band possible, given my limitations. Electricity here is 230v 50hz with an odd plug, so power is yet another challenge. The 6 story hotel does not have windows that open (due to mosquitoes and the threat of malaria), but there are some trees near the pool area I can probably sit near. Or I can operate from inside my hotel room. Basic story is 'Have license, can travel, only lacking Small radio or Antenna...' Any thoughts?" If you have any ideas to help Mark, you can E-mail him at: w8mp@arrl.net

A3, TONGA. Sigi, DL7DF, will head up a team of 9 experienced operators to be active as A35YZ between March 7-24th, 2012. Operators menitoned are Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Reiner/DL7KL, Sigi/DL7DF, Juergen/DL7UFN, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI. Activity will be active on 160-6 meters using several station operating on CW, SSB with one station exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or by the Bureau.

A6, UNITED ARAB EMIRATES. Ulli, DL9WVM, informs OPDX that he is going to fly to Dubai again Friday, November 4th, and will arrive on November 5th. This will be his 5th stay in The Emirates this year, and he plans to stay for 3 weeks. He will visit again with his children in Mirdif/Dubai. Ulli states that he will not be as active as his previous stays but has to work for his company in Germany, remotely. He will set up his station on Saturday, November 5th, and first use the already erected 3 band ground plane (10/15/20 meters) antenna. On Sunday, Ulli, plans to install a 7 band windom antenna (about 20 meters above the ground) and will be fully operational then. Even though his activity will be restricted by his job and family duties, he will concentrate on 10 and 12 meters. QSLs via his home callsign, by the Bureau or direct. QSLs will be answered immediately and cards are already printed. ADDED NOTE: Ulli has already made plans to go to UAE again for March/April 2012 (flights are already booked).

ANTARCTICA 2012 CALENDAR. Mike, GM0HCQ, reports to the WAP that an Antarctica 2012 calendar is now available via the following Web links:
http://www.gm0hcq.com
http://www.lulu.com/commerce/index.php?fBuyContent=11782579

AH2, GUAM. Akira, JR1VAY, will be active as AH2J from Guam (OC-026, USI GU003S, WFF KFF-110, WLOTA 0064) between November 11-14th. Activity will include entries in the JIDX SSB and WAE-RTTY Contests. QSL via JR1VAY by the JARL Bureau.

CR2, AZORES. Toni, OH2UA, will be active as CR2X from Ribeira Grande during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the Web page at: http://www.cu2a.com

CY0, SABLE ISLAND (Update). Operators Murray/WA4DAN, Ron/AA4VK and Jeff/N1SNB are planning a DXpedition to Sable Island between December 28th and January 6th (2012). These dates may shift a day or so due to weather and flight conditions. The group has already received permission to visit

Sable Island from the Canadian Coast Guard and have chartered the flights with Maritime Air operating out of Halifax, Nova Scotia. This DXpedition has been in the planning stage for almost three years. Operation will be on 160-10 meters using CW and SSB. Special emphasis will be made for 10 meters. They hope to be able to have two stations simultaneously operating on 10 meters at peak times. Updated information will be available on their Web site at: http://www.cy0dxpedition.com

D4, CAPE VERDE. Luca, IK2NCJ, is expected to be active as D44TAL from Sao Vicente Island (AF-086). Activity will be on the HF bands. QSL via IZ4DPV.

E5, NORTH COOK ISLANDS. Bill, N7OU, who is currently active as E51NOU from Rarotonga Island (OC-013, WFF E5FF-002), South Cook Islands, informs OPDX that his flight to Manihiki, North Cook Islands, has been delayed. He states, "I won't be up there until the end of the week, maybe on November 10-11th, or later. I'll be operating on 160-10m, CW only, 500w to verticals, with my focus on Europe. My Manihiki, N. Cook Islands, callsign will be E51MAN. Before and after my N. Cook Islands operation, I'll be signing E51NOU from Rarotonga, S. Cook Islands." QSL via N7OU.

EA6, BALEARIC ISLAND. Julio, EA3AIR, will be active as EA6URA (formerly EA6IB) from Ibiza Island during the CQWW DX CW Contest (November 26-29th) as a Single-Op/Single-Band (10m)/Assisted entry. QSL via EA3AIR, by the Bureau, LoTW or direct to: Julio Isa Garcia, Carrenca 25, 08017 BARCELONA, Spain.

ET3, ETHIOPIA. Operators Krassy/K1LZ, David/K3LP, Al/K3VN and Paul/N6PSE will be in Addis Ababa between December 8-13th, and plan to activate the ET3AA club station. The goals of their trip is to install antennas at the Addis Ababa University, administer VE Ham Radio Examinations and the creation of the "University of Addis Ababa - Technology Incubation Program (TIP)". For the complete details, see:
http://www.k3lp.com/et3aa_december_2011.htm
The ET3AA DXpedition team's operating goals from the club station are as follows: Krassy/K1LZ will operate as ET3AA on 80/40 meters, and David/K3LP will operate as ET3AA on 160/30 meters, during the evening to early morning hours (local time 7:00 PM to 7:00 AM). Operators Al/K3VN and Paul/N6PSE will operate during the day and early morning hours on all the other bands using SSB using the ET3SID callsign (from Sid's QTH) and ET3AA from the university's club station.

HB9, SWITZERLAND (Special Event). Team HB9ON Radio Group is pleased to announce the celebration of the life of Steve Jobs, Apple founder, and will activate HB9STEVE throughout the month of November 2011. Commemoration operations will occur sporadically and will be mostly on CW, but with some SSB. QSL via LoTW and GLOBALQSL or direct to HB9DHG. See details on QRZ.com.

HK0NA MALPELO ISLAND 2012 DXPEDITION (Update). Operators Sal/HK1T, Jorge/HK1R and Faber/HK6F went on a reconnaissance trip to Malpelo Island between October 23-30th. They did this to prepare for their

January 2012 DXpedition. Read a short written summary of their observations and see the pictures of what they saw and did on the island at: http://hk0na.com/hk0na-reconnaissance-trip-oct-2330
Also, the followinga press release was sent out on November 2nd:
"Three members of the Malpelo 2012 team have just completed a seven day reconnaissance visit to Malpelo..... This will be a very demanding DXpedition for several reasons. The terrain is particularly difficult, near vertical at times. And in order to have a clear radio view of Asia, the Pacific region and W6/W7; it will be necessary to locate operating site(s) and antennas at the top of the mountain. This further complicates the difficulties and physical risks to the team.
Team members vary in age from 25 to 73. But under the leadership and constant urging of our team's medical doctors, K9SG and W0GJ, we have all embarked on a physical training regimen. We should all be ready for the challenges come early 2012.
Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia Nov. 5-8th, for a planning meeting with team leader, Jorge, HK1R, and other team members. The purpose of the meeting is to review all the checklists and responsibilities for each team member. With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition.
One critical decision to be made concerns the duration of the operation. We have permission to stay on site for 17 days versus the 14 days now planned. We will be reviewing the DXpedition budget to determine if we can afford the extra 15,000 USDs expense for 3 additional days.
Contributions are gratefully accepted at: www.hk0na.com/sponsors
We plan periodic press releases with information of interest. Also, watch the website for breaking news.

Thanks,
Jorge Prieto, HK1R, DXpedition leader
Bob Allphin, K4UEE-co-leader
Gregg Marco, W6IZT-co-leader"

IOTA NEWS.............
NA-169. Operators Yuri/N3QQ and Johnny/KE7V were expected to be active as homecall/p from Waadah Island this past weekend, depending on the weather, and if they could receive permission from the Makah Tribal Council. They planned to be on 80-10 meters using CW and SSB. QSL via N7RO.

NA-240. (NEW IOTA!) Members of the Russian Robinson Club (RRC) and support of the Bethel Amateur Radio Club (BARK) will activate the last new IOTA in Alaska in the Bethel County IOTA Group around January 5-8th, 2012 (depending on weather and transportation availability). The group's main reason for this winter activation is to help jump start the RSGB IOTA Marathon.
See details at: http://www.rsgbiota.org/marathon/index.php
The current team members are: Yuri N3QQ, Tim/NL8F, Alex/RW3RN

and Yuri/UA9OBA. QSL via UA9OBA (Europe/Russia) and N7RO.
For more details and updates, see: http://www.na-234.com

SA-088. Operators Marcelo/PP5BK, Fabio/PP5BZ, Edson/PP5VK, Roni/PP5ZB,
Jose/PU5ATX and Claudio/PY3OZ will be active as PS5F from
Santana de Fora Island (Ilha Santana de Fora) between February
3-6th, 2012, sea conditions permitting. Activity will be on
40-6 meters using mainly CW and SSB. QSL via PP5BZ.

J7, DOMINICA. Mike, VE2XB, will be active as J79XB from Dominica (NA-101)
starting January 5th (2012) for several weeks. Activity will be holiday
style on all bands 160-10 meters and possibly 6m if there are openings.
He states that he will be concentrating a bit more on 80/40/30 meters and
of course the other bands including 17/12 meters as conditions allow.
QSL via VE2XB (see QRZ.com for address and details) with SASE and CDN
stamps or 2 IRCs or 2 greenbacks. The postal rates have gone up, so take
that into consideration before you send your QSL card.

KH3, JOHNSTON ISLAND. OPDX has been informed by Susan, W7KFI, that she
has finally received permission from the U.S. Fish and Wildlife Service
(USFWS) on November 1st, to land on Johnston Atoll between November or
December of this year. However, Susan tells OPDX that she would like to
sail there now during "the month of January (late)/early February for
arrival, and with an extension to 10 days." For those who do not know
about Susan -- she is a 76 year old grandmother (her birthday was this
past Friday) who like to operate ham radio and is the Skipper of her own
sailboat called "USSV DHARMA". Check out her Web page at: http://w7kfi.com
Susan told OPDX that she will be sailing alone on this trip. Activity
will be on 40-6 meters and operating CW and SSB, and also RTTY/PACTOR/PSK31
possibly on request. She mentions to us to look for her on 36 kHz above
the lower edge of general bands (Suggested frequencies mentioned 14036,
14236, 18090, 18146, 21036, 21286, 28036 and 28450 kHz). Susan also
states that she will "only answer full callsigns....no one else. Period."
Her radios are an FT847, IC718 and a K3. She states, "Remember, I am
spending a large portion of my social security to do this trip." QSL via
KH6CG, direct or by the Bureau.

LOTW EXPERIENCING DELAYS. The ARRL Web page reported on November 1st: "Due to a large number of radio amateurs uploading their logs to Logbook of The World (LoTW) after last weekend's CQ Worldwide SSB Contest, the ARRL's online QSL verification service is experiencing delays. According to ARRL IT Department Manager Michael Keane, K1MK, there is about a 33 hour wait for logs to be processed. 'Logs are processed in the order in which they were received,' he explained. 'If you have uploaded your log to LoTW, your log is currently queued for processing. It has not been lost in the system. Uploading your log multiple times will only further delay your log and those of others to be processed.'"
THEN ON NOVEMBER 4TH, they report: "The log processing delay for Logbook of The World (LoTW) remains at approximately 60 hours, with approximately 8000 logs queued for processing. PLEASE DO NOT UPLOAD THE SAME LOG MORE THAN ONCE. According to ARRL IT Manager Michael Keane, K1MK, the League has implemented an interim 'fast lane' for processing logs: 'In order to do this, resources have been shifted from servicing interactive requests to the processing of logs. As a result, LoTW users may notice some sluggish performance. Since these changes have been put into place, the number of logs waiting to be processed has been reduced by approximately 20 percent. The expectation is that this new measure will continue to make inroads into eliminating the backlog.'"

OR4, ANTARCTICA. Karel, ON5TN, will once again be staying at the Princess Elisabeth Station (WAP BEL-02) in the Antarctica between November 16th and through the end of February (2012). As nobody is overwintering at the station, it might take some days before Karel gets on the radio as there is a lot of work to do first. QSL via ON5TN. Updates on OR4TN can be found regularly on: http://www.qrz.com/db/or4tn
For more information about the Princess Elisabeth Station, go to: http://www.antarcticstation.org

PJ4, BONAIRE. Hennie, PE1MAE, will once again be active as PJ4/PE1MAE from Bonaire (SA-006, WLOTA LH-1279) sometime this week for the next 4-5 months. Activity will probably be mainly SSB on 40 meters (around 7175 kHz) at 0000z. He will also be on 80 and 20 meters, possibly some other bands. Hennie will specifically be looking for PA and European stations. He will only run 100 watts into a Delta Loop antenna. QSL via PA2NJC, direct or by the Bureau.

PJ5, SINT EUSTATIUS (Update). Just a reminder that Gerd, DL7VOG, will be active as PJ5/DL7VOG from Sint Eustatius Island (NA-145) between November 13th and December 4th. His three week operation will also include the CQWW DX CW Contest (November 26-27th) as PJ5G. Activity will be on 160-6 meters using mainly CW and RTTY, but he will have a microphone with him just in case someone really needs a phone QSO. Operations will be with a focus on the lower bands and listening for JA stations during his sunset and sunrise. As always, Gerd will be using his IC-706MK2G (this time with an amp) into an HF9VX for 80-6m and an inverted "L" (on a 15m fiberglass pole) for 160m. QSL via his home callsign, Bureau is preferred or direct. Bureau E-mail requests can be sent to: qsl@dl7vog.de

4W6A QSL CARDS. Steve, 9M6DXX, 4W6A Team Member, informs that the final proof of the 4-sided QSL has just been received from the printer. The cards should arrive with QSL Manager Tim, M0URX, soon and will then be sent out quickly. Tim reports that he has already processed QSL requests for over 13,000 QSOs - 32% of the total log - in less than six weeks since the end of the DXpedition. There is also a 2-sided version of the QSL (with the same photo on the front) that will be used for bureau cards and for those people who made more QSOs than can be fitted onto the one card. To see what the QSL card looks like, visit: http://www.m0urx.com

A51PN QSLS AVAIALABLE. Glenn, W0GJ/A51B, reported this past week: "Last week when in Bhutan, I met Pradhan, A51PN, who was very active from 1972 to 1983 when he worked in the Wireless Dept. of the Bhutan government. He gave me his stack of log books to digitize and upload to LoTW, about 30,000 estimated contacts. Pradhan is now 73 and in good health and living a quiet retired life. I will be able to answer QSL requests for anyone needing a card for A51PN. He has meticulous notes in his logs about QSLs that were returned."

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 9500 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2010) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1300+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3500+ QSLs)
- Album for stations from Magrebh - 1945 to 1962 (more than 300+ QSLs)
- More than 800 QSLs from the Antarctic bases.
- Nearly 260 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 300 cards from Eparses Islands such as FR/B/E/G/J/T

- More than 1300 cards for the old timer with more than 120 countries before 1945.
- Cards from the French Department before 1945.
- One card from each of the states in the U.S. before 1945.

The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your participation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@free.fr

Ron, AC7DX, reports that ALL CARDS for PJ4/LU1FAM go to LU2FE for this special operation.

QSL RECEIVED VIA LoTW: 4O3A, 6Y5/W1UE, 6Y9X, CE3FZ, ED1DAX, ER1MM, HB0/HB9CVQ, HC2A, J37BO, LN3Z, NP4G, OG0I, OH1XT, PJ2T, PZ5RA, RI1ANC, SK3W, SV0XCC/9, TM6M, TX7M, UA3KW, V44KAI, VE6WQ, WP4SK and ZK2X

QSLS RECEIVED VIA MAIL: 4O3A, 4S7DXG, 5N6/YL2SW, A92GR, C31CT, CE0Y/DK2ZF, D44AC, DS3HWS, E51PMR, ET3BN, FO/N6JA, HC1HW, HC2A, HC2SL, HL5KY, J39BS, KH6SAT, NH0Z, RC0F, RI1FJA, SU1SK, SV1ENG, TI5/KI4TRG, VK0TH, VK9NN, VK9OL, VP2EMR, VR2UW, ZD8D and ZL7VR

QSLS RECEIVED VIA THE BUREAU: OX3KQ

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQWW DX CW Contest (November 26-27th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

V2, ANTIGUA AND BARBUDA. Dan, K6IF, will be active as V25R from Antigua between December 9-11th. Activity will be mainly SSB for the ARRL 10 Meter Contest. He tells OPDX that outside of the contest activity will be limited on 40 and 20 meters after 10 meters closes at night. QSL via K6IF.

V3, BELIZE. Operators Dennis/K2SX and Leslie/W2LK will be active as V31SX and V31AO between November 22-29th. Activity will include the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry (callsign TBD). QSL via LoTW. Their operations outside of the contest will be mainly CW with some RTTY. Look for them on the lower bands and the 30/17/12 meter bands. They will also do some 6 meters, conditions permitting.

V3, BELIZE. Will, AA4NC (W4MR), will be active as V31RR between February 16-26th. Activity will be on CW, SSB, RTTY, and the 30/17/12 bands. His activity will include the ARRL DX CW Contest (February 18-19th). QSL via AI4U.

V4, ST. KITTS. Jon, W5JON, will once again be active as V47JA from the Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hillside QTH located 300 feet from overlooking the Caribbean Sea and Atlantic Ocean, between February 8th and March 28th. Activity will be on 80-6 meters (including 60m) using a Kenwood TS-590S, Yaesu FT-857D, and SB200 Amplifier. Antennas include: a 80-10m Multi-band Dipole, and metal roof mounted S9, 18' and 31' Verticals and 3 element Yagi for 6m. His operations will include the ARRL International DX SSB Contest (March 3-4th), and CQ WPX SSB Contest

(March 24-25th) as a Single-Op/All-Band entries. XYL Cathy (W5HAM) will occasionally operate as V47HAM. ALL QSLs go to W5JON. Also LoTW.

V6, MICRONESIA. Operator Kazuhide "Kazu"/JA0VSH and his XYL Miyuki/JG0PBJ will once again be active as V63KZ and V63MP, respectively, from Phonpei Island (OC-010) between November 7-13th. Kazu will be here on holiday after completing his job mission in Uzbekistan. Activity last time was on 160-10 meters, CW and SSB. There might be some RTTY this time. Kazu is interested in 160m and will use a 500w amp. QSL via JA0VSH, by the Bureau or direct to: Kazuhide Maruyama, 1-25-49 Irima, Chofu, Tokyo 182-0004, Japan.

VE2, CANADA (Zone 2). Victor, VA2WDQ, will be active as VE2EKA from Sept-Iles in Zone 2 during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via VA2WDQ.

XU7 & XV2, CAMBODIA AND VIETNAM (Update/Reminder). Mal, VK6LC, has started his "DX Vacation" from Cambodia as XU7AEO and will be there until November 21st. Activity will be mainly 20 meters using mostly CW with some SSB. From XU7, he will then return once again to Vietnam and will be active as XV2LC from Vung Tau between December 2-8th. He states that this will be a dedicated 30 day "Culture Tour" of Cambodia (XU7) in November and Vung Tau, Vietnam, in December (which all started in October, from 9M2 Malaysia). Activity will be on 20/17/12 meters using CW and SSB. QSL via his home callsign, only direct. He does NOT use the QSL Bureau. Check out QRZ.com for some more details and pictures under VK6LC, XU7AEO and XV2LC.

YB26, INDONESIA (Special Event). Members of the YB Land DX Club (YBDXC) will activate YB26SEAG between November 11-17th. Activity is to celebrate the "26th South East Asia Games" (SEAG) which take place from Jakarta - Palembang, between November 12-22nd. Look for operations to be on all bands and modes. QSL Manager is Hans, YB2DX. QSL direct to: PO BOX 123, PW, 58100, Indonesia.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 6th November 2011

IRTS Committee Meeting

The next IRTS committee meeting will take place on 10th December at 11.00 in Portlaoise. Affiliated clubs are encouraged to send a representative.

Echo Ireland

The latest issue of Echo Ireland will be delivered to members within the next few days. This issue includes updates on the activities of quite a few clubs -including Limerick Radio Club, Lough Erne Amateur Radio Club, Mayo Radio Experimenters Network and South Dublin Radio Club. There is also a report on the recent Northern Ireland HF conference, as well as coverage of the IARU Region 1 Conference.

Recent and upcoming DX activity is well covered by the regular "HF Happenings" column by Anthony EI2KC; in addition, Eoin EI9O writes about working VK9HR, the recent DXpedition to Lord Howe Island. Brian EI8IU relates the experiences of the Shannon Basin club on Inisboffin for the IOTA contest, while John EI7JO covers the Rathlin Island activation for the same contest.

The less popular modes and bands get good coverage in this issue, with articles on operating portable on the 500 kHz band, weak signal communication on the HF bands and, of course, more excerpts from the HX files dealing with ATV and other UHF activities. Jack EI7HO continues with his series on making and operating magnetic loops, while Tony EI5EM talks about "SWR and what it means".

Good News on 500 kHz

During the meeting of the CEPT WRC-12 Conference Preparatory Group held in Bucharest between November 1st-4th 2011 a European Common Proposal (ECP) was agreed. This ECP represents the block vote of 48 administrations and was passed without dissent. It proposes an allocation to the amateur service between 472-480 kHz on a secondary basis with a maximum power limit of 5W eirp.

This ECP will now be forwarded to the ITU as a contribution from CEPT to WRC-12.

The IARU would like to thank the European Member Societies who helped to influence their national administrations in this matter. This is an important step in the IARU efforts to secure a worldwide secondary allocation to the amateur service in the region of 500 kHz at WRC-12

Mayo Radio Experimenters Network

The following is the corrected list of MREN officers:-

Chairperson: Jimmy Kelly EI2GCB Treasurer: Adrian Healy EI2HAB Secretary: Brendan Minish EI6IZ PRO: David Hatfield EI3ECB Newsletter editor: John Corless EI7IQ Rally Director: Padraic Baynes EI9JA IRTS Club Rep: Adrian Healy EI2HAB QSL Manager: Brendan Minish EI6IZ

The MREN Rally would be held on November 20th this year at its now established venue of The Welcome Inn Hotel in Castlebar.

Foyle and District Amateur Radio Rally

The Foyle and District Amateur Radio Club Rally takes place November 6th 2011 at the White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA. Doors open at 12 noon. The usual traders will be present and IRTS will have a stand also on display. Further details from www.mn0aku.co.uk

---

Limerick Radio Club

The next meeting of Limerick Radio Club takes place on Wednesday 9 November at 7.30pm at the Limerick Institute of Technology.

Closed QSL Bureaux

There are 2 new countries that have closed their QSL bureaux, TU .. Cote d'Ivoire and V7.. Marshall Island.

If you work one of these countries then make sure you get the QSL manager or QSL direct. There is no point in sending them to the outgoing bureau as they will only be returned to you.

South Dublin Radio Club

There will be a talk at South Dublin Radio Club on Tuesday 15th of November.

It will be given by Paul O Kane EI5DI, one of the two EI's who took part in T32C DXpedition to Kiritamiti (Christmas Island). All events at the club are open to visitors and we would encourage everyone to

come along to Ballroan community centre on the Marian Road in Dublin.

http://www.southdublinradioclub.ie

DX News

DK9PY will be in Guadeloupe from 6 - 25 November using the callsign FG/DK9PY. He plans to be active on CW on all bands 80 - 10m. Look for him 15 kHz up from the low band edge.

Another expedition to the Caribbean will see three German operators DL8YHR, DL9MS and DL2NUD on the air from Barbados using the calls 8P9DL. 8P9MS and 8P9HP respectively. QSLs go via their home calls.

Ascension Island will see activity by K7ZZ using ZD8ZZ and W6HGF using ZD8F. They will be there from 8 - 22 November using CW, RTTY and some SSB. Logs will be uploaded to Logbook of the World.

The Pacific Island of Tuvalu is the destination of 3 Australian and 3 American operators from 11 November - 8 December. The callsign they will use is T2T and they will be active on all bands 160 - 6m and hope to have three stations on-air when possible. QSL Manager is VK4FW.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1068. [RAC-Bulletin] RAC Bulletin 2011-037E - Jack Belrose VE2CV appointed to Hall of Fame

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-07 04:30:33 UTC

RAC Bulletin 2011-037E - Jack Belrose VE2CV appointed to Hall of Fame
2011-11-06

The Board of Trustees of the Canadian Amateur Radio Hall of Fame
has appointed John S. (Jack) Belrose VE2CV / VE3CVV of Ottawa, ON to
the Hall of Fame. Jack will be presented with this award at a meeting
to be arranged in Ottawa in early 2012, at which time a more detailed
summary of his contributions to +amateur radio will be published in
The Canadian Amateur magazine.

Nominations for the Hall of Fame must be submitted by Sept.
30th annually. The appointment is to recognize an amateur for
outstanding achievement for sustained service to amateur radio in
Canada, or +amateur radio at large.

The Board of Trustees consists of an amateur radio representative
from each province of Canada.

Ed Frazer VE7EF
Chair, Board of Trustees
Canadian Amateur Radio Hall of Fame
Radio Amateurs of Canada

Hi Eric,
The first thing to do is remove the cover of the 142. Then, remove
your tiny little prick from your pants and piss all over the inside.
This must be done while the radio is plugged in and turned on. This
will disable the AGC circuit, you stupid fucking CB'er!

SB DX @ WW < KB8NW $OPDX.1035.1
Ohio/Penn DX Special Bulletin No. 1035.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1035.1
BID: $OPDX.1035.1
November 7, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, 4Z4DX, N7OU and OH2BN for the following DX information.

9N, NEPAL (Update/Reminder). The Mediterraneo DX Club's DXpedition to Nepal will start this week. The international DXpedition team will be on air as 9N7MD between November 12-27th. Operations will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1826.5, 3505, 7005, 10105, 14025, 18075, 21025, 24895 and 28025
SSB - 1840, 3799, 7080, 14200, 18145, 21295, 24950 and 28470
RTTY - 3600, 7040, 10140, 14085, 18100, 21080, 24930 and 28085 kHz
QSL Manager is IK2VUC for direct, by the Bureau or the OQRS cards (see the Web page). The LoTW files will be uploaded by the end of March 2012 (four months after QRT). Activity will also include an entry in the CQWW DX CW Contest as 9N7DX. QSL via 4Z4DX. For more details and updates, visit the "NEPAL11" Web page at: http://www.mdxc.org/nepal2011

E5, NORTH COOK ISLANDS (Update). Bill, N7OU, who is currently active as E51NOU from Rarotonga Island (OC-013, WFF E5FF-002), South Cook Islands, informs OPDX that his flight to Manihiki, North Cook Islands, will now be on November 8th or 9th, "pretty much as planned". Remember, activity will be on 160-10m, CW only, 500w to verticals, with his focus on Europe. His Manihiki, N. Cook Islands, callsign will be E51MAN. QSL via N7OU.

OJ0X DXPEDITION CAME TO AN END WITH 66.000+ QSOs. Press release by Jarmo, OH2BN, from Helsinki, dated November 7th, states (edited):
"With record warm temperatures and calm seas, the last OJ0X sub-group of Timo/OG9X, Olli/OH0XX, Martti/OH2BH and Teemu/SM0W got back to Aland Islands with 10,000 CQWW QSOs in the books, bringing the total to more than 66,000 in the OJ0X log. The updated log search page is now online at <www.qrz.com/db/OJ0X> with the latest pictures to be added soon.
The OJ0X operating team comprised these fourteen (14) operators: Salvatore/DH7SA, Dietmar/DL3DXX, Frank/DL5CW, Timo/OG9X, Olli/OH0XX, Juha/OH1ND, Pekka/OH1TV, Miika/OH2BAD, Martti/OH2BH, Ilmo/OH2BO, Tapani/OH5BM, Teemu/SM0W, Rick/SM6U and Robert/SP5XVY.

While the gang experienced all kinds of weather in fighting for their
landings and departures, they were satisfied in being able to catch some
good high-band openings, offering OJ0 on those bands and modes for the
first time. They managed the four weeks without a glitch among the rotating
groups.
Here, they offer a score card listing those with the highest number of
band points in various geographical areas, such as Japan: JA6BZI and
JA4DND (21) and JA4EPE, JR4FYW and JA0FSB (19). In the United States, top
honors go to K5EK (17) followed by W4CHA, W4DXA and N8RR. The U.S. West
Coast is led by W7AL (11), followed by N6ED (10). In Europe, OK2PAY and
LZ1NG are credited with 23 band points, followed by EA1SB and ON7GB (22)
and DF3QG and PA1PVH (21). Oceania's best score (15) comes from VK7ZE
and South America's from YV8AD (13).
All in all, OJ0X contacted 26,873 individuals, and 141 stations made it
on all 9 bands offered.
The background team offering help and performing several support
functions consisted of:
Mario/9H5QB, Nigel/G3TXF, Jarmo/OH2BN, Pertti/OH2PM, Harri/OH6VM,
Tore/SM0DZB, Vlad/UA6LV and the boat captain, Mats Sjostrom, plus the
Finnish Lighthouse Society's chairman, Pekka Vaisanen, and Market Reef
chairperson, Angela Eriksson, who did their utmost to make everything
jell.
If you are interested in operating from Market Reef in 2012, you may
contact Pekka or Angela for more information at:
http://www.majakkaseura.fi/eng/market
Harri, OH6VM/OJ0VM, is also offering you a complete tour of the light-
house facilities at: http://www.oh6vm.org/market
OJ0X QSL cards are available from OH2BH in December and soon via LoTW."

NZART Headquarters Infoline Special Issue 29s

08 November 2011

Call Book 2011/2012 and Membership Drive

>From the President

There have been two matters that have been in the pipeline –
namely a Membership Drive and a Call Book for this year. Both were
dependent on obtaining data from RSM that is accurate and useable.

In order for a Call Book to be ready for delivery with the December
issue of Break-In the Call Book editor needed this data by 7th November.
Consequently, as the data from the Smart system hasn't been
received by him in time, we will have to reluctantly cancel the Call
Book for this year.

Likewise for the membership drive. Accurate data is necessary so that we
can compile a list of non-members who would be approached to join. As a
result, the membership drive has also been called off.

Both of these cancellations are regrettable – but are outside
the control of your headquarters as well as your Council.

I hope that you all have a really enjoyable Christmas with plenty of
time to enjoy family and friends – and that 2012 will be good to
you and yours.

Roy Symon, ZL2KH

President, NZART (Inc).

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5R, MADAGASCAR, AF-013
F6ICX plans to show up as 5R8IC again between Nov 15 and Dec 17.
QSL via homecall.

5Z, KENYA
Sig,NV7E/ZS6SIG, plans to be active as 5Z4EE from Kenya until 2014.
QSL via NV7E.

9G, GHANA
Mark,W8MP, is a pilot and travels to Accra regularly for one to four
days. He is working as 9G5MP during his spare time then. See QRZ.com.
QSL via homecall.

9K, BAHRAIN, AS-002
9K7ACW will show up on HF signing A92KT from Bahrain. QSL via homecall.

9N, NEPAL
Members of the MDXC are going to become active as 9N7MD from Nov 14-24.
They will work with four stations in SSB/CW/RTTY all around the clock.
QSL via IK2VUC. The log will be uploaded to the LoTW four months after
the DXpedition, OQRS as well after the DXpedition has ended.
See also their website: http://www.mdxc.org/nepal2011

A6, UNITED ARAB EMIRATES
Ulli,A6/DL9WVM, will stay in Mirdif/Dubai again for three weeks. Though
his activity is restricted by his work and his family, he wants to
focus on 10m/12m. The next flights for March/April 2012 have been
booked already. QSL via homecall.

CN, MOROCCO
Francois,ON4LO, is working as CN2LO and CN2LO/m on 40m-10m between
Oct 15 and Dec 20. QSL via ON4LO.

D4, CAPE VERDE, AF-086
Luca,IK2NCJ, is expected to show up as D44TAL on the HF bands from
Sao Vicente Island (AF-086). QSL via IZ4DPV.

E5, NORTH COOK ISLANDS, OC-014
Bills,N7OU/E51NOU flight to Manihiki (OC-014) in the North Cook Islands
has been postponed until around Nov 10/11.

E5, SOUTH COOK ISLANDS, OC-013
OZ6TL is working as E51TLA on the HF bands from Rarotonga (OC-013).
QSL via bureau, homecall or LoTW.

EA, SPAIN
The Volvo Ocean Race 2011/12 has started on Oct 29. The special event
station EG5VOR is active on the bands for this reason. QSL via EA5KB.

G, ENGLAND, EU-005
The Caddington Scout and Cub group are holding a communication week
starting on Nov 14. They will work as GB1CSC from Caddington Scout HQ
in Caddington/Bedfordshire. The QSL route can be found on QRZ.com.

HB9, SWITZERLAND
The special event station HB9STEVE remembers Steve Jobs, the founder
of Apple, mostly in CW and some SSB in November. QSL via HB9DHG & LoTW.

KH2, GUAM, OC-026
JR1VAY will be QRV as AH2J (OC-026, USI GU003S/WFF KFF-110/WLOTA 0064)
from Nov 11-14, including the JIDX SSB Contest and WAE RTTY Contest.
QSL via homecall.

LA, NORWAY
Lars,LA2RRA/mm, is the ship's cook of "M/S Nordstjernen" (IMO 5255777,
under the Norwegian flag, callsign: LATU), a cargo ship which was built
in 1956, modernized in 1980 and is now used for passenger transport on
the old route to the archipelago of Svalbard (JW). Lars is working
with an IC7000 HF during his spare time. QSL via bureau.

OK, CZECH REPUBLIC
The special event station OL60OU is working from Nov 1-30 to mark the
60th anniversary of the first teaching of engineering in the middle
vocational school in Unicov. QSL via OK2BMI.

ON, BELGIUM
Since 1981 the radio club "ONZ Knokke" celebrates the liberation of
their city by the Canadian Army in 1944. This year they are activating
the special callsign ON30CLM until Dec 31. CLM stands for Canadian
Liberation March. QSL via ON3AIM. See also: http://www.on4clm.be

PJ4, BONAIRE, SA-006
Hennie,PJ4/PE1MAE, is working from Bonaire (SA-006) for the next four
or five months. QSL via bureau to his homecall or direct via PA2NJC.

PJ5, ST EUSTATIUS, NA-145
Gerd,PJ5/DL7VOG, will show up from St Eustatius (NA-145) working on
160m-10m (and 6m if the band opens) between Nov 13 and Dec 5. Gerd will

use the callsign PJ5G during the upcoming CQ WWDX CW Contest. His rig
includes an IC-706MK2G, a 500 watts amplifier, a HF9V and an Inverted L
for 160m. QSL via homecall, bureau preferred but also direct or via
e-mail request to: qsl@dl7vog.de Web: http://www.dl7vog.de

T2, TUVALU, OC-015
A DXpedition is planned to sign T2T from Tuvalu (OC-015, Grid: RI91ol)
in CW, SSB, RTTY and PSK31 on 160m-6m from Nov 10 until Dec 5.
Due to limited baggage weight they have many antennas but only two
Elecraft K3 and KPA500 with them. QSL via VK4FW.
More information can be found on: http://www.t2t.pacific-dxers.com

V6, MICRONESIA, OC-010
Kazu,JA0VSH, has finished his operation in Uzbekistan and spends his
holidays with his wife on Pohnpei Island (OC-010). They will sign
V63KZ and V63MP from Nov 7-13. QSLs via JA0VSH.

VK0/M, MACQUARIE ISLAND, AN-005
Kevin,VK0KEV, went QRT and is back home but Trevor,VK0TH, will stay
on Macquarie Island.

XU, CAMBODIA
Mal,VK6LC, is signing XU7AEO on a "DX holiday" and is working mostly
in CW and little SSB mainly on 20m until Nov 21.
QSL via homecall, unfortunately only direct.

XV, VIETNAM
Kurt,DL5CO, will be QRV as XV2CO during his holiday in Vietnam from
Nov 12 until Dec 5. He is using the shack of a local HAM who is active
on all HF bands. Kurt prefers CW but also works in SSB sometimes.
QSL via homecall.

YB, INDONESIA, OC-021
The special event call YB26SEAG will be QRV during the "26th SEA Games"
from Nov 11-17. The OPs of the YB Land DX Club (YBDXC) will work in all
modes on all bands.
QSL via bureau to YB2DX or direct via PO Box 123, PW 58100, Indonesia.

LoTW: Please expect some delays during the processing of about 8000 WWDX SSB
contest logs.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 12-13: WAE DX Contest RTTY
Nov 12-13: JA International DX Contest
Nov 12-13: OK/OM DX Contest CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-191, HZ, Red Sea Coast Centre: 7Z1CQ, 7Z1AQ, 7Z1SJ, HZ1BT, HZ1BW, HZ1DG,
HZ1DS, HZ1HN, HZ1MD and HZ1TL are going to hit the airwaves as 7Z7AA
from Jabal Al Lith Island from Nov 17-25. This is a new IOTA group!
QSL via 7Z1CQ (bureau/direct/LoTW).

AS-193, HZ, Farasan Islands: Mohamad,HZ1MD, and his family are staying on
Farasan Island until Nov 11. He works as HZ1MD/p on the HF bands
during his holiday. QSL via EA7FTR.

EU-114, GU/MU, Guernsey group: Depending on the ferries Ron,G4DIY, and
Lee,G0DBE, plan to show up as GP0STH on 10m-40m from Guernsey Island
on Nov 10/11. QSL only direct via G4DIY (direct/LoTW).

EU-125, OZ, Jylland West group: Dirk,DF3XX, is signing OZ/KH6DXX from Romo
on the HF bands until Nov 11. QSL via DF3XX (bureau/direct).

SA-040, HK1, Bolivar/Atlantico Division group: Paco,HK1/EA7ATX, is working
from Tierrabomba Island (WLOTA 0296, ARLHS COL-052) in SSB on 10m-80m
from Nov 17-20. QSL via EA7ATX.

NOT IOTA: VE3ISE will be QRV from Grand Island Dunnville Ontario (CISA:
ON-107) on Nov 12. He plans to work on 7055 kHz from 1600-2000 UTC
and if the propagation allows also on the IOTA QRGs on 10m-20m.
QSL via VE3ISE (bureau/direct).

QSL A51PN: While visiting Bhutan Glenn,W0GJ/A51B, has met Pradhan,A51PN, who
was very active from 1972-1983. Glenn has received the logs with about
30.000 QSOs for digitization and subsequent uploading to the LoTW.
Pradhan is now 73 years old and lives quietly and withdrawn.
If you still need a QSL of A51PN, please send your card direct to the
CBA of W0GJ.

QSLs arrived direct: ZD8D, YB3XM, 4J0WFF, 7Z1HL

QSLs arrived bureau: LZ0I (LZ1BJ), SE7M/LH (SM7GUY), TO3GA (DL3GA),
VU3RYO (DL2JRM), ZM4T (ZL2AL), 9UXEV (DL3KBQ),
9X0SP (DL7DF), 6W1SJ (E73Y)

QSL Gallery

The large QSL collection "Les Nouvelles DX" (http://www.LesNouvellesdx.fr)
has now galleries with more than 9.500 QSLs.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV,
DJ9ZB, DL1MDV, DL1SBF, DL3IE, DL7MAE, DL7VOA, DL7VOG, DL8UI, DO3ME,
F6AJA & Les Nouvelles DX, NG3K and others.

1081. Weekly Highlights of Solar and Geomagnetic Activity, 31 October - 06 November 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-08 22:30:05 UTC

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
31 October - 06 November 2011

Solar activity was low to high. Activity began at moderate levels on
31 October with two M1 flares. The first, which was associated with
a coronal mass ejection (CME), occurred at 31/1508 UTC and the
second was a long duration flare at 31/1808 UTC, both from regions
that had not yet rotated onto the visible disk. Low level activity
occurred on 01 November from newly visible Regions 1338 (S14, L=121,
class/area Ehi/375 on 03 November) and 1339 (N19, L=102, class/area
Fkc/1540 on 04 November). Moderate level activity returned on 02
November due to an M4/Sn long duration flare at 02/2201 UTC from
Region 1339. On 03 November, activity increased to high levels when
beta-gamma-delta magnetic configuration Region 1339 produced an
X1/2b flare at 03/2027 UTC associated with a 620 sfu Tenflare. In
addition, the Region produced two M-class flares, an M2/Sf at
03/1111 UTC and an M2/1n at 03/2336 UTC. Activity returned to
moderate levels for the remainder of the period with Region 1339
producing six M-class events between 04 - 06 November, the largest
flare being an M3/1f at 05/0334 UTC.

A greater than 10 MeV proton enhancement began at about 04/0100 UTC,
peaked at 3.6 pfu at 04/0905 UTC and decayed to background levels by
midday on 05 November. The source of this enhancement was unknown.
Proton flux gradually returned to background levels during the
remainder of the period.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels on 31 October - 02 November and normal to moderate
levels 03 - 06 November.

The geomagnetic field ranged from quiet to severe storm levels. On
31 October, an active period was observed near the time solar wind
speed at ACE peaked at 450 km/s due to the effects of a favorably
positioned coronal hole high speed stream (CH HSS). On 01 November
```

at approximately 0817 UTC, a shock arrival was observed at the ACE spacecraft and a sudden impulse (SI) of 18 nT was observed on the Boulder magnetometer at 01/0907 UTC. This transient passage brought geomagnetic activity up to severe storm levels at high latitudes and active to minor storm levels at mid latitudes. Persistent effects from the coronal transient carried over into 02 November with quiet to active levels and minor to major storm periods at high latitudes. Quiet activity prevailed on 03 - 06 November.

Forecast of Solar and Geomagnetic Activity
09 November - 05 December 2011

Solar activity is expected to be at predominately low levels through the period. M-class activity is likely from 07 - 14 November with a slight chance for X-class activity all due to the complex nature of Region 1339. M-class probabilities decrease to a slight chance from 15 - 23 November, with a less than 10 percent chance for X-class activity after Region 1339 departs the visible disk on 14 November. Region 1339 is projected to return on 24 November, raising M-class probabilities for the remainder of the period.

A slight chance for a proton event exists from 07 - 14 November due to the complex nature of Region 1339. Proton event probabilities decrease after Region 1339 departs the visible disk on 14 November. Probabilities will increase slightly on 24 November when Region 1339 is projected to return if it remains as magnetically complex as it is this rotation.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the entire forecast period.

The geomagnetic field is expected to be generally quiet levels for the majority of the period. Quiet to unsettled levels are expected from 11 - 12 November due to a small, recurrent CH HSS and a weak CME observed on 08 November in association with a disappearing filament. Mostly quiet conditions are expected from 13 - 25 November. Quiet to unsettled conditions are expected on 26 - 27 November due to a recurrent CH HSS followed by a return to quiet levels for the remainder of the period.

1082. The ARRL Contest Update for November 9, 2011

Newsgroup: rec.radio.amateur.misc

NEW HF OPERATORS - THINGS TO DO

After a weekend of CQ WW slam dancing followed by the CW Sweepstakes,
you could be forgiven for taking a weekend off! But then get those
vocal cords ready for Phone Sweepstakes and the CW version of CQ WW.
And do make sure you have plenty of envelopes at the QSL bureau!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The right name for NO3M is Eric, not Ty. (Thanks, Bill WY3A)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Nov 12-13

- CWops Monthly Mini-CWT Test (Nov 9)
- Worked All Europe DX Contest--Digital
- 10-10 Fall Digital QSO Party
- Japan International DX Contest--Phone
- OK-OM DX Contest--CW
```

- Kentucky QSO Party
- CQ WE (Western Electric)

Nov 19-20

- ARRL EME Contest
- ARRL November Sweepstakes--Phone
- Collegiate ARC Championship--Phone
- SKCC Weekend Sprintathon--CW (Nov 17)
- NAQCC Monthly QRP Sprint--CW
- Mongolia DX Contest
- LZ DX Contest
- Feld-Hell Turkey Shoot Sprint
- All Austria 160 Meter Contest--CW
- RSGB Second 1.8MHz Contest--CW
- Homebrew and Oldtime Contest--CW
- Run For the Bacon--CW (Nov 21)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Your editor thoroughly enjoyed making off to KP4 for an incognito adventure in the CW Sweepstakes as NP4DX with ARRL Contest Branch Manager, Sean KX9X. Thanks to local KP4 hams KP4WW, WP3R, and WP3MW for their hospitality and assistance!

Claimed scores in the 2011 CQ Worldwide Phone contest shot through the roof compared to last year. In their many reports on the 3830 score-posting website <http://lists.contesting.com/_3830/2011-11/index.html>, operators report terrific openings on the higher bands and many more QSOs at higher rates than in recent memory. The number of submitted logs already exceeds 4000 just a few days after the contest - welcome back sunspots!

ARRL Sweepstakes Manager, Larry K5OT observes after encountering a few stations omitting their call signs from the Sweepstakes exchange, according to Sweepstakes rule 4.3 you must include your full call sign in the exchange. Leaving it out throws off the other station's copying rhythm and may cause requests for fills that waste time, plus you lose a "free" CQ for stations tuning by. Make sure your logging software includes the call sign as part of the exchange to be sent and also that the information is sent in the recommended order: number, precedence, call, check, and section. Get your SS CW log submitted <http://www.arrl.org/log-submission-instructions> and focus on the Phone weekend - there are already more than 750 logs submitted. Send yours in no matter what size...they are all important!

The ARRL 10 Meter Contest <arrl.org/10-meter> will be written up starting with the 2011 edition by new author, Scott Tuthill K7ZO. Given the wildly improved conditions, Scott will have plenty to write about after the dust settles in December. Scott is one of the crew at the Oregon super-station of NK7U that is featured in the latest National

Contest Journal. Breaking new ground already, Scott is in the final stages of completing a novel "pre-writeup" that will be posted on the contest's ARRL web page <http://arrl.org/10-meter>in a few days!

Icom <http://www.icom.co.jp/> - the prime plaque sponsor for ARRL Sweepstakes - is also sponsoring a different sort of contest this coming weekend. The first D-STAR QSO Party <http://www.icom.co.jp/world/d-starparty2011/> will run from Nov 11 through the 13th and emphasizes the worldwide connections afforded to handheld users anywhere within range of a D-STAR repeater.

Dave K5GN sent a link to a great story <http://www.frontiersman.com/articles/2011/10/30/local_news/doc4eacec3a63a91950785002.txt> about a 99-year-old ham in Alaska, Arlene "Buddy" Clay KL7OT. She originally moved to Alaska in 1944 with her husband Earl, KL7EM (SK) to be part of the Civil Aviation Authority's communications system. The CAA (predecessor to the FAA) set up teams - usually a husband and wife - to operate radio stations so that pilots could stay in contact with the ground as they flew over uninhabited areas. (Thanks, Dave K5GN)

The Contesting Wiki <http://wiki.contesting.com/> continues to grow and contains a wide source of hints, tips, kinks, and narrative. This is a great resource for those learning about radiosport. For those more experienced in the ways and means of contesting, consider lending some of your expertise to the site, as well! (Thanks, Hans K0HB)

Assisted by amateur radio, the British APEX team <http://hackaday.com/2011/10/23/beating-the-wrong-amateur-balloon-record/> managed to set several ballooning records although the record for altitude remains a bit out of reach. Not quite a ham radio record, but I think we can all enjoy the achievements of other amateur endeavors and hams were right there along the way, helping track the balloon almost all the way to its eastern landing in Poland or Russia.

In the realm of sunspots and stocks, no prediction is too flaky not to get some attention so it seems inevitable that a correlation between the two would eventually be proposed. A close look at the data <http://www.rickferri.com/blog/strategy/sunspots-and-market-prediction/> by Robert Ferri finds little of actual merit to the claim but the process of analysis makes for a good read. (Thanks, Mark K6UFO)

The latest EDN Ham Radio Today <http://www.edn.com/article/519742-Ham_radio_in_the_21st_century.php> column by Doug K1DG is a good survey of the amateur service for technical folks. You might want to bookmark this page for future reference when someone asks, "Do you still do that?"

Web Site of the Week - Could it be cool again to be a hands-on tinkerer? A recent Christian Scientist Monitor article <http://www.csmonitor.com/Innovation/Tech/2011/1101/Maker-Faire-Mad-science-for-the-masses> about the "Maker" movement - also known as Do-It-Yourself (DIY) - is

attracting a lot of kids to the workbench. Corporate America is noticing, with tools and parts selling well. Ham radio, being intensely hands-on, would seem to be a natural part of the DIY world - if only we can bring ourselves to participate in it! Look for a "Hackerspace" near you - or is that "Shackerspace"?

WORD TO THE WISE

Here are some various bits of homespun ham wisdom -

"QRP - when you care enough to send the very least (W4QO)"
"Aren't you glad you use QSK? Don't you wish everybody did?" (K8MP)
And not wanting to pass up the opportunity to chime in, "Not zero-beating stations means beating zero stations," by your editor.

==> SIGHTS AND SOUNDS

Craig K9CT is building what looks to be a spectacular contest station in the fields near Peoria, IL and you can take a tour in this YouTube video <http://youtu.be/BDheZj3bMOo> shot from a lofty perspective, indeed! You may remember a story about an accidental encounter between a concrete truck and the guy wires for the VHF+ tower but all has been repaired as you can see here. (Thanks, Ken WB9REQ)

A recent story about amateur rocketry garnered lots of attention and the project leader, Derek Deville, has been interviewed <http://interviews.slashdot.org/story/11/10/11/1451219/ask-derek-deville-about-high-altitude-amateur-rocketry>
about his activities on the Slashdot website. If you think this sounds like high-performance radio, you're not alone!

You may have heard HB9STEVE on the air over the weekend, honoring the memory of tech pioneer Steve Jobs. As this Computerworld video <http://www.computerworld.com/s/article/9221185/Video_Steve_Jobs_one_on_one_the_95_interview?pageNumber=2>
shows, Steve has something in common with many hams in his appreciation of Heathkit, discussed about five minutes into the interview. (Thanks, Peter AC7SB)

==> RESULTS AND RECORDS

VY1EI put a lot of smiles on Sweepstake operator faces last weekend - you can read all about Eric's experience in his post-contest writeup <http://lists.contesting.com/archives/html/3830/2011-11/msg00679.html> from the 3830 reflector. It's not all peaches and cream being sought after by a horde of stations! Way to go, Eric! The 3830 archives make great reading, by the way. (Thanks, Steve N2IC)

The question of how speeds are measured in the High-Speed Telegraphy (HST) competitions was recently answered by Barry W2UP. "HST CW speeds are in characters per minute. This differs from both PARIS (which is still used in RUFZ) and WPM...250 CPM is equivalent to 60 WPM letters, 89 WPM figures, and 72 WPM Mixed characters. They differ because all

figures are 5 dits/dahs long, while other characters vary in length and an average is used...it's a linear scale and you can extrapolate any other values using the ratios of CPM to WPM above."

Dink N7WA has fired up the online Soapbox comment collector <http://www.eskimo.com/%7Emwdink/3830/> for CQ WW and CW Sweepstakes. Valery R5GA has also launched his CQ WW Claimed Scores website <http://pileup.ru/cqww_ssb.php?year=2011> with lots of sorting and searching functions - enjoy!

OPERATING TIP

Keep an eye on that VFO - too many US call signs are heard out-of-band during CQ WW Phone, particularly when working stations operating split on 40 meters!

==> TECHNICAL TOPICS AND INFORMATION

How to get that deeply-buried PL-259 loosened? With so many cables and connectors packed into a station, it can be almost impossible to turn the shell of a PL-259 in the midst of a packed panel. Several readers have contributed ideas but the best I found involve a tool for the purpose. Mike W3MC and Mark N1UK recommend the Knipex "Micro Cobra <http://chadstoolbox.com/8701125knipexmicrocobra.aspx>" style pliers, nylon-jawed if you can find them. Your editor has found that heavy-duty spark plug boot pullers <http://www.amazon.com/OEM-25542-Spark-Plug-Pliers/dp/B0014WIUQY> also work and are available at a local auto-parts store. These can turn not only the UHF shells but N, BNC, and even F!

Tree N6TR has been fixing his Tailtwister with a new-style brake wedge. He developed this handy how-to guide <http://www.kkn.net/%7Etree/How%20to%20install%20the%205149320%20Tailtwister%20Brake%20Wedge%20assembly.pdf> for other rotator repair-ers.

This isn't a guaranteed engineering solution but if you are considering screw-in guy anchors for a tower and aren't sure which type is the correct type, Mike NF4L suggests asking what the local telephone and electric companies are using to hold up power poles. They will have already done considerable work to assess local soil conditions and selected the right model.

If you're tired of chasing the footswitch around under the operating desk, try a switch guard such as this Linemaster model <http://www.linemaster.com/Industrial/Accessory.aspx?catNo=AccessoriesGuards>. It holds the switch under your foot and the whole assembly can be moved around for comfort. (Thanks, Steve K6AW)

If you live in a location where ice can build up on your guy wires, watch out for melting ice sliding down into the Preform Big Grips - they can be knocked loose by a big enough impact! Dave W6NL suggests placing a small hose clamp around the end of the grip - this prevents

the grip from loosening due to an impact.

A recent Analog Dialogue <http://www.analog.com/library/analogdialogue>
article has possibilities in the SDR and test equipment world - the
circuitry for a sampling front-end
<http://www.analog.com/library/analogdialogue/archives/45-11/soundcard.html?utm_source=cheetah&utm_medium=email>
that uses a PC sound card to create a high-speed signal digitizer.

By studying how jump ropes bend in the wind, Princeton mechanical
engineers Jeffrey Aristoff and Howard Stone also came up with a
mathematical model
<http://news.sciencemag.org/sciencenow/2011/11/jumping-rope-by-the-numbers.html?ref=hp>
for how antennas and other flexible things are affected by air flow.
Now for a double-dutch dipole!

Technical Web Site of the Week - Now we know why high-pitched QRM
(phone or CW) is more annoying than low-pitch rumbling. A recent story
<http://news.sciencemag.org/sciencenow/2011/10/cover-your-ears.html?ref=hp>
in Science about fingernails on chalkboards (just the words make me
cringe) explains that it is the high-pitched tones do the dirty work.
If filtered out, the sounds are not nearly as aggravating. Time to
reach for that passband shift control!

==> CONVERSATION

Power Surge

It has been a LONG time since we have experienced HF contest conditions
like those during the past two weekends of CQ Worldwide Phone and ARRL
November CW Sweepstakes. Little Pistols and those of you new to HF -
wasn't that fun? Techs, you've doubtless grown weary of the "no meters
like 10 meters" nostalgia, surely thinking the pie-eyed old-timers must
have been making it up. Well, we may have gotten a little soggy with it
at times but now you know why! The long-suffering 10 meter operators at
the multi-multi stations must have felt like having been released from
the years of silent suffering immersed in receiver hiss and little
else.

Looking back through my old logs, 2005 and 2006 were the last years
for which there were extended, worldwide openings on 10 meters and the
band was clearly in decline by that point in the cycle. 15 held in
there for another year but soon HF contesting became a question of who
could hold a frequency on 20 meters or stay up all night doing low-band
battle. Roaring back to life earlier this year, though, sunspot cycle
24 has pumped adrenaline into contesters and RF into antennas around
the globe. If I were an alien outpost monitoring the Earth on HF, I
would think the planet is undergoing some kind of euphoric
electromagnetic eruption every week or so...well, aren't we?

During Worldwide, stations packed the 10 meter band well above 29 MHz
with good rate to be had. QSOs were even reported on 10 meter FM - it
IS a phone contest, after all! 15 meters and 20 meters were full and

busy at the same time. The decision wasn't which band was open but which band offered the highest point value, adding a whole new aspect of strategic challenges. During the CW Sweepstakes, conditions may have been TOO good - with so much activity on 17 and 12 meters, casual stations may have found the smorgasbord of DXing too attractive to stay with just one contest!

Combined with the near global ubiquity of spotting networks, the contest environment has suddenly switched from famine to feast as the networks dispense data at dazzling densities that a single-op just can't hope to keep up with. Watching the spots gush down the screen, I felt like I was watching the radiosport equivalent of the Matrix. With so many stations spotted so widely, the difficulty is not going to be pouncing on each spot but deciding which of the spots to ignore. All of the technology that has been deployed in order to acquire and broadcast information on a scarcity of stations now finds itself saturated at its input. How do we manage too much information instead of not enough? Combine that with an SDR-type display and you will be able to hear the neurons frying!

As an aside, I noticed a great deal of contest-related chatter on Facebook during the CQ Worldwide weekend. I'm sure there was plenty as well on Twitter and other social sites, including chat rooms and similar ham-focused groups. Remember that contest activity - meaning the communication of call signs and exchange information - is restricted to those six bands from 160 through 10 meters. Your posts shouldn't give the game away by providing information about where you're operating, when you're operating or going to operate, or what information you're handing out on the air. It's unreasonable in today's always-connected world to expect contesters to "go dark" during the competition - post if you must - just make sure the competing goes on "between the lines".

Another thing I've noted is that good conditions have a multiplier effect on activity - along with providing more multipliers, of course. The relationship between sunspot activity and the radiosport BIC Coefficient (Butt In Chair) is quite non-linear. The new ARRL 10 Meter Contest writeup author, Scott Tuthill K7ZO, shows this pretty clearly in his upcoming "pre-writeup" article mentioned earlier. With contacts abundant and attainable by the modest station, more operators find it easy to put in more hours in front of more radios. As the reported record scores attest, good conditions are making it possible to contact many new call signs around the world previously hidden by propagation. For example, the K3LR team logged 30% more contacts than the old multi-multi record by KC1XX from 1999. The blooming of ham radio around the world over the past decade is going to bear significant fruit.

So we have more hams on more bands making more contacts from more places - what's not to like? With the possible exception of the low-band specialists, we should all be pumped up about the next few years of great radio action. With all this great equipment and antennas

and so many more hams today, we are surely writing the story of the Good New Old Days with each contest. Say, what's that hot smell coming from the ionosphere? Power surge, anyone?

73, Ward N0AX

==> CONTESTS

9 November through 22 November

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Worked All Europe DX Contest--Digital, from Nov 12, 0000Z to Nov 13, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see web for QTC rules). Logs due: Nov 28. Rules <http://www.waedc.de/>

10-10 Fall Digital QSO Party--Digital, from Nov 12, 0001Z to Nov 13, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Nov 28. Rules <http://www.ten-ten.org/>

Japan International DX Contest--Phone, from Nov 12, 0700Z to Nov 13, 1300Z. Bands (MHz): 3.5-28. Exchange: RST and JA prefecture or CQ Zone. Logs due: 30 days. Rules <http://jidx.org/>

OK-OM DX Contest--CW, from Nov 12, 1200Z to Nov 13, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or OK/OM district. Logs due: Dec 1. Rules <http://okomdx.crk.cz/>

Kentucky QSO Party--Phone,CW,Digital, from Nov 12, 1400Z to Nov 13, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

CQ WE (Western Electric)--Phone,CW,Digital, from Nov 12, 1900Z to Nov 14, 0500Z. Bands (MHz): 1.8-28, 50-440. Exchange: Call, name, Bell QTH, yrs of svc (see web). Logs due: Dec 1. Rules <http://cqwe.cboh.org/>

SKCC Weekend Sprintathon--CW, from Nov 13, 0000Z to Nov 13, 2359Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the second Sunday. Exchange: RST, S/P/C, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

NAQCC Monthly QRP Sprint--CW, from Nov 17, 0130Z to Nov 17, 0330Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

Mongolia DX Contest--Phone,CW, from Nov 19, 0000Z to Nov 20, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T) and CQ Zone. Logs due: Dec 31.

Rules <http://www.qsl.net/jt1kaa/radiosport.html>

LZ DX Contest--Phone,CW, from Nov 19, 1200Z to Nov 20, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and ITU Zone or LZ district. Logs due: 30 days. Rules <http://lzdx.bfra.org/>

Feld-Hell Turkey Shoot Sprint--Digital, from Nov 19, 1600Z to Nov 19, 1800Z. Bands (MHz): 3.5-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 5 days. Rules http://www.feldhellclub.org

All Austria 160 Meter Contest--CW, from Nov 19, 1600Z to Nov 20, 0700Z. Bands (MHz): 1.8. Exchange: RST, serial, OE district. Logs due: Dec 31. Rules <http://www.oevsv.at/>

ARRL November Sweepstakes--Phone, from Nov 19, 2100Z to Nov 21, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL sec. Logs due: Dec 6. Rules <http://www.arrl.org/contests>

Collegiate ARC Championship--Phone, from Nov 19, 2100Z to Nov 21, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Dec 6. Rules <http://www.collegiatechampionship.org/rules/>

RSGB Second 1.8MHz Contest--CW, from Nov 19, 2100Z to Nov 20, 0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due: Dec 5. Rules <http://www.rsgbcc.org/hf>

Homebrew and Oldtime Contest--CW, from Nov 20, 1300Z to Nov 20, 1700Z. Bands (MHz): 3.5-7. Exchange: RST, serial, and category. Logs due: Dec 20. Rules <http://www.qrpcc.de/contestrules/hotr.html>

Run For the Bacon--CW, from Nov 21, 0200Z to Nov 21, 0400Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital, from Nov 19, 0000Z to Nov 20, 2359Z. Bands (MHz): 50-1296. Exchange: Call signs, sig rpt, acknowledgement. Logs due: Dec 20. Rules <http://www.arrl.org/contests>

Kentucky QSO Party--Phone,CW,Digital, from Nov 12, 1400Z to Nov 13, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

CQ WE (Western Electric)--Phone,CW,Digital, from Nov 12, 1900Z to Nov 14, 0500Z. Bands (MHz): 1.8-28, 50-440. Exchange: Call, name, Bell QTH, yrs of svc (see web). Logs due: Dec 1. Rules <http://cqwe.cboh.org/>

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-11-09
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Meteor Scatter: November 2011 - Enhanced activity from Leonids **

Leonids meteor shower may produce enhanced rates, with several peaks
in 2011. The encounter with ancient dust trails will produce some
faint meteors maxima superimposed to normal Leonids activity.
According to reserachers, ZHR enhancement may range from 10 to
200 hr-1. Have a look to shower predictions for November 2011 at
our MS-Propagationpage: http://www.mmmonvhf.de/ms.php

** VK3UM Software UPDATE 9th Nov 2011 **

All of my Software programs have been updated to provide,
(automatically), full directory access rights. This will
overcome Vista and Win7 'default condition issues'. In
addition all programs now retain the last used Desktop
position and size. They still retain the full user full

screen size option (square Windows button) and this latest
option allows for retention of position and size as last used
(all are sizable), on your Desktop. Just download to update
if you wish.http://www.vk3um.com

** DX Operation: Ascension Island (II22TB) **

Tom, K7ZZ (ZD8ZZ) and Al, W6HGF (ZD8F) will be active from Green
Mountain, Garden Cottage (WW Loc. II22TB), Ascension Island (IOTA
AF-003, WLOTA 1491), from 7-22 November, 2011. Tom will focus on CW,
and Al will focus on RTTY; both will operate SSB at times. There
may be some 6 metre opening opportunity. It appears that there is
no internet available for us on the mountain. QSL via home calls,
direct only. Logs will be uploaded to LoTW. Logsearch and QSL info
available at: www.qsl.net/w6hgf/ZD8F-index.html
SOURCE: [W6HGF] via ICPO Bulletin (04-11 November 2011)

** C21AA - Nauru (IOTA OC-031, Grid Loc. RI39) Expedition **

10th November thru to 6th December, 2011 - It is possible that he
will be on the air in a limited manner prior to the official launch

date. They expect to have 6 operators and 3 stations active on all bands 160-6m, CW/SSB/RTTY/PSK31. A dedicated station will be setup on 6 metres running in interupted beacon mode. The team will participate in the CQ WW DX Contest as a M/M or M/2 entry. Operators include Eddie VK4AN, Bill VK4FW, Eric VK4NEF, Art NJ7N, Jay W5SL and Tim NL8F. QSLing will be handled by the Pacific DXers, or via bureau to VK4FW. QSL's provided by VK4FW Print. The Pacific DXers DXpedition Kit will be used, plus additional equipment provided by operators. No 'spot' frequencies will be published. Watch the DX reflectors for their QRG's. An online log will be updated on a regular basis (if possible). Website: pacific-dxers.com/C21AA.html
[dx-world.net] via ICPO Bulletin (04-11 November 2011)

** TUVALU (RI91OL) DXpedition - November 11 to December 8 2011 **

With the Pacific DXers postponing their DXpedition to Nauru (see C2 above), the group has reorganzied their first DXpedition to Vaiaku, Fongafale islet, Funafuti Atoll, Tuvalu Islands (IOTA OC-015, WW Loc. RI91OL) to take place between 11 November and 8 December, 2011. Callsign will be T2T. Operators include Eddie VK4AN, Bill VK4FW, Eric VK4NEF, Tim NL8F, Jay K4ZLE and Julian W5SL Plans are to be QRV on all HF bands, 160-6 metre CW, SSB, RTTY and PSK31. They expect to have at least 3 stations on the air with a dedicated station set up on 6 metres running in an interrupted beacon mode. QSL Manager is the Pacific DXers, or by the bureau via VK4FW. Bureau requests are also accepted by E-mail to eliminate sending your QSL via the bureau (saves time!). PLEASE NOTE: VK4FW is the current QSL Manager for Pacific DXers: Bill Horner, 13 McConnell Rd, Maidenwell, QLD 4615, Australia --or-- via E-mail: QSL-Mgr"at"pacific-dxers.com . LoTW and eQSL will be uploaded within 12 months after the operation finishes. Further information and updates at: c21.pacific-dxers.com/T2T.html
SOURCE: [OPDX Bulletin] via ICPO Bulletin (04-11 November 2011)

** PJ5, SINT EUSTATIUS (Update) **

Just a reminder that Gerd, DL7VOG, will be active as PJ5/DL7VOG from Sint Eustatius Island (NA-145) between November 13th and December 4th. His three week operation will also include the CQWW DX CW Contest (November 26-27th) as PJ5G. Activity will be on 160-6 meters using mainly CW and RTTY, but he will have a microphone with him just in case someone really needs a phone QSO. Operations will be with a focus on the lower bands and listening for JA stations during his sunset and sunrise. As always, Gerd will be using his IC-706MK2G (this time with an amp) into an HF9VX for 80-6m and an inverted "L" (on a 15m fiberglass pole) for 160m. QSL via his home callsign, Bureau is preferred or direct. Bureau E-mail requests can be sent to: qsl@dl7vog.de

SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1035

FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012 Nov. 2, 2011:

Three members of the Malpelo 2012 team have just completed a seven day reconnaissance visit to Malpelo. To see a short written summary of their observations and view some very revealing pictures, go to http://hk0na.com/hk0na-reconnaissance-trip-oct-2330/ This will be a very demanding DXpedition for several reasons. The terrain is particularly difficult, near vertical at times. And in order to have a clear radio view of Asia, the Pacific region and W6/W7; it will be necessary to locate operating site(s) and antennas at the top of the mountain. This further complicates the difficulties and physical risks to the team. Team members vary in age from 25 to 73. But under the leadership and constant urging of our teamï¿½s medical doctors, K9SG and W0GJ, we have all embarked on a physical training regimen. We should all be ready for the challenges come early 2012. Three members of the team K4UEE, N4GRN and W6IZT will travel to Colombia Nov.5-8 for a planning meeting with team leader, Jorge HK1R and other team members. The purpose of the meeting is to review all the checklists and responsibilities for each team member With the information gained on the recent reconnaissance visit, decisions can be finalized concerning camp/operating sites, antenna types and placement, safety measures and other critical decisions necessary to the ultimate success for the DXpedition. One critical decision to be made concerns the duration of the operation. We have permission to stay on site for 17 days versus the 14 days now planned. We will be reviewing the DXpedition budget to determine if we can afford the extra $15,000 expense for 3 additional days. Contributions are gratefully accepted at:www.hk0na.com/sponsors We plan periodic press releases with information of interest. Also, watch the website for breaking news. Thanks, Jorge Prieto, HK1R-DXpedition leader, Bob Allphin, K4UEE-co-leader, Gregg Marco, W6IZT-co-leader - SOURCE: Carl, N4AA, via GOTO List

** NEWSLETTER-DEADLINE for your NEWS input to MMMonVHF week **

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php) to the next MMMonVHF Newsletter will be next WEDNESDAY 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the VHF-DX-Portal MMMonVHF and as well by a lot of free usable HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

==> + USA BRINGS HOME GOLD AT 2011 HIGH SPEED TELEGRAPHY WORLD
CHAMPIONSHIPS

Back in September 1936, Eugene A. Hubbell, W9ERU, took home the
silver trophy at what the October 1936 issue of QST called the first
official "Amateur Code Speed Contest." Only making one error, Hubbell
won first prize with his winning speed of receiving 52.2 words per
minute. Held at the ARRL Central Division Convention that year, the
contest required operators to decipher plain language text at two
minute intervals that ranged in speed from 25 to 52.7 words per minute.
But things have changed since Hubbell made history. Today, individuals
all over the world compete in High Speed Telegraphy (HST) events where
```

they are challenged to correctly receive and copy Morse code transmissions sent at very high speeds, upwards of 300 characters a minute.

According to Barry Kutner, W2UP, HST has long been considered a sport in Europe, especially Eastern Europe, similar to chess or an Olympic sport. This year, Team USA -- consisting of Kutner, Kennan Low, KE3X, and Kody Low, K3ODY - placed 10th at the Ninth High Speed Telegraphy IARU World Championship in Bielefeld, Germany this past October. Kutner won a gold medal -- the first in HST history to a non-European -- in the pileup competition, and a bronze medal in the RUFZ competition. Read more here <http://www.arrl.org/news/usa-brings-home-gold-at-2011-high-speed-telegraphy-world-championships>.

==> + RECORD NUMBER OF FRESHMEN TAKE TECH EXAM AT CALIFORNIA UNIVERSITY

When 114 freshmen electrical engineering students at California Polytechnic State University in San Luis Obispo, California, gathered on Friday, November 4 to take their Technician exam, they made history. Not only was the session one of the largest exam sessions ever, it was the largest exam session sponsored by a college Amateur Radio club and the largest exam session ever held in San Luis Obispo County. After all the exams were graded, 96 of the 114 students were brand new licensed amateurs, joining the next generation of radio amateurs in the US. Hosted by the Cal Poly Amateur Radio Club, this exam session broke its previous record of 62 new licensees, set earlier this year in October. These 96 new Amateur Radio operators will join more than 700,000 other hams in the US in providing volunteer and emergency communications support for everything from local bike rides and parades to global disaster relief. Read more here <http://www.arrl.org/news/california-university-sees-record-number-of-freshmen-take-tech-exam>.

==> + KIRK PICKERING, K4RO, NAMED 14TH EDITOR OF NCJ

Kirk Pickering, K4RO, of Pegram, Tennessee, has been named Editor of the National Contest Journal (NCJ), beginning with the January/February 2012 issue. Pickering takes over from Al Dewey, K0AD, of Plymouth, Minnesota, who has served as NCJ Editor since 2008. Pickering, who has been licensed since 1976, began writing the "Contesting 101" column in NCJ in 2008. "I've been chasing DX since 1986, and in 1994, I began entering contests. My current interests are mostly contesting and DXing. I tend to enjoy CW contesting the most, but I do RTTY and phone contests, too. I also like to tinker in the workshop and learn about how this magic medium of radio works." Read more here <http://www.arrl.org/news/kirk-pickering-k4ro-named-14th-editor-of-em-ncj-em>.

==> + GET READY FOR THE DECEMBER ISSUE OF QST

The December issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including an expanded holiday advertising guide and the 2011 ARRL Field Day results -- the upcoming issue of QST has something for just about everyone.

If you are looking for something new to try during the cold winter months, why not rise to the challenge of QRP CW operating? In his article "A 2 W Logic Chip Transmitter," Lew Smith, N7KSB, presents an easy-to-duplicate transmitter that you can put together in no time at all. Once you have your transmitter ready to go, you'll need to hook it up to an antenna. But what kind of antenna? ARRL Technical Editor Joel Hallas, W1ZR, takes a look at some HF beam options in his article "How About an HF Beam Under Your Holiday Tree?"

With the ARRL turning 100 in just a little more than two years, many here at ARRL Headquarters have been looking to the past as we make plans for for the future. An organization rich in history, the ARRL has been looking for ways to keep that history alive for years to come. One of the ways we are doing so is by archiving the many photos and documents we have, many going back to the very early days of radio. Join ARRL Volunteer Archivist Michael Marinaro, WN1M, as he explains how the ARRL is preserving our history in his article "Ham History SOS."

Many hams spend all year gearing up for ARRL Field Day, the most popular on-the-air operating event in all of Amateur Radio. For those hard-core Field Day aficionados, the December issue of QST is one of the most anticipated issues all year -- this is the issue with the Field Day results! This year, join ARRL Field Day Manager Dan Henderson, N1ND, as he travels through literature to bring readers the annual Field Day results article. You will also find official announcements for upcoming contests and operating events: the ARRL January VHF Sweepstakes, the ARRL International DX Contest (both SSB and CW), the ARRL Rookie Roundup (CW), Kids Day, the ARRL RTTY Roundup and the ARRL Straight Key Night. The results from the 2011 ARRL June VHF QSO Party are also in the December issue.

ARRL Contributing Editor H. Ward Silver, N0AX, takes a look at the FlexRadio Systems FLEX-1500 software defined HF+6 meter QRP transceiver in this month's Product Review. He says this rig "provides excellent performance at an entry level price, assuming you have a satisfactory PC to host it. The Flexers, an active community of SDR enthusiasts, will become your best friends. If you want a portable or mobile radio or don't like to use computer interface devices, I'd recommend staying with a traditional stand-alone rig; however, if you want to experiment and jump into SDR, the FLEX 1500 makes for an easy route."

Of course, there are the usual columns you know and expect in the December QST: Happenings, Hints & Kinks, The Doctor Is IN, Technical Correspondence, How's DX, Vintage Radio and more. Look for your December issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many

benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + LOTW PROCESSING UPDATE

Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>) has been managing to hold its own against the current high volume of incoming logs. An approximate 60 hour processing delay has been maintained for about a week. As of November 9, there are approximately 2.8 million QSOs in the LoTW queue. Many logs are still coming in from the CQ WW and the ARRL Sweepstakes Contests that were held the last two weekends. If you have already uploaded a log, there is no need to upload it again. By doing so, you will only add to the lengthy queue. Also, please do not send entire logs that contain previously uploaded QSOs. Please use the date range option when signing logs. This will allow you to select QSOs from your log within a specific date range. By following these guidelines, this will allow LoTW to process the backlog at a faster pace. The ARRL IT staff has been working diligently to speed up the LoTW processing time and eliminate the backlog. Thanks again for your patience.

==> THE SIXTH ANNUAL ARRL ON-LINE AUCTION COMES TO A CLOSE

After a week of frenzied bidding, the Sixth Annual ARRL On-Line Auction ended with a bang on October 26. The 2011 running of the auction featured almost 200 items, ranging from high-end Product Review equipment to a great assortment of antique books. In addition to bidders from the US, the auction saw winning bids from Canada, Italy, Japan, China and Brazil. According to Auction Coordinator Deb Jahnke, K1DAJ, bidding was fierce for the Yaesu FT-DX 5000D HF/6 meter transceiver that ultimately went to a bidder in China who placed a winning bid of $4925. This rig was featured in the December 2010 issue of QST as a Product Review item. Read more here <http://www.arrl.org/news/the-sixth-annual-arrl-on-line-auction-comes-to-a-close>.

==> ARRL SAYS "THANK YOU" TO VETERANS

On Friday, November 11, here in the US and abroad, we will celebrate Veterans Day, also called Remembrance Day or Armistice Day. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- this day has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peace time or time of conflict, they served their county with honor. We also would be remiss if we did not remember the families of those veterans who kept the homefires burning bright; without their love and support,

our veterans would have indeed been alone.

ARRL Headquarters has its share of service veterans: Contributing Editor Al Brogdon, W1AB (Army); Publications Sales Associate Mark Dzamba, KB1FMY (Air Force); Assistant VEC Manager Perry Green, WY1O (Army); Technical Editor Joel Hallas, W1ZR (Army); News Editor S. Khrystyne Keane, K1SFA (Coast Guard); DXCC Manager Bill Moore, NC1L (Army); Reprints Specialist Tony Nesta, AA1RZ (Navy); Membership and Volunteer Programs Manager Dave Patton, NN1N (Navy); Technical Relations Specialist Jon Siverling, WB3ERA (Army); Field and Regulatory Correspondent Chuck Skolaut, K0BOG (Air Force), and Education & Technology Program Coordinator Mark Spencer, WA8SME (Air Force).

Thank you for your service -- your sacrifice and the sacrifice of your fellow service members is not forgotten.

==> ARRL COMMITTEE SEEKS MICROWAVE BAND PLAN INPUT

Attention microwavers! An ARRL Ad Hoc Committee has been tasked by the Board of Directors with recommending updates to the ARRL band plans for the amateur bands between 902 MHz and 3.5 GHz. If you are now active on any of these bands or are developing plans to do so, the committee would like to hear from you.

The band plans for these bands may be found here <http://www.arrl.org/band-plan-1>:

- 902-928 MHz
- 1240-1300 MHz
- 2300-2310 and 2390-2450 MHz
- 3300-3500 MHz

You can find additional background and a form for submitting information here <http://www.arrl.org/news/arrl-committee-seeks-microwave-band-plan-input>. Please respond by December 15, 2011.

==> + DAVE KAPLAN, WA1OUI, TAKES OVER ADMINISTRATION OF ARRL A-1 OPERATOR CLUB

The ARRL relies on a number of volunteers who give their time to help make the organization run smoothly. From Division Directors to Section Managers to Emergency Coordinators to tour guides at Headquarters and everyone in between, volunteers play an important part in carrying out the ARRL's mission: To promote and advance the art, science and enjoyment of Amateur Radio. Dave Kaplan, WA1OUI, is one of the volunteer tour guides at ARRL Headquarters. Recently, he agreed to take on the role of administrator for the ARRL A-1 Operator Club. First organized in May 1933, the ARRL A-1 Operator Club has a proud history and occupies an important place in Amateur Radio tradition. Read more here <http://www.arrl.org/news/dave-kaplan-wa1oui-takes-over-administration-of-arrl-a-1-operator-club>.

==> + W1AW ANNOUNCES WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The standard times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-winter-operating-schedule-1>.

==> SOLAR UPDATE

Tad "We're out there having fun in the warm California Sun <http://www.youtube.com/watch?v=Yy57Xdk9u0o>" Cook, K7RA, reports: Another sunspot number record for Solar Cycle 24 was shattered: On Wednesday, November 9, the daily sunspot number reached 220, the highest it has been in more than eight years. The last time the sunspot number was higher than 220 was November 1, 2003 when the number was 277. Two days before it reached 277 in 2003, the sunspot number was 330, a harder record to beat. The average daily sunspot numbers this week rose more than 53 points compared to last week, to 153.4, while the average daily solar flux rose nearly 39 points to 173.7. The latest prediction from NOAA/USAF has solar flux at 180 on November 10-11, 175 on November 12-13, 170 on November 14-16, and 165, 155, 155, 145, 140, 135, 135 and 140 on November 17-24. The planetary A index is predicted at 5, 10, 18 and 10 on November 10-13, then 5 on November 14-25. The A index of 18 on November 12 seems to reflect a warning from IPS Radio and Space Services (in Australia) at 2330 UTC on November 9. It announced expected increased geomagnetic activity November 10-12, with quiet conditions on November 10, unsettled to active with isolated minor storm levels on November 11 and quiet to unsettled with isolated active levels on November 12. Geophysical Institute Prague says look for quiet to unsettled conditions November 11, unsettled to active November 12, quiet to unsettled again on November 13 and quiet November 14-17. Look for more information on the ARRL website on Friday, November 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Rivieras' California Sun.

==> JARL WELCOMES NEW PRESIDENT

The Japan Amateur Radio League (JARL <http://www.jarl.or.jp/English/>) named a new President and two new Vice Presidents, effective November 1, 2011. Akira Inage, JA5MG, will take over the presidency from Shozo Hara, JA1AN. Hara has served as JARL President for more than 35 years. "Mr Hara led the JARL with great distinction for more than 35 years, including a period of phenomenal growth," remarked ARRL Chief Executive Officer David Sumner, K1ZZ. "It has been a great privilege to collaborate with him in protecting and promoting Amateur Radio worldwide." Kazuo Niwa, JA1AYO, and Norimasa Nemoto, JH1UBU, will serve as the new JARL Vice Presidents.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Do you still keep a station log on paper?
- Have you ever performed an RF Safety evaluation for your home station?
- How familiar are you with Software Defined Radio (SDR)?
- Now that propagation is improving, are you operating more often on 15, 12 and 10 meters?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the February 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- November 12-13 -- Kentucky QSO Party; WAE DX Contest (RTTY); 10-10 International Fall Contest (Digital); JIDX Phone Contest; OK/OM DX Contest (CW); CWops Mini-CWT Test
- November 12-14 -- CQ-WE Contest
- November 13 -- SKCC Weekend Sprint
- November 14 -- NAQCC-EU Monthly Sprint
- November 17 -- NAQCC Straight Key/Bug Sprint

Next week:

- November 18 -- YO International PSK31 Contest
- November 19 -- Feld Hell Sprint
- November 19-20 -- ARRL EME Contest <November%2018%20--%20YO%20International%20PSK31%20Contest>; LZ DX Contest
- November 19-21 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North America Collegiate ARC Championship (SSB)
- November 21 -- Run for the Bacon QRP Contest
- November 23 -- SKCC Sprint
- November 23-24 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 19-20, 2011 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4, 2011 -- ARRL West Central Florida Section Convention

Amateur Radio Newsline(tm) Report 1787 - November 11 2011

Amateur Radio Newsline report number 1787 with a release date of
Friday, November 11th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A possible record ham radio testing session
takes place in California, hams in Italy respond to flooding in
Tuscany, Russia says it will remove taxi communications from 10 meters,
the Japan Amateur Radio League gets a new president, some radio records
set down under and a dream comes true for one ham at the New York City
Marathon. Find out the details are on Amateur Radio Newsline(tm)
report number 1787 coming your way right now.

RADIO TESTING: CAL POLY SLO TESTS 114 IN ONE SITTING - 96 PASS HAM
EXAM

Its being called one of the biggest if not the biggest college level
ham radio exam sessions in history. That's when a record number of
Electrical Engineering freshman students at Cal Poly San Louis Obispo
attempted to get their technician-class licenses, all at the same time.
And many succeeded as we hear from Amateur Radio Newsline's Jim
Hendershot, WA6VQP:

--

On Friday, November 4th, what is likely a record 114 college students
were given their ham radio tests in the largest amateur radio licensing
event ever held in San Luis Obispo county, California. more
importantly, 96 of these students succeeded in passing their technician
class exam joining the next generation of ham radio operators licensed
in the united states.

Dr. Dennis Derickson , AC0P, is the Cal Poly, San Luis Obispo
Electrical Engineering Department chair. He conceived the freshman
licensing initiative, which gives every student a chance to get their
radio license as part of the introduction to electrical engineering
course curriculum.

Hosted by the cal poly amateur radio club, W6BHZ, the test session was
administered during a 50-minute class period and counted as one of the
midterm exams for the freshman students. Eleven volunteer examiners
assisted in checking id's and overseeing the exam along with a dozen

other people who helped to coordinate the testing event.

Of the 189 students enrolled in the class, 114 opted to take the fcc exam and attempt to get their licenses. The 85% that succeeded had their callsigns posted to the FCC website on Monday, November 6th, thanks to a tremendous effort on the part of the ARRL VEC office to quickly process the exam session results.

Prior to the test session, members of the Cal Poly Amateur Radio Club held review meetings to help students prepare to pass their exam. At the same time they were also given an introduction to a wide variety of electrical engineering topics.

It is likely that the November 4th session is the largest amateur radio license testing event ever held at the collegiate level. Sponsors hope that it might spur other colleges and universities nationwide and world-wide to do the same.

For the Amateur Radio Newsline, this is former Cal Poly student and W6BHZ member, Jim Hendershot, WA6VQP, reporting.

--

Founded in 1947, the Cal Poly Amateur Radio Club has a long tradition of communications service on campus and in the San Luis Obispo community area. The club maintains a station campus for the San Luis Obispo Emergency Communications Council. This station is equipped with emergency power and radio equipment to support various public safety agencies in the event of a disaster. More information about the club can be found at www.w6bhz.org. (Cal Poly SLO)

**

RESCUE RADIO: HAMS IN ITALY RESPOND TO TUSCANY FLOODS

Ham radio is in emergency response mode in Italy. This following flash flooding in the Liguria and Tuscany regions of which have already accounted for the deaths of ten people in that region.

The Amateur Radio Voluntary communications group R-N-R-E has been asked by the government to provide additional radio communications in the affected areas that began on Friday November 4th. Frequencies which may be used in Italy are 3.643 and 3.760 MHz on 80 meters and 7.045 to 7.060 MHz on 40. Amateurs world-wide not directly involved in flood related communications are asked to listen carefully before using these frequencies to avoid causing QRM to emergency nets.

Further heavy rain is striking the region as we go to air and additional casualties are expected due to increased flooding. (IARU Region 1)

**

RESCUE RADIO: THAI HAMS HAVE ALREADY SAVED 1000 LIVES

Some breaking news from the Far-East. That's where Radio Amateur Society of Thailand Secretary Paul Wacharaphol, HS4DDQ, reports his team helped to save almost 1,000 lives by coordinating rescue communications in cases of medical emergencies during the severe flooding.

The team has been organizing the emergency medical communications at Public Health Ministry using the callsign HS0AC. Speaking at a small society gathering on Sunday November 6, HS4DDQ said that the National Broadcasting and Telecommunications Commission has praised the role that radio amateurs have been playing to help people cope with the disaster by providing communications support. This has been especially helpful in flooded areas where cellular sites have failed.

According to HS4DDQ Thai government agencies have been able to take advantage of the amateur radio communications as their own networks failed. Using the skills and experience of the radio amateurs, the government agencies kept communicating with one another under adverse conditions. HS4DDQ says that this volunteer spirit that has carried radio amateurs to the "front-line" has also helped many victims of Thailand's worst flooding in over 60 years.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles. (IARU R3 Disaster Communications Committee and RAST.)

**

INTRUDER WATCH: RUSSIA SAYS IT WILL GO AFTER ILLEGAL TAXI DRIVERS ON 10 METERS

Russia says that it is going to do all that it can to remove illegal taxicab two-way radio operations from the 10 meter amateur band. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

In a letter to Uli Bihlmayer, DJ9KR, Deputy Director Mickoli Valamow of Russia's Radio Frequency Service has promised to arrange permanent monitoring of the 10 meter band for illegal CB - like operations and to deal with them.

In October of 2010, DJ9KR, petitioned Russia's Intruder Watch for assistance to help remove from the air the ever growing number of illegal taxis speaking in the Russian language and using FM in the 28.00 to 29.70 MHz amateur band. He received no reply.

So on September 29th he filed the complaint to Russia's Radio Frequency Service in Moscow. A month late on October 31st he received the response that he and many others across Europe had hoped for. Russia will act to remove the illegal operators from the airwaves.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

How long the clean-up of the 10 meter illegals' by Russian telecommunications authorities will take is at this time unknown. (IARU-R1)

**

RESTRUCTURING: CEPT TO PROPOSE NEW 500 KHZ ALLOCATION AT WRC-12

The European Conference of Postal and Telecommunications Administrations better known to radio amateurs as the C-E-PT says that it plans to back a proposal at the 2012 World Radiocommunication Conference to create a new ham radio allocation near 500 kHz.

During the November 1st to 4th meeting of the CEPT's WRC-2 Conference Preparatory Group held in Bucharest, Romania a European Common Proposal was agreed on for a 5 watt Effective Radiated Power allocation to the amateur service between 472 to 480 kHz. This new band would be on a secondary basis to all other spectrum users. . This European Conference of Postal and Telecommunications Administrations ECP will now be forwarded the proposal to the International Telecommunications Union in the hope of having it included in the WRC-012 agenda. It should be noted that tjhis internsational body represents the block vote of 48 administrations and the motion to create the 500 kHz amateur radio allocation was passed without dissent. (IARU - R1 via G3PSM)

ENFORCEMENT: $10000 PROPOSED FINE ISSUED TO FLORIDA CB OPERATOR

A Florida CB operator has been issued a $10000 Notice of Apparent Liability to Forfeiture for operating a radio transmitter without the requisite FCC authorization. In other words, Michael Perry, of Cross City is accused of using non FCC certified power amplifiers on the 11 meter Class D Citizens Band in direct violation of Sections 95.409 and 95.411 of the Commission's Part 95 Citizens Radio Service rules.

This one goes back to this past March 31st. That's when agents from the Enforcement Bureau's Tampa Office used direction finding to locate the source of the interference on Citizens Band channel 28 that was coming from Perry's residence.

Later that day the agents inspected Perry's CB station and found a non-certificated CB transmitter and three linear amplifiers as part of Perry's CB station. Perry admitted to the agents that two of the three

linear amplifiers were capable of generating a power output of 200 and 1500 watts respectively, but claims that he had never tested the third.

The agents observed that the transmitter and two of the amplifiers were warm to the touch, indicating that the devices had been recently operated. Perry admitted to the agents that he had been using earlier that day.

In issuing Perry the Notice of Apparent Liability to Forfeiture the FCC says that Section 95.411(a) of the Rules states that CB operators may not attach external radio power amplifiers to CB transmitters in any way. It also notes that Section 95.411(b) says that there are no exceptions to this rule and that use of a power amplifier voids authority to operate the station.

As a result, the FCC believes that a proposed fine of $10,000 is apropos in this case. In addition it has also directed Perry to submit a statement signed under penalty of perjury that, to the extent he is engaged in CB operations that he will only use a certified CB transmitter; and not attach any outboard power amplifier to his CB station.

This statement must be provided to the Tampa Office within thirty calendar days of the November 1st release date of the N-A-L. The FCC added that failure of Perry to comply with this requirement could subject the licensee to additional enforcement action.

At airtime it's unknown if Perry plans to file an appeal. (FCC)

**

ENFORCEMENT: NYC PROPOSED $4000 WRONG FREQUENCY FINE REDUCED TO $500

In an October 21st Memorandum Opinion and Order the FCC has reduced a proposed $4000 fine down to $500. This based on the regulatory body receiving proof that the $4000 amount would prove to be a financial hardship to Paisa 2 Car and Limousine Service, Inc. of Woodside New York.

As previously reordered, back on October 5, 2009, the Enforcement Bureau's New York Office issued to Paisa a Notice of Apparent Liability for Forfeiture in the amount of $4,000. This after finding that Paisa apparently willfully and repeatedly violated section 1.903(a) of the Rules by operating a base station and mobile stations on an unauthorized frequency.

Paisa did not file a response to the N-A-L and on June 18, 2010, the Enforcement Bureau's Northeast Region issued a Forfeiture Order affirming the findings and affirming the $4,000 forfeiture. After receiving this notification, Paisa responded with a petition for reconsideration in which it claimed that it never received the original N-A-L and speculating that it was mistakenly delivered to one of the other two businesses that are located at the same mailing address. In

support of this claim, Paisa submitted documentation showing that two other businesses share Paisa's mailing address. Paisa also claimed that it did not know it was operating on an unauthorized frequency because the base station and mobile radios were programmed by Paisa's radio vendor. Paisa also requested a reduction or cancellation of the forfeiture based on its inability to pay and presented to required documentation to the FCC for it to consider.

After reviewing all of the data that Paisa 2 Car and Limousine Service, Inc. submitted the FCC says that it was declining to cancel the forfeiture based on Paisa's claim that it did not know that it was operating on an unauthorized frequency. However it also said that the forfeiture should be reduced to $500, based on the company's documented inability to pay the $4000 amount imposed in the Forfeiture Order. (FCC)

**

RADIO POLITICS: FCC COMMISSION NOMINEES MAY BE PUT ON HOLD DUE TO CONGRESSIONAL LIFGHTSQUARED INFORMATION DEMAND

Senator Chuck Grassley of Iowa says that he will hold up the approval process of to two nominees to the Federal Communications Commission. This over the agency's refusal to turn over documents related to wireless company LightSquared.

Addressing his concerns with the way the FCC has handled the Lightsquared matter Grassley says that he will object to proceeding to the nomination because the FCC continues to stonewall a document request that he submitted to the agency over six months ago regarding their actions related to the LightSquared and the Harbinger Capital matters. Grassley says that it not only sets a dangerous precedent for a federal agency to unilaterally set the rules on how it engages with Congress but that it also prevents any meaningful ability for the vast majority of Congress to inform themselves of how an agency works.

President Obama has nominated Ajit Pai and Jessica Rosenworcel to serve as commissioners on the FCC. Rosenworcel has worked for Democrats previously, while Pai has worked for Republicans.

A spokeswoman for Grassley said the senator will place a hold on the nominees that will take effect once the nominations reach the Senate floor. Before Grassley announced his intent to place a hold, observers widely expected the nominees to easily receive confirmation. More is on-line at tinyurl.com/nominees-objected. (TVBC)

**

CLASSIC RADIO: BBC AUCTIONING OFF GEAR FROM BUSH HOUSE

If you are a ham who wants to really spiffy up your boatanchor or classic station, then listen up. The BBC World Service is auctioning off more than 100 lots of audio and radio equipment that has been

decommissioned from its Bush House studio in London. Included are audio consoles, monitors, microphones including some very rare Coles ribbon mics designed to BBC specifications. Details are available through the Internet auction site of GoIndustry DoveBid. A direct link to it is tinyurl.com/BBC-auction. Bidding closes on November 22nd at 13:00 hours GMT. (BBC)

**

NAMES IN THE NEWS: JA5MG APPOINTED NEW JARL PRESIDENT

Some names in the news. First up is Akira Inage, JA5MG, who was appointed as the new President of the Japan Amateur Radio League on November 1st. Inage replaces longtime J-A-RL leader Shozo Hara, JA1AN who announced that his was stepping down at the Japanese Ham Fair 2011 in Tokyo earlier this year.

Appointed along with Inage are two new Vice-Presidents. They are Kazuo Niwa, JA1AYO, and Norimasa Nemoto, JH1UBU. More is on-line in the Japanese language at tinyurl.com/JapanJARL. (JARL)

**

NAMES IN THE NEWS: PA2LS APPOINTED IARU REGION 1 YOUTH COORDINATOR

The International Amateur Radio Union Region 1 Executive Committee has appointed Lisa Leenders, PA2LS, as its first Youth Coordinator.

The 21 year-old Leenders lives in the city of Rotterdam. She first got her amateur radio novice license at the age of 13 and was issued with the call sign PD2LLS. She upgraded to her full license when she was 19 year's old and obtained her current PA2LS callsign.

In her new capacity Leenders will be working with Youth Coordinators from the various IARU member societies to promote amateur radio among to the younger generation in Region 1. (IARU-R1)

**

NAMES IN THE NEWS: VE2CV TO BE INDUCTED INTO THE CANADIAN AMATEUR RADIO HALL OF FAME

John S. Belrose of Ottawa, Ontario Canada who holds the call signs VE2CV and VE3CVV will be inducted into the Canadian Amateur Radio Hall of Fame. Jack as he is better known in the world of amateur radio will be presented with this award at a meeting to be arranged in Ottawa in early 2012. At that time a detailed summary of his contributions to the hobby will be published in The Canadian Amateur magazine. Induction into the Canadian Amateur Radio Hall of Fame is made in recognition of a radio amateur's outstanding achievement for sustained service to ham radio in Canada, or amateur radio at large. (VE7EF)

**

NAMES IN THE NEWS: RONNIE MILSAP WB4KCG AND HIS TRIO TO PERFORM HOLIDAY SHOW IN SOCAL.

And if you live in or near Southern California and have no plans the evening of December 9th, you might consider a trip to the Cerritos Center for the Performing Arts. That's where country music legend Ronnie Milsap, WB4KCG, and his trio will be performing their Holiday Show. One of the most popular dinner speakers ever at the Dayton Hamvention, WB4KCG has been honored for his contributions to the art of country music by the Country Music Association, the Academy of Country Music and Billboard Magazine. More about WB4KCG is at his website at www dot ronniemilsap dot com. For information on tickets for this event go to www dot cerritoscenter dot com. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: FORMER FCC COMMISSIONER KENNETH COX - S.K.

Former FCC Commissioner and media diversity advocate Kenneth A. Cox died on October 31st at his home in Bethesda, Maryland.

Kenneth Cox served as an FCC Commissioner from 1963 to 1970. He was a graduate of the University of Washington and the University of Michigan and later taught at the University of Michigan law school before practicing law in Seattle. Cox also served as a special counsel to the Senate Commerce Committee's TV inquiry in the mid-1950's and was tapped by then FCC Chairman Newton Minow to be chair of the FCC's Broadcast Bureau in 1961.

According to a notice in the Washington Post, Kenneth Cox is survived by his wife, Nona; three sons and four grandchildren. Services will be November 19th at the Westmoreland Congregational Church in Bethesda, Maryland. Kenneth Cox was age 94. (RW)

**

HAM RADIO IN SPACE: AMSAT DESIGNATES AUBIESAT-1 AS AO-71

AubieSat-1 is now AubieSat Oscar 71 or AO-71. This according to an announcement by OSCAR Number Administrator, Bill Tynan, W3XO. Tynan says that the OSCAR designation came as the result of the successful launch and deployment of AubieSat-1 on October 28th. (AMSAT)

**

WORLDBEAT: VENEZUALA CLOSES DOWN INDEPENDENT FM STATION

The owner of a radio station in western Venezuela says that on November 3rd that dozens of National Guard soldiers seized his stations broadcasting equipment. This as part of an investigation launched by the country's state-run Telecommunications Commission.

Jose Ramon Socorro says about 50 armed soldiers entered Kalor 91.1 FM and took away all of the broadcast equipment. Socorro calls the incident an armed assault on his facility. He says the troops did not provide details on the reason for the investigation or confiscation of the gear.

Representatives of the state telecommunications commission have not answered media requests seeking comment. Watchdogs groups have accused Venezuelan President Hugo Chavez of trying to suppress the country's independent media. (Published news reports)

**

WORLDBEAT: DAB FAILS IN SINGAPORE

Singapore radio broadcaster MediaCorp is turning off its Digital Audio Broadcast or DABservices at the beginning of December. In announcing the shutdown, MediaCorp stated that its DAB listenership had been stagnant compared to uptake of its Me Radio app for streaming audio to iPhones and select Android-based HTC phones.

MediaCorp launched its DAB services in November of 1999, primarily simulcasting its 14 FM services. The company says that it plans to reassign staff currently working on its DAB efforts to other operations.

DAB is a digital radio technology for broadcasting used in several countries, particularly in Europe. At the last broadcast census there were approximately 1,000 stations worldwide using the DAB format. (RW)

**

WORLDBEAT: BBC PLANS TO PUT ITS ARCHIVES ON LINE

The BBC will soon introduce a new radio website that will contain almost its entire archive of radio programs going back to the 1940's. Code named Audiopedia the service is being developed for launch within the next 12 months.

Tim Davie who is the Director of BBC Audio and Music the at the BBC. He says that the organization is working on how best to present Audiopedia. At the moment the BBC believes that most people will probably access the new on demand content via other pieces of related media that they are already listening to across the BBC website.

The new Audiopedia website will represent the biggest release of BBC programming on demand since the iPlayer was introduced in 2007. (Media Network, London Telegraph)

**

WORLDBEAT: NEW 60 METER BEACON ON FROM GREECE

A new 60 meter beacon from Greece is now on the air. Operating on 5.398.5 MHz transmitting in Morse the beacon currently runs 30 watts out into a non resonant antenna. Itts reported to be on the air usually between 19.00 and 06.00 UTC. Details of the beacon message and timings can be found on the IARU Region 1 website at www.iaru-r1.org. (IARU R1)

**

RADIO RECORDS: NEW SHF RECORDS CLAIMED DOWN UNDER

Some new VHF and UHF records are being claimed by hams in Australia. Here's W-I-A Newsman Graham Kemp, VK4BB, with the details:

--

VK4BB: "Here are details of seven new VHF-UHF distance records. The first ever records for the 134 GHz and 243 GHz bands:

Michael VK3KH and Alan VK3XPD have set the first Australian distance records for these bands - 25 meters on 21 October 2011. Alan and Russell VK3ZQB then extended these records to 50 meters on October 23.

First ever record on 324 GHz. Michael VK3KH and Alan VK3XPD have set the first Australian distance record for this band: 25 meters on 21 October 2011.

Frequencies above 250 GHz are not assigned to any service by telecommunications regulator ACMA, so technically there is no 324 GHz band. However amateurs may operate on these frequencies because they are not assigned to any other service.

First records in the new Digital EME record category: On 2 metres, the first Digital EME record is from VK9NA to EA2AGZ at a distance of 18306.4 km. This was set on 12 January 2011. On 1296 MHz, the inaugural record claim is from Mark Swannack VK2AMS and David Scott, VK2JDS - 325.3 km on October 1st.

For full details of all past and present VHF-UHF records are available for viewing or download on wia.org.au.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reporting from Brisbane, Australia.

--

All we can say is congratulations to those in VK land who worked had to set these new Australian ham radio records. (WIA News)

**

ON THE AIR: CELEBRATING THE LIFE OF STEVE JOBBS

On the air, keep an ear open for the Team HB9ON Radio Group in Switzerland which is celebrating the life of Apple Computer founder Steve Jobs. This by activating the special call HB9STEVE throughout the month of November. Commemoration operations will occur sporadically and will be mostly on CW, but with some SSB. QSL via Logbook of the World, GLOBALQSL or direct to HB9DHG. See details on QRZ.com. (Southgate)

**

DX

In DX, word that the Mediterraneo DX Club's DXpedition to Nepal may be on the air by the time you hear this report. The DXpedition team was to be on the air as 9N7MD between November 12th to the 27th with stations on 160 through 10 meters using CW, SSB and RTTY. QSL direct to Manager IK2VUC or via the bureau. Logbook of the World files will be uploaded by the end of March 2012.

N7OU who is currently active as E51NOU from Rarotonga Island in the South Cook Islands says that he should be arriving on Manihiki in the North Cook Islands on November 8th or 9th. Once there his operation will be on 160 through 10 using only CW. QSL via N7OU.

PA8A will again be active as PJ4B from the island of Bonaire. Listen out for him between Janaury 8th and the 22nd of 2012. His operation will be holiday style on the High Frequency bands only. QSL direct only via PA8A.

IK2NCJ is expected to be operational as D44TAL from Sao Vicente Island in he near future. Activity will be on the High Frequency bands only. QSL via IZ4DPV.

VE2XB will be active as J79XB from Dominica starting January 5th,2012 for several weeks. His operation will be holiday style on all bands 160 through 10 meters and possibly 6 meters if there are openings. QSL via VE2XB as listed on QRZ.com.

Lastly, DL7DF will head up a team of 9 experienced operators to be active from Tonga as A35YZ between March 7th and the 24th, 2012. Operation will be on 160 through 6 meters using several station operating on CW, SSB with one station exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, either direct or via the bureau.

(Above from various DX news soiurces.)

**

THAT FINAL ITEM: A DREAM COMES TRUE AT THE 36th NYC MARATHON

And finally this week, the amazing story about last weekends New York City Marathon and its ham radio communications director that was published in the Saturday November 5th issue of New York Daily News. Titled "Cancer Won't Keep This Radio Volunteer Down," the story details the fight being waged by Steve Mendelsohn, W2ML, against Pancreatic Cancer while at the same time organizing the vast ham radio

communications network for this years running of the worlds largest on-foot marathon event.

In the article writer Wayne Coffey calls Mendelsohn's volunteer work for the New York City Marathon as being indispensable. He notes that this was to be the 36th running of the five-borough event adding that W2ML is the only person who has been on the course for every mile of every one of them.

For his part, W2ML says that that it's simple what keeps him fighting the disease. He notes that physicists say that energy can neither be created nor destroyed, but that the energy of the marathon is what keeps him going and this year has quite literally kept him alive. And speaking a few weeks ago at the Pacificon convention in Santa Clara, California, he put it all into perspective in a way that only W2ML could:

--

W2ML: "The doctor that is treating my cancer always wanted to run in the marathon. I was given three to five months to live in January and I said to him that it's simple. You keep me alive until the marathon and Ill get you into the marathon. Only a ham could make tat kind of a deal with the devil. (applause)"

--

The entire story about Steve Mendelsohn, W2ML, and his fight against cancer to once again lead the communications network for the New York City Marathon is in-line at tinyurl.com/w2ml-marathon-2011. And less we forget, the New York City Marathon was held last weekend and for the 36th consecutive year Steve Mendelsohn, W2ML, was there with his crew of 400 or so ham radio volunteers to keep it all running smoothly. THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA IS FOR WEEK
COMMENCING NOVEMBER 13 2011.

ACMA warns unlicensed radio communicators (Story in text editions only)

The Australian Communication and Media Authority (ACMA) has issued warning
notices to six radio communications hobbyists, citing breaches of the
Radiocommunications Act.

The hobbyists, comprising those using the Citizen Band (CB) and Amateur Radio
frequencies are from Tasmania, Victoria, New South Wales and South Australia.

The ACMA's Field Operations Sections found each were operating on High Frequency
(HF) frequencies outside the radio bands they were authorised to use.
In addition to warning notices, a number of non-compliant radio communications
devices were surrendered to the ACMA.

(Jim Linton VK3PC

The Australian Treasurer, Wayne Swan, says the Government will wait for advice from police before deciding the next step in the Australia Network tender process.

Radio Australia's parent company, the Australian Broadcasting Corporation, now holds the contract to operate the international satellite television network but is competing with Sky News to retain it.

Sky News is partly owned by the British broadcaster BSkyB.

Australia's Minister for Broadband, Communications and the Digital Economy, Senator Stephen Conroy, announced the end of a competitive tender process on Monday, saying he was acting on the advice of the Government Solicitor.

He said: "The advice which the Government has received is that due to significant leaks of confidential information to the media, the Australia Network tender process has been compromised to such a degree that a fair and equitable outcome may no longer be able to be achieved."

The Government also referred the matter to police because of the alleged leaks.

A NEW, dedicated radio studio at Patterson Lakes Primary School means students are now interviewing some of Australia's biggest names, live to air.

Radio program co-ordinator Craig Jenner said a $50,000 State Government grant to build the studio also helped deck it out with the latest technology.

"We've also got the experienced students training others how to do it, which gives them a sense of responsibility and independence."

The school's radio program has been hugely successful over the years, with students interviewing the likes of former prime minister John Howard, TV stars Bert Newton and Rove McManus, NBA basket baller Andrew Bogut and former St Kilda footballer Robert Harvey.

The station can be picked up on 104.7 FM throughout the Patterson Lakes area.

A map of the station's coverage area can be found at pattopsradio.weebly.com

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The Board of the WIA has accepted the recommendations of the 2011 Club Grant Committee and announced the successful applications.

Two categories of project were identified that the WIA would support this year. The first category was projects and activities to be conducted before 1 June 2012 to attract new amateurs, but focussed on people under 25 and the second category was amateur radio projects that are useful and innovative and that utilise both information technologies and radio communications.

No projects were proposed by any club that fell into the second category.

The Oxley Region Amateur Radio Club will be supported by a grant of $1,500 to support a mobile shack as a promotional tool to attract new members, for Field days and emergency communications within their local area.

The Brisbane Amateur Radio Club will receive a grant of $600 to help them to improve the quality of their meeting presentations using digital projection equipment.

The St George Amateur Radio Society Inc. will also be supported by a grant of $600 for a basic trailer to be converted into a mobile display and field operations unit.

The Sunraysia Radio Group will be supported by a grant of $1,000 to support their work promoting amateur radio to Scout District in the Mildura/Wentworth area.

The Adelaide Hills Amateur Radio Society will receive a grant of $600 to support building on the established training room by the addition of training aids and a number of kits.

The Illawarra Amateur Radio Society will be supported by a grant of $900 to provide a projector and basic transceiver and antenna to supplement existing training aids for classes.

The full report of the 2011 Grant Committee can be found on wia.org.au

I would also ask you to read carefully the "Comment" in the December Amateur Radio when it is published, where I comment on the small number of applications for club grants this year and raise the question of the club grant scheme and ask for submissions and note that this will be an issue for the Open Forum at the Annual Conference of the WIA in Mildura next year.

(Michael VK3KI WIA President)

Looking Out for Your Mates

Greetings from the WIA, this is Ewan VK4ERM, considering Looking Out for Your Mates.

The eleventh hour of the eleventh month has just past. While it is right and proper to remember those who made the ultimate sacrifice to preserve our way of life and freedoms while they Looked Out for Their Mates, it also behoves us to look out for those men and women who return with damaged bodies and minds. Sometimes these situations are tragically personal or uncomfortably close.

Within the Amateur Radio community we too can Look Out for Our Mates in many direct and indirect ways.

Operating our equipment in a comfortable shack at home, mobile through innumerable places in this broad land or setting up a field or portable station for a contest or to escape urban RF noise provide ample opportunities for Looking Out for Your Mates.

Unfortunately it is a truism that familiarity does breed contempt or at least avoidable carelessness or the taking of unnecessary risks. Sometimes the first we become aware of the error of judgement is when a situation goes wrong resulting in damage to what we have been working on, a minor physical inconvenience or personal injury.

What would you reasonably expect a mate to do in such circumstances? What would you do if you were witness to the potential for such a situation occurring?

In the first case a friendly word of caution from your mate may be all that was needed to jolt you out of complacency to reconsider your course of action. In the second case wouldn't you believe it was your responsibility to caution your mate on the likely outcome of his or her actions?

Either way, both situations demonstrate Looking Out for Your Mates and unlikely to cause offence with real mates.

The foregoing physical cause and effect situations are readily observable to which we can spontaneously react without offence to those with whom we are familiar. Far worse and more insidious is the onset and manifestation of mental stress. The gradual change in the behaviour of a mate may be so subtle that in the long term we don't notice it nor become aware of the past and present circumstances causing the change.

However, it is unfortunate that the first we become aware that a mate is under stress is when he or she explodes or crashes with unpredictable behaviour and outcomes. This is when you have to be Looking Out for Your Mates, hopefully before situations come to a head and afterward if too late.

We like to think that we know and understand those whom we have known for years or decades but the reality is there may be disturbing or traumatic events buried in their memory and eating away at their very being; events and emotions they have never communicated to others, not even their mates.

Those in the far reaching fraternity of Amateur Radio are no different and if you become aware of changes in the personality and behaviour of your Amateur Radio friends in any circumstances then it is truly time to be Looking Out for Your Mates.

The changes you see may be their cry for help.

Look Out for Your Mates

This has been Ewan VK4ERM for the WIA Board

I'D SOONER BE FISHING

Every now and then members let us know they receive spam emails claiming to be from the WIA and wanting to obtain personal information, this sort of email activity is called PHISHING (pronounced fishing).

Phishing is a way that the bad people on the internet attempt to acquire information from us such as usernames, passwords and credit card details by claiming to be from a trustworthy entity (in our case the WIA). Customers

of Banks and other financial institutions are typically the major targets of Phishing scams however they seem to have a go at people from any organisation including organizations like ours. So remember, should our WIA office staff ever need to verify your membership or personal details, they will contact you directly by telephone, never by unsolicited email.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news
Email Address : r_demkiw@yahoo.com.au

Planning is well under way for "Amateur Radio's big day out" next year at the Wyong racecourse.

The Central Coast Amateur Radio Club Field day at Wyong has a new service for next year. A "group meet-up" service.

There are several Amateur Radio groups who are spread across the country and rarely are able to meet-up in person, so why not take advantage of the fact that many group members travel to the Wyong Field Day?

This is a free service.

The CCARC will allocate 30 minute slots throughout the day on a first come first served basis and publicise these before the field day and announce them over the public address system throughout the day.

An area in the coffee & tea room on the 2nd floor of the race club building will be set aside as the "meet-up point". This has lift access available for those who have difficulty with stairs.

As the slots are already filling, it is recommended to get your application in as soon as possible by sending an email to WFDMeetup at gmail.com

The list will close at the end of January or earlier if all slots are taken, so that signs can be printed for display at the event and the list publicised.

Make sure you have the date firmly in your calendar *- CCARC Field day at Wyong - February 26th. 2012 and the Field-Day website at www.fieldday.org.au for all information about the event.

Police Roundup http://www.vicpolicenews.com.au/

Victorian National Parks next weekend

So far eight registrations have been received for declared National Parks activations in Victoria as a concentrated effort is made on the Keith Roget Memorial National Parks Award.

It is also part of the Amateur Radio Victoria Century and will run from Friday November the 18th through to Monday November 21st.

They include Heathcote-Graytown, Brisbane Ranges, Barmah, Dandenong Ranges, Greater Bendigo, plus a yet to be specified park in Gippsland.

For the Saturday and Sunday Terry Murphy VK3UP will be using the special call sign VK100ARV.

Others involved are VK3WAM, VK3JDA, VK3VTH, VK3ZPF, VK3EME and VK3PF.

Check them out by visiting www.amateurradio.com.au and tune around the bands next weekend giving them plenty of support.

(Jim Linton VK3PC)

VK4

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

October 9th was important for the 2 dozen or so amateurs who attended the President's Luncheon at the Bundaberg Radio Club. Since the reformation of the Wireless Institute of Australia and devolving the old state WIA branches into advisory committees, these meetings have been a way of sharing face to face between the clubs and the board of the Institute.

WIA President, Michael Owen, VK3KI ran the meeting so that ideas that had surfaced could be put and thoughts gathered from the clubs represented. Similarly, ideas and concerns from the clubs were put to the meeting and input from the VK4 event will be used at later similar get-togethers.

Discussion at the tea break and again at lunch ran the gamut of what you would expect of a bunch of amateurs - from home brew to dealings with policy councils. Still one question which Michael raised seemed not to prompt an easy response. Whilst everyone agreed that recruiting to the hobby from our younger community is necessary, getting a finger on what attracts the people who have grown up with the "convergent" technology, to me or you and our hobby of amateur radio, just seemed too hard.

As time has gone on and technology has outstripped individual imaginations, when we talk about the good old days of radio, is it not really us that has run out of steam and not the young people with their pocket computer radio internet linked devices? How do these people relate to you and me and how do we attractively present our interests to them?

I'm Geoff Emery and that's what I think....how about you?

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

With late notice and being a Monday Morning, it was great to see many of the Central Queensland Amateur Radio Association Members turn out to assist with an open day at the Rockhampton Heritage Village. Our members assisted the Heritage Village co-ordinator VK4NJB - Jeff in the setup, cleaning and activation of the radio museum.

The Singaporean Armed Forces and other international visitors were touring the Heritage Village on the day and were taken through the Amateur Radio Museum.

Members present displayed UHF, VHF and HF operations as well as a HF Portable Back-Pack radio. A big thanks go out to the CQARA Members that assisted. From all reports the display was well received by our international visitors.

I'm Adam - VK4MTJ on behalf of the Central Queensland Amateur Radio Association.

SUNSHINE COAST
Maleny VK4RSC 146.850 (91.5HZ) and 438.075 VK4RSN 53.7
Noosa Heads VK4RSL 146.825 and 438.175

The Expedition

3 members from SCARC set out together to travel to and attend the CHARC annual get together at Fairbairn Dam recently, they travelled up together but came back 3 different and separate ways.

What could have happened, are they still friends??

It started a few days early, 3 4WD's, 3 Caravans and 3 couples. It took 3 days to get up there from the Sunshine Coast which seems a bit slow but they did all have 4WD's from the same manufacturer. Possibly there were some bitsamissing however the official story is they took their time.

First nights camp and a brand new caravan suffered a broken awning clip at the hands of an experienced caravanner, oh the shame. There were other problems, intermittent radio comms in one car meant the other two could only chat to each other, some like to drive less per day, other like to drive more etc.

All were running HF APRS and it was interesting to see some get out a lot more position reports than others, this was good as it highlighted a fault with one setup. Not to mention another one that drove through a 10 foot clearance bridge with an 11 foot antenna, needless to say there were no beacons from that one anymore.

The report back to the club seems to indicate they do still talk to each other, I think they actually enjoy arguing amongst themselves, so even though they went their separate ways on the way back it was because they had planned it that way. But as they say "why let the truth get in the way of a good story"

Tone added to 146.850 at Maleny

Due to ongoing interference a 91.5Hz tone is required to access the Maleny 146.850 repeater.

The 146.825 linked repeater at Noosa does not require a tone so if you can't access the Maleny repeater due to not having a tone try Noosa.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again from the Atherton Tablelands this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

TREC members are planning for the VHF/UHF Spring Field Day contest to be held on the 26/27th November. We will be operating from Hallorans Hill which is located only 1.5 kilometres from the centre of Atherton.

Grid locator is QH22rr.

This contest is always lots of fun and allows operators to see just how far they can work on the higher bands.

Frequencies to be used by TREC will be 6M, 2M, 70cm, 23cm and 3cm.

Some club members will also be operating from other locations around the Atherton Tablelands during the contest.

We are also planning for the Annual TREC End of Year party to be held at the Tolga Hotel on Saturday 3rd December. The famous (or maybe that should read infamous) TREC Trivia Challenge will be held again with this year's quizmaster being Gary (Snoopy) VK4FD.

Now a reminder of our up and coming VK4XQA operation on 160M & 80M that is scheduled for 19/20/21 November 2011 from Euramo, QLD, Australia.

All systems are go, antenna ready, the rig and amplifier are ready, now we wait until we can all congregate at the site. Operation times and frequencies will be fairly flexible with operation mainly during our nights here and with prime consideration being given to top band operations.

Top Band Operations:

We will have one operator, John VK4TL who will be our designated CW operator and who will be operating in the CW section of the band, somewhere around 1825KHz.

Our SSB operators will be Jeff VK4BOF and Gary VK4FD who may also grace us with his CW skills, Chris VK4YCG will also be operating on occasion, mainly on AM for the old time operators out there. <Grin>

SSB and AM operations will be on or about 1845KHz though we can go lower for those of you out there that are not permitted operations in that section of the band.

These frequencies comply with the suggested band plan here in Australia and also seem to be ok for IARU region's 1 & 2 as well.

Please bare in mind that we will only be operating with ONE RADIO, therefore we cannot devote all our time to just CW or just to the AM/SSB side of it, we must share it aound amongst all modes and operators.

80M band Operations:

80M band operation is secondary to our 160M band efforts.

SSB & CW Operation on 80M will be within the frequency range of 3779KHz to 3799KHz. AKA, the 'DX Window' in Australia.

We *may* operate at a lower frequency ie: between 3500 & 3700KHz but it will be a much lower priority. In fact our whole 80M band activation is going to be of a lower priority for us, we are mainly going to be on-site for 160M band operations.

Power output on all modes and frequencies will be the Australian legal limit for the appropriate mode.

The rig will be an Elecraft K3 and the amplifier will be an Elecraft KPA500. An Elecraft P3 Panadaptor will also be in use to see the activity around us on the bands.

Well that's your lot for this week.

Once again don't forget to visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to QNEWS. Travel Well!

VK5

November 20 is Adelaide Hills Amateur Radio Society Hamfest Goodwood Community Centre, Rosa St Goodwood at 0930. Visit www.ahars.com.au for contact details

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

New Zealand Amateur Radio Day will be held March 10 from 1000 to 1400 hours.

NZART Branches are being encouraged to set up stations in prominent areas in their local community, and to make contact with other NZARD stations and home stations.

Media inclusion is to be encouraged.

The purpose of NZARD is twofold. To expose Ham Radio to the community and to prospect for potential amateur operators.

Container search continues

The search continues off Tauranga in ZL land for containers lost from the stranded ship Rena in bad weather back in October.

Sonar searches have found a number of them within a 1,000 metre radius of the ship, in water up to 80 metres deep.

A total of 30 containers has either washed up on beaches or been located, leaving around 50 still missing.

Four containers with dangerous goods on board the Rena have been tagged with transmitters in case they too end up coming off the ship.

500 kHz

During the meeting of the CEPT WRC-12 Conference Preparatory Group held in Bucharest between November 1st-4th 2011 a European Common Proposal (ECP)

was agreed.

This ECP represents the block vote of 48 administrations and was passed without dissent. It proposes an allocation to the amateur service between 472-480 kHz on a secondary basis with a maximum power limit of 5W eirp.

This ECP will now be forwarded to the ITU as a contribution from CEPT to WRC-12.

The IARU has thanked the European Member Societies who helped to influence their national administrations in this matter. This is an important step in the IARU efforts to secure a worldwide secondary allocation to the amateur service in the region of 500 kHz at WRC-12

BBC celebrates 75 years of television

Back on November 2, 1936 the BBC ran the world's first "repeat" of a TV show, this on the very same day they COMMENCED transmissions from Alexandra Palace.

Having the transmitter and studios in the same building caused some problems at first, such as radio transmissions interfering with electronics of cameras.

Two services were tested.

John Logie Baird's in one studio and a Marconi-EMI system in another.

A coin toss decided that the pilot programme would be transmitted on the Baird system first, and then on the Marconi-EMI system following a brief pause - so that there was a repeat show on the first day!

After three months it was decided to use the EMI system.

A BBC video reports names once considered for television included phototelegraphy, seeing by wireless, and electric telescope.

Read more: http://www.digitaljournal.com/article/313799#ixzz1d5Bw1kbU

Still at the Beeb, the BBC World Service is moving out of Bush House and into Broadcasting House early next year. An online auction of general audio and radio equipment is being held, which includes:

Audio consoles: Speakers: Microphones: Headphones, equipment stands, microphone stands, tape decks, turntables, stereo power amplifiers, general audio processing equipment.

For more information, including photos, and to sign up for the auction, visit http://www.go-dove.com/event-16010/BBC-World-Service

Bidding closes on 22 November.

==========

RSGB

New 6m beacon from Greece

A 5MHz beacon from Greece is now on the air.

Operating on 5,398.5kHz CW, it runs 30W into a non-resonant antenna for the moment. It should be on the air mostly between 19.00 and 06.00 UTC. It may be off on some days due to other HF activities at the test site, so try to listen regularly.

Details of the beacon message and timings can be found on the IARU Region 1 website, www.iaru-r1.org

New digital net

A new digital net to encourage use of these modes on 10m will be held every Saturday and Sunday at 18.00 UTC.

The net will gather on 28,125kHz USB, plus or minus QRM. RS ID and Call ID will be used to help people pick out the net and modes used. Olivia 500/8 mode will be used to call up the net but it may switch modes as needed.

Check out www.obriensweb.com/sked for online coordination during each session.

Colorado 6m beacon back on air

The Colorado 6m beacon is back on the air following rebuilding.

The operating frequency is 50.065MHz and the call sign is KA0CDN. Further information can be found online at www.rmvhf.org

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Nov 26-27 WIA Spring VHF-UHF Field Day

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Closed QSL Bureaux

There are 2 new countries that have closed their QSL bureaux,

TU Cote d'Ivoire and
V7 Marshall Island.

If you work these countries make sure you get the QSL manager or QSL direct.

There is no point in sending them to the outgoing bureau as they will only be returned to you.

Ascension Island will see activity by K7ZZ using ZD8ZZ and W6HGF using ZD8F.

They will be there until November 22 using CW, RTTY and some SSB.

Logs will be uploaded to Logbook of the World.

(irts)

Amateur Radio Newsline report that the Five Star DXers Association's T32C DXpedition to Christmas Island is now history.

Despite initial difficulties with their container of equipment not reaching the island, the team finished with over 213,000 contacts and this is the first time an expedition has exceeded 200,000 QSO's to that rare location.

AWARDS

VK100ARV is on air

Want to qualify for the Amateur Radio Victoria Centenary Award or obtain the special QSL card? Sunday this weekend has it activated again by Luke Steele VK3HJ. He has it on Thursday this week too.

VK100ARV is through the VK3RML repeater on Monday nights during the Digital Slow Scan TV session around 1000z-1300z. Outside those times Keith Proctor VK3FT will be on every Monday.

On Friday November the 18th Peter Freeman VK3PF puts it on air. And from the Brisbane Ranges will be heard Terry Murphy VK3UP both on the Saturday and Sunday.

Check out the VK100ARV roster, Award conditions, and reports on previous activity on the website www.amateurradio.com.au

Every day in November is a VK100ARV day.

RSGB Commonwealth Century Club Jubilee Award 2012

2012 is the Queen's Diamond Jubilee and mindful that the Queen is the head of the Commonwealth of Nations we are pleased to announce a new operating award for 2012.

To qualify for an attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from www.beru.org.uk/CCCaward/CCCindex.html

qdg.org.au

At this month's general meeting, the SEQATV group gave the Brisbane Digital Amateur Television Group permission to commence testing digital TV transmission on 446.5 MHz from their Ocean View repeater site.

It is hoped that if the testing goes well, the two groups will combine their ATV repeaters in the near future.

(Alan Wills VK4NA For the SEQATV group)

'Chirpy' 28 MHz CW Transceiver on YouTube

Roger G3XBM has released a video of 'Chirpy' the CW transceiver for 28 MHz that uses just 14 components.

This ultra-simple transceiver puts out just over 100mW and can hear signals down to around 2uV in a quiet room. Crystal controlled, full QSK and great fun, although the signal does chirp! Hence the name.

Best DX so far is 1414km.

The circuit diagram of Chirpy is at
https://sites.google.com/site/g3xbmqrp/Home/xbm10_2

Google Chirpy - a 14 part CW transceiver for 28MHz on YouTube

OSCAR 1 YouTube video

A prototype of the first Amateur Radio satellite, OSCAR 1, has been on display at the AMSAT symposium in San Jose. OSCAR-1 was launched nearly 50 years ago on December 12, 1961. Its beacon sent the letters HI on 144.9830 MHz CW.

Bob Allison, WB1GCM of ARRL's Technical Lab led the effort to refurbish the OSCAR 1 prototype on display at ARRL headquarters. With the help of OSCAR 1 developer Lance Ginner, K6GSJ, Bob and his team got OSCAR 1 operational again.

The refurbished OSCAR-1 was on display at the ARRL exhibit area at the 2011 Dayton Hamvention. The OSCAR 1 prototype was again on display during the AMSAT Symposium where everyone was able to once again hear the CW transmissions (now managed by a PIC controller) in the 145 MHz band.

November through March 0900 UTC 7.068 MHz

AubieSat-1 designated AO-71

OSCAR Number Administrator, Bill Tynan, W3XO reports that he has advised J. M. Wersinger, PhD, KI4YAU, Professor Emeritus and Director of Auburn

University's Student Space Program, that following the successful NASA ELaNa III launch on October 28, 2011 of AubieSat-1, and by the request of the AubieSat-1 team, the new satellite has been assigned an OSCAR number.

Professor Wersinger documented that telemetry has been received from the satellite. The IARU-Sat Website states that AubieSat-1 was fully coordinated with the IARU.

Bill wrote, "Therefore, by the authority vested in me by the AMSAT-NA President, I hereby designate AubieSat-1 as AubieSat Oscar 71 or AO-71 and welcome this newest OSCAR into the Amateur Radio satellite community.

On behalf of AMSAT-NA and the world's amateur radio satellite community, I congratulate Professor Wersinger, Auburn University and all of those responsible for building, testing and launching this new CubeSat. May its mission meet with success."

(Bill Tynan, W3XO OSCAR Number Administrator via SouthGate)

Following in text editions only:-

Saving almost 1,000 lives

The Radio Amateur Society of Thailand (RAST) Secretary Paul Wacharaphol HS4DDQ reports his team helped to save almost 1,000 lives by coordinating rescue communications in cases of medical emergencies during the severe flooding.

He coordinates the emergency medical communications at Public Health Ministry on Ngarmwongwarn Road and using the call sign HS0AC. Speaking at a small RAST gathering at Sena Place Hotel on Sunday November 6, Paul HS4DDQ told how emergency unfolded.

Since the flooding began in July at least 529 people have been killed in the affected 63 of Thailand's 77 provinces. The cost to the local economy including hundreds of global manufacturers who rely on its low-cost factories keeps rising.

The amateur radio station established by the National Broadcasting and Telecommunications Commission (NTC) using the call HS0AB were also discussed, along with the donations that RAST has received that now total over 50,000 baht, including a large amount received from donors in Malaysia.

The NBTC has praised the role that radio amateurs have been playing to help people cope with the disaster by providing communications support and this have been especially helpful in flooded areas where several mobile phone cell sites have failed.

Government agencies have been able to take advantage of the amateur radio communications infrastructure when their own networks failed.

Using their skills and experience radio amateurs kept communicating with one another under adverse conditions. There volunteer spirit that has carried radio amateurs to the "front-line" has also helped many victims of Thailand's worst flooding in over 60 years.

The RAST club station HS0AB was controlled by Pranee Netrattana E21DKD, was praised for her efforts.

The station was inundated by flood water to a depth of over one metre, but that the campus was presently still inaccessible and the extent of damage to equipment is yet to be evaluated

A good example of this was demonstrated by Champ Muangamphun E21EIC and his wife Goi E20NKB, who left after the meeting with flood relief supplies in their four-wheel drive vehicle well equipped with a boat strapped to the roof.

(Jim Linton VK3PC, Chairman IARU R3 Disaster Communications Committee / RAST)

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and
Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a
range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

GB2RS NEWS

Sunday 13 November 2011

The news headlines:

* Voting deadline approaches for RSGB EGM

* Intruder Watch reports taxis on 28MHz

* New QSL Managers for G6 and G8 2-letter calls

The RSGB EGM takes place at the Hilton Metropole, NEC, B40 1PP on Saturday 19 November. Electronic and postal voting closes at 12 noon on 16 November. If you plan to attend the EGM, it would help if you let us know via the website at www.rsgb.org/attend. Registration opens at 11am and tea and coffee will be available on arrival. The EGM starts promptly at 12 noon. Tickets for a light sandwich lunch will be available for purchase on the day. Unfortunately, car parking at the NEC is regulated by the NEC at a standard price. The RSGB has negotiated a small discount and parking will be £7 per vehicle. There is a free courtesy bus from Birmingham International train station. You will need to call the bus using a courtesy telephone. The phone, which has a Hilton logo on it, is inside the station arrivals hall, next to the Subway restaurant.

Following the flood of low power FM transmissions across the 28MHz amateur band, the RSGB Intruder Watch has provided the Ofcom Monitoring Station at Baldock with a number of recordings. It has been confirmed that these transmissions are from taxi operators and this will form the basis of a complaint by Baldock to the Russian authorities. The timing of this complaint is fortunate as Uli Bihlmayer, DJ9KR, the Joint Coordinator of the IARU Monitoring System, has recently had a reply to a written complaint that he made directly to the Russian authorities. They have agreed to monitor the 28-29.7MHz band with the intention of stopping transmissions from CB and taxi operators. It remains to be seen how this works in practice but there is now a real possibility that this problem is going to be tackled at source.

Frank Harris, G4IEY, the long-time QSL sub manager for both the G6 and G8 2 letter calls is retiring. The Society thanks him for his help and support. Whilst both of these call groups are small, they remain quite active as they are used by clubs and as re-issued calls to relatives. The bureau is most grateful to Miles Hall, G4GSB and Dave Helliwell, G6FSP, who currently manage the G6 and G8 three letter groups, for

agreeing to include all two letter calls with their existing workload. Cards and envelopes are being transferred and sub groups will now simply be known as G6 and G8 Series, respectively. More details are available on the RSGB website.

There is some good and some bad news coming out of the Czech Republic. The use of the band 70.1- 70.3MHz will be extended throughout 2012 but, unfortunately, the 5MHz experiments will come to an end by the end of 2011.

The OJ0X DXpedition to the Aland Islands finished with more than 66,000 QSOs in the log. All in all, OJ0X contacted 26,873 individual stations and 141 stations made it on all 9 bands offered. The updated log search page is now online at www.qrz.com/db/OJ0X. The log processing delay for Logbook of The World remains at approximately 60 hours, with approximately 8000 logs queued for processing. The ARRL IT Manager asks that users do not upload the same log more than once. The ARRL has implemented an interim fast lane for processing logs and, since these changes have been put into place, the number of logs waiting to be processed has been reduced by approximately 20 percent.

Two more countries have closed their QSL bureaux. The first is TU, Cote d'Ivoire, and the other is V7, Marshall Island. If you work one of these countries, make sure you get QSL route information or QSL direct.

And now for the details of rallies and events for the coming week

A D-Star Digital Workshop will be held today, 13 November, at County Hall, Atlantic Wharf, Cardiff CF10 4UW. Doors open from 10am to 5pm. Bring a copy of your licence to operate the D-Star station on the day. There will be help with operating D-Star, programming radios, repeater and reflector use and navigating your radio. Newcomers are most welcome. Contact Dave, 2W0RUH by e-mail to dave.2w0ruh@ntlworld.com for further details.

The Mayo Radio Experimenters are holding their annual Radio Rally on Sunday 20 November at the Welcome Inn Hotel, Castlebar, Co Mayo, where the doors will open at 11am. There will be the usual range of traders, club stands, demonstrations and extensive catering facilities. On Saturday evening, at 7pm, Pat Fitzpatrick, EI2HX will give a talk and demonstration on amateur television and at 9pm Dave Deane, EI9FBB will give a talk on the ARRL DXCC Program and also on the Logbook of the World system. He also took part in the recent T32C DXpedition. Full details of the hotel packages, the lecture programme and rally information is online at www.ei7mre.org.

Also on 20 November, the 34th CATS Radio & Electronics Bazaar will take place at 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors will be open from 10am to 1pm and admission is £1. There will be a Bring & Buy.

Plymouth Radio Club Rally will be held on 20 November at Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. Doors open at 10am and

admission is £2. There will be trade stands and a Bring & Buy. More information from Bob Griffiths, G7HNB on 017523 431 277.

Now for the news of special events

Caddington Scout and Cub group is holding a communication week starting on 14 November at Caddington Scout HQ, Dunstable Road, Caddington, Bedfordshire using the callsign GB1CSC. Using the 40m, 20, and 2m bands they are hoping for lots of contacts.

Today, Sunday 13 November, GB4WLR will be on the air from the West Lancs Railway as part of the Children in Need fund raising event.

Paul Godley, 2ZE was sent to Ardrossan in December 1921 by the ARRL as part of the transatlantic tests. This resulted in the first short wave transatlantic amateur radio signals being received in Scotland. The Scots, Crocodile Rock Amateur Group will put GB2PG on the air to commemorate the 90th anniversary from 18 November until 15 December. More details at www.gb2pg.blogspot.com. And now the HF DX news compiled from 425 DX News and other sources

DK9PY will be in Guadeloupe until 25 November using the callsign FG/DK9PY. He plans to be active on CW on all bands from 10 to 80m.

Ascension Island will see activity by K7ZZ as ZD8ZZ and W6HGF using ZD8F. They will be there until 22 November using CW, RTTY and some SSB. Logs will be uploaded to Logbook of the World.

T2T will be on the air from the Pacific Island of Tuvalu until 8 December. They will be active on all bands from 6 to 160m and will try to have three stations on the air as often as possible. The QSL manager is VK4FW.

Karel, ON5TN will be staying at the Belgian Antarctic base Princess Elisabeth between 16 November and late February 2012. He plans to operate again as OR4TN in his spare time. Updates will be posted on qrz.com under OR4TN. QSL via ON5TN.

Now the contest news

The RTTY leg of the WAE DX Contest finishes at midnight tonight, 13 November. Everybody works everybody, although single operator stations are limited to 36 hours out of 48. The exchange is signal report and serial number.

Tuesday 15 November sees the 1.3GHz UK Activity Contest take place from 2000 to 2230UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

Next weekend, 19 and 20 November, the 2nd 1.8MHz Contest will take place from 2100 to 0100UTC, this is one of the HF Championship events. Using CW, the exchange is signal report, serial number and District code.

Thursday 22 November sees both the 50MHz UK Activity Contest and the SHF Activity Contest take place, both between 2000 and 2230UTC. On 50MHz, it's all modes with the exchange of signal report, serial number and locator. For SHF it's the 2.3 to 10GHz amateur bands using all modes and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 31st of October to the 6th of November, compiled by Neil Clarke, G0CAS on the 7th of November

On the 1st, a large sunspot group rotated over the north-east limb into view. Even before this, the STEREO Behind spacecraft saw this region producing solar flares. Once in view this continued, a total of 9 M class solar flares took place. On the 3rd this group produced an X class flare, which was the fourth largest flare so far this sunspot cycle. Numerous C class flares also took place, including some from other regions. No coronal mass ejections took place that were directed towards Earth. Solar flux levels increased from 138 units on the 31st to 177 by the 6th. The average was 158. The 90 day solar flux average on the 6th was 128, that's four units up on last week. X-ray flux levels varied little day to day and averaged B9 units. Geomagnetic activity was initially quiet on the 31st but during the 1st a coronal mass ejection arrived and lasted into the next day. The Ap index was 21 units on the 1st. Quiet conditions returned on the 3rd and lasted to the end of the period. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 460 kilometres per second on the 1st to a slow 260 by the 5th. Particle densities were low every day. Bz fluctuated between minus 13 and plus 10 nanoTeslas during the CME disturbance and between minus and plus 2 nanoTeslas when the field was quiet.

And finally the solar forecast. The recent increase in solar activity is expected to continue this week. Solar activity is expected to be low but could increase on almost any day. Solar flux levels will be determined in part by the size of the visible sunspot groups but should be around the 150's. Geomagnetic activity is expected to be quiet every day with no coronal hole disturbances expected, but beware, with the present level of solar activity a coronal mass ejection could head our way and increase activity substantially. MUFs during daylight hours at equal latitudes should be around 35MHz. Darkness hour lows should be about 11MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 0800 and 1000 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 14 November Gloucester Amateur Radio & Electronics Society is on the air on HF. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 14 November Leicester Radio Society showing an RSGB video, VHF Then And Now, by Jack Hum, G5UM. Details from John, G0IJM, on 07939 121 132.

On Monday 14 November South Birmingham Radio Society is planning its Christmas party and future rally visits. Contact Don, on 01214 581 603.

On Monday 14 November Stratford Upon Avon District Radio Society is having a surplus equipment sale hosted by John, G8HJS. Contact G0CHO, on 01608 664 488.

On Tuesday 15 November Derby & District Amateur Radio Society is having an illustrated talk on broadcasting aerials. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 15 November Loughborough & District Amateur Radio Club invites members on the air from home on 2m. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 15 November Wythall Radio Club is having a homebrew night. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 16 November Midland Amateur Radio Society is holding an open meeting, arranging outside events for the spring, and running training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 16 November South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 16 November Telford & District Amateur Radio Society is having a quiz night. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 17 November Salop Amateur Radio Society is having the Chairman's forum. Details on the club website at www.salop-ars.org.uk.

On Thursday 17 November South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603. On Friday 18 November Coventry Amateur Radio Society is holding a committee forum. Contact John, G8SEQ, on 07958 777 363.

On Friday 18 November South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Sunday 20 November Derby RAYNET Amateur Radio Group is supporting an all day walk. Contact Martin, G7MKS, via email to contactus@derbyraynet.co.uk.

NEWS FOR THE NORTH OF ENGLAND On Monday 14 November Sheffield Amateur Radio Club is having a talk on repeaters by Steve Webster, M1ERS. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 14 November Thornton Cleveleys Amateur Radio Society is having a talk on digital cameras and how they work by John, G8RDP. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 15 November Chester & District Amateur Radio Society is conducting an asset review. Details from Barbara Green on 07957 870 770.

On Tuesday 15 November Halifax & District Amateur Radio Society is on the air, discussing the forthcoming construction workshops and continuing the training courses. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 15 November Stockport Radio Society is having a presentation on receiver tuning by John Shufflebotham. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 16 November Denby Dale Radio Club is having a talk on pound shop aerials by Gerald, G3SDY. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 16 November Hornsea Amateur Radio Club is having a talk by G4YTV. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 17 November Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 17 November South Manchester Radio and Computer Club is having a talk on VHF mobile antenna installation by Brian, G4LUL. Details from Ron, G3SVW, on 01619 693 999.

On Saturday 19 November Hornsea Amateur Radio Club commences its weekend event for the 2nd 1.8MHz Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday 19 November South Tyneside ARS will have a table at St Peters Church Hall, York Ave, Jarrow as part of the Autumn Fayre. Contact George, M1FNE, by email to g.scott@blueyonder.co.uk.

NEWS FOR NORTHERN IRELAND On Monday 14 November Greenisland Electronics Amateur Radio Society is on the air on 2m. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

Lough Erne Amateur Radio Club reports that it has been greatly enriched by an influx of enthusiastic and recently licensed members. Courses and examinations held in the Share Centre yielded 39 successes, 26 Foundation, 9 Intermediate and 4 Advanced, with only one fail. Tommy Nelson MI0RVH, is a prime example. He came into the hobby via the Club's courses, got his Full Licence in June, and then was elected Chairman last September. In fact, five of the nine-member Committee

hold recent Full or Intermediate licenses. Lough Erne Amateur Radio Club is looking for more like them, so is now recruiting for another run of Foundation and Intermediate courses. Anyone interested should please contact the club secretary, Michael Clarke, Mi5MTC, on 02868 621 436 or email sec@learc.eu.

NEWS FOR SCOTLAND On Tuesday 15 November Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Thursday 17 November Aberdeen Amateur Radio Society is on the air. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 18 November Cockenzie & Port Seton Amateur Radio Club is having a talk on planning permission by Len Paget GM0ONX. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 14 November Coulsdon Amateur Transmitting Society is holding its annual quiz with Steve, G7SYO and Wendy. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 14 November West Kent Amateur Radio Society Club is having an update on the software defined radio project by Richard, G8CDD. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 15 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 15 November Bromley & District Amateur Radio Society is having a talk on PICs. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 15 November Harwell Amateur Radio Society is having a talk on the development of the G4TPH magloops by Tom, G4TPH. Contact Malcolm, G8NRP, on 01235 524 844. On Tuesday 15 November Verulam Amateur Radio Club is having five minute tips by members. Details from Tony, 2EOWAP, on 01727 853 087.

On Wednesday 16 November Worthing & District Amateur Radio Club is having a DVD evening. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 17 November Colchester Radio Amateurs is having a talk on microwaves by Sam Jewell, G4DDK. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 17 November Cray Valley Radio Society Nobby, G0VJG is giving a talk about the T32C DXpedition, with some insight to behind the scenes operating. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 17 November Horndean & District Amateur Radio Club is having a talk on Portsmouth area transport in the mid-1900's by Eric Watts. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 17 November Horsham Amateur Radio Club is having a social evening at The Chequers' Inn, Rowhook RH12 3PY. Details are on the web at www.harc.org.uk.

On Thursday 17 November King's Lynn Amateur Radio Club is having a talk entitled the bodger's guide to microwaves by John Worsnop, G4BAO, chairman of the UK Microwave group. All are welcome; entry is £1 on the door and there's free tea and coffee. Please check www.klarc.org.uk for more details of the event, and the approach to the club site.

On Thursday 17 November Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Friday 18 November Loughton & Epping Forest Amateur Radio Society is holding a club meeting. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 18 November Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239 371.

On Friday 18 November Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Sunday 20 November Horsham Amateur Radio Club is having a morning fox hunt. Details are on the web at www.harc.org.uk.

NEWS FOR THE SOUTH WEST On Monday 14 November Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 15 November West Devon Radio Club is having a talk and demo on the oscilloscope by Jules Cuddy, M1AGY. Further information from Jules Cuddy, M1AGY, on 01752 291 588. On Wednesday 16 November Thornbury & South Gloucestershire Amateur Radio Club is holding a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 16 November Trowbridge & District Amateur Radio Club is having a natter night and committee meeting. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 17 November South Bristol Amateur Radio Club is holding its AGM. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 17 November Swindon & District Amateur Radio Club is having a members' equipment sale. Contact Den, M0ACM, on 07810 317 750.

On Thursday 17 November Yeovil Amateur Radio Club is having a practical evening of antenna building. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 18 November North Bristol Amateur Radio Club is on the air. More information from Dick on 01454 218 362.

On Friday 18 November Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to

g6fsp@tars.org.uk.

NEWS FOR WALES On Sunday 13 November there will be a D-Star digital workshop at County Hall, Atlantic Wharf, Cardiff CF10 4UW, from 10am until 5pm. It will cover such things as basic D-Star, radio programming, repeaters and reflectors. Volunteers will even program your radio for you. Talk-in is on 145.550MHz. For more information email dave.2W0RUH@ntlworld.com.

On Tuesday 15 November Chepstow & District Amateur Radio Society is holding its AGM. More information from Paul, on 01594 842 580.

On Tuesday 15 November Wrexham Amateur Radio Society is having a beginners guide to understanding propagation.. Details from Patrick, 2W0HUU, on 07947 701 927.

On Friday 18 November Newport Amateur Radio Society is on the air and having a natter night. More information from Ross Clare, GW3NWS, on 01633 880 146.

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with regret that we have to announce that the key of Gerald Smith, ZS6IG, a dear friend of the Sasolburg ARC and the Vaal Triangle ARC and a mentor of many other radio amateurs became silent on Wednesday 9 November 2011.

Our sincere condolences to his wife Kathy and to all his friends and family.

(PAUSE)

In the news today:

MARITIME MOBILE NET IN CREW RESCUE

RADIO AMATEUR EXAMINATION RESULTS IMMINENT

CEPT TO PROPOSE NEW 500 kHz ALLOCATION AT WRC-12

SCIENTISTS PLAY PING PONG WITH SINGLE ELECTRONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

MARITIME MOBILE NET IN CREW RESCUE

The South African Maritime net assisted in the rescue of the crew of the sailing vessel "Wizard" which belonged to Gerry Boshoff, ZS6SUN . The yacht struck a submersed container. Gerry had maintained regular contact with the SA Maritime Net which enabled Graham Griggs, ZS2ABK, to supply the maritime authorities with much needed information. The crew was saved and taken aboard a tanker which had been diverted to the

spot where the sailing vessel sank.

Mark Steed, the MRCC Duty Controller passed on a note of thanks from the father of one of the crew. He told Graham "from the MRCC side we thank you for your invaluable assistance in making this rescue a success. It is a sterling service you provide and our relationship is much valued and appreciated by MRCC",

Tune to Amateur Radio TODAY at 10:00 this morning for a full report from Graham, ZS2ABK. You can find detail of the frequencies and various transmission times on www.sarl.org.za, select Amateur Radio TODAY from the left hand menu.

RADIO AMATEUR EXAMINATION RESULTS IMMINENT

The RAE results will be issued early this week with the call sign allocation by the end of the week. Listeners may remember that in July this year ICASA changed the procedure of the administration of the results of the RAE. At the time the following bulletin was released: "The SARL and ICASA have revisited the Radio Examination Moderation Process. After each examination an SARL appointed moderator verifies the examination results and checks that all the marks are correctly computed and verifies that all questions are correctly marked. In a multiple choice examination the answer is either right or wrong. The examiner has no discretion. There are however at times marginal cases where the candidate scores a very high mark in one section but just misses to score the required minimum of 50% in the other section. It is in cases like these that the moderator reviews the answer papers and makes a recommendation to ICASA".

In this new process ICASA verifies the results before they are published. Unfortunately this process takes a little longer but is ultimately the fairest way of handling the results of the examination. However, when candidates receive their call signs on Friday they may go on the air without having to wait for the official letter, certificate or license.

CEPT TO PROPOSE NEW 500 kHz ALLOCATION AT WRC-12

The European Conference of Postal and Telecommunications Administrations better known to radio amateurs as the C-E-P-T says that it plans to back a proposal at the 2012 World Radio Communication Conference to create a new amateur radio allocation near 500 kHz.

During the November 1st to 4th meeting of the CEPT's WRC-2 Conference Preparatory Group held in Bucharest, Romania a European Common Proposal was agreed on for a 5 watt Effective Radiated Power allocation to the amateur service between 472 to 480 kHz. This new band would be on a secondary basis to all other spectrum users.

This European Conference of Postal and Telecommunications Administrations, ECP, will now be forwarding the proposal to the International Telecommunications Union in the hope of having it

included in the WRC-12 agenda. It should be noted that this international body represents the block vote of 48 administrations and the motion to create the 500 kHz amateur radio band.

SCIENTISTS PLAY PING PONG WITH SINGLE ELECTRONS

Scientists at the Cambridge University (UK) have shown an amazing degree of control over the most fundamental aspects of an electronic circuit, how electrons move from one place to another. Researchers at the University's Cavendish Laboratory have moved an individual electron along a wire, batting it back and forth over sixty times, rather like the ball in a game of ping pong. The research finding may have applications in quantum computing transferring a quantum 'bit' between processor and memory, for example.

Imagine you are at a party and you want to get to the other side of a crowded room to talk to someone. As you walk you have to weave around people who are walking, dancing or just standing in the way. You may also have to stop and greet friends along the way and by the time you reach the person you wanted to talk to you have forgotten what you were going to say. Wouldn't it be nice to be lifted up above the crowd, and pushed directly to your destination?

In a similar way, electrons carrying a current along a wire do not go directly from one end to the other but instead follow a complicated zigzag path. This is a problem if the electron is carrying information, as it tends to 'forget' it, or, more scientifically, the quantum state loses coherence.

In this work, a single electron can be trapped in a small well (called a quantum dot), just inside the surface of a piece of Gallium Arsenide (GaAs). A channel leads to another, empty, dot 4 microns (millionths of a metre) away. The channel is higher in energy than the surrounding electrons. A very short burst of sound (just a few billionths of a second long) is then sent along the surface, past the dot. The accompanying wave of electrical potential picks up the electron, which then surfs along the channel to the other dot, where it is captured. A burst of sound sent from the other direction returns the electron to the starting dot where the process can be repeated. The electron goes back and forth like a ping-pong ball. Rallies of up to 60 shots have been achieved before anything goes wrong.

This is an enabling technology for quantum computers. There is a lot of work going on worldwide to make this new type of computer, which may solve certain complex problems much faster than classical computers. However, little effort has yet been put into connecting up different components, such as processor and memory. Although the experiments do not yet show that electrons 'remember' their quantum state, this is likely to be the case. This would make the method a candidate for moving quantum bits of information (qubits) around a quantum circuit, in a quantum computer.

CLUB NEWS

OVERBERG AMATEUR RADIO CLUB

On 19 November 2011, the Overberg Amateur Radio Club will be having their end of the year function in conjunction with the HF Field Weekend at the QTH of John, ZS1DI, and Judy, ZS1JEG, at Stanford. They will also be hosting the Cape Town Branch of the AWA and they will be displaying and operating some of their radios.

For those of you with surplus equipment, take it along and they can have a boot-sale.

A short meeting will be held at 11:00. The usual bring-and-braai will be held after the meeting and should continue into the evening for those staying over. Please take some wood if possible, and your braai implements. Braai drums will be available.

Visitors are more than welcome. Go and join the fun over the weekend. Contact Andre, ZS1AZ, at 028 514 2018 or 072 729 1680. You can also contact Sam, ZS1OR, at 028 316 1470 or 073 250 0428 for more information and directions.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that sunspot 1 339 is in a state of slow decay but can still produce some M-class flares. The sun's surface is peppered with smaller sunspots promising exciting HF conditions.

For those who do their own frequency predictions the expected effective sunspot number for the week will be around 127, another new high for this solar cycle.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13 November - AWA open day at the Rand Airport starting at 10:00. 13 November - Pears HF Competition 12:00 till 16:00 UTC. 19/20 November - SARL Field day competition. 19 November - Overberg Amateur Radio Club get together at Stanford. 20 November - CW leg of 80 m Club competition. 27 November - Digital competition. 30 November - last day to submit logs for Pears HF DX-expedition. 31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding

the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 13th November 2011

IRTS Committee Meeting

The next IRTS committee meeting will take place on 10th December at 11.00 in Portlaoise. Affiliated clubs are encouraged to send a representative.

South Dublin Radio Club

There will be a talk at South Dublin Radio Club on Tuesday 15th of November.

It will be given by Paul O Kane EI5DI, one of the two EI's who took part in T32C DXpedition to Kiritamiti (Christmas Island). All events at the club are open to visitors and we would encourage everyone to come along to Ballroan community centre on the Marian Road in Dublin.

http://www.southdublinradioclub.ie

Mayo Radio Experimenters Network

The MREN Rally would be held on November 20th this year at its now established venue of The Welcome Inn Hotel in Castlebar. All the usual traders attending and as always it promises to be a very enjoyable rally. An opportunity to meet old and new friends. Doors open at 11am.

DXCC Awards

Congratulations to Tony EI7JN, who is EI's newest DXCC Award holder. Tony has joined the DXCC list with 209 entities confirmed. As a matter of interest, Tony tells us that almost 80% of these confirmations came through Logbook of the World.

See www.irts.ie/dxcc for the latest EI DXCC list. We note in particular that Declan EI6FR now has all 341 current DXCC entities confirmed. With the big improvement in conditions on the higher bands in recent weeks there has been plenty of DX activity over this period, which no doubt will shortly be reflected in the DXCC listings.

DX News

A large multi-national team will be QRV from Nepal from 13 November until 25 November. The callsign to look out for is 9N7MD. Activity will be on all bands in SSB, CW and RTTY. The QSL Manager is IK2VUC and logs will also be uploaded to Logbook of the World.

Islands on the Air Award enthusiasts will have the opportunity to work a new one this week when 7Z7AA comes on the air from 17 - 25 November. The QTH will be Jabal Al Lith Island in the Red Sea .The IOTA Reference Number is AS-191 and QSL info is via 7Z1CQ. In addition this will probably be a new one for the WPX hunters.

Antonio DL4EA will be back in Zimbabwe for a couple of weeks starting 13 November. As before he will be using the call Z24EA and will be active on all bands 160 - 6m. He hopes to have lots of contacts on 6m so please look out for him.

Sig NV7E who also holds the callsign ZS6SIG will be working in Kenya for the next three years. He enjoys working DX and will be QRV as 5Z4EE on all bands 80 - 10m. QSLs go via the W7 bureau or direct to his address on QRZ.COM.

T2T Tuvalu

Following the cancellation of the C21A Nauru expedition, Pacific DXers team members VK4AN, VK4FW, VK4NEF, NL8F, K4ZLE and W5SL now plan to be active from Tuvalu as T2T between November 11 to December 8, 2011.

Dundalk Amateur Radio Society EI7DAR

Michael, EI5GG will give special demonstration and instruction on ATV on Wednesday 16th November 2011 at 8pm sharp at the club QTHR. All are welcome.

Extra Long Electrical Arcs

Researchers at the University of Canterbury, in New Zealand, have developed a new, lower-voltage method of generating extra-long, lightning-like electrical arcs. The arcs are created when an electrical impulse is applied to a thin copper wire that subsequently explodes. By jump-starting the arcs using exploding wires, as opposed to the traditional method of directly breaking down air, the researchers reduced the amount of voltage needed to create an arc of a given length by more than 95 percent.

Thailand Amateur Radio

At a recent gathering hosted by Thailand's amateur radio society, RAST, those present heard how RAST Secretary Wacharaphol, HS4DDQ, and his

team working with the Public Health Ministry and using the callsign HS0AC had helped to save almost 1,000 lives by coordinating rescue communications in cases of medical emergencies.

Old QSL Collection

Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 9500 old amateur radio QSL cards in several different albums/galleries. The website can be viewed on http://LesNouvellesDX.free.fr

---

EI4GXB Radio Theory Notes

Ger EI4GXB advises us that he has uploaded files to the Radio Theory section of his website which he has used for the theory class last year in Limerick. They may be of help to any candidates sitting the examination in 2012. Go to www.ei4gxb.com for further details. Comments welcome to Ger on ei4gxb /at/gmail /dot /com

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NJ1Q & ARRL DX, K2SX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, N6RT, K7BHM, N7OU, K8GI, K8YSE, W8GEX (60m News), W8MP, W0GJ, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, F6FQK, G4IRN, I1JQJ/IK1ADH & 425 DX News, JA1XGI, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and Z21BB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-Novovember, through Sunday, 13th-November there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9X, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Slavo/SP2JMB and his XYL Dorota/SP2TO will be active as 3B8GY from Mauritius Island between February 5-25th, 2012. Activity will be on all HF bands using CW, SSB and RTTY. Also, both operators will be active in ARRL International DX CW Contest (February 18-19th). QSL via

SP2JMB.

5B, CYPRUS. John, G4IRN, will be active as 5B/G4IRN from Cyprus during the CQWW DX CW Contest (November 26-27th) possibly as a Single-Op/ Single-Band (20m)/High-Power entry. There may be some activity prior to the contest weekend. QSL via G4IRN, direct (see QRZ.com) or by the Bureau (he accepts E-mail Bureau requests). Logs will be uploaded to LoTW upon his return to the UK.

5R, MADAGASCAR. Just a reminder to look for Eric, F6ICX, to once again be active as 5R8IC from Saint Marie Island (AF-090) between November 15th and December 17th. Activity will be holiday style operating CW, RTTY, and PSK63, and using 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log during his activity. QSL via his home callsign (QRZ.com). View pictures of his last trips at: http://f6kbk.free.fr/5r8ic/5r8ic.htm

8Q, MALDIVES. Yuki, JH1NBN, will be active as 8Q7ZB from the Maldive Islands (AS-013) between November 15-29th. He is reportedly here on business. Activity will be on the HF bands, propagation permitting. He may also possibly enter the CQWW DX CW Contest (November 26-27th). QSL via his home callsign, direct or by the Bureau.

9G, GHANA (Update to OPDX.1035). Mark, W8MP, an airline pilot who travels periodically to Accra and plans to be active as 9G5MP, informed OPDX on Thursday that he received a short notice and is heading back to Ghana Friday night (10 hours notice). So by the time you read this, he may be on the air. Mark states that he will be there for a week and is bringing his IC7000. He mentions, "Not sure about antenna, will have a Buddipole and some random wire. Only paper logging this time, as it is either a radio or a computer. Phone and CW is the plan for now. Will work out the bugs this time and maybe do it better next time." QSL via his home call-sign.

9N, NEPAL. By the time you read this, the multi-national team should be all together and on the air as 9N7MD until November 27th. Some of the team members have arrived early and have been active as 9N7MD and 9N7DX. Activity will be on all bands using CW, SSB and the Digital modes. Also, for the first time in history, they have received official permission to use the 6 meters band without restrictions! QSL Manager is IK2VUC for direct, by the Bureau or use the OQRS (see the Web page). The LoTW files will be uploaded by the end of March 2012 (four months after QRT). Activity will also include an entry in the upcoming CQWW DX CW Contest as 9N7DX. QSL via 4Z4DX. For more details and updates, visit the "NEPAL11" Web page at: http://www.mdxc.org/nepal2011

A2, BOTSWANA (Ops needed!). Frosty, K5LBU, reports, "Well, it seems like we have lost 3 of our members for the DXpedition to Botswana in March 2012. So, therefore, we are looking for some more operators that might like to go with us. The plan is to arrive in Johannesburg on the 15th of March and spend 3 nights in a game park on the way to Botswana. Arriving at the Lotsane lodge on the 18th and returning to Johannesburg on the 28th and departing on the

29th. Will operate as A25HQ in the CQ WPX Contest while there. If you would like to go E-mail me at: 3da0cf@gmail.com
The cost is 235.00 USDs per day per person and this covers all meals, transport and lodging. All you will need is your laptop for logging and a key and headset. I plan on having a Icom 746pro, a Yaesu FT450 AND at least one Expert 1K-FA amp. Antennas are a T6 logP, HF2V, and a folded dipole that covers 160-10 meters also. Might put up another T6 if we have a total of 6 or more operators."

A3, TONGA. Haru, JA1XGI, will be active as A35XG from Tonga between April 2-9th, 2012. Activity will be on 20-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. He is expected to use a 2 element beam on the HF bands. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW.

C9, MOZAMBIQUE. Mike, K9NW, will be active as C91NW from Mozambique between November 21-29th. Activity will be on 160-10 meters using CW, SSB, RTTY and possibly 6m. He will also be on during the CQWW DX CW Contest as a Single-Op/All-Band entry. QSL via his home callsign.

E35, ERITREA. Erling, LA6VM, co-organizer and team leader on the E35X expedition to Eritrea in 1993, has obtained the callsign E35X and may be active again. No other details are available. Stay tune!

E5, NORTH COOK ISLANDS (Update). Last heard, Bill, N7OU, is currently active as E51NOU from Rarotonga Island (OC-013, WFF E5FF-002), South Cook Islands. His flight to Manihiki, North Cook Islands, was still being delayed (due shortage of fuel), but he is expected to leave very soon - possibly in a few days. Bill tells OPDX, "A ship has now delivered the fuel and the plane will go up as soon as two pilots can be scheduled. Because of the delay, I've moved up my departure date from Manihiki to 6th Dec. My N. Cook callsign will be E51MAN. For about the last week I've had to be packed and ready to go at short notice, but I've been operating as E51NOU on the high bands, using a wire vertical supported by a long stick I found. It's ugly but works great. All QSOs with E51NOU are S. Cook and all QSOs with E51MAN will be N. Cook. Unless you're unsure about a QSO, please don't dupe." Remember, activity from N. Cook will be on 160-10m, CW only, 500w to verticals, with his focus on Europe. QSL via N7OU.

ET3, ETHIOPIA (Update to OPDX.1035). Operator Bill, N2WB, has joined the team of Krassy/K1LZ, David/K3LP, Al/K3VN and Paul/N6PSE for the upcoming operation to Addis Ababa between December 8-13th. For the complete details, see: http://www.k3lp.com/et3aa_december_2011.htm

EY, TAJIKISTAN. Stephen, K6AW, will be active as EY3M during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (TBD) entry. QSL via W5UE. Outside of the contest, he will use the callsign EY8ZE.

FG, GUADELOUPE (Update). Armin, DK9PY, will be active as FG/DK9PY from Guadeloupe between now and November 26th. Activity will be only CW mainly on the 30/17/12 meter bands, and also on 80/40/20/15/10 meters usually

15 kHz from the bottom of the band edge. QSL via his home callsign, direct or by the Bureau.

GB0, SCOTLAND (Special Event). Members of the Stirling and District Amateur Radio Society (SDARS) will activate special event station GB0SA from the Wallace Monument in the City of Stirling, Central Scotland, on November 26-27th. Activity is to celebrate Scotland's St. Andrew's Day (November 30th). The two days of activity are a short window of opportunity available for the SDARS group to operate on top of the monument on both days. Look for details/updates on the SDARS Web page at: http://www.gm6nx.com

HQ9, HONDURAS. Ray, WQ7R, will once again be active as HQ9R during the CQ WW DX CW Contest (November 26-27th) as Single-Op/All-Band/High-Power entry. QSL via K5WW or LoTW.

HU2, EL SALVADOR. A team consisting of Juergen/DF7TT, Ruediger/DK8YY, Oliver/DL2ARD, Ralf/DL3JJ, Ingolf/DL4JS, Daniel/DL5SE, Lu/DL8ALU, Jaroslav/OK4MM, Mario/YS1GMV, Mario/YS1MAE and Florencio/YS1ZC will be active as HU2DX from Capricho Beach House, Barra de Santiago, El Salvador, between January 29th and February 10th, 2012. Activity will be on 160-10 meters with the main focus on the lower bands. QSL via DH7WW.

IOTA NEWS.....
AF-019. (Cancelled) Tony, IK1QBT, has cancelled his activity as IH9/IK1QBT and IH9X (CQWWDXCW) from Pantelleria Island (IIA TP-001, WLOTA 0041) between November 23-28th, due to work and other reasons.

NA-076. Operators Rick/K8GI and Bill/K9RR will be active as homecall/4 from Cedar Key starting about 2000z on Saturday, November 12th through about 0100z on Tuesday, November 15th (this may vary due to weather). Activity will be on 40/30/20/15/10 meters using CW, SSB, RTTY and PSK63. QSL via their home callsigns, direct (preferred) or by the Bureau. Look for K8GI/4 QSOs to be uploaded to LoTW.

OC-136. You may have one day left to work operators Lino/VK3EI and Les/VK3MLM as homecall/p from the French Island. Activity was to take place on November 13-14th. They will be operating from mid afternoon (~0400z) for a few hours and probably into the evening (weather permitting). Activity will probably be on 40m and 20m, but depending on conditions, they may also try 15m and 10m. QSL via their home callsign.

OC-164. John, VK6HZ, will once again be active as VK6ARI from Rottnest Island OC-164 between December 23-30th. Activity is usually holiday style on SSB, PSK and RTTY, possibly CW. Antenna will be a Buddipole. Activity will be around the usual IOTA frequencies. QSL via VK6HZ. Log will be uploaded to Clublog and LoTW.

SA-078. Oscar, HK6PRO, will be active as HK6PRO/1 from Palma Island, in the San Bernardo Islands group, between January 8-12th, 2012. QSL via EA5KB.

J7, DOMINICA. Operators Ken/JN1THL/AB1GJ and Yoshi/JK1KHT will be active as from the J79KT and J79YK, respectively, from Dominica (IOTA NA-101) between November 13-20th. Activity will be on all HF bands. QSL both callsigns via JN1NDY, direct only (SAE + sufficient postage).

K7, UNITED STATES (Special Event). The Central Arizona DX Association (CADXA) is very pleased to announce their special event operation in celebration of the Arizona Centennial during the week of February 13-19th, 2012. They will be using the callsign of the late Senior Senator, and Arizona native son, Barry M. Goldwater • K7UGA. Individual CADXA members will be operating from their home stations located throughout Arizona during that week using the callsign K7UGA. However, only special operating locations from Tucson, Prescott and Phoenix will be on the air celebrating the 100th anniversary on Tuesday, February 14th, 2012. Operations will be on all amateur bands (160-2 meters); and will be using CW, SSB, RTTY, PSK31 and Satellite modes. This CADXA special event operation has proudly received recognition from the 2012 Arizona Centennial Foundation as a sanctioned "Special Event"; and from the Arizona Historical Advisory Commission as an official "Centennial Legacy Project". All QSL requests go to Bob Davies • K7BHM (qrz.com) with an SASE. For more details, please go to the CADXA Web site at: http://www.cadxa(dot)org

KH2, GUAM. Haru, JA1XGI, will be active as W8XGI/KH2 from Guam (OC-026, USI GU003S, WFF KFF-110, WLOTA 0064) between December 12-14th. Activity will be on 20-10 meters (especially 30/17/12m) using mainly CW. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW.

KH3, JOHNSTON ISLAND (Update). Susan, W7KFI, informs OPDX that she has received permission to land on Johnston Island. She plans to leave Honolulu on January 15th, 2012, arriving on Johnston Island some 5-7 days later, depending on wind. If there is a delay for any reason she can operate through February. Her plan is to operate for 10 days setting up a tent on the pier where it will be over land using a 43 ft. vertical set into sand. Her QSL Manager Stan, KH6CG, states, "She has informed the ARRL of this station set up so they are aware for [pending] DXCC approval. Additionally, Susan will take photos and is expecting an Elecraft banner to be sent to her soon via the company. Susan will use a K3 on CW/SSB mainly." Susan also menitons to OPDX that she will operate 40 meters and up using CW, SSB and RTTY. Again she mentions she will "ANSWER ONLY FULL CALL-SIGNS...call me with three letters, etc...and you will be wasting your breath". She states there are possibilities for her to also activate several other IOTAs from V7 and T32. Stay tuned!

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/ Low-Power entry. QSL via LoTW. For more details, see: http://www.wix.com/n2tta1/kp2mm

MD, ISLE OF MAN. Martin, G4XUM, will once again be active as MD4K during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (15 or 10m) entry. QSL via G3NKC.

NCDXF PRESS RELEASE. Glenn Johnson, W0GJ, NCDXF Vice President, reported: "The Northern California DX Foundation (NCDXF) board of directors voted on November 7, 2011, to welcome back Charles "Rusty" Epps, W6OAT, to their board. W6OAT was also elected as President effective January 1, 2012. Current President, Bruce Butler, W6OSP, will continue on the board as Treasurer. Glenn Johnson, W0GJ, will continue as Vice President and Kip Edwards, W6SZN, will continue as Secretary. NCDXF plans on adding additional individuals to their board in early 2012."

NH7, HAWAII. Albert, NH7A, will be active during the CQWW WPX SSB Contest (March 24-25th, 2012) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct, by the Bureau or LoTW.

OM, SLOVAK REPUBLIC. Pierre-Marie (Pedro), F6FNL/HB9DTH, is now retired in Slovaquia and has received the callsign OM0DX. Activity will be mainly RTTY and CW contesting. QSL via eQSL or LoTW. NO BUREAU QSLS.

P4, ARUBA. Valery, R5GA, will be active as P4/R5GA from Oranjestad (P49V/ P40YL Aruba Ham Radio Rental - see <www.p49v.com>) between November 20-28th. Activity will be on CW mainly on 160-10 meters, especially on the 30/17/12 meters. Operations will also include the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry using the callsign P40F. QSL via R5GA, direct, by the Bureau or LoTW.

PZ, SURINAM. Yuri, VE3DZ, will be active as PZ5T from Surinam between November 21-29th. Activity will be on 160-10 meters including 30/17/12 meters and using CW, SSB and RTTY. He will also be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via his home callsign.

LOTW PROCESSING UPDATE. The ARRL Letter reports this week: "Logbook of The World (LoTW) has been managing to hold its own against the current high volume of incoming logs. An approximate 60 hour processing delay has been maintained for about a week. As of November 9th, there are approximately 2.8 million QSOs in the LoTW queue. Many logs are still coming in from the CQ WW and the ARRL Sweepstakes Contests that were held the last two weekends. If you have already uploaded a log, there is no need to upload it again. By doing so, you will only add to the lengthy queue. Also, please do not send entire logs that contain previously uploaded QSOs. Please use the date range option when signing logs. This will allow you to select QSOs from your log within a specific date range. By following these guidelines, this will allow LoTW to process the backlog at a faster pace. The ARRL IT staff has been working diligently to speed up the LoTW processing time and eliminate the backlog. Thanks again for your patience."

QSL RECEIVED VIA LoTW: 5N7Q, CT3FQ, DF9ZP, DH7BQA, DL1SBR, F8DZU, G4SOF, G7FSI, I2EAY, IF9ZWA, KL7RA, LX7I, LY1G, OE6MDF, PA1MR/P, PI4DX, PJ7J, PR2P, RN1A, TX7M, V26B, V26P, VK7ZX, VK9OL, VP2MDG, VP5DX, VP5T, WP4NEG, YJ0VK, YL2QV, YO9HP, ZK2X and ZL6RWC

QSLS RECEIVED VIA MAIL: 3A2MD, 4L1UN, 5R8KS, 5Z4/JA7SGV, BA4DW, BV1EL, C31CT, EA6UN, FG5DH, GI0RQK, GW0ETF, H77REX, HS0ZBS, J88DR, JG8NQJ/JD1, LA6YEA, MU0FAL, NH0S, OJ0UR, PJ5/SP6EQZ, RI1FJA, ST0R, T8XX, T88UE, UG6GAE, V26OB, V85/WK1S, VP8DMN, XV2RZ, YB0/WK1S, YB8/WK1S, YB9/WK1S, YL2BJ, Z35T, ZD8D and ZK2V

QSLS RECEIVED VIA THE BUREAU: 5V7CC, 7Z1HL, 8P9NX, 8R1PY, A35AY, BA5AN, BD1BYV, BD1WC, BG1TPD, H40FN, HB0/DG1SFJ, HL5/DL3OCH, HS0ZIV, J79VO, J79ZG, KH6OO, KL2R, KL5DX, NP3IR, OD5/DL6SN, OX/DL2SWW, OX/DL2VFR, PJ2M, PJ4I, RA2FT, S9DX, S92LX, SV9COL, SV9OFS, TO7ZG, TO8YY, UP8WFF, V51LK, ZP6CW, ZY0F and ZY0T

SILENT KEY. It was reported that Ed Reinberg, W6JI, became a "Silent Key" (SK) on October 21st, 2011, at the age of 81. He was a ham for over 61 years, and Ed was an avid CW operator/DXer and was a member of the DXCC Honor Roll with 351 countries on CW. OPDX and its readers would like to

send out our deepest sympathy to the family and friends of W6JI.

SOUTH SUDAN NEWS. John, K1XN, from the GoList, reports: "Folks, I have been told by an IARU offical that callsign allocation for South Sudan will most likely take place late January or early February 2012. The ARRL is accepting this one callsign, ST0R, as South Sudan for credit in DXCC."

T2, TUVALU. Members of the "Pacific DXers" are now active as T2T from Tuvalu (OC-015) until December 8th. Activity will be on all HF bands, 160-6 meters using CW, SSB, RTTY and PSK31. QSL Manager is the Pacific DXers (see Web page), or by the Bureau via VK4FW. Bureau requests are also accepted by E-mail to eliminate sending your QSL via the Bureau (saves time!). PLEASE NOTE: VK4FW is the current QSL Manager for Pacific DXers: Bill Horner, 13 McConnell Rd, Maidenwell, QLD 4615, Australia --or-- via E-mail: QSL-Mgr@pacific-dxers.com
If an InterNet connection (doubtful)can be established during the operation an online log will be updated on a regular basis, otherwise it will be uploaded as soon as they return home. LoTW and eQSL will be uploaded within 12 months after the operation finishes. For more details and updates, visit: http://c21.pacific-dxers.com/T2T.html

T8, PALAU. Arkadiy, UA4CC, will be active as T8CC or T88UU from Palau between December 6-16th. Activity will be holiday style during his spare time on 160-10 meters (possibly 6m) using CW, SSB and RTTY. QSL via UA4CC, by the Bureau or direct. Logs will be uploaded to the Clublog Web page and LoTW as soon as possible.

TI, COSTA RICA. Alan, K0AV, will be active as TI5A during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (TBD). QSL via TI5KD or LoTW.

TP50, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP50CE between December 2-4th. Activity is to celebrate the 50th anniversary of the European Social Charter. Operations are usually on all HF bands and modes, and possibly the satellites. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

TR, GABON. Sebastien, F4EIH, will be in Gabon starting February 1st, 2012, for 3 years at least. Currently the callsign is unknown. Activity is expected to be on the HF and VHF (EME + Sat) bands using SSB, PSK31 and JT65.

V3, BELIZE (Update). Operators Dennis/K2SX and Leslie/W2LK will be active as V31SX and V31AO between November 22-29th. Activity will include the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry using the callsign V31AO. QSL via LoTW. Their operations outside of the contest will be mainly CW with some RTTY. Look for them on the lower bands and the 30/17/12 meter bands. They will also do some 6 meters, conditions permitting.

V4, ST. KITTS (Cancelled). Andy, N2NT, had to cancel his activity as V47NT from the QTH of V47KP for the CQWW DX CW Contest. He states the

station was not available this year.

VE, CANADA. Sandy, YO3ND, is in Montreal for the next 6 months and will be active as VE2/YO3ND. The bands/modes of operation were not provided. QSL via his home callsign.

Z2, ZIMBABWE. Antonio, DL4EA/EA4KT, will once again be active as Z24EA from Harare between November 12-22nd. Activity will be on 160-6 meters using CW, SSB and RTTY. As a base he will use Fernando's, Z21BB, station, and will try to make the best of the present good propagation conditions, paying special attention to possible openings on the 6m band. QSL via the Bureau to DL4EA, or LoTW, or eQSL.

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

6O, SOMALIA
Darko,J28AA/E70A, plans to show up as 6O0DX from Somalia working in
CW, SSB and RTTY on 80m-10m from Nov 21-30. His equipment includes an
IC735 and FT857D, a commercial vertical and a dipole for 80m.
QSL via K2PF or E77E, bureau & LoTW.

8Q, MALDIVES, AS-013
Yuki,JH1NBN, is working as 8Q7ZB from Male, the capital of the
Maldive Islands (AS-013), in his spare time until Nov 29.
QSL via homecall.

9L, SIERRA LEONE, AF-037
A team of German HAMs including DJ8NK, DL5CW, DL9USA, DL2VW and DJ9RR
will be active as 9L0W from the Banana Islands (AF-037) between Nov 22
and Dec 4. Activities will take place in CW, SSB and RTTY on 160m-6m.
QSL via DK2WV.

C6, BAHAMAS, NA-001
Kenny,K2KW, Gene,KB7Q, Fred,KE7X (C6AKX), Walter,N6XG, Jeff,N6XR, and
Mike,WA6O, are going to visit Eleuthera Island (NA-001) from Nov 18-28.
They will sign C6AAW in the CQWW CW Contest. QSL via WA4WTG.
They are using their personal C6A calls before and after the contest.

C9, MOZAMBIQUE
Mike,K9NW, will be QRV as C91NW in CW, SSB and RTTY on 160m-10m from
Nov 21-29. He will join the WWDX CW Contest as SOAB. QSL via homecall.

CO, CUBA, NA-015
The prefixes CL9/CM9/CO9 are belonging to clubstations or to OMs
working from them. The prefixes T4/CO0/CM0/CL0 are reserved especially
for IOTA activities, contest teams, special event stations, etc.

E3, ERITREA
Erling,LA6VM, co-organizer of the E35X DXpedition to Eritrea in 1993,
has once again got the callsign E35X and could be active on the bands
already. Stay tuned! QSL via homecall.

E5, NORTH COOK
N7OU is using the callsign E51MAN from Manihiki (North Cook, OC-014).
On Rarotonga (OC-013) he has used E51NOU as mentioned before.
QSLs via homecall.

EL, LIBERIA
The VooDoo Contest Group plan to take part in the CQ WWDX CW Contest
for the 23rd time in a row. This year they will join the M/M category
as EL2A a little south of Monrovia. QSL via G3SXW.
They will start operation on Nov 21 with their personal callsigns:
EL2A - Roger, G3SXW
EL2CW - Bud, N7CW
EL2LF - Lee, KY7M
EL2MF - Mike, KC7V
EL2NS - Ned, AA7A
EL2WP - Fred, G4BWP
QSLs via homecalls. The upload to LoTW will be done soon.
The group wants to thank the Liberian Radio Amateur Association for
their wonderful support.

FJ, ST BARTHELEMY, NA-146
Nikola,FJ/VE3EY, and John,FJ/VE3TA, will be QRV from St. Barth (NA-146)
from Nov 22-29. During the WWDX CW Contest they will sign TO3A as M/S.
QSLs via homecall, TO3A via VE3EY.
Their website is: http://dx.fireroute.com/to3a

FS, ST MARTIN / PJ7, SINT MAARTEN, NA-105
Jean-Pierre,F5AHO, plans to show up as FS/F5AHO from St Martin (NA-105)
or as PJ7/F5AHO from the Durch part Sint Maarten from Nov 17-30.
He also plans to activate Tintamarre Island (NA-199) as FS/F5AHO/p
during the weekends of Nov 19/20 and Nov 26/27.
Listen for him in SSB/RTTY/PSK31 on 20m and 17m. QSL via homecall.

J6, ST LUCIA, NA-108
Bill,K9HZ, will be QRV again as J68HZ from Labrelotte Bay (IOTA NA-108,
WLOTA L-1336) working in CW and SSB from Nov 19 until Dec 3.
Following frequencies are announced: CW: 3550, 7050, 14050 kHz;
SSB: 3770, 7155, 14155 kHz. Listen on 40m and 20m from 1600-2400 UTC.
QSL via homecall.

J7, DOMINICA, NA-101
Once again Walter,HB9MFM, is active as J79WTA from Dominica (NA-101)
until Dec 7. He is working in SSB and digital modes on 160m-30m.
QSL via homecall.

Ken,J79KT (JN1THL/AB1GJ), and Yoshi,J79YK (JK1KHT), are working on
all HF bands until Nov 20. QSLs via JN1NDY, unfortunately only direct.

JA, JAPAN
The special event station 8J4EQ is active in all modes on all bands
until Jan 31, 2012, to mark the "Earthquake Disaster and the Disaster
Prevention Day". QSL via bureau.

The special event station 8J5SSS is also working in all modes on all
bands to celebrate the 54th Saijo Sangyo Sai (Saijo Industry Festival)
until Nov 30. Saijo (JCC 3806) is situated in the region Shikoku,
prefecture Ehime, Shikoku (AS-076). QSL via bureau.

The special event station 8N2IWA is activated on all bands until Dec 11
to mark the 40th anniversary of Iwakura city (JCC 2030). Iwakura lies
in the prefecture Aichi on Honshu Island (AS-007, WLOTA 2376).
The city was founded on Dec 1, 1971. QSL via bureau.

OM, SLOVAKIA
Pierre-Marie (Pedro),F6FNL/HB9DTH, has retired and is now active as
OM0DX from Slovakia. He is working mainly in RTTY and CW.
QSL via eQSL or LoTW.

P4, ARUBA, SA-036
Valery,P4/R5GA, wants to show up from Aruba (SA-036, WLOTA 0033) from
Nov 20-28. He will join the WWDX CW Contest as SOAB signing P40F.
QSLs via R5GA and LoTW.

PZ, SURINAME
Yuri,VE3DZ, is expected to become active from Suriname working in CW,
SSB and RTTY on 160m-10m as PZ5T from Nov 21-29, including the WWDX CW.
QSL via homecall.

SU, EGYPT
Vlad,SU9VB, has been spotted on 160m around 0300 UTC.
QSL via UA4WHX, direct or LoTW.

TK, CORSICA, EU-014
The Bavarian Contest Club members Mario,TK/DJ2MX, Matthias,TK/DK4YJ,
Simon,TK/DJ4MZ, Ulf,TK/DK5TX, Christoph,TK/DK9TN, Luise,TK/DL2MLU, and
Ben,TK/DL6RAI, will stay on Corsica (EU-014, WLOTA 1390, DIFM TK-001,
MIA MCO-001) from Nov 23-28. Activities are planned in SSB/CW/digital
modes on 10m-160m and also in the WWDX CW Contest, signing TK4W.
For TK4W QSLs they will put up an OQRS at: http://www.dq4w.de/2011/tk4w
QSLs for TK4W via bureau or direct to DJ2MX.
All other QSLs via the operators homecalls.

V3, BELIZE
Dennis,K2SX, and Leslie,W2LK, plan to become active as V31SX and V31AO
from Nov 22-29. They will work mainly in CW/RTTY before the contest and
will join the WWDX in the M/S class. Their call will be anounced later.
QSLs via homecalls, LoTW.

V5, NAMIBIA
Like (almost) every year Klaus,DJ4SO, is active from Namibia during the
WWDX CW Contest. He will work as V5/DJ4SO in CW/RTTY/PSK31 and some SSB

on 160m-6m from the Farm Heimat (Loc JG87xc) between Nov 17 and Dec 14.
QSLs via bureau, direct, LoTW or with an e-mail to klaus@dj4so.de
No eQSLs!

V8, BRUNEI, OC-088
The special call V84SEA will be active from the 39th SeaNet Convention
in Bandar Seri Begawan, capital of Brunei (OC-088), from Nov 15-21.
Unfortunately QSLs only direct.

VP2, MONTSERRAT, NA-103
Gregor,VP2MGO (DF7OGO), Tom,VP2MWT (K3WT), Ron,VP2MTA (N0AT),
Vlad,VP2MTL (N0STL) and Bill,VP2MOR (W0OR), are planning to activate
Montserrat (NA-103) in CW/SSB/RTTY on 160m-6m from Nov 18 until Dec 6.
They will use the call VP2MWG in the WWDX CW and ARRL 160m Contests.
QSLs for VP2MWG via N0AT, all other QSLs should be sent via homecalls.
More information and updates can be found on their website at:
http://www.vp2mwg.comeze.com

VU, INDIA
The special event station AU2JCB is celebrating the birthday of the
Indian physicist and radio pioneer Jagadish Chandra Bose in SSB on 40m
to 10m between Nov 19 and Dec 4. QSL via VU2DSI, only direct.

Z2, ZIMBABWE
Antonio,DL4EA, is active as Z24EA from the QTH of Z21BB until Nov 22.
He is working in all modes on 160m-6m. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Steve,G3ZVW/AF6SU, announced to be QRV as ZD8N from Ascension (AF-003)
from Nov 21 until Dec 2. He was not there for three years but will be
QRV in CW, SSB and digital modes on 80m-10m now (maybe also WWDX CW).
QSL via G3ZVW.

Jorma,ZD8X (OH2KI), and Oliver,ZD8W (W6NV), are going to ZD8 as well
from Nov 20-29. They will join the WWDX CW Contest as a M/S team using
an Elecraft K3, KPA500 amplifier, triband yagis, dipoles for the low
bands and separate antennas for receiving. QSLs via homecalls.
They are looking forward to the pile ups!

WORLD CASTLES AWARD PROGRAM
After a few months of testing the WCA E-log is up and running now. The
author and manager is Jiri,OK5NN (ex-OK2SJI). The WCA E-Log allows an
easy QSO check for the World Castles Award Program.

A2 - OPs needed: Three members of the DXpedition to Botswana in March 2012
have cancelled their participation. If you like to jump in and join
please send an e-mail to: 3da0cf@gmail.com
The costs are 235 US $ per person per day and you have to bring only
your notebook, key and headset!

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 18 UFT-YL-CW-Contest (80m)
Nov 19 UFT-YL-CW-Contest (40m)
Nov 19/20 All Austrian 160m Contest
Nov 19/20 RSGB 1.8 MHz Contest
Nov 19/20 LZ DX Contest
Nov 20 HOT Party
Nov 26/27 CQ WWDX Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-019, IG9, Pelagie Islands: Emilio,IH9/IZ1GAR, will be active from the
Pantelleria Islands (IIA TP-001, WLOTA 0041) from Nov 23-28. He will
use the call IH9R in the CQWW CW Contest. QSL via IZ1GAR.

Tony,IK1QBT, is also working from Pantelleria during that time period.
He will join the WWDX CW Contest as IH9X. QSL via IK1QBT.

AN-016, several, Antarctica: Starting on Nov 16 Karel,ON5TN, works as OR4TN
during his spare time on the Belgian Antarctic station "Princess
Elisabeth" (WAP BEL-02) until the end of February 2012. More info can
be found on QRZ.com (OR4TN). QSL via ON5TN (direct).
More information about the station at: http://www.antarcticstation.org

AS-023, JA6, Amami Islands: Hiro,JA6WFM, and Naomi,JM6EBU, will show up as
JF6YME/6 from Yoron (WLOTA 0287) from Nov 21-23. QSL via JA6WFM.

SA-095, CE4, O'Higgins/Maule Region group: Cezar,VE3LYC, and Dino,CE3PG,
are planning to activate Papuya Island from Nov 20-23. Activities will
take place in CW and SSB on 40m, 30m, 20m and 17m using two IC7000 and
multiband verticals. This is a first activation of a new IOTA group!
QSLs via VE3LYC.
More info at: http://ce4a.yolasite.com/team.php and http://www.ce3aa.cl

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
07 - 13 November 2011

Solar activity was at low to moderate levels. Activity began at low levels on 07 November, although Regions 1339 (N19E45, L=102, class/area Fkc/1540 on 04 November) and 1338 (S=14, L=121, class/area Ehi/375 on 03 November) both exhibited spot areal coverage growth. Late on 07 November, a filament channel eruption was observed in SDO/AIA imagery beginning around 07/2232Z. LASCO C2 imagery first indicated a CME liftoff from the NW limb at 07/2348Z. Activity remained at low levels on 08 November, as Regions 1339 and 1338 both started to decay and simplify magnetically. On 09 November, activity increased to moderate levels when a long duration M1 flare occurred at 09/1335Z. Associated with this event were a Type II radio sweep with an estimated shock velocity of 750 km/s and an Earth directed full-halo CME, visible in LASCO C2 imagery at 09/1336Z. Activity decreased to low levels on 10 November with the largest event of the day being a C6/1f flare at 10/1831Z. Region 1339 remained the largest region on the disk but continued to decay. On 11 November, activity remained at low levels with Region 1344 (S19, L=101, class/area Dai/200 on 12 November) producing a long duration C4/Sf flare at 11/0705Z with an associated partial-halo CME. The CME had an estimated plane-of-sky speed of 825 km/s, based on SOHO/LASCO C2 images, and appeared to have a slight earth directed component. On 12 November, activity remained at low levels with occasional C-class flares. Regions 1339 and 1338 continued to decay while Region 1344 continued to increase in magnetic complexity, areal coverage, and total spot count before stabilizing on 13 November

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal levels throughout the period.

Geomagnetic field activity ranged from quiet to minor storm levels. The period began under quiet to unsettled conditons on 07 November. Activity increased on 08 November to quiet to unsettled conditions with isolated periods of active to minor storm levels at high latitudes. Mostly quiet levels returned on 09 November and continued through 13 November.

Forecast of Solar and Geomagnetic Activity
16 November - 12 December 2011

Solar activity is expected to be at predominately low levels with a chance for M-class activity through the period. Old Region 1339 (N19, L=102) returns on 27 November bringing an increased probability of M-class activity and a slight chance for an X-class event.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at background levels.

Geomagnetic field activity is expected to be quiet for the greater portion of the forecast period. Unsettled conditions are possible on 26-27 November and again on 09-10 December with the return of recurrent coronal hole high speed streams.

==> HURRIQUAKE 2011

The week of August 22, 2011 may go down in weather history as one of
the strangest in the Washington, DC area : On Tuesday, August 23, our
area was hit with a magnitude 5.8 earthquake. I'm sure the quake took
everyone by surprise. It sure surprised me. Damage was light, but
widespread, including what looks like about 25 million dollars done to
the National Cathedral, and an as-yet undetermined amount of damage to
the Washington Monument, which remains closed. There was significant
damage to the building housing the ham shack at the Armed Forces
Retirement Home in Washington, DC. That is not good news for the Marine
Corps Marathon radio operators.

Immediately after the earthquake, many cell phone systems buckled under
the load of everyone trying to call everyone else. In College Park,
Maryland, where I work, even the wire line phones had some problems.

Prince Georges County ARES® activated a resource net on the local
repeater to marshal radio resources in case of need. We stood by for
```

about six hours, but as the evening wore on, we ended the net as it became clear that normal communications were working again.

The following Saturday night, Hurricane Irene passed just east of the area. The County Government activated the EOC at 4 PM Saturday and called for RACES and ARES communications support for storm shelters in the southern end of the county. RACES operators under the leadership of RACES Radio Officer Ken Greenhouse, KB3IIE, and ARES Emergency Coordinator Jim Montgomery, WB3KAS, deployed to two shelters, one at the Baden VFD and one at the Bunker Hill VFD. As the evening wore on, power failed at the Baden shelter and the generator there failed to start. We provided communications as the Red Cross redeployed the shelter to the Brandywine VFD during the storm.

RACES operators established HF and VHF radio communications with the State and adjacent county ARES/RACES groups. As the peak of the storm passed at about 2 AM, a large tree fell across the utility lines at the entrance to the EOC property cutting off electric power, Internet and land line phones as well as the cable TV to the facility. It took the county more than one hour to get the generator at the EOC to stay on-line. Of course no one could come into or leave the EOC complex because the tree was blocking the entrance.

Once the generator did come on-line, we discovered that the generator does not provide power to the EOC radio room. All of the radios there were useless without AC or DC power. Meanwhile, I maintained contact with the shelters thanks to my trusty Yaesu HT and the Green Mountain Repeater Association's 146.61 MHz repeater. The repeater worked flawlessly through the night and we maintained communications for the Red Cross personnel at the EOC and in the shelters until the shelters were secured late Sunday morning.

The county fire personnel started calling it "HurriQuake 2011." Not many ARES/RACES groups can say that they had to contend with an earthquake and a hurricane in one week.

Special thanks to the Green Mountain Repeater Association for the continued great support and the use of the .61 repeater. We literally could not have done it without them and their machine. - Spence Spencer, NX3SS <http://www.qrz.com/db/nx3ss>, <http://www.qrz.com/db/nx3ss> AEC for Operations, Prince Georges County Maryland ARES

==> ARES® DOCKET

Amateurs Assist with Communications in Aftermath of Rare October Nor'easter
<http://www.arrl.org/news/amateurs-assist-with-communications-in-aftermath-of-rare-october-nor-easter>
- ARRL Letter

Agreement Inked Between ARRL East Bay Section and Bay Area Red Cross

ARRL Section Manager Jim Latham, AF6AQ, has announced the formal signing of a local Statement of Cooperation between the ARRL East Bay Section and the Bay Area Chapter of the American Red Cross. "This is a significant step as we rebuild the ARES® program in the Section. We now have a served agency that recognizes ARES locally and that is recognized by ARES," Latham said in a statement.

The local Statement of Cooperation supplements the national Memorandum of Understanding between the American Red Cross and the ARRL that has been in effect since March, 2010 and anticipates increased local familiarity and cooperation between the two entities. A copy of the document will be made available for review on the East Bay Section <http://www.eastbaysectionarrl.org/> Web site.

Latham added: "It is now more important than ever that we be able to exhibit that we are professional-quality, well-equipped, and well-trained Amateur Radio operators. To this end, we will be implementing on-line local ARES registration so that we will have an up-to-date listing of the Section's members and leaders. We will also be implementing training and education programs sponsored by the Section to ensure a common, minimum level of training for members and leaders alike. Look for additional changes and progress as we organize and build the ARES program in the Section." [Jim Latham, AF6AQ, is Section Manager, ARRL East Bay Section; and Emergency Communication Advisory Committee Representative - Pacific Division].

Detroit Marathon Supported By 60 Operators

The Detroit Free Press/Talmer Bank Marathon <http://www.freepmarathon.com/>, held in Detroit, Michigan on October 16, 2011, was supported by 60 radio amateurs from two countries. The communications effort was organized by the Wayne County Amateur Radio Public Service Corp <http://www.wa8eoc.org/about.html>, which has supported the event for nearly its entire history. This event is used as part of Wayne County ARPSC's ongoing training regimen.

Wayne County ARPSC coordinated ARES members from Wayne, Oakland, Macomb and Monroe counties and partnered with Windsor, Ontario, Canada hams, from their Amateur Radio Community Service (ARCS), to support the world's only marathon that includes a certified underwater mile. The course features two water crossings, one across the Ambassador Bridge and one through the Detroit Windsor Tunnel, with the underwater mile spanning the Detroit River.

Amateur Radio provided health and welfare communications support to more than 20,000 Marathon participants as well as more than 2,000 volunteers. The event employed multiple controlled nets that relayed priority medical traffic, course logistical traffic, and security coordination as well as spectator assistance. The end result helped facilitate a world class event that included two international border crossings that would not have been possible without partnership between ARES and the ARCS ham operators from the US and Canada. -- Doug Scoda, KD8PKI, Westland, Michigan

==> WISCONSIN ARES/RACES CONFERENCE: MUTUAL AID THEME

"Mutual Aid: Being There for Each Other" served as the theme of the 2011 Wisconsin ARES/RACES Conference held in Wisconsin Rapids on October 22, with 79 present. ARRL Section Emergency Coordinator Gary Sorensen, W9ULK, served as facilitator of the conference. Former SEC Bill Niemuth, KB9ENO, reported on an organization that is building a statewide linked repeater system, while Section Manager Don Michalski, W9IXG, presented the DEC of the Year award to Ed Jacobsen, KB9KJE, immediate past DEC for the Northwest District. Howard Fischer, KC9IVJ, Juneau County EC, won the EC of the Year award.

Stan Kaplan, WB9RQR, updated the group on the Wisconsin ARES/RACES Winlink Net, and on the free computer distribution program he runs. [Kaplan has distributed 600 computers to various ARES/RACES groups over the past 17 years.] Sauk County EC Drew Smith, KC9LJK, gave a talk on using social media in the ARES/RACES program, and Steve Sell, former Administrator of Wisconsin Emergency Management talked on "We Need YOU" - how important ARES/RACES is to the Emergency Management Program in the state.

Wisconsin Northeast DEC Dave Levorson, N9KNY, ran a session with input from attendees on "How Our Involvement in Emergency Response Has Changed Since 9/11 - YOUR Stories." Winnebago County EC Kyle Schaefer, KC9SDK, gave a presentation on how to approach "Taking Ham Radio into Your School" on working with primary and secondary school teachers and students to integrate ham radio into science programs.

Wisconsin Chief RACES Radio Officer Skip Sharpe, W9REL, spoke on why we must integrate ICS into ARES/RACES in order to become a credentialed part of the incident response team. Dan Lenz, KB9IME, Assistant SEC for Training talked about mutual aid and also conducted a review of the recent statewide SET (Simulated Emergency Test).

The Wisconsin ARES/RACES <http://www.wi-aresraces.org/> Web site has been revitalized through the efforts of a committee headed by Assistant SEC for Marketing and Recruiting Kathy Schramm, KB9UAZ, and Webmaster Richard Engel, K9RWE. Check out the Twitter Feeds shown on the home page for ARES/RACES and also from Ready Wisconsin, Wisconsin Emergency Management. Immediate alerting and messaging to the membership is possible by following the Twitter Feed and arranging for it to forward messages to a cell phone. -- reported by Stan Kaplan, WB9RQR and submitted with notes added by Gary Sorensen, W9ULK, SEC, Wisconsin ARES/RACES

==> ARES YOUTH CORPS COORDINATOR APPOINTED IN OHIO

The ARES Tenth District Youth Corps of Ohio is a team of volunteers with the mission to educate young people about not only ham radio but specifically ARES. Kevin Baxter KD8OPX, of Middlefield, Ohio, has been appointed to the post of ARES Tenth District Youth Corps Coordinator. Baxter is an active senior at Cardinal High School in Middlefield.

Matt Welch, W8DEC, District Emergency Coordinator for the ARES Tenth District, says "Kevin is a motivated individual with an evident passion for the hobby. Since passing the Technician class license in August 2010, he volunteers for many public service events throughout the year. Most recently, he helped WEBELOS Scouts from Cub Scout Pack 197 in Burton, Ohio operate the W8TEN station for Jamboree on the Air (JOTA)."

Baxter is a trained SKYWARN Spotter, and a member of the Warren Amateur Radio Association (WARA) and Lake Erie Amateur Radio Association (LEARA). - Matt Welch, W8DEC <http://www.qrz.com/db/w8dec>, District Emergency Coordinator, ARES Tenth District <http://www.ohioares10.org/>, Ohio Section,

==> PRIORITY USE OF CENTER OF ACTIVITY FREQUENCIES FOR ACTUAL EMCOMMS

Last month's issue included an item on the IARU Center of Activity Frequencies. It should be emphasized that any frequency on which ongoing emergency communications is underway needs to be protected.

In the course of the International Amateur Radio Union (IARU) consideration of the emergency Center of Activity Frequencies, members in 2008 noted that priority use of the frequencies is limited to times when there is an actual emergency in progress, and that they are available for regular amateur use at all other times. In 2009, the IARU Administrative Council when noting that all three regions have agreed on the Center of Activity Frequencies in the 15, 17 and 20 meter bands, namely, 21.360 MHz, 18.160 MHz and 14.300 MHz, also noted the GAREC09 <http://www.iaru-r3.org/garec-2009/> Statement, while making no specific reference to the emergency Center of Activity Frequencies, called upon IARU member-societies, among others, "whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, web-sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic."

In short, amateurs should protect any frequency when it's actively being used for emergency communications. Otherwise the same standard applies to the Center of Activity frequencies as to any other amateur frequency: as stated in 97.101(b), "Each station licensee and each control operator must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies. No frequency will be assigned for the exclusive use of any station."

==> PLAN NOW TO ATTEND NATIONAL HURRICANE CONFERENCE IN MARCH

The 2012 National Hurricane Conference, "the nation's forum for education and professional training in hurricane and disaster preparedness," will be held March 26-29 at the Hilton Orlando, Florida. A robust Amateur Radio presence and forums are always on tap.

The primary goal of the National Hurricane Conference is to improve hurricane preparedness, response, recovery and mitigation in order to

save lives and property in the United States and the tropical islands of the Caribbean and Pacific. In addition, the conference serves as a national forum for federal, state and local officials to exchange ideas and recommend new policies to improve Emergency Management.
To accomplish these goals, the annual conference emphasizes:

* Lessons Learned from Hurricane Strikes.

* State of the art programs worthy of emulation.

* New ideas being tested or considered.

* Information about new or ongoing assistance programs.

* The ABC's of hurricane preparedness, response, recovery and mitigation -- in recognition of the fact that there is a continual turnover of emergency management leadership and staff.

More details are to come on specific Amateur Radio forums planned for the Conference. The ARRL is a Participating Organization.

==> LETTERS: MORE NEW TECHNOLOGY IN MINNESOTA

We deployed three new pieces of technology at the Medtronic Twin Cities Marathon
<https://www.tcmevents.org/events/medtronic_twin_cities_marathon_weekend/>
held last month. We are already using Apple ® iPad ® tablets for medical tent patient checks linked to our Amateur Radio tracking system. We deployed an IP phone system between our hospital tent and the family medical information tent. We set up a pair of Ubiquiti ® 5 GHz commercial grade WiFi link radios on a 1.4 mile non-line-of-sight path to one of the area EOCs from our data trailer. And finally, we ran three ICOM D-STAR ID-1 radios at the same time in our data trailer to three different area repeaters. This marks our fifth year of 100% reliable D-STAR performance in real world public service medical communications applications. -- Erik Westgard, NY9D
<ewestgard@att.net>, Director, Volunteer Medical Communications, Medtronic Twins Cities Marathon

==> LETTERS: FEMA CLASSES

I manage a large EMA organization. Most of our volunteers do not understand what constitutes "Emergency Management." As a result, we require IS-230 -- Fundamentals of Emergency Management
<http://training.fema.gov/EMIWeb/IS/is230b.asp>for any certification level in all of our specialties. I recommend adding this course to your list so ARES operators will more fully understand the environment in which they work.

For an Amateur Radio operator who wants to do more than "hold a mic," I would also suggest trying to get into a COML III
<http://www.npstc.org/commUnitLeader.jsp> class, which requires IS-300. Keep up the good work. -- Garth Kennedy, W9KJ, Naperville, Illinois EMA

==> RECOMMENDED TRAINING COURSES FOR ARES MEMBERS

♦ ARRL Introduction to Emergency Communication-
<http://www.arrl.org/online-course-catalog>Course #: EC-001. This is a
revision of the former Emergency Communications Basic/Level 1 course.
This on-line course is designed to provide basic knowledge and tools
for any emergency communications volunteer. Prerequisites: ICS-100
(IS-100.b <http://training.fema.gov/EMIWeb/IS/IS100b.asp>)
(Introduction to the Incident Command System); and IS -700
<http://training.fema.gov/EMIWeb/IS/IS700a.asp> (National Incident
Management System). Also recommended, but not required, are: IS-250
<http://training.fema.gov/EMIWeb/IS/is250.asp>, Emergency Support
Function 15 (ESF15), External Affairs; and IS-288
<http://training.fema.gov/EMIWeb/IS/is288.asp>, The Role of Voluntary
Agencies in Emergency Management. The course covers: The Framework: How
You Fit In; The Networks for Messages; Message Handling; What Happens
When Called; Operations & Logistics; Safety & Survival; and What to
Expect in Large Disasters.

♦ Red Cross or AHA combined course in Adult CPR/First Aid/AED Basics
<http://www.redcross.org/portal/site/en/menuitem.d8aaecf214c576bf971e4cfe43181aa0/?vgnextoid=aea70c45f663b11
0VgnVCM10000089f0870aRCRD&vgnextfmt=default>

♦ FEMA IS-100 (Introduction to Incident Command System)
<http://training.fema.gov/EMIWeb/IS/IS100b.asp>

♦ FEMA IS-700 (National Incident Management System)
<http://training.fema.gov/EMIWeb/IS/IS700a.asp>

==> ARRL MICHIGAN SECTION COMBINES PROGRAMS FOR SYNERGY

Michigan's Amateur Radio Public Service Corps (ARPSC) encompasses the
Amateur Radio Emergency Service (ARES), the Radio Amateur Civil
Emergency Service (RACES) and SKYWARN, the service provided in
cooperation with the National Weather Service. ARES is activated for
mostly any event where a communications need exists within the
framework of the FCC rules. RACES is activated for an incident that the
government sees a need for additional communications support.
Generally, the Governor of a state or their duly appointed
representative makes the call. It is a program administered by FEMA.
SKYWARN is administered by the National Weather Service, of course.
There are four National Weather Service sites in Michigan --
Detroit/White Lake <http://www.crh.noaa.gov/dtx/>, Grand Rapids
<http://www.crh.noaa.gov/grr/>, Gaylord <http://www.crh.noaa.gov/apx/>
and Marquette <http://www.crh.noaa.gov/mqt/>.

Michigan was one of the first if not the first state in the United
States to recognize the need for Amateur Radio operators to be
cross-trained in both ARES and RACES protocols. This aids the process
of assistance provided in the sense that cross-trained individuals who
start out activated as an ARES operator can just change hats and
continue operations wearing the RACES hat as the situation evolves.
This has worked very well, and is due in no small part to several

individuals in the Eighth Region (Ohio and Michigan, in particular) and most especially to George Race, WB8BGY, former SEC, Section Manager and Great Lakes Division Director, as well as others.

The Michigan program's mission statement: "Develop the Michigan ARPSC Program in to a fully integrated communications team ready, willing and able to provide radio communications support to Public Service Agencies and the citizens of Michigan." - Michigan ARES <http://www.ares-mi.org/>, Dale Williams, WA8EFK, Section Manager

==> K1CE FOR A FINAL

It's Thanksgiving time, and in keeping with the theme of giving thanks, I am reproducing the open letter of thanks from New York City-Long Island Section Manager Mike Lisenco, N2YBB, to his ARES team and others in the aftermath of storm Irene. His letter is a gem -- sincere and heartfelt -- and I thought it deserved a wider audience. Enjoy!

"I hope that you are recovering from Hurricane Irene and that this finds you, your families, your property and your friends in good shape. Obviously and luckily, most of the Section weathered the storm without much damage.

"It's been ten years since Amateur Radio in New York City-Long Island has been asked to provide communications support for a wide-scale event. Yes, there have been minor activations of ARES during that time, but nothing on the magnitude of Irene. Over the years we in the amateur community have seen how hams around the world consistently provide help to their communities. And while Irene, thankfully, did not do the damage locally that we anticipated, we still were asked to support our community by providing assistance where and when needed.

"It's very hard maintaining interest in staying involved in local ARES, SKYWARN, and club groups participating in emergency communications when nothing is going on. Complacency sets in over time. And, understandably, how many "athons" can you participate in before you've had enough. In spite of this, when something does happen that warrants our participation, hams pour out of the woodwork offering their services.
And the core group of trained hams directs the flow of these volunteers. Irene was no exception to this. We saw the involvement of active ARES/RACES members, SKYWARN spotters, and club volunteers who maintained communications for the American Red Cross and governmental shelter operations, local and county Emergency Operation Centers, local Fire battalions, the National Weather Service, and local informational nets so that club members could stay in touch and bring their friends and neighbors up-to-date with what is happening in their neighborhoods. Generally we participate in these events and, as soon as mainstream communications is restored, pack up and go home. Maybe we get a "thank you," maybe not. But we always go home with our heads held high knowing that we provided a service to our community and once again proved why we are granted our spectrum.

"Having served as an ARES volunteer, DEC, SEC and now SM, I know how important it is to be recognized for the work we do. To that end, I want to issue a very public THANK YOU to those in the New York City-Long Island Section who offered their services and participated in the effort."

[For a list of the individual operators, clubs and teams that Mike compiled, click here <http://nli.arrl.org/>]. See you next month! -- 73, Rick, K1CE, Flagler County, Florida

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

WIANEWS WEEK COMMENCING NOVEMBER 20 2011.

WIA Directors VK4ERM, VK4TI Join us

ACMA acts against unlicensed hobbyists

Thousands contact VK100ARV

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOVEMBER 20 2011.

ACMA acts against unlicensed hobbyists

The recent issuing of warning notices and confiscations in four states by
the Australian Communications and Media Authority (ACMA) shows it's
serious about infringements by hobby communicators.

Under the Radiocommunications Act, six individuals were given a warning
for their unlicensed operation and two additional warnings of possession
of modified amateur radio equipment.

The ACMA said all were operating on HF frequencies they were not licensed
to use, or allocated to the Amateur Service.

A range of non-compliant equipment has been surrendered to the ACMA.

A 70 Watt CB radio in Victoria, a 40 Watt CB radio and 400 Watt linear amplifier in South Australia, a modified Kenwood ham band transceiver from Tasmania, 70 watt CB radio and 600 watt linear amplifier in New South Wales.

The ACMA said operating non-compliant or modified radio communications equipment on frequency bands contrary to that specified by a licence condition, had the potential to cause serious interference to radio communications services.

While the ACMA prefers to educate those who operate outside their licence conditions, it will suspend or cancel licences, issue infringement notices, or commence prosecutions for more serious offences.

(Jim Linton VK3PC)

Big jump in digital radio sales

Despite one of the weakest retail markets for many years, sales of digital radios recorded their biggest quarterly jump since Christmas 2010.

Official data relating to digital radio in Australia was released by Commercial Radio Australia (CRA) this week, showing close to 100,000 DAB+ digital radios were sold in Q3 2011 alone, according to the GfK Marketscope report, bringing the total number of DAB+ digital radios sold since August 2009 to 603,932.

(cra)

Already many thousands of contacts logged by VK100ARV

Terry Murphy VK3UP and Tony Hambling VK3VTH made 643 contacts over three days. And Terry will sign VK100ARV this weekend from the Brisbane National Park.

Luke Steele VK3HJ will have three turns on the roster. Take last Sunday for example, he worked 457 contacts in 30 DX entities. Some DX stations had double bonus point on that shift. Three had qualified for the Century Award.

Keith Proctor VK3FT also a DXer has been quietly working away. Peter Freeman VK3PF and Joe Walsh VK3XN are both to make plenty of contacts.

A highlight each Monday is VK100ARV through the VK3RML repeater and on the 20m band by the SSTV gang.

Next weekend the Sunraysia Radio Group. We're expect lots of action. The roster can be read at www.amateurradio.com.au

(Jim Linton VK3PC)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Greetings Trent VK4TI here -

What a month this has been Sunspot activity at a high for the cycle - new record scores in the contests and many new operators experiencing the first taste of great ten metre openings.

After the CQ WW SSB contest came the news that VK4MA had worked over 5000 contest stations in one weekend - a truly remarkable performance - Well done Paul.

On the topic of contests I have been working with the various WIA contest managers to set-up a standard set of governing rules for WIA contests and this is almost complete - while the individual contests will all have their own character; terminology will be aligned -

I have also been fortunate to be involved in some of the local area operators ideas for ways to improve the WIA and this weekend will see me in Gympie in discussions with the team from the old gold mining town -

Next weekend I will be pounding the keyboard in the CQWW CW contest and look forward to hearing many stations on the bands -

73 to all - this is Trent VK4TI back over to the news desk

The Summertime of Amateur Radio

Greetings from the WIA, this is Ewan VK4ERM, considering the Summertime of Amateur Radio.

With the warmer months upon us and the WIA VHF UHF Field Day so close, many of us will be taking the opportunity to escape into the solitude of the bush to enjoy portable operation in locations away from manmade noise and interference. While there we may well enjoy the company of family, friends, wildlife, on air contacts and FIRE!

Did I say fire?

Unfortunately, I am not referring to the well prepared campfire where people stare into the dancing flames and glowing embers solving the problems of the world but those uninvited fires that can arrive with terrifying rage and devastating effect.

Equally it can be your campfire blazing beyond practical need spiralling embers downwind to trigger spot fires in your area. Sadly, raging bush fires have caused human tragedy and property loss in most parts of Australia for hundreds of years. Many of us are experienced in assessing operating and camp sites for fire and other hazards but we cannot always assume that those with us understand the requirements nor our mental planning so it is very much the responsibility of the experienced person, whoever that may be, to ensure fire safety in the field is understood and applied by all present.

Just as we have load lists for our radio gear and tools, our camp and feeding needs so to should we have a load list and plan for fire prevention and management around our site.

Here I do not intend, nor do I have time, to cover all aspects of fire prevention and management but simply to prompt your thoughts and action on

what you should attend to in your circumstances before heading out bush and when you get there.

Perhaps the first thing for your consideration is the weather forecast for the region you intend to go to and that comes down to risk assessment. If there is a high fire danger and hot dry winds forecast is it really worthwhile taking the risk of going?

Is there an alternate route out of the site you have chosen should it need to be taken to escape any fire threat?

Do other people, family or friends, know exactly where you will be and when you are expected to return? Just make sure you go to where you say you will and don't wander off elsewhere and return when you say you will if you are unable to notify them otherwise.

At your campsite have you established a fire point with extinguisher, beater, metal rake and sprayer? Seems a lot but gold when you need them.

Have you briefed everyone on where it is and assigned tasks to each of them in the event of a campsite fire or approaching fire?

Is your generator and fuel sited downhill from the rest of the camp? Does everyone who needs to know understand how to refuel and conduct generator checks?

How do you know?

Are all vehicles facing the exit route? It may seem trivial but if a major blaze is about to engulf you then every split second counts.

A wealth of further information is available from government internet sites in all states of Australia. I encourage you to gather the information and develop your fire prevention and management plans for your Summertime of Amateur Radio in the great Australian bush.

This has been Ewan VK4ERM for the WIA Board.

The summer edition of Amateur Radio magazine

Has the Club Grant Scheme run its course? That is the question posed by WIA President Michael Owen VK3KI. He traces the efforts made to support the clubs. The 2011 Grant Committee report is disappointing. Michael VK3KI explains in detail and well worth a read.

The WIA Historian Peter Wolfenden VK3RV talks about the Centenary last year and from the Centenary Convention is Justin Giles-Clark VK7TW on modern communications technologies and techniques.

Reports include the "Science Alive" display by the Elizabeth Amateur Radio Club from Paul Schulz VK5FPAW, Darcy Hancock VK5RJ an old-timer sits with his new Kenwood TS-590, and Morse code is revisited by Foundation Corner by Ross Pittard VK3CE.

More on the December issue of Amateur Radio magazine next week. A service to WIA members and available at selected news stands.

I'm Barry Robinson VK3PV and you are listening to VK1WIA

Victorian National Parks are on air

Declared National Parks are on air this weekend under the Keith Roget Memorial National Parks Award and part of the Amateur Radio Victoria Centenary.

They include the Brisbane Ranges, Heathcote-Graytown, Chiltern-Mt. Pilot, Barmah, Dandenong Ranges, Greater Bendigo, Baw Baw, Warby-Ovens and up to three in the southwest of the state.

At two of the National Parks expect to hear the special callsign VK100ARV.

A regular participant is Peter Fraser VK3ZPF. He has also indicated activating Mount Buffalo, and Burrowa-Pine Mountain, on Monday and Tuesday respectively.

A full list is posted on the website www.amateurradio.com.au

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

One of those areas which has a certain mystique in our hobby is "home brew". Whether we are tinkerers of full blown constructors, amateur radio has evolved as a sharing hobby where what is learned is proudly shared with one's

colleagues.

With the development of the w-w-w, sharing projects and experiments has taken a whole new direction for many amateurs. A notable example of this phenomenon is the story of Frank, K0IYE. I MENTIONED THIS LAST JUNE HERE ON QNEWS...

I have often followed links to Frank's book "Crystal
Sets to Sideband" which is a free internet book and it was with pleasure that I read Frank's story in last May's, issue of World Radio Online.

http://www.worldradiomagazine.com/

There is a further article in THAT issue showing the construction of one of Frank's projects. Anyone familiar with Drew Diamond's use of
"ugly construction" will feel at home with the use of the "Manhattan" technique used in this audio amplifier.

Even in this age of the ready-made, for the hobbyist there is a place for rolling one's own. Part of this is the self-imposed challenge of succeeding at something different and part of it is using equipment you have made. Another part is being able to share what we have picked up along the way with other amateurs. For his efforts in explaining, developing and sharing his journey, a big thank you to Frank, K0IYE.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in QNEWS broadcasts please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page.
http://www.wia.org.au/members/broadcast/upload/

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of QNEWS.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

Due to work commitments and some technical difficulties over the last 2 months it's good to be back with news for the Redcliffe Club.

The club conducts technical talks on the 3rd Monday night of every month and for the programme rest of the year as follows:-

November, Peter VK4TAA Repairing and Programming Older Radios (Philips etc);
Dec John VK4CJC Calibrating SWR and Power meters and Jan Scot VK4CZ 6m DX.

Club members will be competing in the Spring VHF/UHF Field-day and will be using the club's competition call sign VK4IZ, so give the guys a call during the contest.

And whilst speaking VHF, Charles, VK4BTC, has constructed a 6m 4 element beam which is only awaiting installation on the club's mast and with its rotator should be ready for the contest weekend.

The club's Christmas Social Gathering is to be held at the 4 Mile Creek Hotel, 260 Gympie Road, Strathpine, 3 December 2011 from 11.30 am. All club members and their partners are invited to attend but as per club rules, there is to be no transmitting equipment allowed inside the venue!!

The club will hold is final working bee for the year at 9.00am 10th December 2011. Guttering around the club house is to be either repaired/replaced.
John VK4YJV has already organised the supply of the guttering.
The kitchen bench has to be moved about 50mm to allow a dish washer to be installed.

The next big Fund Raiser for the club is the Bunning Sausage Sizzle for the 27 Dec 2011. Your assistance is required for this. It is appreciated that this is over the Xmas holiday period and some members will be out of town but if you are available to assist for a few hours please advise the secretary, Roger, VK4ZLQ or via the club's website secretary@redclifferadioclub.org.au if you are available.

The news ends on a sad note with the passing of young Daniel Coombes, son of one of our club members who died unexpectedly in his sleep, last Monday. Daniel's funeral was held at the chapel at Marist College, Ashgrove, yesterday. To you John and your family, all club members are deeply saddened with your loss.

So now it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

G'day again from the Atherton Tablelands this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

TREC members are planning for the VHF/UHF Spring Field Day contest to be held on the 26/27th November. We will be operating from Hallorans Hill which is located only 1.5 kilometres from the centre of Atherton.

Grid locator is QH22rr.

This contest is always lots of fun and allows operators to see just how far they can work on the higher bands.

Frequencies to be used by TREC will be 6M, 2M, 70cm, 23cm and 3cm.

Some club members will also be operating from other locations around the Atherton Tablelands during the contest.

Christmas Car Boot Sale and end of year festive day:

Sunday December 4 immediately after the broadcast, REAST will be holding an end of year get together that will combine a car boot sale and an end of year BBQ as well as other delicious foods. A giant Xmas hamper will also be up for grabs.

Put this date in your diary as it is bound to be a great day for members and friends of the club.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Amateur Radio Assessments and training

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio Licenses are advised that the North West Tasmanian ATV Group can provide these requirements and much more.

Maybe someone wishes to upgrade. Well the club has the appropriately trained personnel with Facilitators from the Radio and Electronics School who can attend to all requirements should candidates so desire.

For more information, please contact the Club's Learning Organizer Tony VK7AX, or the Club.

Contact details can be found on the Club Web Site or http://www.wia.org.au under VK7 Clubs.,

DISCUSSION POINT

What use is an f-call?

Recently I got to thinking about this hobby of Amateur Radio.

It's not like any other hobbies I've had in the past.

It's different in so many ways that it took me a little by surprise.

When I played with lego, electric trains or on my home computer in my teens, I was a hobbyist. I spent time, effort and money on my hobbies. When I came across another enthusiast, I exchanged ideas and findings and carried on with

what I'd learned. Sometimes we combined efforts and I recall making a huge railway yard in the attic with about six friends, each of our tracks hand-marked to prevent inadvertent ownership transfer.

With the age of the Internet, you'd expect that you'd see an evolution beyond that. You'd see people getting together in communities and sharing their hobby.

While this does happen, much more than when I was a teenager, there are hundreds of places for each hobby, most of them insular and self-contained, region specific, language specific, what ever.

Amateur Radio is different.

We have a scarce resource that is shared around the globe, our radio bands. When I first turned on my radio I recall thinking that these bands were huge, infinite, there was just so much to choose from, how would I ever find anyone?

Turns out, running your finger over your VFO, or programming your radio to do it for you, gives you a great sense of what's happening where and when. It turns out that as you start using the bands, you realise that these huge bands are not infinite at all. During some parts of the day, some of these bands are not helpful in getting radio signals out across the countryside. Turns out that people become grouped together in smaller bands at different times of the day. The side effect of this is that all the people with this hobby are all in the same place at the same time. More or less anyway.

You get my point, we're all talking together in the same place, all of us, so we have a built-in system to make us participate with each other in the same place. Of course it helps that a large part of Amateur Radio is to do with communication, so not only do we congregate, we also talk.

Other aspects of this hobby that took me by surprise are that it's more encompassing than other hobbies. Amateur Radio is about communication and all that this embodies. It's about learning skills, it's about socialising, it's about building and testing, it's about competitions, about professionalism, it's unlike any other hobby I've participated in.

Amateur Radio, what a hobby. Tell your friends.
I'm Onno, vk6flab

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Czech Republic

There is some good and some bad news coming out of the Czech Republic.

The use of the band 70.1-70.3MHz will be extended throughout 2012 but, unfortunately, the 5MHz experiments will come to an end by the end of 2011.

RONNIE MILSAP WB4KCG AND HIS TRIO TO PERFORM HOLIDAY SHOW IN SOCAL.

If you are listening in or near Southern California and have no plans the evening of December 9th, you might consider a trip to the Cerritos Center for the Performing Arts. That's where country music legend Ronnie Milsap,

WB4KCG, and his trio will be performing their Holiday Show.

One of the most popular dinner speakers ever at the Dayton Hamvention, WB4KCG has been honored for his contributions to the art of country music by the Country Music Association, the Academy of Country Music and Billboard Magazine.

More about WB4KCG is at his website at www dot ronniemilsap.com

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Intruder Watch reports taxis on 28MHz

Following the flood of low power FM transmissions across the 28MHz amateur band, the RSGB Intruder Watch has provided the Ofcom Monitoring Station at Baldock with a number of recordings.

It has been confirmed that these transmissions are from taxi operators and this will form the basis of a complaint by Baldock to the Russian authorities. The timing of this complaint is fortunate as Uli Bihlmayer, DJ9KR, the Joint Coordinator of the IARU Monitoring System, has recently had a reply to a written complaint that he made directly to the Russian authorities. They have agreed to monitor the 28-29.7MHz band with the intention of stopping transmissions from CB and taxi operators. It remains to be seen how this works in practice but there is now a real possibility that this problem is going to be tackled at source.

(rsgb)

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

Extra Long Electrical Arcs

IRTS report researchers at the University of Canterbury, New Zealand, have developed a new, lower-voltage method of generating extra-long, lightning-like electrical arcs.

The arcs are created when an electrical impulse is applied to a thin copper wire that subsequently explodes!

By jump-starting the arcs using exploding wires, as opposed to the traditional method of directly breaking down air, the researchers reduced the amount of voltage needed to create an arc of a given length by more than 95 percent.

40M Rebroadcast in VK7 on the Move

In VK7 for at least the last 40 years there has been a 7.090MHz broadcast each Sunday morning.

Since 2004 this broadcast has only been the local VK7 Regional News broadcast from 0930.

Following feedback and discussion with our 40m rebroadcasters here in VK7 we have decided to broadcast both the WIA National News and VK7 Regional News each week from the 20 November 2011 starting at 0900.

This will also coincide with a move to the preferred 40m segment from the WIA Band Plan.

We have looked at the band plan and what 40m frequencies the other states broadcast on and have come to the conclusion that 7.140MHz is the safest option as the only other state to use this is VK6 and the time zone is very different.

So, from today - 20 November 2011 the 40m VK7 broadcast will begin at 0900 and feature both the WIA National News and then at 0930 the VK7 Regional News broadcasts on 7.140MHz.

Feedback is always welcome.

Justin, VK7TW VK7 Regional News and Broadcast Coordinator

VU2UR in The Hindu

The Hindu newspaper reports on radio amateur B.L. Manohar VU2UR who has been licensed since 1967.

The paper says "when all cellphone towers have fallen down, landlines broken, satellite dishes damaged, as often happens during an earthquake or tsunami, amateur radio operators are the only ones who can provide emergency communications. This fact is very often forgotten."

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-11-17
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** V5/DJ4SO from Namibia **

Klaus, DJ4SO will be active again as V5/DJ4SO from Namibia from
17 November to 14 December. He will operate mostly CW, RTTY and
PSK31 with some SSB on 160-6 metres, and will participate in the
CQ WW CW Contest. QSL via DJ4SO, direct or bureau, and LoTW.
Email requests for bureau cards can be sent to klaus[at]dj4so.de
SOURCE: [TNX The Daily DX] via 425 DX News #1071

** C9, MOZAMBIQUE, qrv HF and 50 MHz **

Mike, K9NW, will be active as C91NW from Mozambique between
November 21-29th. Activity will be on 160-10 meters using CW,
SSB, RTTY and possibly 6m. He will also be on during the CQWW
DX CW Contest as a Single-Op/All-Band entry. QSL via his home
callsign. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1036

** K7UGA - UNITED STATES (Special Event) qrv in 2012 **

The Central Arizona DX Association (CADXA) is very pleased to
announce their special event operation in celebration of the
Arizona Centennial during the week of February 13-19th, 2012.
They will be using the callsign of the late Senior Senator, and
Arizona native son, Barry M. Goldwater K7UGA. Individual CADXA
members will be operating from their home stations located
throughout Arizona during that week using the callsign K7UGA.
However, only special operating locations from Tucson, Prescott
and Phoenix will be on the air celebrating the 100th anniversary
on Tuesday, February 14th, 2012. Operations will be on all amateur
bands (160-2 meters); and will be using CW, SSB, RTTY, PSK31 and
Satellite modes. This CADXA special event operation has proudly
received recognition from the 2012 Arizona Centennial Foundation
as a sanctioned "Special Event"; and from the Arizona Historical
Advisory Commission as an official "Centennial Legacy Project".
All QSL requests go to Bob Davies K7BHM (qrz.com) with an SASE.

For more details, please go to the CADXA Web site at:

==> + AMATEUR RADIO IN SPACE: NEW SPACE STATION CREW MEMBERS LAUNCH
FROM KAZAKHSTAN

Three new astronauts -- Dan Burbank, KC5ZSX, Anton Shkaplerov and
Anatoly Ivanishin -- are now onboard the International Space Station.
The Soyuz TMA-22 spacecraft carrying the new trio launched from the
Baikonur Cosmodrome in Kazakhstan at 0414 UTC Monday, November 14.
Expedition 29 Commander Mike Fossum, KF5AQG, and flight engineers
Satoshi Furukawa, KE5DAW (JAXA) and Sergei Volkov, RU3DIS (RKA),
welcomed their new crewmates when the hatches opened at 0739 UTC
Wednesday, November 16. Burbank, Shkaplerov and Ivanishin are scheduled
to live and work aboard the ISS until March. Read more here

==> + ON THE AIR: THE 2011 ARRL PHONE SWEEPSTAKES IS THIS WEEKEND!

The ARRL Sweepstakes celebrates its 78th anniversary in 2011 and the SSB weekend is coming up on November 19-21. As the CW weekend earlier this month demonstrated, the recent re-awakening of the sunspot cycle promises a generous dose of competition and fun for operators all across the US and Canada. Technician licensees can make the most of their HF privileges by taking advantage of the great conditions on 10 meters! Even very modest stations can do well on 10 meters, including mobile and portable operations. Start tuning on USB from 28.3 MHz and follow the action. If you've never operated a contest before, an introduction to operating in Sweepstakes has been posted online. You can also can brush up on the basics by viewing the 2011 ARRL November Sweepstakes Operating Guide. Assembled by ARRL Contest Branch Manager Sean Kutzko, KX9X, it is a great compilation of Sweepstakes rules, operating techniques, and log submission guidelines. Read more here <http://www.arrl.org/news/let-s-play-two-the-2011-arrl-phone-sweepstakes-is-right-around-the-corner>.

==> + LOTW PROCESSING TIMES IMPROVING

Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>) is continuing to accept and process logs. As of November 17, the processing delay stands at 52 hours. There are approximately 1.38 million QSOs in 5886 logs waiting to be processed. If you have already uploaded a log, there is no need to upload it again; by doing so, you will only add to the queue. Do not send entire logs that contain previously uploaded QSOs; please use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. Following these guidelines will allow LoTW to process the backlog at a faster pace. The ARRL IT staff continues to investigate an anomalous series of events that began on October 29, initially creating the persisting backlog. The IT staff is also working diligently to speed up the LoTW processing time and eliminate the backlog. Thanks again for your patience.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 MAY DE-ORBIT IN APRIL 2012

According to predictions <http://www.ne.jp/asahi/hamradio/je9pel/arissat5.htm> from Mineo Wakita, JE9PEL, the ARISSat-1 <http://www.amsat.org/amsat-new/index.php> satellite is due to re-enter Earth's atmosphere in early April 2012. Launched from the International Space Station on August 8, the satellite is traveling in a low orbit and is steadily losing altitude. The rate of orbital decay may be accelerated by increasing atmospheric density caused by increased solar activity. With that factor in mind, some ARISSat-1 decay predictions suggest re-entry as early as February 1. ARISSat-1 remains quite active, sending voice messages, digital telemetry and Slow Scan TV images. Amateurs have also been able to enjoy contacts through

ARISSat-1's linear transponder despite the fact that the UHF antenna was apparently damaged prior to (or during) deployment. Last month, AMSAT-NA announced a competition <http://www.arrl.org/news/arissat-1-team-announces-morse-code-contest> to see who can record the last bits of telemetry as ARISSat-1 makes its final plunge. To decode the CW or BPSK telemetry you must use the ARISSATTLM software <http://www.arissat1.org/v3/> for Windows or Mac OS. The CW signal is transmitted at 145.919 MHz and the BPSK signal appears at 145.920 MHz, plus or minus Doppler.

==> + AMATEUR RADIO IN SPACE: APPLY NOW TO HOST A REAL-TIME CONVERSATION WITH CREWMEMBERS ONBOARD THE ISS

NASA is now accepting proposals from US schools, museums, science centers and community youth organizations to host an Amateur Radio on the International Space Station (ARISS) contact between July 15, 2012 and January 15, 2013. To maximize these radio contact opportunities, NASA is looking for organizations that will draw large numbers of participants and integrate the contact into a well-developed education plan. Proposals are due January 30, 2012.

Using Amateur Radio, students can ask astronauts questions about life in space and other space-related topics. Students fully engage in the ARISS contact by helping set up an Amateur Radio ground station at the school and then using that station to talk directly with a crewmember on the International Space Station for approximately 10 minutes. ARISS has a network of mentors to help obtain the technology required to host this exciting opportunity for students. Read more here <http://www.arrl.org/news/apply-now-to-host-a-real-time-conversation-with-crewmembers-onboard-the-iss>.

==> + ON THE AIR: BRITISH HAM PLANS PSK31 DXPEDITION TO MYANMAR

The Daily DX <http://www.dailydx.com/> is reporting that Simon Luttrell, HS0ZIB/G6JFY <http://hs0zib.com/>, has been granted an "invitation" from senior officials within the Myanmar Ministry of Post and Telecommunications and the Ministry of Tourism to visit Bagan, Myanmar to operate a four-day PSK31 "micro DXpedition." Myanmar -- formerly known as Burma -- has not been on the Amateur Radio bands since 2004. Although Luttrell does not yet have a formal date for his first operation, his Myanmar contacts want him to "come soon for about five days." Luttrell told The Daily DX that he is hoping to go to Myanmar later this month or in early December, "but must wait for the 'final go-ahead' from Myanmar authorities."

Luttrell's initial activity will be on 20 meters only, running about 50 W into a wire antenna. "This operation is intended to be an initial demonstration station," he told The Daily DX, "and my plans for regular 'low-profile' PSK DXpeditions from different tourist locations within Myanmar have been warmly received. Whilst some may scoff at such a micro station, others will be fully aware that a small station of this type can easily achieve global contacts." He said that he hopes that

this will be the first of many operations from XZ, as he lives just three hours from the Thai/Myanmar border.

==> + AMATEUR RADIO FUN: BE A STAR! ENTER THE SECOND ANNUAL ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Second Annual Video Contest <http://www.arrl.org/video-contest>! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. If your video takes first, second or third place, we'll post it on the ARRL website for everyone to see. We're looking for a few good videos (but only one per ARRL member, please) on any tasteful subject relating to Amateur Radio. While you are welcome to submit a video on any theme, we're especially looking for videos that illustrate the joy and excitement of Amateur Radio. Videos will be judged on overall quality and composition, and prizes will be awarded. This year, the ARRL will be offering two categories: Professional and Amateur. The Professional category is intended for entrants who are professional videographers or those who have access to professional-grade video equipment and software. Both categories will have prizes for first, second and third place. Read more here <http://www.arrl.org/news/be-a-star-enter-the-second-annual-arrl-video-contes t>.

==> ARRL COMMITTEE SEEKS MICROWAVE BAND PLAN INPUT

Attention microwavers! An ARRL Ad Hoc Committee has been tasked by the Board of Directors with recommending updates to the ARRL band plans for the amateur bands between 902 MHz and 3.5 GHz. If you are now active on any of these bands or are developing plans to become active, the committee would like to hear from you.

The band plans for these bands may be found here <http://www.arrl.org/band-plan-1>:

- 902-928 MHz
- 1240-1300 MHz
- 2300-2310 and 2390-2450 MHz
- 3300-3500 MHz

You can find additional background and a form for submitting information here <http://www.arrl.org/news/arrl-committee-seeks-microwave-band-plan-input>. Please respond by December 15, 2011.

==> + W1AW ANNOUNCES WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The standard times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-winter-operating-schedule-1>.

==> SOLAR UPDATE

Tad "November's Sun is felt by none <http://www.youtube.com/watch?v=g_fwgkpghtM>" Cook, K7RA, reports: This week geomagnetic indices quieted a bit, as did solar activity in general. On November 9, sunspot numbers reached a high of 220, and this week, they declined, rose to 176 and then declined again. The average daily sunspot numbers slipped 8.4 points to 145, while the average daily solar flux dropped 12.5 points to 161.2. The most recent forecast predicts a bit lower activity than we've seen recently. The predicted solar flux from NOAA and USAF shows flux values of 145 on November 17, 150 on November 18-19, 155 on November 20-23, 150 on November 24, 145 on November 25-28, and then rising to 165 on December 4-7, which is just a few days before the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>. The predicted planetary A index for November 17-20 is 5, 7, 8 and 7, then 5 on November 21-25, 7 on November 26-27, and 5 on November 28-December 8. Geophysical Institute Prague has their own take, with unsettled conditions November 18, quiet to unsettled November 19 and quiet November 20-24. Look for more information on the ARRL website on Friday, November 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Widespread Panic's Driving Song <http://en.wikipedia.org/wiki/Widespread_Panic>.

==> + ARRL HEADQUARTERS TO CLOSE FOR THANKSGIVING HOLIDAYS

ARRL Headquarters will be closed November 24 and 25 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a day early on Wednesday, November 23, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, November 24. ARRL Headquarters will reopen Monday, November 28 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> THIS WEEK ON THE RADIO

This week:

- November 18 -- YO International PSK31 Contest
- November 19 -- Feld Hell Sprint
- November 19-20 -- ARRL EME Contest <November%2018%20--%20YO%20International%20PSK31%20Contest>; LZ DX Contest
- November 19-21 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North America Collegiate ARC Championship (SSB)
- November 21 -- Run for the Bacon QRP Contest
- November 23 -- SKCC Sprint
- November 23-24 -- CWops Mini-CWT Test

Next week:

- November 26-27 -- CQ Worldwide DX Contest (CW)
- November 27 -- SARL Digital Contest
- December 1 -- QRP ARCI Topband Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 19-20, 2011 -- ARRL Indiana State Convention <http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and-computer-expo>, Fort Wayne, Indiana
- December 3-4, 2011 -- ARRL West Central Florida Section Convention <http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-bay-hamfest-1>, Palmetto, Florida
- January 8, 2012 -- ARRL New York/Long Island Section Convention <http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-radio-university-2012>, Bethpage, New York
- January 27-28, 2012 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>, Jackson, Mississippi
- February 4, 2012 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>, Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>, Ladson, South Carolina
- February 10-12, 2012 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>, Orlando, Florida
- February 17-18, 2012 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18, 2012 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25, 2012 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont

Amateur Radio Newsline(tm) Report 1788 - November 18 2011

Amateur Radio Newsline report number 1788 with a release date of
Friday, November 18th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio and the National Weather Service
cooperate in a severe weather event in Alaska, rescue radio stands down
in Italy and Turkey, more intruders are found on 10 meters and an
in-depth look at the November 9th National E-A-S test. Was it a
success or a failure? Find out the details are on Amateur Radio
Newsline(tm) report number 1788 coming your way right now.

RESCUE RADIO: HAMS LAUDED IN THE WAKE OF EARLY SEASON ALASKA STORM

Ham radio has been highlighted in the November 12th issue of the Alaska
Dispatch. This after an early season storm hit the most-Northern
state. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the
details:

--

According to the news article, when it became clear the Bering Sea
storm was going to be a major severe weather incident the National
Weather Service got word out to Alaska's amateur radio network that it
wanted help. And as crashing waves pounded beaches, the people who
live in the remote, isolated villages along the storm's path stayed
connected via a web created by Alaska's ham radio community.

When other communications failed, ham radio operators came to the
rescue. Throughout the storm, they were the eyes for scientists and
weather forecasters in Fairbanks and Anchorage who otherwise would have
been isolated from the severe weather conditions they could predict but
not see.

Carven Scott, is a forecaster with the National Weather Service in
Anchorage. He told the newspaper that it was hams that were providing
critical observations as the storm blew past. Scott noted that the
N-W-S does not have much in the way of meteorological observations in
the western part of the state but hams kept his agency alerted to the
latest conditions in remote areas. This included such data as how fast
the wind was blowing and from what direction; wave height; whether it
was snowing or raining; and the temperature. Scott says that these

seemingly small details from various villages made a big difference for the weather service in its predictions.

Scott credits Richard Courtney, NL9H, as the ham radio operator who came up with the idea of an alliance between Alaska's ham community and the weather forecasters. Scott said that he had for some time thought that amateur radio would be a good communications supplement. With the Bering Sea storm approaching the Alaska coast, Scott said that they decided to give it a shot.

Scott told the newspaper that through the ham radio network he and his colleagues learned that river ice in Koyuk was backing up and spilling onto the banks. Also that roofs had blown off and water was surging in Nome, and rain and snow were falling in several other villages.

The story also highlights the work of Martin Ruud, WL7MR, in the city of Nome. From Tuesday night as the storm approached through the following Thursday morning, WL7MR forwarded messages from islands and other coastal communities. The newspaper says that Ruud had draped sleeping bags over his windows to protect himself and his equipment in case a wind gust shattered the glass. Outside, a 160-meter loop antenna stood ready atop four telephone poles the city of Nome gave to him for free, knowing he could put people in contact with the outside world when other methods failed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The entire story of ham radios role in this major Alaskan winter severe weather outburst can be read on-line at tinyurl.com/alaska-storm (Alaska Dispatch)

**

RESCUE RADIO: MARITIME MOBILE NET IN CREW RESCUE

The South African Maritime Net recently assisted in the rescue of the crew of the sailing vessel "Wizard" owned Gerry Boshoff, ZS6SUN . This after the yacht struck a submersed container and began taking on water.

Boshoff maintained regular contact with the South African

Maritime Net which enabled Graham Griggs, ZS2ABK, to supply

the maritime authorities with needed information as to the

yachts location and condition. This allowed rescue

personnel to reach the location and to the crew being saved.

At last report all were taken aboard a tanker which had been

diverted to the spot where the sailing vessel sank.

(SARL)

RESCUE RADIO: ITALY AND TURKEY SECURE HF EMCOMM OPERATIONS Italian and Turkish High Frequency emergency operations on the 80 and 40 meter bands have been secured. As such there is no further need to take care when operating around 3.643, 3.760MHz on 80 meters and 7.045 and 7.060 and 7.092 and 7.095 MHz on 40.

Keeping clear of these frequencies had been requested RNRE in Italy for relief efforts following the flooding in the North West of that country and TRAC for the Earthquake in Van province of Turkey. Both groups have offered their thanks to the world ham radio community for its cooperation during those hectic times.

**

ENFORCEMENT: AUSTRALIA'S ACMA ACTS AGAINST HOBBY RADIO RULES VIOLATORS

The recent issuing of warning notices and confiscations in four states by the Australian Communications and Media Authority or ACMA shows it's serious about infringements by hobby communicators.

Under the Radiocommunications Act, six individuals were given a warning for their unlicensed operation and two additional warnings of possession of modified amateur radio equipment.

The ACMA said all were operating on HF frequencies they were not licensed to use, or allocated to the Amateur Service. A range of non-compliant equipment has been surrendered to the ACMA.

A 70 Watt CB radio in Victoria, a 40 Watt CB radio and 400 Watt linear amplifier in South Australia, a modified Kenwood ham band transceiver from Tasmania, 70 watt CB radio and 600 watt linear amplifier in New South Wales.

The ACMA said operating non-compliant or modified radio communications equipment on frequency bands contrary to that specified by a license condition, had the potential to cause serious interference to radio communications services.

While the ACMA prefers to educate those who operate outside their license conditions, it will suspend or cancel licenses, issue infringement notices, or commence prosecutions for more serious offences.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News, in Brisbane, Australia. (WIA News, VK3PC)

INTRUDER WATCH: PROBLEMS WORSENING ON 10 METERS AS MUF RISES

A recent issue of the IARU Monitoring System newsletter reports that the intruder situation on 10 meters is getting worse as the Maximum

Usable Frequency or M-U-F continues to rise in Solar Cycle 24.

The report said that it found much CB-like traffic using AM, FM and SSB between 28 and 29.7 MHz in September and again in October 2011. It pegs Europe, Brazil and the Far East as the primary originating points for most of the illegal 10 meter traffic. The report goes on to say that the band is also still filled with numerous taxi cabs operating FM.

The report says that with conditions on the upper High Frequency bands improving that we could soon witness what it calls the "apocalypse" on the amateur- exclusive 10 meter band. The newsletter also describes interference on the 24 MHz band from Codar Radar and numerous "CB" operators taking to those airwaves as well.

As reported last week, Russia has agreed to do all it can to remove illegal taxi radio operators from the 10 meter band but just how successful that move will be remains to be seen.

RESCUE RADIO: THE FIRST NATIONAL EAS TEST - A PARTIAL SUCCESS AND A PARTIAL FAILURE

If you were listening to a radio or watching television at 2

p.m. Eastern U-S time on Wednesday, November 9th this is

what you may have heard:

--

Actual test audio air-check.

--

That's the sound of the nations first ever national test of the Emergency Alert or E-A-S system. Here's Robert Sudock, WB6FDF, with a look at what happened and possibly why:

--

In a November 11th letter to the CGC Communicator broadcast industry newsletter, Richard Rudman, W6TIA, who is the California State

Emergency Communications Committee EAS Vice Chairman writes that FEMA, the Federal Emergency Management Agency, will hopefully release the details soon. That said, from some post-test recordings that he has listened to he believes that there is a very strong likelihood that the audio loop-back that many heard occurred at the FEMA warning origination point. Rudman says that there are other theories being advanced, but that we will have to wait for FEMA to issue its official post-test report to know with 100% certainty exactly what happened and what will be done to prevent this from happening in the future.

Rudman who is one of the architects of emergency public alert systems going back several decades says that while a large number of people and media outlets still represent the test as a "failure" it wasn't that at all. Rudman says that he wants to strongly restate his feeling that we need to look beyond the audio shortcomings and concentrate on the many things that went right with the EAS relay system, and on the distribution infrastructure and equipment issues that will require EAS public and private stakeholder cooperation to fix.

Rudman adds that at some point in the near future we will find out if our government is serious about warnings or not. This he says includes dollars for training from origination point on through; dollars for redundant and resilient warning distribution infrastructure and now the will on the part of FEMA and the FCC for as rapid a transition from SAME EAS to CAP EAS as possible, with wired and wireless paths for CAP distribution that back up Internet distribution.

But back in the nation's capitol, FEMA Integrated Public Alert and Warning System Program Director Manny Centeno has a different view. In an interview with Radio World magazine, Centeno claims that the test went off on time, and was delivered across the country. He says that the quality of the originating message was clear for the first four seconds; however a technical malfunction occurred at a national primary level that introduced dual header tones and subsequently decreased the original audio quality of the message for downstream stations. Centeno says that this resulted in distorted audio.

According to Centeno, the Federal Emergency Management Agency delivered the audio to more than 60 Primary Entry Point stations that were all on a telephone conference bridge during the event. All the national primary stations were connected during the test. Asked whether a particular station introduced the bad audio, Centeno said FEMA is looking into how the audio was introduced into the system and is re-creating the anomaly in its lab.

Centeno reiterated that last the November 9th test will not be the last. He says that FEMA looks forward to approaching the community with lessons learned, hearing their observations in an open forum, and continuing to improve the Best Practices Guide as well as the EAS system on a national scale.

But there is one issue that has yet to be addressed. That's the human issue of whether FEMA is expecting to much from the public when it holds an E-A-S test. This is because the average radio listener and TV viewer is used to great sounding audio all of the time. And what planners of the EA-S within FEMA and other government lettered agencies have yet to realize is that even in the clear and without a loop back problem, communications quality audio of 300 to 3000 Hz is going to sound really lousy on even the cheapest of pocket radios and that when the public hears alert tones that sound like bursts of static, many are going to simply tune out.

These agencies also seem to not realize what Richard Rudman and other E-A-S technologists do. That being in time of a real crisis situation that the Internet and much of the nation's landline communications may be down and that an alternate means of alerting the nations population is needed.

The bottom line is that the current E-A-S system may be a bit to complex for its own good. Some of us old enough to remember the days of the old Conelrad emergency alerting system tests that began in 1951 and continued until 1963. Those people also recall how well it worked because of its simplicity. It did not rely on computer routing and an immense software controlled hihgherarchy. Rather it placed its trust in the hands of human beings and only once in its history did that human system ever fail.

For the Amateur Radio Newsline, I'm Robert Sudock, WB6FDF, in Los Angeles.

--

If you have never heard a Conelrad alert but would like to, then take your web browser to tinyurl.com/first-conelrad test. And yes, things were much simpler back then. (Adapted from the CGC Communicator, RW, others)

BANDPLANNING: ARRL AD HOC COMMITTEE ON MICROWAVE BANDS

And this for hams who like to operate in the

microwave spectrum. An ARRL Ad Hoc Committee

has been tasked by the Leagues Board of

Directors with recommending updates to the ARRL

band plans for the amateur bands between 902 MHz

and 3.5 GHz. If you are now active on any of

these bands or are developing plans to do so,

the committee would like to hear from you. The

band plans for these bands may be found at

www.arrl.org/band-plan-1. Comments go via the

ARRL website at www.arrl.org/microwave-band-plan-

input-form. You have till December 15th to

respond.

(WA6ILQ. W9QZB, others)

HAM HAPPENINGS: FROSTFEST 2012 IN RICHMOND

VIRGINIA

Turning to the ham radio social scene, Frostfest 2012, sponsored by the Richmond Amateur Telecommunications Society, takes place on Saturday, February 4th. This event features manufacturer's representatives from major equipment makers, new equipment vendors, 300 tables of indoor flea market sales, VE Testing, DXCC Card Checking, forums and meetings. The venue is the Richmond Raceway Complex in Richmond Virginia. This event is also the ARRL Virginia State Convention. More is on-line at www.frostfest.com.

**

HAM HAPPENINGS: 15th INTERNATIONAL EME CONFERENCE TWEETING

There is now an official Twitter information

feed for the upcoming 15th International E-M-E

Conference. That happening is to be held in

Cambridge, United Kingdom, August 16th to the

18th of 2012. The Twitter feed can be found at

twitter.com/moonbounce2012. For more

information on the conference take your web

browser to www.eme2012.com (Southgate)

**

HAM HAPPENINGS: DAYTON HAMVENTION TOPS 22,000

IN 2011

Its taken a few months to compile, but according to Dayton Hamvention on-line Moderator Bill Curtice, WA8ABP, the official attendance for the 2011 gathering has been tallied at 22,312. That appears to be up by several hundred over 2009 and 2010. It is a sign that at least the health of the ham radio economy is improving even if that of the rest

of the nation seems to be lagging behind. The information was posted to the Hamvention reflector on Sunday, November 13th.

(Hamventionr News Group, WA8ABP)

RADIO TECHNOLOGY: PROBLEMS WITH P25 SECURITY

While it's not of much concern to hams who have adopted Project 25 digital audio, researchers looking at the security of this system have discovered that it's easily jammed, and almost as easily compromised. And all of this can be accomplished using a kid's toy. Amateur Radio Newsline welcomes Heather Butera-Howell, KB3TZD, to the Amateur Radio Newsline family. She has this report:

--

During a two-year study, researchers from the University of Pennsylvania found that encryption on a police P 25 network was not only routinely switched off, but also demonstrated how a 25 dollar toy called the "GirlTECH IM me" could be reprogrammed to jam transmissions and even exclude specific users or subnets. It also showed how a more-expensive option could track a specific user.

P 25 is the United States equivalent to the trans-European Trunked Radio or TETRA digital audio radio system. But unlike TETRA, which is deployed in a dedicated and fairly secure radio spectrum, P 25 had to be compatible with the existing analog systems, and is thus squeezed into a fixed 12.5 kilohertz split-channel spacing. However, that is not the only thing making it vulnerable. According to the report P 25 uses fixed-length packets, optionally encrypted using a symmetric key, distributed to handsets manually or over the air.

They say that the first problem is the key distribution doesn't always work. As such the research team found users frequently get cut out and have to ask the rest of the group to switch off encryption for the duration of the operation. Individual users can also, inadvertently, switch off their own encryption without other users being alert enough

to notice.

The researcher's 16 page report does have practical advice for users of the P 25 digital audio mode. It suggests reprogramming handsets to make switching off encryption less obvious, and reminding users when it has been switched off. But the team also concludes that fundamentally the P 25 system wasn't designed with a properly layered security model, and that this will always leave it more vulnerable than it should be.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Pennsylvania.

--

More about this issue with the P-25 system is on-line at tinyurl.com/p25-secure (The A Register)

**

HAM RADIO IN SPACE: KC5ZSX NOW ON THE ISS

Amid steady snow, a Soyuz TMA-22 spacecraft roared to life from the Bikenour Cosmodrome in Kazikstan at 10:14 G-M-T one Monday, November 14th. On board were United States Astronaut Daniel Burbank KC5ZSX along with commander Anton Shkaplerov and engineer Anatoly Ivanishin.

The three were supposed to have launched on September 22. That went on-hold after an unmanned Progress cargo ship suffered a third stage malfunction during launch August 24th and failed to reach orbit. The third stage of the cargo craft's rocket is virtually identical to the one used in the manned version.

The three Expedition 29 space explorers docked with the ISS on Wednesday, November 16th. All the current Expedition 29 I-S-S crew members are radio amateurs. This includes commander Michael Fossum KF5AQG, Sergei Volkov U4MIR and Satoshi Furukawa KE5DAW. Once they return to Earth on November 21st, Daniel Burbank KC5ZSX will be the Expedition 30 commander and also become the only radio amateur on the ISS until the next crew change about 6 months from now. More is on-line at spaceflightnow.com.

**

HAM RADIO IN SPACE: RESEARCHER SAYS ARISSAT-1 WILL DEORBIT IN APRIL

The ARISSat-1 satellite is due to re-enter Earth's atmosphere in early April 2012. This, according to predictions from Mineo Wakita, JE9PEL, made on his website at tinyurl.com/7qw2nt9.

At his site JE9PEL has posted charts that show the slowly declining orbit of ARISSat-1 which was hand launched from the International Space Station back on August 8th. If his predictions hold accurate then ARISSat-1 still has several months left on-orbit before it meets a fiery demise as it reenters the Earths atmosphere. Meantime the

satellite remains quite active and has become one of the most popular birds since the start of ham radios operations from space.

**

COMING TO THE AIR: MARCH 2012 DXPEDITION NEEDS MORE OPERATORS

Planning is well underway for an upcoming DXpedition to Botswana, but more operators are needed. This according to organizer Charles Frost, K5LBU, who tells the Ohio Pen DX Newsletter that the operation appears to have lost 3 members for the March 2012 DXpedition and that its looking for replacements who might like to go with it.

K5LBU who is better known as Frosty says that the current plan is to arrive in Johannesburg, South Africa on March 15th. They will then spend 3 nights in a game park on the way to Botswana arriving at the Lotsane Lodge on March 18th and returning to Johannesburg on the 28th. He adds that they will operate as A25HQ in the CQ WPX Contest while there.

According to K5LBU in addition to transportation to and from Johannesburg the cost is $235 a day per person

and this covers all meals, transport and

lodging. All you will need is your laptop for

logging and a key and headset. Equipment the

DXpedition is bringing along includes an Icom

746 Pro, a Yaesu FT 450 and at least one Expert

1K-FA amplifiers. Antennas are a T6 Log

Periodic, an HF2V, and a folded dipole that

covers 160 through10 meters also. If you would

like to go please E-mail Frosty to 3da0cf (at)

gmail (dot) com.

OPDX

**

DX

In DX, JH1NBN will be active as 8Q7ZB from the Maldives Islands through November 29th. Operations are on the HF bands, propagation permitting. He may also enter the CQ World Wide DX CW Contest on November 26th and the 27th. QSL via his home callsign, either direct or via the bureau.

K9NW will be active as C91NW from Mozambique through November 29th. His operations will be on 160 through 10 meters using CW, SSB, RTTY and

possibly 6 meters as well. QSL via his home callsign.

A large multi-national team will be on the air from Nepal until November 25th. The callsign to look out for is 9N7MD. Activity will be on all bands in SSB, CW and RTTY. The QSL Manager is IK2VUC and logs will also be uploaded to Logbook of the World.

Lastly, DK9PY will be operational portable FG from Guadeloupe through November 26th. Activity will be only CW mainly on the 30, 17 and 12 meter bands. Also listen out on 80, 40, 20, 15 and 10 meters usually at about 15 kHz from the bottom of the band edge. QSL via his home callsign, either direct or by the bureau.

**

THAT FINAL ITEM: VISITING GERMANYS HAM RADIO CONVENTION THANKS TO THE CAMERA OF DC3AQ

And finally this week, a new video about the HAMRADIO 2011 convention in Friedrichshafen, Germany, last spring is now on-line. Often called the Dayton of Europe, this years HAMRADIO featured 184 exhibitors, representatives from 29 countries and an attendance up with the biggest shows. These three factors made it a truly international event.

The show was produced by Matthias Schilhab,

DC3AQ, and uses only video and the voices of the

attendees to tell the story of HAMRADIO as seen

through the eyes of each person interviewed and

presented in that person's home language. For

example, here is a sample from those who

expressed their view of the event in the English

language:

--

Actual show audio sample.

--

According to film maker DC3AQ, he decided not to narrate or to translate the film because he and his crew didn't know whether to release it in German, English, or Spanish. Instead, he calls the on-line release his polyglot version with each language standing on its own. Hence its title of HAMRADIO 2011 Polyglot.

You can view this 14 minute movie on-line at tinyurl.com/dc3aq-DL-Movie. And less we forget to mention, DC3AQ says that he funded this project himself without any support any sponsor or radio club. We say bravo on this very special gift from him to the

world-wide amateur radio community. (DC3AQ, ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, in Chasrleston, West Virginia, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 20th November 2011

The news headlines:

* Logbook of the World processing delay reduced

* New challenge for Spectrum Defence

* Christmas posting deadlines loom for overseas book orders

Following the news item last week on delays uploading to Logbook of the World. Currently, the processing delay is down to 45 hours. More than 1 million QSOs have been uploaded in the past five days. If you have already uploaded a log, there is no need to upload it again as this will only add to the queue. Please follow guidelines online as this will allow Logbook of the World to process the backlog at a faster pace.

Recent news from the MoD in the UK and in Europe underline the upsurge in demand for lower frequency microwave spectrum for mobile and broadband use. Our secondary allocations at 2.3 and 3.4GHz lie within the so-called 'sweet spot' for forthcoming 4G commercial services and are coming under increasing pressure. The Society and IARU are fully engaged with this difficult challenge. Spectrum defence is never easy but we certainly plan on retaining sufficient access for our own increasing activity and innovation.

The Christmas posting deadlines are fast approaching for overseas book orders from the RSGB. The first deadline is 1 December for Rest of the World airmail orders, then 3 December for Western Europe. Air mail orders to North America and Western Europe must be placed by 8 December. All these dates can be found on the RSGB website within the RSGB Shop.

The BBC World Service is auctioning off more than 100 lots of audio and radio equipment that has been decommissioned from its Bush House studio in London. Included are audio consoles, monitors, microphones including some very rare Coles ribbon microphones designed to BBC specifications. Details are available at www.tinyurl.com/BBC-auction. Bidding closes on 22 November at 1300 hours GMT.

Following the cancellation of the C21A Nauru expedition, Pacific DXers team members VK4AN, VK4FW, VK4NEF, NL8F, K4ZLE and W5SL now plan to be active from Tuvalu as T2T until 8 December.

Activation forms for ROC Bunker Month 2012, which will be held in October 2012, are now being accepted. So why not get planning and submit a form to www.rocbunkers.co.uk to participate? And now for the details of rallies and events for the coming week

The Mayo Radio Experimenters Annual Radio Rally is today, Sunday 20 November, at the Welcome Inn Hotel, Castlebar, Co Mayo. Doors open at 11am and there will be the usual range of traders, club stands, demonstrations and extensive catering facilities. Full details are online at www.ei7mre.org.

Also today, 20 November, the 34th CATS Radio & Electronics Bazaar will take place at 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors will be open 10am to 1pm and admission is £1. There will be a Bring & Buy. Details are online at www.catsradio.org.

Plymouth Radio Club Rally is taking place today, 20 November, at Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. Doors open at 10am and admission is £2. There will be trade stands and a Bring & Buy. More information from Bob Griffiths, G7HNB, on 017523 431 277.

The final rally of the year takes place on 4 December. The Bishop Auckland Radio Amateurs Club Rally will be held in Spennymoor Leisure Centre, Co Durham DL16 6DB. Doors open at 10.30am and admission is £1.50, with accompanied under 14s free. There will be trade stands and a Bring & Buy. More details from Mark, G0GFG on 01388 747 497.

Now for the news of special events

Newport ARS will be activating the Newport ROC Bunker in Monmouthsire on Saturday 26 November using callsign GC4EZW. Details are listed on www.rocbunkers.co.uk and on the ROCBunkers Facebook page.

G4PF and M0GWW will be running a special event station to celebrate Lancashire Week, using the callsign GB0LD. The NoV runs from 20 to 27 November with the Loyal Toast being read at 9pm on the final day, which is Lancashire Day. The station will be run from the village of Hoghton in central Lancashire and will use all bands from 70cm to 160m. More information can be found on QRZ.com.

And now the HF DX news compiled from 425 DX News and other sources

VE3EY and VE3TA will be active from Saint Barth£lemy between 22 and 29 November using a TO3 prefix callsign. Their operation will include the CQ World Wide DX CW Contest on 26 and 27 November as a Multi- Single entry. QSL via their home callsigns.

G3RWF will be active as 5X1NH from Uganda for three weeks, starting on 23 November. He will concentrate on the low bands. QSL via his home callsign.

A large multi-national team will be on the air from Nepal from 13 to 25 November as 9N7MD. Activity will be on all bands in SSB, CW and RTTY.

The QSL Manager is IK2VUC and logs will also be uploaded to Logbook of the World.

Islands on the Air Award enthusiasts will have the opportunity to work a new one this week as 7Z7AA is on the air until 25 November from Jabal Al Lith Island in the Red Sea. The IOTA reference number is AS-191 and QSL info is via 7Z1CQ. Now the contest news

Tuesday 22 November sees both the 50MHz UK Activity Contest and the SHF Activity Contest take place, both between 2000 and 2230UTC. On 50MHz, it's all modes with the exchange of signal report, serial number and locator. For SHF it's the 2.3 to 10GHz amateur bands using all modes and the exchange is signal report, serial number and locator.

Thursday 24 November is the 80m Club Sprint contest from 2000 to 2130UTC. Using CW only, the exchange is serial number and name.

The CQWW DX CW Contest takes place for the whole 48 hours of 26 and 27 November. With propagation on the upper HF bands improved over recent years, at times we can expect the CW segments of all the contesting bands from 3.5 to 28MHz to be very busy indeed. The exchange is signal report and CQ Zone, which is 14 for the UK.

And now the solar factual data for the period from the 7th to the 13th of November, compiled by Neil Clarke, G0CAS on the 14th of November

The solar disc had numerous sunspot groups visible every day, a lot were small and quiet. There was, though, one large group that looked capable of producing major solar flares, but all it could manage was C class flares. Activity did increase on the 9th when an M class flare occurred from a smaller region. Solar flux levels declined from 182 units, the highest so far for this cycle, to 155 by the 13th. The average was 174. The 90 day solar flux average on the 13th was 135, that's seven units up on last week. X-ray flux levels declined slightly to end the period at B6.8 units. The average was B7.1 units. Geomagnetic activity was quiet every day. The most disturbed day was the 8th with an Ap index of only 6 units. On the 13th the Ap was zero. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 480 kilometres per second. Particle densities varied between 1 and 5 particles per cubic centimetre. With a quiet magnetic field, Bz only varied between minus and plus 8 nanoTeslas and not even that on some days. With high solar flux levels, low Ap figures and the right time of year, MUFs were at their season high and were well above 30MHz every day, which provided excellent conditions on all the HF bands to all continents.

And finally the solar forecast. This week, the quieter side of the Sun is expected to be looking our way. Solar activity should be at low levels, with only a small chance of activity going any higher. This, as always, is based on previous solar rotations, but at this stage of the sunspot cycle that can change during the two weeks it takes to rotate across the far side of the Sun before coming back into view again.

Solar flux levels should be around the 130's. Geomagnetic activity should be mostly quiet, however a small disturbance could take place around midweek due to a small coronal hole that had almost disappeared on its last rotation. MUFs during daylight hours at equal latitudes should be around 30MHz. Darkness hour lows should be about 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1300 and 1800 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

SARL NEWS - SUNDAY 20 NOVEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

PROPOSED AMENDMENTS TO THE ELECTRONIC COMMUNICATIONS ACT ON SARL WEB

ANNUAL REMEMBRANCE DAY SERVICE TODAY

ANOTHER MILE STONE FOR 500 kHz

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

PROPOSED AMENDMENTS TO THE ELECTRONIC COMMUNICATIONS ACT ON SARL WEB

The Department of Communications has published proposed amendments to the Electronic Communications Act for comment. The SARL is studying the proposals for any possible changes that may affect amateur radio. A copy of the proposed changes to the ECA can be downloaded from www.sarl.org.za, select Amateur Radio TODAY from the left hand menu. The SARL Council invites your input before 26 November 2011 to artoday@sarl.org.za.

ANNUAL REMEMBRANCE DAY SERVICE TODAY

The annual Remembrance Day service will be transmitted as part of Amateur Radio TODAY at 10:45 this morning. The service will be conducted in Afrikaans and English by Ds Jan Kramer, ZS6JRK, of the Nederduits Hervormde Kerk gemeente Elsburg. The service was not transmitted last Sunday because of a technical problem.

All radio amateurs are requested to keep radio silence between 10:45 and 11:00 this morning in memory of all who lost their lives in service of their country.

ARISSat-1 MAY DE-ORBIT IN APRIL 2012

According to predictions from Mineo Wakita, JE9PEL, the ARISSat-1 satellite is due to re-enter Earth's atmosphere in early April 2012. Launched from the International Space Station on August 8, the satellite is traveling in a low orbit and is steadily losing altitude. The rate of orbital decay may be accelerated by increasing atmospheric density caused by increased solar activity. With that factor in mind, some ARISSat-1 decay predictions suggest re-entry as early as February 1. ARISSat-1 remains quite active, sending voice messages, digital telemetry and Slow Scan TV images. Amateurs have also been able to enjoy contacts through ARISSat-1's linear transponder despite the fact that the UHF antenna was apparently damaged prior to (or during) deployment. Last month, AMSAT-NA announced a competition to see who can record the last bits of telemetry as ARISSat-1 makes its final plunge. To decode the CW or BPSK telemetry you must use the ARISSATTLM software for Windows or Mac OS. T

he CW signal is transmitted at 145,919 MHz and the BPSK signal appears at 145,920 MHz, plus or minus Doppler.

ANOTHER MILE STONE FOR 500 kHz

Preparatory studies for WRC agenda item 1.23 seeking a new amateur service allocation somewhere in the range 415 - 526,5 kHz reached a milestone with the approval of a Report on amateur experimental operations in the above frequency range.

Working Group 1, the group responsible for amateur radio issues, continued an updating and revision of Questions, Recommendations and Reports pertaining to the amateur services. The IARU continues to show leadership in the planning and implementation of these activities.

PROBLEMS WORSENING ON 10 METRES AS MUF RISES

A recent issue of the IARU Monitoring System newsletter reports that the intruder situation on 10 metres is getting worse as the Maximum Usable Frequency or MUF continues to rise in Solar Cycle 24.

The report said that it found much CB-like traffic using AM, FM and SSB between 28 and 29,7 MHz in September and again in October 2011. It pegs Europe, Brazil and the Far East as the primary originating points for most of the illegal 10 metre traffic. The report goes on to say that the band is also still filled with numerous taxi cabs operating FM.

The report says that with conditions on the upper High Frequency bands improving that we could soon witness what it calls the "apocalypse" on the amateur- exclusive 10 metre band. The newsletter also describes interference on the 24 MHz band from Codar Radar and numerous "CB" operators taking on those airwaves as well.

Last week Russia agreed to do all it can to remove illegal taxi radio operators from the 10 metre band but just how successful that move will be remains to be seen.

MEMBERSHIP EDGES TOWARDS 1 500

The current membership of the SARL is 1 414, still some way to go to the 1 500 mark. I you have not yet paid your dues, please do it now and get reinstated to receive member benefits and Radio ZS. By paying the full 2011/2012 fee now you will not loose your membership record.

If you are not a member, is it not time that you consider joining and supporting your hobby? In January 2012 the ITU meets in Geneva for WRC12, the IARU is making good progress on getting an allocation in the 500 kHz band, their strength at representing amateur radio lies in the strength of individual member societies. The SARL and ICASA are in talks about an allocation in the 5 MHz band. All this need the support of every radio amateur. Do it now, join the SARL and you support your hobby.

CLUB EVENTS

South Cape Amateur Radio Club.

On Saturday, 5 November 2011, the SCARC held their AGM at Wilderness with 30 members and non-members in attendance. The committee elected for 2012 consist of the following members: Chairman: Jacques Vermeulen, ZS1WC Vice Chairman: Casey Nootenboom, ZS1AAS Secretary/Treasurer: Bets Meyer, XYL of ZS1M Repeaters: Hans Potgieter, ZS6ALJ/ZS1ALJ Additional members: John Fletcher, ZS1ZR Chris Meyer, ZS1M, and Chris Nortier, ZS1FA

Many thanks to the retiring committee members and strength to the new committee.

After the meeting a Bring-and-Braai was enjoyed and the day ended with a huge boot sale.

West Rand Amateur Radio Club.

The WRARC will host its next flea market at 12:00 on Saturday 03 December 2011 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that many sunspots are producing C-class flares and that sunspot 1 346 poses a slight threat for Earth directed M-class flares. The sun's surface is peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 103, slightly down on last week's record high for this solar cycle.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

20 November - Field day competition still on. 20 November - CW leg of 80 m Club competition. 26 November - Last day to submit comments on the proposed amendments to the Electronic Communication Act to artoday@sarl.org.za. 27 November - Digital competition. 30 November - Last day to submit logs for Pears HF DX-expedition. 03 December - Flea market of the West Rand Amateur Radio Club at 12:00. 31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

NZART Headquarters Infoline Issue 242

20 November 2011

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· KORDIA National System Award

· Branch information

· VHF Contest information

· FMTAG Report

· Looking for an old amateur, can you help?

· Housekeeping

Debby Says…I have been unable to find a replacement HQ Info-line Editor, therefore after some consideration, it has been agreed that the deadline for articles will now be on the Thursday prior to publication. This gives me time to collate everything received and place in a readable format.

As from Issue 243 due out 4th December, Info-line will be sent out via e-mail on Friday evenings following the deadline. Any missed articles, dependant on urgency, will be included in the following fortnightly issue.

This will be the last week for any subscriptions for 2012 received to be eligible to go in the draw for the hand held radio. Please make sure your payments reaches me on or before Wednesday 30th November.

Talk soon…Debby ZL2DL

Kordia National System Award – 2012

The Kordia National System Award 2012 – Historic Places, is being run again by The Hamilton Amateur Radio Club, Branch 12, NZART, in association with the New Zealand Historic Places Trust. FMTAG NOTES FOR HQ INFOLINE 242 - 20th NOVEMBER 2011

REPEATER/BEACON/LINK LICENCE RENEWAL

Time is running out to renew licences before the end of November, to avoid automatic licence cancellation by the MED's SMART system.

As at the close of business on Friday 18th November, NZART Headquarters had not received licence renewal fees from the following Branches:

33 Rotorua

34 South Canterbury

37 Southland

38 Taumarunui

42 Titahi Bay

60 Taupo

66 Auckland VHF

85 Mercury Bay

CARDS

Please contact FMTAG to receive a repeat of the licence reminder message:

fmtag@nzart.org.nz

Please make the discounted payment of $46 per licence to NZART HQ, to arrive on, or before, the 25th of November 2011.

Payment may be made by cheque made out to NZART.

Please attach a note: Branch <number> MED licence fee.

Payment may be made direct to the NZART Bank Account at the BNZ Upper Hutt.

The account number is 02 0772 0209760 00

Please ensure that the Payee Reference includes: Branch <number> MED licence fee.

For either method of payment, please send an email to NZART HQ and to FMTAG, advising that payment has been sent, and the method by which it was sent:

nzarthq@nzart.org.nz fmtag@nzart.org.nz

Failure to pay the licence fee to NZART will result in the MED SMART system cancelling the licence. The MED charges $408.89 for re-instating a licence lost by non-payment of the annual fee.

PROPOSALS

None this time.

FINAL RECOMMENDATIONS TO COUNCIL

These were published as Proposals in HQ Infoline 241. No adverse comments have been received.

Reefton-Buller Branch 62 has applied for a 2-metre repeater at Millerton, located at Topo50 BR21 049901. The repeater transmit frequency will be 146.750 MHz and receive frequency 146.150 MHz.

Reefton-Buller Branch 62 has applied for a 2-metre APRS digipeater at Denniston, located at Topo50 BR21 003782. The digipeater transmit and receive frequency will be 144.575 MHz.

Reefton-Buller Branch 62 has applied for a National System UHF Link Station (ULS) at Denniston, located at Topo50 BR21 003782, to link to the Murchison National System station. The ULS transmit frequency will be 439.950 MHz and receive frequency 434.950 MHz.

Reefton-Buller Branch 62 has applied for a National System Repeater at Denniston, located at Topo50 BR21 003782. The repeater transmit frequency will be 439.975 MHz and receive frequency 434.975 MHz, in accordance with the National System Frequency Plan.

Engineering investigations, in accordance with MED PIB38, confirm that the above four stations will not interfere with other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Looking for an old amateur

My father Nelson John Winch was an active radio operator in the 1940/1950 era and I would like to include his call sign(?) in a history I am putting together. Do you have any records that can give me that detail.

Thanks

Dennis Winch

If anyone can help, please contact me here at HQ nzart.hq@clear.net.nz

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 20th November 2011

IRTS Committee Meeting

The next IRTS committee meeting will take place on 10th December at 11.00 in Portlaoise. Affiliated clubs are encouraged to send a representative.

ECHO Ireland

The December issue of Echo Ireland will go to print in the early days of December. With the CQWW CW contest taking place that means a deadline for ECHO Ireland is two weeks from now, that is the first few days in December. No later please. Your co-operation is gratefully appreciated.

RMS Titanic

RMS Titanic, the world's largest passenger ship at the time, sank on her maiden voyage from Southampton to New York, following a collision with an iceberg, at approximately 0245 on the morning of April 15th 1912.

1,517 people lost their lives in the tragedy.

The 100th anniversary of the sinking will be marked by several special event stations at ports associated with the ships maiden voyage.

These include Belfast, Southampton, Cherbourg, Cobh, Cape Race, VO1MCE and a maritime mobile station, VE0MGY, at the site of the sinking.

The call sign EI100T has been issued for the year 2012 and will operate in co-operation with the Cobh Titanic 100 Committee.

The main events will happen over the weekend of April 13/14th and EI100T will also be operated regularly throughout the year.

A special award will be announced before the end of December in conjunction with the other special event locations.

Enquiries and QSLs to EI4HQ QTHR.

Dundalk Amateur Radio Society EI7DAR

On Wednesday 16th November last Michael EI5GG gave a superb information talk on ATV. Michael's encyclopaedic knowledge of ATV was most certainly demonstrated combined with his unique teaching style. Among the audience were our most welcome visitors from South Dublin Radio Club (SDR), Daniel EI9FHB and Tom EI7HT. We look forward to the next talk and demonstration to follow very soon. Everyone welcome.

South Dublin Radio Club Christmas Party 2011

This year's South Dublin Radio Club Christmas Party will take place on Tuesday the 13th of December.

The venue will be the same as last year, "The Morgue," Templeogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members & visitors can choose from the bar menu until 9.00 pm.

Lough Erne Radio Rally 2012

The Lough Erne Radio Rally will take place April 1st, 2012, an easy to remember date. This promises to be a very worthwhile rally to attend. Keep your diaries free for April 1st next and don't be fooled.

Longer Lasting Lithium-ion Batteries

Scientists boost battery strength with small holes.

Batteries for phones and laptops could soon recharge ten times faster and hold a charge ten times larger than current technology allows. Scientists at Northwestern University in the US have changed the materials in lithium-ion batteries to boost their abilities. One change involves poking millions of minuscule holes in the battery. Batteries built using the novel technique could be in the shops within five years, estimate the scientists.

DX News

N7OU has been very active from the South Cook Islands as E51NOU on CW during the past few weeks. His plans to travel to the North Cook Islands, which count as a separate DXCC entity, have had to be put on hold due to problems with flights between the two islands. It is hoped that by the time you hear this that fuel will again be available in the North Cook Islands to enable flights to resume and hopefully N7OU will be on the air as E51MAN from Manihiki Island. As with his earlier

operation he will use only CW and plans to be there till 6 December.

Darko E70A, who also operates as J28AA from Djibouti, has indicated that he may be active from Somalia using the call 6O0DX from 21 -30 November. Due to the general security situation in the area there is some doubt as to whether this operation will take place.

Following on from his recent visit to Guinea in West Africa with the 3XY1D team Sigi DL7DF is now headed for Kenya for a holiday until 6 December. He will reactivate his Kenyan Call 5Z4HW which he had previously used in February 2004 and February/March 2008.

A team of German amateurs will be active from Banana Island off the coast of Sierra Leone from 22 November until 4 December. They will use the callsign 9L0W and for the island chasers the IOTA reference is AF-037. QSLs go via DK2VW.

Italian and Turkish HF emergency operations complete

The IARU Region 1 website reports that the use of HF for relief operation in Italy and Turkey has finished.

The use of HF frequencies by RNRE in Italy for the flooding in the North West of their country and TRAC for the Earthquake in Van province of Turkey has finished. There is no further need to take care when operating around 3.643, 3.760MHz, 7.045-7.060 and 7.092-7.095 MHz.

Thanks to all amateurs who kept the frequencies clear for emergency traffic.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, N1DG, NJ1Q & ARRL DX, W2IRT, K3USC, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, K8GI, K8YSE, W8GEX (60m News), ND9M/VQ9JC, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, HS0ZIB, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IZ4AKS, JG7PSJ, LA6VM, LZ1JZ, OH2BN, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RK3DT, RSGB IOTA Web Site, SV1HER, UT1FG, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VO1AU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-November, through Sunday, 20th-November there were 236 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Yoshida, JA1NLX, will be active as 3D2YA from Yageta Island, Yasawa IOTA Group (OC-156) between March 15-21st, 2012. Activity will be

on 80-10 meters, mainly CW, possibly RTTY and SSB. QSL via his home callsign. He will QSL all QSOs via Bureau. The log will be uploaded to LoTW when he returns home. Direct QSL will be welcomed with SASE (1 IRC or 2 USDs). For more details and updates, see Yoshida's Blog page at: http://ja1nlx-aki.blogspot.com

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

60 METERS CHANGES. The U.S. Federal Communications Commission released a "REPORT AND ORDER" on November 18, 2011, with new 5 MHz rules for the Amateur Radio Service. The effective date is 30 days after publication in the Federal Register. Some of the FCC changes are to now allow Phone (Upper Sideband), RTTY, Data, and CW; with specific limitations on the use of these modes, as well as the maximum allowed power level is now 100 watts PEP (ERP) effective radiated power referenced to a dipole. The FCC has deleted a channel and added a channel. The new 60 meter channel list (for General, Advanced, or Amateur Extra Class license only) is as follows (Suppressed Carrier):
VFO Dial frequency

5330.5 kHz USB (center of channel 332.0)
5346.5 kHz USB (center of channel 348.0)
5357.0 kHz USB (center of channel 358.5) New!
5371.5 kHz USB (center of channel 373.0)
5403.5 kHz USB (center of channel 405.0)
PLEASE NOTE: The FCC deleted the channel 5366.5 USB (centerS68.0) and "replaced it" with channel 5357.0 kHz USB (centerS58.5).
For the complete FCC "REPORT AND ORDER" release, see:
http://www.fcc.gov/document/amateur-radio-service-5-mhz

6O, SOMALIA. Just a reminder that Darko, J28AA/E70A, will be active as 6O0DX from Somalia between November 21-30th. He usually operates on CW, SSB and RTTY, and on 80-10 meters. QSL via K2PF or E77E.

9L, SIERRA LEONE. Remember to look for operators Karl/DK2WV, Jan/DJ8NK, Andy/DL5CW, Andreas/DL9USA and Heye/DJ9RR to be active as 9L0W from Banana Island (AF-037) between November 22nd and December 4th. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. The suggested frequencies were listed in OPDX.1031. Their operations will also include participation in the CQWW DX CW Contest. QSL via DK2WV. For more details and update, visit: http://www.mdxc.org/9l0w

AH0, MARIANA ISLANDS. Members of the Saipan BBQ Contest Club will be active as AH0BT during the CQWW DX CW Contest (November 26-27th) as a Multi-2 entry. QSL via 7L1FPU, by the Bureau or direct (w/SAE and 2 USDs) to: Kuniyoshi NAKADA, PMR9292, 3-23-3, Minami-Oi, Shinagawa-ku, Tokyo, 140-0013, JAPAN.

AU2, INDIA (Special Event). Look for special event station AU2JCB to be active between November 19th and December 4th. Activity will be on 40-10 meters SSB, SSTV and PSK. Suggested frequencies are (depending on the propagation): 28550, 28470, 24950, 21350, 21280, 14220, 14310, 7135 and 7030 kHz. The operator will be Surabhi, VU2DSI. QSL direct (with 2 IRCs) to VU2DSI. Operations are to celebrate the 153rd anniversary of the birth (November 30th) of Sir Jagadeesh Chandra Bose, India's great scientist and inventor, who they consider the "Father of Wireless Communication". For more details, see the following Web page at: http://www.qsl.net/vu2msy/JCBOSE.htm

C5, THE GAMBIA. By the time you read this, the Czech-Slovak team (with 12 operators) should once again be active as C50C between November 20-28th. Activity will be on the HF bands 160-10 meters (no 30/17/12m). Their main goal is to participate in the CQWW DX CW Contests (November 26-27th) under the callsign C5A. QSL via Brani, OM2FY. There are also some changes in the contest crew. New team members Jano/OM2IB, Vitek/OK5MM and Zdenek/OK1DSZ will replace OK1DIX, OK1DO and OK1RK who couldn't take part in the CW contest for various reasons. The complete details can be found at: http://www.om0c.com

C6, BAHAMAS. Brian, ND3F, will once again be active as C6AQQ from Nassau (FL16 - Junkanoo Beach), Providence Island (NA-001) between November 24th and December 6th. Activity will be mostly on the lower bands, but he will also be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign, direct preferred or LoTW, by the Bureau (long wait).

CR3/CT9, MADEIRA ISLANDS. Operators Ulrich/DJ2YA, Walter/DJ6QT, Suad/DK6XZ, Ulf/DL5AXX, Frank/DL8WAA, Falk/DK7YY, Arunas/LY2IJ, Saulius/LY5W and Kaspars/YL1ZF will be active as CR3L during the CQWW DX CW Contest (November 26-27th) as a Multi-2 entry. QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest.

E21, THAILAND. Champ, E21EIC, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/ALL-Band/Low-Power entry. QSL via LoTW. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at: http://www.e21eic.net

E35, ERITREA (Update/Rumors). Erling, LA6VM, informs OPDX of the following E35X information being passed around: "It has come to my attention that rumors are going that I am planning an expedition to Eritrea using the call-sign E35X. These rumors have no basis in any real situation. The E35X call-sign was issued to the LA5X; Ham Forum group, headed by me, and used in June 1994 just a week after their declared independence. This was the first amateur radio activity licensed by the Eritrean authorities. A possible cause for the rumor may be that I am working on updating the QRZ.com profile for LA6VM, to include my recent A52VM activity, and to include all my previous expedition callsigns. At the same time, I have updated the profile to include responsibility for our E35X expedition, as the former QSL Manager, Ruth, LA6ZH, and her husband Thor, passed away sometime ago. As far as I am informed, the current political situation that Eritrea is in makes it unlikely that any permission for amateur radio

activity will be granted in the near future. We can only hope that this situation will be eased; firstly for the benefit of the Eritrean people. In an eased situation, I would guess that permissions for operation amateur radio in Eritrea will be granted.....
Oslo, 14th November 2011, Erling, LA6VM"

E5, NORTH COOK ISLANDS (Update). Bill, N7OU, is now active as E51MAN from Manihiki, North Cook Islands, possibly until December 6th. Activity apparently started on November 17th. Remember, activity will be on 160-10 meters, CW only, 500w to verticals, with his focus on Europe. QSL via N7OU.

E7, BOSNIA-HERZEGOVINA. Operators Chris/9A5K, Mark/9A8A, Ranko/E70R, Vlado/E70T, Fuad/E73CQ, Radomir/E74IW, Zoran/E76C, Braco/E77DX, Rob/E77E and Chea/YU1EA will be active as E7DX during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via E77E.

EL, LIBERIA. Remember to look for the VooDoo Contest Group to be active from here beginning November 21st. This is their 23rd straight year, but this time it will from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQWW DX CW Contest (November 26-27th) as a Multi-Multi category using the callsign EL2A. Outside of the contest, the following mentioned operators will use their own personal callsigns: Ned/AA7A (EL2NS), Roger/G3SXW (EL2A), Fred/G4BWP (EL2WP), Mike/KC7V (EL2MF), Lee/KY7M (EL2LF) and Bud/N7CW (EL2CW). QSL via their home callsign. Logs will be uploaded to LoTW.

F8, FRANCE. Operators Maurice/F5NQL, Maurice/F5IYU and possibly others will activate the Union Francaise des Telegraphistes (UFT) callsign F8UFT from Zone 14 (JN17RR) during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. All QSOs will be confirmed by the Bureau. Those who want direct cards, QSL via Gerard, F6ICG (QRZ.com). The final log will be upload on LoTW after submitting to the contest checker.

FY, FRENCH GUIANA. Operator Didier, FY5FY, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (??)/Low-Power entry. QSL via FY5FY.

GRID ACTIVITY (Wet). Yuri, UT1FG, will once again be traveling across the Atlantic Ocean and will be active from some "Wet grids" as UT1FG/MM between November 25th, through the end of May 2012. First trip will be from the Panama Cannal to Huelva, Spain (EA7), and then to Brunsbuttel, Germany (From there, he will inform us later). Yuri is reportedly a crew member on the ship, so activity will be during his free time. Operations are expected on all amateur radio bands, 160-2 meters, 70 cm, and also including the satellite. His activities will be mainly through the satellite, but also look for him on the HF bands. He will also be active on 6 meters, conditions permitting. QSL via his home callsign, direct (see QRZ.com), by the Bureau or to his QSL Manager UX0FY.

GU, GUERNSEY. Dick, GU4CHY, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via his

home callsign, direct (preferred) or by the Bureau (long QRX).

IOTA NEWS.............
AS-018. Operators Yuri/RA0FU, Vlad/RC0F and Igor/RU0FM will be active as RU0FM from Sakhalin Island during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via LoTW. QSOs will be promptly uploaded to LoTW.

AS-191. (Update to OPDX.1033/1034) NEW IOTA! The 7Z7AA DXpedition from Jabal Al Lith, Saudi Arabia, is now active between now and November 25th. This is a rare IOTA. Activity will be on 160/40/20/17/15/12/10 meters using CW, SSB and RTTY. Watch the IOTA frequencies. Operators mentioned are Abdul/7Z1CQ (team leader), Al/7Z1AQ, Suli/7Z1SJ, Ali/HZ1BT, Abdul/HZ1BW, Abdul/HZ1DG, Daher/HZ1DS, Hani/HZ1HN, Mohamad/HZ1MD and Nhaw/HZ1TL. QSL via 7Z1CQ. The 7Z7AA Web page is available at: http://www.dxcoffee.com/7z7aa

EU-017. Staff members of "DxCoffee" will be active as ID9DXC from the Aeolian group activating some rare or semi-rare rocks and islands valid for the I.I.A. (Italian Island Award). The activity will be spread out starting from the end of 2011 throughout the entire year of 2012. It will begin November 18th, from the Island of Panarea, Italian Island Award ME-006, World Lighthouse on the Air WLOTA LH-2210 (if weather conditions permit). A special card will be printed for each reference the team activates. QSL via Antonello Scauso, IT9YVO, direct or by the Bureau. If you want to follow the activities of ID9DXC, stay updated by visiting their Web site at: http://www.dxcoffee.com/id9dxc
Also following on Twitter at: @dxcoffee

EU-092. Jim, MM0BQI, will be active as MM0BQI/p from Tanera Mor (IOSA SC10, SCOTIA CN32), Summer Isles, between July 26-30th, 2012. Activity will include an entry in the RSGB IOTA Contest (July 28-29th) using his contest callsign GM1J. QSL both callsigns via MM0BQI, direct, by the Bureau and LoTW.

EU-108. Jim, MM0BQI, will be active as GB5TI from Lunga Island (IOSA NH17, SCOTIA DI09, WAB NH17), Treshnish Isles, Inner Hebrides, between April 27th and May 1st, 2012. Activity will be on the HF bands, on or near the usual island and IOTA frequencies. QSL via LoTW, direct or by E-mail Bureau requests.

EU-112. Jim, MM0BQI, will be active as MM0BQI/p from the Shiant Islands (IOSA OH18, SCOTIA DI32), Outer Hebrides, between July 14-22nd, 2012. Jim reports that he has confirmed with the island owners and has permission to stay for the week. Final details will be worked out over the winter. Stay tuned for more details. QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

EU-125. Rico, DO6EBB, will be active as OZ/DO6EBB from Fano Island
(DIA NS-002) between June 17-30th, 2012. Activity will be on
the HF bands, propagation permitting. QSL via his home callsign,
direct or by eQSL.

EU-189. Operators George/EA2TA, Christian/EA3NT, Simon/IZ7ATN and Col/
MM0NDX are planning to activate Rockall Rock (WLOTA 1694) as
MS0INT between June 1-3rd, 2013 (Dates could change). The
DXpedition is subject to sea and weather conditions. QSL via
M0URX. For updates, check the Web site at: http://eu189.com

OC-033. Sam, FK8DD, will be active as TX8NC from Lifou Island during
the CQWW DX CW Contest between 0000-2200z, on November 27th.
QSL via LZ1JZ.

SA-095. Just a reminder that Cezar/VE3LYC and Dino/CE3PG are expected
to activate Pupuya Island between November 20-23rd (dates may
change in case of bad weather conditions), using the callsign
CE4A. Activity will be on 40/30/20/17 meters using CW and SSB.
QSL via VE3LYC, PLEASE see the Web page for details. For
updates, watch the DXpedition's Web at: http://ce4a.yolasite.com
LAST MINUTE UPDATE FROM CEZAR (Nov. 20th): "Weather looks good,
not a lot of wind, and it is expected even better tomorrow
morning, when we will attempt landing. If everything goes well,
I hope to be on the air by no later than 18 UTC."

JD1, OGASAWARA. Yoshi, JG4IQC, will be active as JG4IQC/JD1 from Ogasawara
(AS-031) between November 23-25th. Activity will be limited to his spare
time because of work, but look for him on 20-10 meters CW. QSL via his
home callsign.

JD1, OGASAWARA. Hiroyuki "Harry", JG7PSJ, will once again be active
as JD1BMH from Chichijima Island (AS-031) between December 30th and
January 7th (2012). Activity will be on 160-10 meters using CW, SSB
and RTTY. QSL via the Bureau to JD1BMH or direct to JG7PSJ. Visit his
Web page for more details at: http://sapphire.es.tohoku.ac.jp/jd1bmh

LOTW PROCESSING IMPROVING. The ARRL Letter is reporting this week:
"Logbook of The World (LoTW) is continuing to accept and process logs.
As of November 17th, the processing delay stands at 52 hours. There
are approximately 1.38 million QSOs in 5886 logs waiting to be processed.
If you have already uploaded a log, there is no need to upload it again;
by doing so, you will only add to the queue. Do not send entire logs that
contain previously uploaded QSOs; please use the date range option when
signing logs, selecting only those QSOs in a specific date range to
upload to LoTW. Following these guidelines will allow LoTW to process
the backlog at a faster pace. The ARRL IT staff continues to investigate
an anomalous series of events that began on October 29th, initially
creating the persisting backlog. The IT staff is also working diligently
to speed up the LoTW processing time and eliminate the backlog. Thanks
again for your patience."

LX, LUXEMBOURG. A team of operators will be active as LX7I during the
CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via
LX2A. Also, visit the following Web page at: http://www.lx2a.com

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQWW DX CW
Contest (November 26-27th) as a Single-Op/Single-Band (15m) entry. QSL
via LoTW.

OFFICERS FOR 2012. Members of the North Jersey DX Association (which also
encompasses the 2nd district incoming QSL bureau) have recently elected
the following officers for 2012:
President : John Weber, WA2C
Vice-President: Peter Dougherty, W2IRT
Treasurer : Gene Ingraham, N2BIM
Secretary : Ryan Jairam, N2RJ
Visit their Web site at: http://www.njdxa.org

PETE'S-DX-NEWSDESK GOING QRT! It was announced on Thursday by Pete Rayer,
ISWL Life Vice President, and administrator of the mailing list called
"Pete's-DX-Newsdesk" (which had subscribers in 39 countries) would be
closing down (deleting) the Yahoogroup. The reason given is that Ray
has recently been rushed into the hospital and has had several tests
and surgical procedures. He is now home as of Wednesday. He is scheduled
for more surgery in December and possibly in the spring. Ray states that
he is sorry for the loss of news and has "tried to reply to all the well
wishers in due course and to those, who sent adverse comments because of
the loss of service, ...well now the whole service is closing down. If
you are one of the above, please visit <www.pgr1.co.uk> then scroll down
and see Jack's message." OPDX and its readers would like to wish Ray the
best and a speedy recovery. His source of DX input will be surely missed.

Fred, IK7JWX, reports that all the QSLs for the recent 5C2J operation (AF-068 and CNFF-007) between September 23-28th, which were received direct will be sent out this week. PLEASE NOTE: All QSOs with 5C2P on September 21-22nd, are not valid for AF-068 because operations were from the HQ of ARRAM in RABAT (CN8MC). These QSOs were uploaded to LoTW.

QSL STATUS TM5SM. Denis, F5RJM, reports that all the direct QSL card requests received as of November 15th, for the recent TM5SM activity from EU-081 have been mailed on November 16th.

QSL RECEIVED VIA LoTW: 2M0YIO, 4C1JPG, 4O3A, 5N7Q, 6V7F, 7Q7GM, 8Q7EJ, 9H3TA, 9J2RI, 9M2ZAK, 9M6XRO, 6Y5/K1XM, AA4V/VP9, BD7LMD, C6AGU, CE2/VE7SV, CN8KD, CT1DKS, CU3AC, DF5AN, DJ6YX, DK1MAX, DL3KOG, DL5ZB, E51NYV, EB1LA, ES5JR, F4FDA, F4FGC, FJ/OH2YL, FP/KV1E, G0WRE, G3NPA, G4NXG/M, GM0GAV, GM4AM, GW0ETF, HI3TEJ, HS0ZJU, IF9/IK2ANI, IZ2AMW, JA1BPA, JA1CQK, JA1WPX, JA3FYC, JA8ZO, JE4URN, JE7JDL, JH7VHZ, JJ2LPV, JN4MIV, JR1NHD, KH6MB, LA5AKA, LA6XAA, LA6YEA, LW5HR, LX1KC, LY1G, MU0GSY, OE2LCM, OK1ASG, OK1CDF, OL1C, OM3TWM, ON4AXU, ON4CD, PE1CIM, PI4DX, PJ4/W9NJY, PJ4T, PJ7NK, PJ7X, PP5/OE9APV, R7NA, RA3CQ, RG5A, S58MU, SM4EMO, SP2GUV, SP7LFT, SP9ODY, SP9YFF/P, ST0R, SV1GYG, TI9KK, TX3T, TX7M, UA2FX, UA3AP, UA3QNS, UA4CR, UA9LP, UR5FEL, UU2JQ, UU7JM, UW2ZM, UY5AA, VA3MJR, VA7XX, VE7IEF, VP2MSC, VY2RU, XE1/VE7SV, YJ0VK, YT1VP, YV5ESN, YV5MSG, ZD8F, ZF2LC, ZK2V, ZK2X, ZL6RWC, ZS2EZ, ZS2Y and ZS6EV

QSLS RECEIVED VIA MAIL: 8Q7QX, AA4V/VP9, C31MO, FK8DD, H77REX, IT9EJW/p, K0AP/5, OJ0UR, PJ5/SP6EQZ, RU3ZX, S59N, ST0R, TZ6TR, YJ0ANR and YL2AG

QSLS RECEIVED VIA THE BUREAU: 1A0KM, 3A/IK4RQJ, 5C2J, 5D0IPY, 6W/IK4ALM, 7Q7RB, A60SAB, A61AB, A61AN, D44TBE, DG4IAN, DH2KO, DJ5BV, DK9WI, DL4IAL, DL5HBD, HZ1PS, HZ1SK, JA1CLW, JA2GSD, JA3EOP, JE2PMG, JH1EEB, JI4POR, JT1NOC, OE6MDF, OK1ABP, OK1JIR, OK1MJH, OK1NZJ, T70A, UA1ARD, YI1RZ YO2MFZ and ZA0/IK7JWX

RADIO ARCALA TEAM GOING FOR CQWW CW BOOTS ON! A press release from Jarmo, OH2BN, dated November 17th, states (edited): "For the past several years, the discussion about operating 48 hours nonstop has prompted many initiatives of doing so. Radio Arcala's team doctor, Ville, OH2MM, has specialized in food consumption prior to and during the contest. Several lectures were given on this vital aspect of contesting.
As CQWW SSB worked out fine with a new claimed overall SOAB European record (CR2X by OH2UA), approaching 10,000 QSOs, and a Finnish record (OH8X by OH6KZP), it was discovered that several team members struggled to stay afloat for the entire 48 hours. Some came close to a knockout.

CQWW CW will now be used semi-scientifically to record those ups and downs and to seek ways of hanging on and avoiding a meltdown.

OH8X, Northern Finland - Radio Arcala, OH8X, has invited Toivo, ES2RR, a 2010 WRTC medallist, to drive their contest machine for 48 hours nonstop, seriously, boots on.

CR2X, Azores - Toni, OH2UA, is due for some unexpected undertakings at CR2X, but also determined to balance the effort needed to stay in the ring for 48 hours.

OH0X, Aland Islands - Radio Arcala's new associated station, OH0X, will be operated by Pekka, OH2TA, and he is ready to do 48 hours for the first time, with some reservations and doubts.

TC2X, Asiatic Turkey - Another new associated station, TC2X manned by Pertti, OH2PM, will try to offer Turkey (Asiatic) with maximum efficiency, with a modest setup but now with boots on, in a 48-hour effort.

OH2BH, Southern Finland - Will be piloted by Pasi, OH2IW, who has been sleeping for the past weeks so as not to need any nap time when the race starts. Can one sleep in advance? Maybe to some extent, with no boots.

9H9BH, Republic of Malta - For his 50th straight year in CQWW, Martti, OH2BH, will be watching the bedlam poolside, maybe not boots on, but dipping his toe in deep water to provide a semi-rare multi.

Why boots on? There's an old Finnish wisdom which holds that going to sleep boots on may cause headache and mental disorder in the morning. More Finnish wisdoms after CQWW CW. Until then, good luck in contacting Radio Arcala's boots-on team.
--
73 Jarmo OH2BN"

ST, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power/ Unassisted entry. QSL via S53R.

SU, EGYPT (Update). Gab, HA3JB, will once again be active as SU/HA3JB from Cairo between November 20-29th; his renewed license is valid until November 30th. Activity will be on on CW, SSB, RTTY, PSK31 and SSTV. He will also be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/ Single-Band (??) entry. QSOs are valid for the HA-IPARC Award. QSL via HA3JB, direct (w/SAE) to: Gabor Kutasi / H-8601 Si�fok, P.O.Box 243, Hungary. If you are IPA member please write/add your E-mail address.

SX100, GREECE (Special Event). Members of the Radio Amateur Association of Greece (RAAG) will activate the special event callsign "SX100A" between 0000z Friday, December 2nd and 2400z Sunday, December 4th. Activity is to celebrate the 100th anniversary in which the historic battleship the "Georgios Averof" joined the "Hellenic Navy". The operation will take

place from the radio room of the "Georgios Averof". QSL via the Bureau.
For more information, see: http://www.qrz.com/db/SX100A

T32, EASTERN KIRIBATI. Six operators from the U.S. and Canada will be active from Kiritimati Island (OC-024) between January 17th and February 2nd. The group will be active from the same location that the recent T32C group operated from. The group is planning to operate during the CQWW 160m CW Contest (January 27-29th) as a Multi-Op entry and use the callsign T32XX. QSL via KB8TXZ. Outside of the contest, the operators will be active on 160-6 meters using CW, SSB, RTTY and PSK, using the following callsigns:
T32AU - Operator Dave/VO1AU; QSL via VO1MX
T32CO - Operator Brian/KG8CO; QSL via KB8TXZ
T32LJ - Operator Lee/N8LJ; QSL via K8ESQ
T32TR - Operator Ted/K8AQM; QSL via KB8TXZ
T32TX - Operator Jim/KB8TXZ; QSL via KB8TXZ
T32WW - Operator Stan/AC8W; QSL via KB8TXZ
Look for the callsigns T32WW and T32CO to be operating on both RTTY and PSK.

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. Activity will be on 40/20/15/10 meters only using 100 watts into a OCF dipole at 30 feet. QSL via K8GY.

TC3, TURKEY. Members of the "LZ Contest Group" will activate Asiatic Turkey during the CQWW DX CW Contest (November 26-27th) as TC3A and as a Multi-2 entry. Operators mentioned are Nikolay/LZ1NK, Krasi/LZ2UW, Christo/LZ3FN, Aleko/LZ3ZZ, Bedri/LZ4RR and Vesselin/LZ5VK. Activity outside of the contest will be on the HF bands, 160-10 meters, using CW and SSB. QSL TC3A via LZ1NK. For skeds before the contest, contact: lz1nk@yahoo.com

TL, CENTRAL AFRICA. Elvira, IV3FSG, will be active as TL8ES from M'Baiki very soon. Activity will be on SSB, RTTY and PSK. QSL via IK3GES.

TX5, CLIPPERTON ISLAND. Another DXpedition to Clipperton Island is planned by the Cordell Expeditions for March next year. The Cordell Expedition are known for the following DXpeditions: 3Y0PI, XR0Y/Z, VK0IR, XR0X, K7C, etc... The current list of radio operators are Bob/KK6EK (Co-organizer), John/N7CQQ (Co-organizer), Alan/AD6E, Peter/W6OP and Dean/N7XG. The operators will be part of the "Clipperton Project" which has invited a group of 20 artists and scientists from 9 different countries. Activity is expected to take place between March 10-15th, 2012. They will use the callsign TX5Q. The team will also deploy and use the innovative satellite-internet system ("DXA" Ver. 2) for real-time display of the expedition activities. In addition to the radio operations, the team will carry out a variety of other activities in support of the ecosystem and public awareness of Clipperton. The entire "Clipperton Project" is described at:
http://www.theclippertonproject.com
Details about the TX5Q DXpedition are available at:
http://www.cordell.org/CI

The team is currently looking for a doctor. QSL will be via N7CQQ. Look for more details to be forthcoming.

VP9, BERMUDA. Alan, N3AD, will be active as VP9/N3AD from Bermuda (NA-005) between November 22-28th. Activity will include the CQWW DX CW Contest (November 26-27th) as a Single-Op/Low-Power entry. QSL via W3HNK.

VQ9, CHAGOS ISLANDS. Jim, ND9M/VQ9JC, informs OPDX that he is back on Diego Garcia (AF-006) after 10 months off the island and is expected to be active at least until March 1st, 2012. He states, "The local licensing office renewed my regular license for two years and was also kind enough to issue me another short-term special prefix callsign (VQ91JC [numerals nine one]) to use between November 19th and December 4th. In fact, the signed licenses were handed to me less than 90 minutes after I made my request! I'll be on during the upcoming CQWW DX CW Contest as VQ91JC as an All-Band/Low-Power entry." It seems that Jim is the only operator on the island at this time. He mentions, "Larry, VQ9LA, and I left the island within 48 hours of each other in January. Unfortunately, Larry is not returning, and the only other regular operator, VQ9ZZ, has also left for good." While Jim was away from the island, the club station on the island has developed some major issues. He states, "Visitors over the last few months disconnected a number of coax and other cables without labeling them first, so I'm doing a lot of cable tracing (and labeling!). Much of the cabling work that VQ9LA did over the years has been removed for no apparent reason. The finals in both amps (Alpha 99 and AL80B) have failed, so I'll be running barefoot for the foreseeable future. The amps are owned by the Navy, but the Navy hasn't provided any equipment repair support for several years, and I'll have to buy the replacement finals out of pocket, but that won't happen for several months. Also, the log periodic (10-30 MHz) works well, but the rotator binds around 20 degrees when turning clockwise (from north towards east). There is an apparent issue with strain on the coax caused by turning the rotator and maybe even the connection at the top of the 30-meter tower; the SWR skyrockets when the rotator is turned beyond 20 degrees as it moves to the east. Fortunately, the problem corrects itself when returning the antenna to the north or further west which makes me think the cable may have become jammed beneath the rotator. For now, the antenna will be left facing northwest rather than risk causing permanent damage until I can get up there. This heading favors the path to Europe and the Americas, but obviously hurts the paths to JA and VK/ZL to the east as well as Long Path to NA to the south, but it can't be helped at this point. The single remaining HF rig is an IC-760 which has a lot of years and miles on it, but its performance is still adequate. (There's an FT-920 that is barely good enough for QRP on a couple bands.) I brought an FT-857 from home which I'm using to work the LEO satellites. It will also serve as a back up for HF should the IC-760 come into hard times. I'll be putting up a 5-element 6m beam. That antenna won't be on the tower, but should still be high enough to take advantage of the openings that have finally started appearing. I'll use the FT-857 for working 6m as well as the satellites. My usual QRV hours are 1200-1630z on most days. Finally, there is no air conditioning in the shack, so I leave both the front and back doors open to get a little natural air flow. The geckos that live in the shack love

it because they don't have to go hunting for bugs any more; the bugs come to them!"

XW, LAOS. Alex, RK3DT, is once again active as XW3DT from Laos. His license is only good for three bands - 40/30/20 meters. He has been on CW and SSB. Alex mentioned that his license cost him 6,000 USDs. When OPDX asked Alex how long he will be there, he stated, "I will stay until beer money dries out..." He suggests to send a QSL card to the following address before December 3rd, 2011: Alex Sinchukov, P.O. BOX 11, Lamma Island, Hong Kong.

XY, MYANMAR (Possible PSK Activity). In a E-mail (received on November 18th) from Simon, HS0ZIB/G6JFY, he informs OPDX that his QTH in Thailand is only a few hours drive to Myanmar, and he has regularly visited the country. His hotel/guesthouse businesses have enabled him to obtain initial contact with the Myanmar Ministry of Tourism and via that route, he has been in discussions with authorities from the Myanmar Ministry of Post & Telecommunications and the Ministry of Tourism, for almost a year about an initial, "demonstration" DXpedition. Simon mentions, "The recent political changes in Myanmar have increased the possibility of operating an amateur radio station from Myanmar. My own position enables me to operate on a regular basis, if this were allowed."
He adds, "No 'high profile' expedition will currently be considered by the authorities, (meaning no large teams, no high power, no large antennas..etc). The use of simple equipment is a major reason why PSK or other digital modes was proposed by me. PSK31, although a little slow for handling multiple QSOs, does have the advantage of allowing split operation by using the panoramic display of the application software. So although I will be using simple equipment, I will be able to 'watch' say a 1 kHz window above my operating frequency."
Simon states, "I am waiting on the return of the Minister from a trip to Indonesia before I learn whether or not my proposals have been accepted. In any case, even if they are declined, I and my contacts in Myanmar are fairly confident that I will obtain permission in the near future. Once my trip is definitely going ahead, I will set up a dedicated web-site with news of my expedition. Donations to assist me will be invited, but due to my close proximity to Myanmar and the use of existing equipments, the total cost for this expedition is not too high. I appreciate your patience and hope that this will be the first of regular DXpeditions to Myanmar." Stay tuned for updates.

ZK2, NIUE. Chris, GM3WOJ, who has been active as ZK2V, now reports that he has received special permission to operate on the 60m band. The permit is good to transmit on 5403.5 kHz between December 1-7th (Niue local time, which equates to 1100z, December 1st, until 1100z on December 8th). He states, "I am intending to install a more 'DX' antenna than the Inverted-Vee I had in 2009, so hoping for some further DX." He also mentions, "3.5 MHz and 7 MHz are very noisy here on the island, so I am hoping that QRN will not be a problem." Chris will be active as ZK2V until December 20th. The QSL Manager for ZK2V and ZK2X is N3SL. All ZK2V and ZK2X QSOs will be uploaded to the ARRL's LoTW - daily if possible.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

:Product: Weekly Highlights and Forecasts
:Issued: 2011 Nov 22 1901 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
14 - 20 November 2011

Solar activity has been at low to moderate levels. On November 14
solar activity was at low levels with a C5/Sf flare observed at
14/0930 UTC from Region 1348 (N20, L=088, class/area Dso/120 on 15
November) with an associated Type II radio sweep (estimated shock
velocity 610 km/s). Activity increased to moderate levels on
November 15 with three M-class flares. Region 1348 produced an M1/Sf
flare at 15/0912 UTC and an M1/1f flare at 15/2235 UTC, and Region
1346 (S18, L=339, class/area Dso/140 on 16 November) produced an
M1/Sf flare at 15/1243 UTC. From November 16-20, activity returned
to low levels with several Type II radio sweeps being reported. The
first of these (estimated velocity of 529 km/s) was possibly
associated with a C7 flare at 16/1505 UTC from Region 1348. Two Type
II radio sweeps occurred on November 17, one (estimated velocity of
456 km/s) associated with a C2 flare at 0133 UTC from Region 1346
and the other (estimated velocity of 558 km/s) associated with a
C6/Sf at 0727 UTC from Region 1346. The last Type II radio sweep of
the summary period (estimated velocity of 542 km/s) was associated
with a C1 flare at 19/0127 UTC from Region 1341 (N18, L=055,
class/area Dso/210 on 09 November). Several coronal mass ejections
(CMEs) were observed during the period but none were earthward
directed.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels the entire period.

The geomagnetic field was quiet to unsettled. The period began with
quiet conditions. Activity levels increased to quiet to unsettled
for a brief time on 15 November, but soon returned to quiet levels
and remained there for the remainder of the period.

Forecast of Solar and Geomagnetic Activity
23 November - 19 December 2011
```

Solar activity is expected to be at predominately low levels through the period. There is a slight chance, however, for isolated M-class activity.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels the entire period.

The geomagnetic field is expected to be generally quiet for most of the outlook period, with the exception of 28 - 29 November when quiet to unsettled levels are expected due to a small, recurrent coronal hole high speed stream.

1117. [DXNL] DXNL 1755 (Nov 23, 2011)

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-22 23:04:00 UTC
From: Robert Busch - DL7VOA <dl7voa@gmx.de>

DXNL 1755 - Nov 23, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5X, UGANDA
Nick,G3RWF, will be active again as 5X1NH for three weeks starting on
Nov 23. He will focus on the lowbands using also a power amplifier.
QSL via homecall, LoTW.

5Z, KENYA
Sigi,DL7DF, and his XYL are on holiday again and Sigi shows up as 5Z4HW
from Nov 23 until Dec 6. He will work in CW, SSB, RTTY, PSK31 and SSTV
on 160m-10m from Diani Beach at the coastline of Kenya near Mombasa.
QSL via homecall. See also: http://www.dl7df.com/5z

6W, SENEGAL
Jeff,N1SNB, is working as 6V7V from Nov 23-29. He will join the
CQ WWDX CW Contest. QSL via homecall.

C5, GAMBIA
Members of the OM0C Contest team are QRV as C50C again from Nov 20-29.
They will join the WWDX CW Contest as C5A in the M/M category.
QSLs via OM2FY. See also: http://www.om0c.com

C6, BAHAMAS, NA-001
C6AQQ is the callsign of Brian,ND3F, from Nov 24 until Dec 6. He will
work from Nassau (NA-001) especially on the lowbands and in the WWDX.
QSL via homecall, direct preferred, LoTW.
QSLs via bureau have to expect long delays.

E3, ERITREA
According to Erling,LA6VM, another DXpedition after E35X was never
planned. This comes out of the rumor mill.

E5, NORTH COOK, OC-014
Bill,N7OU, is working as E51MAN from the Manihiki atoll (OC-014),
which belongs to North Cook, until Dec 6. QSL via homecall.

EY, TAJIKISTAN
Steve,K6AW, will be QRV as EY8ZE from Dushanbe from Nov 24-28. He will take part in the WWDX CW Contest signing EY3M as SOSB from CQ Zone 17. QSLs via W5UE.

FM, MARTINIQUE, NA-107
Albert,F5VHJ, will be QRV as TO5A from Nov 29-30. QSL via F5VHJ, LoTW.

GM, SCOTLAND, EU-005
Members of the Stirling and District Amateur Radio Society (SDARS) will be on the air as GB0SA from the Wallace Monument in Stirling city on Nov 26/27 to celebrate St. Andrews Day on Nov 30.
QSL via bureau or direct to GM4UYE. See also: http://www.gm6nx.com
---
Paul Godley,2ZE, visit to Ardrossan/Scotland in December 1921 resulted in the first transatlantic shortwave amateur radio QSO with the station 1BCG in Greenwich/Conneticut on Dec 11, 1921. In the further course 43 other North American stations were contacted as well.
The Crocodile Rock Amateur Group (CRAG) will activate the special call GB2PG to commemorate the 90th anniversary of this transmission from Nov 18 until Dec 15. QSL via GM0DEQ.
Web: http://www.gb2pg.blogspot.com

J6, ST LUCIA, NA-108
Mike,J6/W0MU, Jim,J6/N1NK, and Jonathan,J6/G0DVJ, are working from the Chateau Devaux, Cape Estate at the northern end of Saint Lucia (NA-108, WLOTA 1336, Loc. FK94mc) vom Nov 21 until Dec 1. They are working in CW, SSB and digital modes on 160m-6m. They will sign J6M (QSL via N1NK, LoTW and OQRS) in the upcoming CQ WWDX CW Contest. Derek,J6/VE3CZF, will join the team for the contest. Their equipment includes two K3, KPA 500, SteppIR 2ele yagi with 30/40m, 5 band Hexbeam, 31 ft vertical, microHAM Keyer for RTTY, PSK etc., multiband dipole and band filters. QSLs via homecall, LoTW. See also: http://www.w0mu.com/DX

J7, DOMINICA, NA-101
Volker,DL8WEM, plans to show up again as J79WE from Salisbury on Dominica (NA-101) from Nov 23 until Dec 8. He uses a K3 with 100 watts and a multiband Kelemen dipole for 40m-10m mainly in CW, including the CQ WWDX CW Contest. QSL via homecall.

JD1, OGASAWARA, AS-031
Yoshi,JG4IQC/JD1, is working in CW on 20m-10m from Chichi-jima (AS-031, WLOTA 2269, JCG 10007) from Nov 23-25. This is a business trip so his radio activities are limited to his spare time. QSL via homecall.

KH6, HAWAII, OC-019
Dave,KH6/WJ2O, plans to activate Hawaii (IOTA OC-019, USi HI025S, WLOTA 0065, Loc BK29cc) from Nov 23-30. He will join the WWDX Contest as well and wants to focus on 30m/17m/12m outside of the contest.
QSL via homecall. See also: http://www.wj2o.com

KH0, MARIANA ISLANDS, OC-086
Kazuo,JH8PHT, will be QRV as AH0KT from Saipan (OC-086) from Nov 24-28.

QSL via homecall.

PJ2, CURACAO, SA-099
Joeke,PJ2/PA0VDV, will be QRV in CW on 80m-10m from Curacao (SA-099 between Nov 24 and Dec 13. He will NOT work in the CQWWDX CW Contest, but works on 30m, 17m and 12m instead. QSL via homecall.

PJ7, SINT MAARTEN, NA-105
Masa,K1GI, plans to show up as PJ7I from Sint Maarten (NA-105) from Nov 24-28. He will work on 80m-10m with a FT-450, 500 W amp, a Hexbeam and a lambda/4 vertical for 80m/40m. QSL via JG2BRI.
Internet: http://www.qsl.net/pj7i and http://pj7i.blog.fc2.com

TL, CENTRAL AFRICAN REPUBLIC
Elvira,IV3FSG, plans to become active as TL8ES in SSB/RTTY/PSK on HF from M'Baiki within the next days. The length of the stay is not known. QSL via IK3GES.

TN, REPUBLIC OF CONGO
TN9SN is the new callsign of Nicolas Sinieokoff, ex-TN5SN. He wants to renew it for the next year because he will stay in Brazzaville until 2012. QSL via IZ1BZV, direct or LoTW. See: http://www.tn5sn.0fees.net

UT, UKRAINE
A new football stadium opens in Lviv for the upcoming Euro 2012. The special event station EO12WFS is working until Nov 30. QSL via UR5WA.

V2, ANTIGUA, NA-100
Bud,AA3B, will be QRV as V26K from Antigua (NA-100) only in CW from Nov 24-28. He will join the CQWW DX CW Contest in the SOAB LP category. QSL via AA3B.

VP2E, ANGUILLA, NA-022
Pete,VE3IKV/VA3RA, plans to be active as VP2EAT from Anguilla (NA-022, WLOTA 1474, Loc. FK88) between Nov 25 and Dec 3. He will join the WWDX as single op on 40m-10m and will promised to focus on 17m/12m/10m/6m after the contest. QSL via VE3IKV.

VP2V, BRITISH VIRGIN ISLANDS, NA-023
Art,VP2V/N3DXX, is working from Virgin Gorda/Tortola (NA-023) from Nov 23-30. He is focussing on 160m and the CQWW DX CW Contest (SOAB). QSL via AA7V.

VP9, BERMUDA ISLANDS, NA-005
Alan,VP9/N3AD, hits the airwaves from Bermuda (NA-005) from Nov 22-28. He will join the CQWW DX CW Contest as SOLP. QSL via W3HNK.

VQ9, CHAGOS ARCHIPELAGO, AF-006
Jim,ND9M, is back on Diego Garcia/Chagos Islands (AF-006) and expects to stay there until Mar 1, 2012. The licensing auhtority renewed his regular license (VQ9JC) for two years and issued another one on short notice with the special callsign VQ91JC (valid Nov 19-Dec 4). He plans to take part in the upcoming CQ WWDX CW Contest (SOAB). Jim is usually

working from 1200-1630 UTC. QSLs via homecall.

XW, LAOS
Alex,RK3DT, has been spotted again signing XW3DT in CW/SSB from Laos.
His license is valid for 40m/30m/20m. Please e-mail him for other bands
to xw3dt@yahoo.com. His license costs 6.000 US$ and he wants to stay
there "until he has no more money for beer..." QSLs should be send
to following address before Dec 3:
Alex Sinchukov, PO Box 11, Lamma Island, Hong Kong

XZ, MYANMAR
After one year of discrete discussions with senior officials within the
Myanmar Ministry of Post&Telecommunications and the Ministry of Tourism
Simon,HS0ZIB, has received an invitation to visit Myanmar and to make a
PSK31 'micro' DXpedition for about 4 days from the historic city of
Bagan. The initial operation is on 20m only, running about 50 watts
into a PAR wire antenna. Simon hopes that this will be the first of
many micro DXpeditions to Myanmar. More details are not known.

YN, NICARAGUA
Mike,AJ9C, plans to show up as YN2CC from Granada in CW, SSB and RTTY
on 160m-10m from Nov 24 until Dec 5. His plans include also the
CQ WWDX CW Contest and the ARRL 160m CW Contest (Dec 2-4).
QSL via homecall (direct), LoTW.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 26/27: CQ WWDX Contest, CW
Dec 2-4: ARRL 160m Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AN-016, several, Antarctica: Massimo,IW0HEU, stays at the "Mario Zucchelli
Station" on Terra Nova Bay (WAP ITA-01, AA I-01, WFF IFF 025) until
February 2012. He prefers to work only in SSB on 20m and 40m as II0MZ.
QSL via IW0EFA (bureau/direct).

EU-017, Ix9, Eolie Islands: ID9DXC is a special callsign of the "DXCoffee".
This call will be used during special activities for the Italian Island
Award (IIA) from rare islands in the IOTA group EU-017 between Nov 2011
and the end of 2012. A special QSL is available via IT9YVO.
For more information check the website: http://www.dxcoffee.com/id9dxc

NA-078, XE2, Baja California Sur State South West Group: Manuel,XE2HUQ, will
be QRV as XF1M from Santa Margarita Island (WLOTA 1634) from Nov 28 and
Dec 2. He will work in SSB and CW on 80m/40m/20m/17m/15m/12m/10m.

QSL direct via XE2HUQ.

WFF activities:
PJ5/DL7VOG PAFF-025 Nov 15-Dec 6
DG6PY/p DLFF-111 Nov 30-Dec 2

Lighthouse activities

AH0KT LH 1333 Nov 24-Nov 28
PJ2/PA0VDV LH 0942 Nov 24-Dec 13
PJ7I LH 0711 Nov 24-Nov 28
VP2ERA LH 1474 Nov 25-Dec 3

The ARRL Contest Update

Published by the American Radio Relay League
****

November 23, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- A Dying Mode? Take a Listen to CQ WW CW
- Top Band Tumult - ARRL 160 Meter Contest
- CQ WW Logs Set New Record
- Take a Drink From the JUG
- How-To - A Beverage Transformer
- Busy Week at the ARRL
- Pole Guying Utiility Know-How
- Dig Some MUD!
- Put Your Pencils Down

NEW HF OPERATORS - THINGS TO DO

If you like CW and DX, shake off that trailing turkey torpor and join the throngs on ham radio's own "Black Friday" known as the CQ World Wide CW <http://www.cqww.com/> contest - a 48-hour cacophonous code carnival. The very next weekend brings an opportunity to whittle down your Top Band WAS list - the ARRL 160 Meter Contest <http://www.arrl.org/160-meter>.

BULLETINS

Get your logging software ready to go - update your program and supporting files now and not an hour before the contest starts! Jim AD1C reports that the Country (CTY) files <http://www.country-files.com/cty> were updated on 21 November 2011. Bob WA1Z has updated the Super Check Partial database files <http://www.supercheckpartial.com/>, as well.

BUSTED QSOS

Nothing horrendously inaccurate was reported to have leaked out in the last issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Nov 26-27

- SKCC Straight Key Sprint--(Nov 23)
- CQ World Wide CW Contest
- SARL Digital Contest

Dec 3-4

- ARRL 160 Meter Contest--CW
- Top Band Sprint--(Dec 2)
- SNS and NS Weekly Sprints--CW (Dec 2)
- TARA RTTY M�l�e
- Top Operators Activity Contest--CW
- AWA Bruce Kelly QSO Party--CW
- 10 Meter RTTY Contest
- ARS Spartan Sprint--CW (Dec 6)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

John K1AR reports that at least 7025 logs were received for the CQ WW SSB contest as the deadline passed - an increase of more than 1000 - nearly 15% - over the previous all-time total! The combination of new ham populations around the world, great high-band propagation, and the ease of submitting a Cabrillo-formatted log are resulting in big increases in scores and log submissions!

As we approach the end of 2011, a look back at Contest Corral <http://www.arrl.org/contest-calendar> for the year finds 418 contests listed - not including contests that run more than once a month, such as the NS Sprints. Of the 418, there were 310 HF-only contests and 37 contests that only used the VHF+ bands. Most contests (72%) included CW - not bad for a mode now more than 170 years old! 47% featured phone operation and keeping with the trend of participation, 37% now have a digital component of the competition.

One of the additional digital contests is the new 10 Meter RTTY Contest <http://www.rttycontesting.com/the10meterrttycontest.html> sponsored by Ed W0YK and Don AA5AU. After taking a survey of RTTY contesters, it was decided to create a new low-power 10 meter contest - just in time for the great conditions of late. "By having this new contest occur the weekend before the ARRL 10-Meter Contest, it should give those who plan to operate the ARRL contest a chance to shake their stations down on 10 meters in a real contest beforehand and give die-hard RTTY contesters their own 10 meter contest. As an added incentive, Ed (owner of Muns Vineyard) is awarding a bottle of his excellent wine to the top ten single operators." Plaque sponsorships are also available for this brand-new contest as described on the website.

With solar flux in abundance, Dan W7WA decided to find out what the all-time record is. "I recall from W3ASK's propagation column in CQ magazine it was sometime during cycle 19 and over 300. I did some

Google searching and found some charts <http://www.solen.info/solar/history/hist1957.html>. Apparently the historical record for 10.7 cm solar flux measurements extends only back to 1947 (source: Wikipedia). Besides solar flux noteworthy for 1957 was that at times the planetary A index went up over 160. There were extended periods of elevated planetary A index lasting up to a week. So with 6 meter F2 openings there were probably extended periods of HF blackout/disturbed conditions. September 1957 looks to have been especially fraught with HF blackouts. During 1957 the solar flux ranged from 170 on May 18 to nearly 380 on December 23rd. Between December 12 and 23rd the flux jumped from 210 to nearly 380." We've got a ways to go to top that!

Stew Perry plaque manager, Lew W7EW, writes that, "The plaque program for The Stew Perry TopBand Extravaganza <http://jzap.com/k7rat/stew.html> is unique in that The Boring Amateur Radio Club does not decide what performances should be rewarded with wood. The radio combatants do that by sponsoring categories that they individually feel are important. These stalwarts choose the accomplishment that they want rewarded...and then the fight is on for that category." So far, the following plaques are sponsored:

Sponsor - Category
KL7RA - "Top Number of QSOs"
North Pole Contest Club - "Being Cogitated"
TF4M - "Longest DX" (2 stations, each get 1 plaque)
W0UCE - "Top Score USA/SOLP/single wire for Tx & Rx"
KR2Q - "Golden Log" (Top # of QSOs w/o a bust)
VK6VZ - "Top Score N. Hemisphere station working S. Hemisphere stations"

The winner of that last plaque gets an official Flying Doctors of VK Baseball hat instead of a plaque. If your Stew is in need of a warmup, try the QRP ARCI's Top Band Sprint <http://www.qrparci.org/> the evening of 1 December before the ARRL 160 Meter Contest.

How good are conditions? Here's a list that will give you an idea - the first six positions of the SSB Sweepstakes Single-Op, High Power top ten (N9RV, VY2ZM, KH7X, W7WA, KL7RA, and K7RL - as of Nov 22nd) include five stations located north of latitude 45N and a sixth that is nearly 2400 miles from the US West Coast! Amazing to see stations previously hobbled by propagation surging to the fore.

Amateur Radio assistance is requested for the Plasma Thrust Shadow Experiment to be conducted on the International Space Station. The Central Research Institute of Machine Building (TSNIIMASH) in Russia is conducting a series of space plasma experiments in order to evaluate the shape of previously observed "dead" zones, or shadow-ing due to the firing of an onboard arcjet plasma source. Integration of electric thrust (ET) onboard a spacecraft poses a certain set of problems including electromagnetic compatibility. One matter of interest is that highly ionized exhaust plumes of ET may scatter RF signals producing a

large "dead" zone for communications. See this ARRL Web story
<http://www.arrl.org/news/hams-invited-to-participate-in-a-research-project-on-the-iss>
for complete details.

Membership awards are often awarded towards the end of the year, such
as Sigurd KJ1K who recently received the Packrats
<http://www.packratvhf.com>Rover Recognition Award. Sigurd operates a
rover equipped from 50 MHz through 5 GHz, generating a lot of points in
VHF+ contests for club members. Doesn't your club have deserving
individuals who would appreciate recognition for their efforts?

Doug KR2Q posts some information to help explain the CQ WW log
format extension of XQSO: at the beginning of each logged contact
instead of the usual QSO: It indicates a QSO that you made but do not
wish to be included as a claimed QSO. First, he notes that the correct
way to find out the answer to a question about CQWW is to send an email
to questions@cqww.com and not post it in a public forum. XQSO can be
used to designate QSOs that don't comply with the restrictions of your
category - for example, a contact made with high power although your
log is submitted in a low power category, contacts made (accidentally,
of course) outside your authorized frequency limits, or contacts of
which you are unsure. By using XQSO and leaving the QSO in the log, you
don't have to worry about creating penalties "on the other end." XQSO
should appear very, very rarely - it is for accidents, not post-contest
manipulation of the log. (See the Conversation section of this
newsletter for more on that subject.) Contact the CQ WW committee for
specific and official responses to questions.

Ham radio made a great impression during the recent severe storms in
Alaska as reported in this Alaska Dispatch article
<http://www.alaskadispatch.com/article/howling-storm-battered-alaska-ham-operators-provide
d-vital-link?page=full>.
(Thanks, William W3QX)

While there is no contest activity on 60 meters, you can read this ARRL
Web story
<http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters> about
the FCC's recent update of the rules for operating on that band. Once
again, CW is allowed on all amateur allocations!

Web Site of the Week - Fans of the Northern California Contest Club
newsletter, "The JUG <http://nccc.cc/newsletter.html>" will be pleased
to know that the new editors, Ian W6TCP and Stu K6TU are building on
the work of former editor, Rob K6RB. They are busily turning the
newsletter into a resource for contesters everywhere, not just in the
NCCC region. You can see all the editions online!

WORD TO THE WISE

Assuming - don't do it! Even though your logging program thinks it
knows an exchange, don't just blindly accept that data. Many stations
may have a new QTH or the program could be wrong in guessing where the

station is located. In CQ WW, that can cost you QSO points at the least and a multiplier at worst. Listen to what the station sends and log it!

==> SIGHTS AND SOUNDS

Kirk K4RO found this nice video <http://www.youtube.com/watch?feature=player_detailpage&v=JrWBUdtkKsg> about building Beverage antenna transformers. I especially like the "mount on lid, not box" idea.

Members of the Radio Amateur Society of Thailand (RAST) have been throwing themselves into relief efforts in response to the heavy flooding in Bangkok and other areas of Thailand. You know Champ E21EIC/KY1A as a contester but as the photo elsewhere in this issue shows, he is busy helping out with disaster communications, too. He has posted more photos and information online <http://bit.ly/uvvhqR>.

==> RESULTS AND RECORDS

The ARRL Contest Branch has been busy as reported by its manager, Sean KX9X. "2010 10 Meter certificates went out the door Friday. 2011 RTTY Roundup plaques and certificates are being worked on as we speak. Look for those to go out by the first week in December. You can follow ARRL contest awards processing status online <http://www.arrl.org/plaques-and-certificates>, too. 2011 August UHF expanded results should be online by Monday, November 28. In the meantime, 1353 logs were received for 2011 SS CW before the deadline and 973 logs have been received so far for last weekend's SS Phone. Over 600 logs were submitted by 8 AM EST Monday morning, further validating the idea that the contest ends when the last QSO is made. Submit your log when the contest is over! The ARRL remains committed to having initial Sweepstakes results out in 60 days. All paper logs received for Sweepstakes are once again being converted to Cabrillo by a small group of dedicated data entry volunteers. We are not responsible for errors in conversion due to illegible handwritten logs. Contest clubs are continually encouraged to help their club members submit their logs electronically. Don't forget that the second CW Rookie Roundup <http://www.arrl.org/rookie-roundup> is December 18 from 1800-2400 UTC. Get your club active and open your shacks to the newly-licensed and help them work and enjoy CW!"

The results of the UBA CW Contest 2011 <http://www.uba.be/> have been published - go to the HF "TOP BAR" and the Contest Results "LEFT BAR". All participants will receive their UBN file in the coming week. (Thanks, Marc ON7SS - OO9O)

Results for the QRP ARCI's <http://qrparci.org/> Fall QSO Party Results are now online. The full result view brings up a rather large spreadsheet of information. (Thanks, Jim K9JWV)

Getscores <http://www.getscores.org/live> developer Gerry W1VE "...now has a beta page up which displays all scores sent to the site. (Meaning no configuration to see any particular contest.) The Grid refreshes in

place, so no need to refresh the page. The grid allows you to group by any column, as well as Filter by any column. Want to see CQ-WW-CW results for SOLP Europe? No problem. How about all scores from only your contest club? Simple. The Grid is drag and drop... and very configurable."(Thanks, Gerry W1VE)

OPERATING TIP

To avoid a big metabolic shutdown during the contest - eat lightly and often so your stomach doesn't commandeer all that blood oxygen, shutting down your contest computer (the brain).

==> TECHNICAL TOPICS AND INFORMATION

Sometimes finding the right person to answer questions at the local power company is more difficult than the 80th section near the end of Sweepstakes! In the meantime, complete documentation and all sorts of valuable guying information and soil information can be found at the AB Chance civil construction <http://www.abchance.com/> web pages. (Thanks, Tom N4NW)

Bill KB8WUP provides some handy design data from the telecom/utility industry. A 10-foot clearance (minimum) over finished grade is required where vehicular traffic is not expected. Over roadways, a minimum 17-foot clearance applies. He reminds us that the clearance should be at the lowestpoint in the sag of the cable or wires, including a little extra height margin to deal with ice loading and the resulting additional sag.

How high off the ground does a feed point need to be to be considered elevated enough to use tuned radials on 160? Your editor suggests 1.1 Antler or 1.1 UPS trucks high - whichever is greater. I don't thinkanybody has to ask how I might have learned this.

Here's a new way
<http://www.clickgreen.org.uk/research/data/122768-scientists-flushed-with-success-after-sprinkle-power-breakthrough.html>
to enter QRP categories from Lynn N7CFO. Nuff said.

Julius N2WN humorously suggests that the recent invention of metal structures nearly as light as air
<http://io9.com/5859728/breakthrough-this-ultralight-metal-is-made-mostly-of-air>
could result in 160 meter Yagis liftable by one or two people!

What makes the most effect Beverage termination? According to Frank W3LPL, researchers found that that the most stable all weather Beverage termination (especially in very dry weather) is a ground mat. The least expensive ground mat is chicken wire installed at the end of the Beverage. The mats used by the researchers is about 6 feet wide and roughly ¼-wavelength long at the lowest frequency of interest.

Technical Web Site of the Week - Proceedings from the 2011 Microwave Update are now available as a low-cost print-on-demand book from Lulu

<http://www.lulu.com/browse/search.php?fListingClass=0&fSearch=2011+microwave>
or as a CD-ROM <http://www.newsvhf.com/confcd.html> with some extra
material. There is lots of material of interest to the active
contester, particularly those VHF+ specialists. Here are just a few of
the articles:

- Building a portable Multi-Limited VHF Contest Station; Ken Kent,
KA2LIM
- Roam; Thomas. P. Sullivan, W1AUV
- 1kW Solid State Amplifier for 144MHz; Fred Stefanik, N1DPM
- Uses for California Amplifier MMDS Downconverters; John Franke,
WA4WDL
- Updating KK7B, SHF, DEM, or DEMI 900 and 1296 MHz Transverters; Steve
Kostro, N2CEI
- How Close Can They be Stacked; Gerald Johnson, K0CQ
- Elegant 12-Volt Outlet Box; Paul Wade, W1GHZ
- Making Shielded Enclosures without a Mill Shear or Brake; John
Franke, WA4WDL

==> CONVERSATION

Put Your Pencils Down

When those words were heard at the conclusion of standardized testing
during my primary school years, we knew to drop 'em and sit back - the
proctors were already snatching test forms off the desk! When the test
was over, it was OVER.

Would that was just as true of ham radio contests! Yet, there remains
considerable confusion out there in radiosport land about what should
happen between the last QSO and the log submission deadline. That
period was originally required in the days of paper logs to go through
and clean up handwriting, remove duplicate contacts, and generally make
the log checkable - no computer software was involved. In addition,
mailing in the log from faraway places often took some time.

These days, it's uncommon to NOT use a computer to log your contacts
and with the Internet nearly ubiquitous, the resulting computer file
can be sent to the sponsors in seconds. So as in golf, turn in your
score card before you even take your spikes off! No other sport permits
the participants a "do over" by allowing them to rewrite history by
changing the submitted record of the competition.

What do the ARRL HF Operating Guidelines
<http://www.arrl.org/hf-operating-guidelines> have to say about it?
Paraphrasing some of the information there, any information in your log
at the end of the contest is what should go to the contest sponsors. If
your information is wrong, so be it - everyone makes mistakes. It's
possible to "sanitize" a log after the contest, but the correct answer
is that the contest is over at the time the rules say it's over.

Examples of post-contest log manipulation include editing times,
correcting band changes, checking calls against the Callbook, checking

against packet spots, looking through logs from other contesters, confirming calls and exchanges with your buddies, reading DX and contesting reflectors for news about rare calls, and even posting questions like, "did anyone get QSL info for that VQ0?" If someone asks you to confirm a QSO or information in the exchange, you should politely decline. After the log submission deadline, you can discuss anything you want, of course. If you're not sure about that QSO with KX1ABC, the time to make sure is during the contest.

There are wide ranging opinions about the acceptability of editing your log after the contest. Most contesters would agree that if you made a note during the contest about an error, it's OK to fix it afterwards. Furthermore, it is generally OK to make a quick pass through the log immediately after the contest looking for "obvious" typos such as entering CT as CTT or changing 'o' to '0' - in fact, most logging software does such a check before creating the final log file. Correcting syntax errors reported by a log acceptance robot such as improper dates or multiplier abbreviations is also acceptable. Once you step over the line into making changes to what you think you "should" have logged, that's going too far.

Reviewing your log is completely appropriate to help improve your operating accuracy and look for ways to improve strategy - in the NEXT contest. In fact, many top operators regularly review their logs and even record parts of contests in order to review and improve their operating practices. For example, when you get your log-checking report, you can go back to review busted calls and see what the other station really sent. This is an excellent way to discover where your weak spots are. A quick scan of last year's log will refresh your memory about when and where you worked those rare multipliers, too!

It is encouraging to see so many logs submitted within minutes of the end of major contests, often a significant fraction of the final tally. That means contesters are "getting it" -we compete during the contest period and not afterwards. It is becoming a matter of pride that your log is turned in right away just as it is to compete ethically and by the rules. There is more work to be done - urge your peers to follow suit and join the clatter of pencils falling onto tabletops as the clock ticks over to 0000 Z.

73, Ward N0AX

==> CONTESTS

23 November through 6 December

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL 160 Meter Contest--CW, from Dec 2, 2200Z to Dec 4, 1600Z. Bands (MHz): 1.8. Exchange: RST and ARRL/RAC section if US/VE. Logs due: Jan 3. Rules <http://www.arrl.org/contests>

SKCC Straight Key Sprint--CW, from Nov 23, 0000Z to Nov 23, 0200Z. Bands (MHz): 1.8-28, 50. Monthly on the fourth Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/>

CQ World Wide CW Contest--CW, from Nov 26, 0000Z to Nov 27, 2400Z. Bands (MHz): 1.8-28. Exchange: RST and CQ zone. Logs due: Dec 21. Rules <http://cq-amateur-radio.com/>

SARL Digital Contest--Digital, from Nov 27, 1300Z to Nov 27, 1600Z. Bands (MHz): 3.5-14. Exchange: RST and serial. Logs due: 7 days. Rules <http://www.sarl.org.za/public/contests/SARL_2011_Contest%20Manual_issue_9.pdf.>

Top Band Sprint--Phone, CW, from Dec 2, 0000Z to Dec 2, 0600Z. Bands (MHz): 1.8. Exchange: RST, S/P/C, ARCI number or Power. Logs due: Dec 17. Rules <http://www.qrparci.org/contests>

SNS and NS Weekly Sprints--CW, from Dec 2, 0200Z to Dec 2, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

TARA RTTY M�l�e--Digital, from Dec 3, 0000Z to Dec 3, 2400Z. Bands (MHz): 1.8-28. Exchange: RST and State/Province or serial. Logs due: Jan 1. Rules <http://www.n2ty.org/seasons/tara_melee_rules.html>

Top Operators Activity Contest--CW, from Dec 3, 1600Z to Dec 4, 1559Z. Bands (MHz): 3.5-28. Exchange: RST, serial, and TOPS/PRO number. Logs due: Dec 31. Rules <http://www.procwclub.yo6ex.ro/>

AWA Bruce Kelly QSO Party--CW, from Dec 3, 2300Z to Dec 4, 2300Z. Multiple operating periods, see website. Bands (MHz): 3.5,7. Exchange: RST, Xmtr type, power, name. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

10 Meter RTTY Contest--Digital, from Dec 4, 0000Z to Dec 4, 2359Z. Bands (MHz): 28. Exchange: RST and state or province or serial. Logs due: Dec 15. Rules <http://www.rttycontesting.com/the10meterrttycontest.html>

ARS Spartan Sprint--CW, from Dec 6, 0200Z to Dec 6, 0400Z. Monthly on the first Monday evening local time. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

VHF+ CONTESTS

SKCC Straight Key Sprint--CW, from Nov 23, 0000Z to Nov 23, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the fourth Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 5 days. Rules http://www.skccgroup.com

this week. The Audio News will return December 1, 2011.

==> ARRL HEADQUARTERS TO CLOSE FOR THANKSGIVING HOLIDAYS

ARRL Headquarters will be closed November 24 and 25 in observance of
Thanksgiving. There will be no W1AW bulletins or code practice
transmissions <http://www.arrl.org/w1aw-operating-schedule> those days.
The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a
day early on Wednesday, November 23, but there will be no ARRL Audio
News <http://www.arrl.org/arrl-audio-news> on Thursday, November 24.
```

ARRL Headquarters will reopen Monday, November 28 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> ON THE AIR: FCC RELEASES NEW RULES FOR 60 METERS

On November 18, the FCC released a Report and Order (R&O), defining new rules for the 60 meter (5 MHz) band. The new rules will not go into effect until 30 days after being published in the Federal Register, which has not yet happened. These rules are in response to a Petition for Rulemaking filed by the ARRL filed more than five years ago, and a June 2010 Notice of Proposed Rulemaking. In the R&O, the FCC replaced one of the channels, increased the maximum authorized power amateur stations may transmit and authorized amateur stations to use three additional emission designators. Read more here <FCC_Seal.JPG>.

==> DELTA DIVISION SEES LEADERSHIP CHANGE; MIDWEST, ATLANTIC DIVISIONS UNCHANGED

On November 18, ballots were counted in the races for Director in the Atlantic, Delta and Midwest Divisions. This year, there were only three contested races for Director or Vice Director in the five Divisions holding elections. In the Delta Division, Vice Director David Norris, K5UZ, defeated Director Mickey Cox, K5MC, for the top slot in that Division. Bill Edgar, N3LLR, won re-election as the Director in the Atlantic Division. Cliff Ahrens, K0CA, also was re-elected in the Midwest Division. Terms for Directors and Vice Directors begin at noon on January 1, 2012 and run for three years. Read more here <http://www.arrl.org/news/delta-division-sees-leadership-change-midwest-atlantic-divisions-unchanged>.

==> PUBLIC SERVICE: WHEN BRUTAL STORM SLAMS ALASKA, HAMS PROVIDE CRITICAL COMMUNICATIONS

Winter storms are nothing new to Alaska, "the Last Frontier." But even infrastructure built to withstand some of the harshest conditions can fail. As a November storm pummeled the small, isolated villages along Alaska's western coast, it knocked out power lines and communications across the region. The only way the villages could communicate with each other -- and with officials and weather forecasters in Fairbanks and Anchorage -- was via ham radio. "The hams were providing critical observations," explained Carven Scott, the Science and Operations Officer at the National Weather Service's office in Anchorage. "We don't have a lot of meteorological observations in the west. We don't have the instruments out there."

Scott told the Alaska Dispatch -- an online-only news service -- that the messages he received from radio amateurs were "deceptively simple": How fast the wind was blowing and from what direction, sea level, wave height, whether it was snowing or raining and the temperature. "These seemingly small details from various villages made a big difference for the weather service," he told the Dispatch. "A lead forecaster told

Scott that 'whatever you do, don't cut it off because this stuff is really helping us.' Through the ham radio network, Scott and his colleagues learned that river ice in Koyuk was backing up and spilling onto the banks, roofs had blown off in Nome, water was surging in Nome, and rain and snow were falling in Shaktoolik and Savoonga." Read more here <http://www.arrl.org/news/when-brutal-storm-slams-alaska-hams-provide-critical-communications>.

==> PUBLIC SERVICE: THE 13TH ANNUAL SKYWARN RECOGNITION DAY SET FOR DECEMBER 3

The 13th Annual SKYWARN Recognition Day (SRD) Special Event will take place Saturday, December 3, 2011. SRD is co-sponsored by the ARRL and the National Weather Service (NWS) as a way to recognize the commitment made by Amateur Radio operators in helping to keep their communities safe. According to SRD Coordinator David Floyd, N5DBZ, Amateur Radio operators can visit their local participating NWS offices, working as teams to contact other hams across the world throughout the 24 hour event. Read more here <http://www.arrl.org/news/the-13th-annual-skywarn-recognition-day-set-for-december-3>.

==> LOGBOOK OF THE WORLD: BACKLOG IS CLEARING

Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>) is continuing to accept and process logs, including logs from this weekend's ARRL November Phone Sweepstakes Contest. Currently, the processing delay is at 30 hours, down from 45 hours last week. As of November 23, there are approximately 857,000 QSOs in 3335 logs still waiting to be processed. If you have already uploaded a log, please do not upload it again; by doing so, you will only add to the queue. Do not send entire logs that contain previously uploaded QSOs; use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. By following these guidelines, you'll help LoTW process the backlog at a faster pace. Thanks again for your patience.

==> SPECTRUM DEFENSE: THE ARRL NEEDS YOUR HELP TO PROTECT OUR AMATEUR RADIO SPECTRUM

The third edition for 2011 of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- was recently published on the ARRL website. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum.

Defending spectrum means protecting the way each of us chooses to enjoy Amateur Radio. It is important to have VHF/UHF allocations when radio amateurs are called upon to provide support during communications emergencies. But Amateur Radio is primarily a personal radio service where licensees have great latitude to develop their skills, experiment

to broaden their knowledge base, serve their communities and to simply have fun. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can help to protect these privileges by contributing generously to the 2011 ARRL Spectrum Defense Fund. Read more here <http://www.arrl.org/news/the-arrl-needs-your-help-to-protect-our-amateur-radio-spectrum>.

==> ON THE AIR: REACH FOR THE TOP IN THE ARRL 160 METER CONTEST

While Solar Cycle 24 is making the high bands the focal point for HF operators <http://www.arrl.org/news/attention-techs-10-meters-is-hot>, 160 meters -- often called "Top Band" -- is still chock-full of DX. There's no better time to explore this fun and exciting band than the ARRL 160 Meter Contest <http://www.arrl.org/160-meter>, running the weekend of December 2-4.

The ARRL 160 Meter Contest is an all-CW event. The object of the contest is for DX stations to contact American and Canadian stations (and vice versa). And according to ARRL Contest Branch Manager Sean Kutzko, KX9X, everyone will be seeking you, especially if you live in a rare Section such as North Dakota, Nebraska or any of the rare Sections from November's Sweepstakes contests. In this contest, Alaska (KL7) and Hawaii (KH6) count as DX, as do the Caribbean US possessions (KP1-KP5) and all of the Pacific Ocean territories (KH0-KH9).

"If you don't have an antenna for 160, you should just load up whatever you have through an antenna tuner and give 'top band' a try," Kutzko said. "Even a 40 meter dipole through a tuner will make QSOs. And since ARRL and RAC Sections are each worth 2 points and count as multipliers, the ARRL 160 Meter Contest is a good way to begin working -- or finishing up! -- your Worked All States (WAS <http://www.arrl.org/was>) award. But don't forget about those DX stations: each DXCC entity is a multiplier and is worth 5 points."

The 2011 ARRL 160 Meter Contest <http://www.arrl.org/160-meter> runs from 2200 UTC Friday, December 2 through 1559 UTC Sunday, December 4. Logs must be e-mailed <160meter@arrl.org> or postmarked no later than 1600 UTC Tuesday, January 3, 2012. Paper logs should be sent to ARRL 160 Meter Contest, 225 Main St, Newington, CT 06111.

==> SUPPORT ARRL: ANNUAL CFC CAMPAIGN IS UNDERWAY

For the past 10 years, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC <http://www.opm.gov/cfc/>). In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated more than $191,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support the ARRL's effort to represent its members and all radio amateurs.

Similar to the United Way, the CFC encourages individuals to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Those wishing to select the ARRL to receive all or part of their payroll deductions should designate organization 10099 when completing their CFC donor forms. Donations to ARRL can be designated for Diamond Club contributions, the ARRL Spectrum Defense Fund or the ARRL Education & Technology Program. Donors may also make unrestricted contributions to the League. The 2012 CFC Campaign ends December 15.

One important note: Since the CFC does not provide the ARRL with the names of individual donors, the ARRL Development Office would appreciate a copy of the donor form to ensure that each contribution is applied according to the donor's wishes and the contribution or pledge can be properly acknowledged. Please e-mail <mmacdonald@arrl.org> or fax a copy of your completed pledge form to 860-594-0259.

==> AMATEUR RADIO FUN: BE A STAR! ENTER THE SECOND ANNUAL ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Second Annual Video Contest! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. If your video takes first, second or third place, we'll post it on the ARRL website for everyone to see. We're looking for a few good videos (but only one per ARRL member, please) on any tasteful subject relating to Amateur Radio. While you are welcome to submit a video on any theme, we're especially looking for videos that illustrate the joy and excitement of Amateur Radio. Videos will be judged on overall quality and composition, and prizes will be awarded. This year, the ARRL will be offering two categories: Professional and Amateur. The Professional category is intended for entrants who are professional videographers or those who have access to professional-grade video equipment and software. Both categories will have prizes for first, second and third place. Read more here <http://www.arrl.org/news/be-a-star-enter-the-second-annual-arrl-video-contest>.

==> SOLAR UPDATE

Tad "We drove off into the sunset <http://www.youtube.com/watch?v=5_7C0QGkiVo>" Cook, K7RA, reports: There is not much in the way of solar excitement this week. While there are many sunspots, the solar activity in terms of flares or coronal mass ejections is low. The overlapping (by one day) average sunspot numbers in this bulletin declined 21 points to 124. We should see good conditions for the CQ Worldwide DX Contest, which runs this weekend

(November 26-27). The latest prediction from USAF/NOAA shows the solar flux at 140 on November 23, 145 on November 24-27, 150 on November 28-29, 155 on November 30, 160 December 1-2, and 165 December 3-7. The predicted planetary A index is 5 on November 23-27, 7 on November 28-29, and then 5 on November 30-December 24. Look for more information on the ARRL website on Monday, November 28. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Arlo Guthrie's Alice's Restaurant <http://en.wikipedia.org/wiki/Alice%E2%80%99s_Restaurant>.

==> SECTION MANAGER ELECTIONS: FALL SECTION MANAGER ELECTION RESULTS

ARRL members in New Mexico, Tennessee, and Michigan will have new Section Managers, beginning January 1, 2012. Members in Kansas also re-elected their Section Manager in a balloted race that concluded when ballots were counted and verified at ARRL Headquarters on Tuesday, November 22. Read more here <http://www.arrl.org/news/fall-section-manager-election-results>.

==> ARRL AND AMATEUR RADIO FEATURED ON FOX NEWS

In a story published on the Fox News website on November 22, reporter Michelle Macaluso called Amateur Radio the "newest trend in American communication." Macaluso cited numbers provided by the FCC that proclaimed that in October 2011, there were more than 700,000 radio amateurs in the US. Read the story here <http://www.foxnews.com/scitech/2011/11/17/radio-days-are-back-ham-radio-licenses-at-all-time-high/?cmpid=cmty_email_Gigya_Radio_Days_Are_Back%3A_Ham_Radio_Licenses_at_an_All-Time_High> on the Fox News website.

==> THIS WEEK ON THE RADIO

This week:

- November 26-27 -- CQ Worldwide DX Contest (CW)
- November 27 -- SARL Digital Contest
- December 1 -- QRP ARCI Topband Sprint

Next week:

- December 2 -- NCCC Sprint
- December 2-4 -- ARRL 160 Meter Contest <http://www.arrl.org/160-meter>
- December 3 -- TARA RTTY Melee; Wake-Up! QRP Sprint
- December 3-4 -- TOPS Activity Contest
- December 4 -- 10 Meter RTTY Contest
- December 6 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update

<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 3-4, 2011 -- ARRL West Central Florida Section Convention <http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-bay-hamfest-1>,
Palmetto, Florida
- January 8, 2012 -- ARRL New York/Long Island Section Convention <http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-radio-university-2012>,
Bethpage, New York
- January 27-28, 2012 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>,
Jackson, Mississippi
- February 4, 2012 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>,
Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>,
Ladson, South Carolina
- February 10-12, 2012 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>,
Orlando, Florida
- February 17-18, 2012 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18, 2012 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie,
Arkansas
- February 25, 2012 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,
South Burlington, Vermont

WIANEWS WEEK COMMENCING NOVEMBER 27 2011.

ACMA Proposes Cost Increases: WIA Costs Not Affected:
WIA Office Manager Mal Brooks FK3FDSL reports.

WIA Emergency Communications Operator training program:
WIA News Editor Graham Kemp VK4BB reports.

RMS Titanic special call sign EI100T:
IRTS NewsMan Aidan Noone EI7JC reports.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING NOVEMBER 27 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

ACMA Proposes Cost Increases: WIA Costs Not Affected

A number of amateurs have drawn attention to the ACMA's current review of
certain of its costs and its proposal to increase some costs affecting amateurs.

In particular, in general terms, it is proposed to increase the costs of Advanced Standard and Foundation exams or assessments conducted by the ACMA by 68% or 69%

Under the Commonwealth Cost Recovery Guidelines the ACMA is bound to review these costs every 5 years and the last time this was done was in 2007. These cost increases will affect only the cost charged by the ACMA and not the cost charged by the WIA for providing the same service. Under its agreement with the WIA there are only two situations where the ACMA, rather than the WIA, will provide any of these exam or callsign services. One is where the ACMA has reasonable grounds for believing that a qualified operator will probably be unable to pass an examination, part of a process leading to the cancellation of a licence. The other situation is where the WIA ceases to provide the services.

The WIA has no intention of giving up its functions in respect of the qualification of amateurs or the recommendation of callsigns.

Under its arrangements with the ACMA the WIA is bound by the Commonwealth Cost Recovery Guidelines, except that its costs are reviewed every year. The costs taken into account incurred by the WIA in setting its charges include all the direct and indirect costs, such as salaries referable to providing the services, paper, postage, phone costs, insurance, security costs referable to providing the services, storage of records, even the costs of printing the actual certificates of proficiency that the WIA issues.

Why are the WIA costs so much less than the ACMA costs? For the simple reason that so much is done on a voluntary basis. All the Assessors and Learning Facilitators, the WIA's RTO and the many others involved one way or another give their time. Knowing how much it costs the WIA in fact to provide the services is very important in two ways. One is that it is not in the interests of amateur radio for the costs of becoming an amateur to be more than the minimum. The other is that if the WIA is charging less than the actual cost it incurs it means that its members are paying for the shortfall, which will ultimately lead to even further membership fee increases.

The cost of an amateur licence is made up of two components, the costs incurred by the ACMA in managing the system, and a tax component. In accordance with the Cost Recovery Guidelines , the ACMA is bound to increase the management cost component by the cost increases it has incurred. That is why it is proposed to increase the cost of amateur licences by $5.

As is the case for the WIA charges, the cost increases proposed by the ACMA depend on fact: has the cost it incurs to provide a service increased and if so by how much?

The WIA believes that it is unlikely that the ACMA will be unable to demonstrate the cost increase it asserts. The WIA also believes that once again the value of the contribution of so many to the examination system that it manages for the ACMA is amply demonstrated.

To date well over 100 emergency communications operators across Australia have been training via the WIA Emergency Communications Operator training program.

This program, Certificate II in public safety (SES Operations), is now available "on line" and can be completed as a self-paced program. The WIA registration requirements apply. The process to undertake the course can be commenced by completing the WIA on line application form found on the WIA web site.

https://www.wia.org.au/members/emcom/emcomregisteronline/

The on line program will assist those wishing to complete the program but are unable to attend a formal training session our those who have missed a section of the training as well as those who want to complete the program and provide a service to their community.

HAMS ACROSS AUSTRALIA.

Dave Jones' EEV Blog is one of YouTube's top-rating channels for electronic engineers, with a huge viewership world-wide.

Added on November 20 is a half-hour documentary on Sydney's Manley-Warringah Amateur Radio Society.

http://www.youtube.com/watch?v=ysv4SNLwM20

Dave tours the VK2MB clubrooms and interviews members on facets including software defined radio, Jamboree of the Air, repeaters, CW, the Foundation license and more.

After less than 24 hour online it already had attracted over 300 views and 23 'likes'. The professionally - produced EEV Blog has numerous other videos of interest to the electronics experimenter, all presented in Dave's unique enthusiastic style.

(Peter VK3YE)

Display of Electric Vehicles

Peter VK2BEU via VK2WI News tells us the Australian Electric Vehicle Association is holding its annual Field Day on the 3rd of December at the Rouse Hill Town Centre.

On display will be a number of road-going electric cars which have been converted from petrol models by members of the association. There will also be on display some commercial and specialty electric vehicles. Amateurs with an interest in electric traction can catch up with what's happening in this emerging field of vehicle propulsion.

The date again is Saturday the 3rd of December. The location is the Rouse Hill Town Centre, out the front near the bus station. The hours are 10am to 3pm and entry is free.

Police Roundup http://www.vicpolicenews.com.au/

A good week ahead for VK100ARV!

With a steadily growing log the Amateur Radio Victoria Centenary special call sign of VK100ARV is headed for another week of action.

Thanks to the WANSARC team, Terry Murphy VK3UP, Michele Grant VK3FEAT, Peter Freeman VK3PF, Keith Proctor VK3FT, Scout Radio and Electronics Service Unit, Luke Steele VK3HJ, Joe Walsh VK3XH, Tony Hambling VK3VTH, Stephen Ireland VK3SIR, Sunraysia Radio Group and Peter Cossins VK3BFG for activating VK100ARV.

Vk100ARV was buoyed last weekend by activations occurring in two VK3 National Parks: Baw Baw and Brisbane Ranges.

The Western and Northern Suburbs Amateur Radio Club are also activating VK100ARV in their weekly 2-metre simplex net in addition to the Clubs earlier successful five day stint.

The Sunraysia Amateur Radio Group from Mildura is to give it an airing up until late on Saturday November 26, followed by Tony VK3VTH who can be heard today. (Sunday November 27)

Each Monday evening the Digital Slow Scan Television gang led by VK3SIR uses the special call sign. It will be on air this Monday November the 28th both through the VK3RML repeater and hopefully on 20-metres.

By this weekend it will have over 3000 contacts in its log. The Amateur Radio Victoria Centenary Award special call sign VK100ARV is worth a bonus Ten points or ordinary two points per valid contact.

Check out the roster and rules at www.amateurradio.com.au

(Jim Linton VK3PC)

VK4
LISTEN TO QNEWS
wiaq.com/ftp/vk4_qnews_64.mp3

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Has the time come for us to get rid of our monthly magazine and our weekly broadcasts as well as our club newsletters?

Is it time to just depend on RSS feeds and Tweets? Has the cyber technology expunged the need for mass produced information?

Some years ago, I can remember people saying that the Internet had replaced the role of amateur radio. Similarly, I can remember that when single sideband was in its infancy, both in land mobile and amateur services that people were forecasting the demise of AM - fondly remembered as ancient modulation. Broadcasting still makes good use of AM as do amateurs who are using newer methods and technology to explore this mode.

One thing that news broadcasts and publications provide is an aggregated view a mass of items presented coherently. With the use of multiple platforms our amateur news services do bring the world to our shacks. This is only true if people are prepared to share their local news and not just horde it on their own web site. In doing this they are ensuring that others have to find it and cannot complain that outsiders don't know. This is reversing the idea of the global village.

I'm Geoff Emery and that's what I think....how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in the
QNEWS broadcasts, please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page.
http://www.wia.org.au/members/broadcast/upload/

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of QNEWS.

BUNDABERG

Well it's good news from the Bundaberg Amateur Radio Club about its recent October weekend of celebrations.

The club's 50th Anniversary Reunion Luncheon was held on Saturday the 8th and then on Sunday the 9th we hosted the WIA Qld President's function.

The weekend began with an early morning tour of the Mt Goonaneman VK4RBU Repeater site. The visitors had a brisk walk up the mountainside and it was a pity that low level cloud shrouded the site and obscured the grand views.

That cloud soon turned into a violent rain and electrical storm so it was a quick dash back to town for the Reunion Luncheon where the B.A.R.C. president hosted almost 60 guests.

Due to the storm the venue suffered some long power outages but with only a slight delay the Chef managed to put together a sensational lunch and the day was enjoyed by all. Our raffles and prizes were mostly won by visitors so we spread good cheer far and wide.

The Sunday event was a working President's day which got underway after the WIA News. The Qld club representatives had a chance to hear from, and present reports to, the WIA President Michael Owen, WIA Boardmember Ewan McLeod and Mike Charteris from the Queensland Advisory Committee.

The weekend closed with a fine BBQ lunch for those attending the President's Meeting then it was time for many depart for home although we hear some travellers stayed on for a few days.

Thank you to all who attended and helped us celebrate our 50th.

There are plenty photos of the weekend events at the club's B-A-R-C website, that's barc.asn.au

This has been VK4UD with the Bundaberg news

IPSWICH

This is Allan VK4FABR with an update from the Ipswich and District Radio Club.

Last Monday November 21 an extraordinary general meeting of the club was held to elect a new president and vice president.

A good representation of nearly 20 members were in attendance and after a number of nominations from the floor a show of hands, Darrin VK4FVRX was elected as club president, Glen VK4FARR as vice president, while Jamie VK4JY has taken on the role of secretary with Darrin's move to president.

As this was an extraordinary meeting our trusty treasurer John VK4IE continues in the role as there was no requirement for that position to be put to a fresh vote.

The club like to thank honorary vice-president councillor Andrew Antoniolli for chairing the meeting, WIA director Ewan VK4ERM for attending and representing the WIA and former president Derek VK4MIA and vice president Paul VK4FPDW.

Members and visitors can keep up to date with the latest club news, repeater information and other events and contests on the club website - vk4wip.com

Reporting from Ipswich, this is Allan VK4FABR

RADAR

Greetings from the Rockhampton and District Amateur Radio Club, the RADAR Club.

I'm Les VK4VIL.

Last Saturday night, the Club held its annual Dinner, which, keeping with tradition, had a Christmas theme.

Attendance was great, with almost 70 people present on the night.

Bill, VK4XZ from the Sunshine Coast travelled by tilt train for the event, taking home with him a flash multimeter prize donated by Gary VK4FGZA. Other attendees on the night represented Gladstone, Mackay and Central Highlands clubs.

As well as the great raffles led by Gary and Gordon VK4GM, guests realized some real bargains from a super auction and Bob VK4HRC tested our knowledge with a brain twisting quiz.

There was something for everyone, including presents and giveaway for the children, who added to the atmosphere.

Congratulations to Clive VK4ACC who is customarily responsible for arranging the event. Clive also added to the Club's coffers by donating a dual band hand held as a prize. Definitely a top night.

December's general meeting is the Club's last event for 2011 and is affectionately known as "ladies night". Male members of the club are encouraged to bring their partners along, with an informal social following the basic, essential business. It's interesting to note that female members usually take their partners to all general meetings, Hi Hi. Well done, ladies.

Until next time, or next year, this is Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

CRARC Foundation/Upgrade Weekend held 19th/20th November,

VK1 successfully saw 5 New Foundation Licensees , two were very capable 12 year olds who are itching to get on the air.
They also saw 6 successful upgrade candidates and 1 new Advanced licensee join the ranks.

A job well done by all!- Congratulations!!

Help grow amateur radio

Know someone interested in becoming a radio amateur? The next quality Foundation Licence weekend held by Amateur Radio Victoria, at Ashburton, is on the weekend of December the 3rd and 4th.

Contact Barry Robinson VK3PV 0428 516 001 or email foundation@amateurradio.com.au

A new Radio Shack out at Terri and Brian's Birkdale Brisbane home belongs to PW (Peter William).

VK4FYMC is also into the Army Cadets, Australian Cadet Unit 136 Redlands

Congrats P.W.

The Shack is now officially open!

DISCUSSION POINT

What use is an f-call?

I've had my license for about a minute and a half, but one thing I realised today is that I'd never heard of Amateur Radio in any meaningful sense until a month before I got my license.

I'm technically minded, have worked in broadcast radio for many years, I'm heavily involved in Information Technology, do Research and Development daily and talk to many people about skill development, training and communication. I've been self-employed for over a decade, but I'd never heard of Amateur Radio.

Imagine that.

One realisation I came to is that I'm not alone in this historic lack of knowledge about Amateur Radio. I think that going out on Field Days with a club, going into the community, finding other like-minded individuals and

getting them excited about Amateur Radio is going to open up a whole new group of Amateurs.

For me, I've already started creating a list of clubs and communities I'm aware of, or even a member of and I've started thinking about how to communicate about this hobby, what it means for the individual participating and for the community in which that individual lives - because let's not forget that Amateur Radio is also about the wider community.

Amateur Radio, what a hobby. Tell your friends.

I'm Onno, vk6flab

INTERNATIONAL NEWS NOW FROM THE IRTS/ARNEWSLINE/RSGB

==========

IRTS NEWS DESK

RMS Titanic

RMS Titanic, the world's largest passenger ship at the time, sank on her maiden voyage from Southampton to New York, following a collision with an iceberg, at approximately 0245 on the morning of April 15th 1912.

1,517 people lost their lives in the tragedy.

The sinking will be marked by several special event stations at ports associated with the ships maiden voyage.

These include Belfast, Southampton, Cherbourg, Cobh, Cape Race, VO1MCE and a maritime mobile station, VE0MGY, at the site of the sinking.

The call sign EI100T has been issued for the year 2012 and will operate in co-operation with the Cobh Titanic 100 Committee.

The main events will happen over the weekend of April 13/14th and EI100T will also be operated regularly throughout the year.

A special award will be announced before the end of December in conjunction with the other special event locations.

Enquiries and QSLs to EI4HQ QTHR.

==========

NEWS FROM ARNEWSLINE USA

HAMS LAUDED IN THE WAKE OF EARLY SEASON ALASKA STORM

Ham radio has been highlighted in the November 12th issue of the Alaska Dispatch. This after an early season storm hit the most-Northern state. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

According to the news article, when it became clear the Bering Sea storm was going to be a major severe weather incident the National Weather Service got

word out to Alaska's amateur radio network that it wanted help. And as crashing waves pounded beaches, the people who live in the remote, isolated villages along the storm's path stayed connected via a web created by Alaska's ham radio community.

When other communications failed, ham radio operators came to the rescue. Throughout the storm, they were the eyes for scientists and weather forecasters in Fairbanks and Anchorage who otherwise would have been isolated from the severe weather conditions they could predict but not see.

Carven Scott, is a forecaster with the National Weather Service in Anchorage. He told the newspaper that it was hams that were providing critical observations as the storm blew past. Scott noted that the N-W-S does not have much in the way of meteorological observation equipment in the western part of the state but hams kept his agency alerted to the latest conditions in remote areas. This included such data as how fast the wind was blowing and from what direction; wave height; whether it was snowing or raining; and the temperature. Scott says that these seemingly small details from various villages made a big difference for the weather service in its predictions.

Scott credits Richard Courtney, NL9H, as the ham radio operator who came up with the idea of an alliance between Alaska's ham community and the weather forecasters. Scott said that he had for some time thought that amateur radio would be a good communications supplement. With the Bering Sea storm approaching the Alaska coast, Scott said that they decided to give it a shot.

Scott told the newspaper that through the ham radio network he and his colleagues learned that river ice in Koyuk was backing up and spilling onto the banks. Also that roofs had blown off and water was surging in Nome, and rain and snow were falling in several other villages.

The story also highlights the work of Martin Ruud, WL7MR, in the city of Nome. >From Tuesday night as the storm approached through the following Thursday morning WL7MR forwarded messages from islands and other coastal communities. The newspaper says that Ruud had draped sleeping bags over his windows to protect himself and his equipment in case a wind gust shattered the glass. Outside, a 160-meter loop antenna stood ready atop four telephone poles the city of Nome gave to him for free, knowing he could put people in contact with the outside world when other methods failed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

The entire story of ham radios role in this major Alaskan winter severe weather outburst can be read on-line at tinyurl.com/alaska-storm

Logbook of The World http://www.arrl.org/logbook-of-the-world
is continuing to accept and process logs, including logs from this

weekend's ARRL November Phone Sweepstakes Contest.

Currently, the processing delay is at 30 hours, down from 45 hours last week as heard in the audio version of the vk1wia newscast.

As of November 23, there were approximately 857,000 QSOs in 3335 logs still waiting to be processed.

If you have already uploaded a log, please do not upload it again; by so doing, you will only add to the queue. Do not send entire logs that contain previously uploaded QSOs; use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. By following these guidelines, you'll help LoTW process the backlog at a faster pace.

Thanks again for your patience.

Christmas posting deadlines loom

The Christmas posting deadlines are fast approaching for overseas book orders from the RSGB.

The first deadline is 1st December for Rest of the World airmail orders, that includes those in VK/ZL then 3rd December for Western Europe. Air mail orders to North America and Western Europe must be placed by 8th December.

All these dates can be found on the RSGB website within the RSGB Shop.

==========

WEIRD AND WONDERFUL

Cold War Echo

The Russia Today YouTube News Channel carried an interesting story about the mysterious Russian 'Buzzer' station on 4625 kHz.

Cold War Echo: Unravelling mysterious radiowave UVB-76

Among the hundreds of radio stations in Russia, there is one that is seemingly out-of-this-world. Instead of music or news, these broadcasts are of mysterious voices and noises which have radio enthusiasts baffled.

It leaves some wondering what's the message behind these noises.

RT's Yegor Piskunov's tuned-in.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Nov 26-27 WIA Spring VHF-UHF Field Day is THIS weekend.

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

August VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

(A note from Nina DL2GRC - VK2INZ this in text edition only)

"You may have heard that my company Bosch was founded by Robert Bosch senior 125 years ago.

We organised a special call sign In Memoriam of Robert Bosch's 150th birthday (which would have been in September 2011) - which is DK150RB.

OM Holger and I will bring it on air this Sunday, 27th November, between 7:30 UTC and 11 UTC. (4.30pm Sydney daylight saving time.)

>From 7:30 UTC till 9 UTC we will turn our beam towards VK to work VK-Stations on 20/15meters.

PSK31 or Olivia would be also possible.

We will be at the station of the Bosch headquarter in Stuttgart.

(vk2dot)

Possible amateur radio activity from Myanmar (Burma)

Simon, HS0ZIB/G6JFY, says that his QTH in Thailand is only a few hours' drive to Myanmar, and he has regularly visited the country.

His hotel/guesthouse businesses have enabled him to obtain initial contact with authorities from the Myanmar Ministry of Post and Telecommunications about an initial, "demonstration" DXpedition.

Simon mentions, "The recent political changes in Myanmar have increased the possibility of operating an amateur radio station from Myanmar. My own position enables me to operate on a regular basis, if this were allowed."

Good to see a non-professional shall we say dx activity instead of the all to frequent dx pedtitions that often run into problems and end up (hopefully) refunding their supporters!

Southgate ham heading for Ascension Island

Southgate Amateur Radio Club member Steve White, G3ZVW/AF6SU, will once again be active as ZD8N from Ascension Island (IOTA AF-003, WLOTA 1491) until 2 December.

He has been off the island for almost three years.

Activity will be on 80-10 metre CW, SSB and the Digital modes.

He is also expected to participate in the CQWW DX CW Contest this weekend (26-27 November).

QSL via his home call sign G3ZVW.

A quick reminder to members and visitors of the Oxley Region Amateur Radio Club.

The club conducts two nets each week on the 146.7MHz VK2RPM 2 metre repeater.

The mid-week net takes place at 7:30 pm on Tuesday nights.

The weekend net takes place at 8:30 am on Sunday mornings.

(vk2wi)

We have had Lighthouses, Museums, Railway stations Mountain Tops all as venues for special awards well now comes word of R.S.O.P.A.

Rest Stops On The Air

And there must be literally millions around the world!

Jon, N5JLD and John, KF5FEI activated the Burleson Texas Rest Area as part of the Rest Stops On The Air on 24 November.

The rest stop was located on Interstate 35W @ exit 31 Grid Square Em 12 il North Bound, South of Burleson at Milepost: 33

Might we suggest to find out more about "Rest Stops" you contact Jon N5JLD

AWARDS

Awards on offer to all

The Keith Roget Memorial National Parks Award and the much sought after Amateur Radio Victoria Centenary Award certificates are now available and on display.

The Keith Roget Memorial National Parks Award updated certificate features a back-drop of one of the Victorian National Parks that has been kindly provided by avid VK3 National Parks activator, Peter Fraser VK3ZPF.

Award Manager, Tony Hambling VK3VTH, advised that a total of 17 National Park activations occurred over the four days taking in last weekend (November 18-21).

So successful was the National Parks activation weekend that it will be repeated in 2012.

Meantime the limited-edition Amateur Radio Victoria Centenary Award has an historic montage and defining text that tells how the state-wide organisation began 100 years ago.

The rules and images of these two exciting awards can be found in the "Award" section of the Amateur Radio Victoria website www.amateurradio.com.au

ARISSat-1 MAY DE-ORBIT IN APRIL 2012

According to predictions from Mineo Wakita, JE9PEL, the ARISSat-1 satellite is due to re-enter Earth's atmosphere in early April 2012. Launched from the International Space Station on August 8, the satellite is traveling in a low orbit and is steadily losing altitude. The rate of orbital decay may be accelerated by increasing atmospheric density caused by increased solar activity.

With that factor in mind, some ARISSat-1 decay predictions suggest re-entry as early as February 1. ARISSat-1 remains quite active, sending voice messages, digital telemetry and Slow Scan TV images. Amateurs have also been able to enjoy contacts through ARISSat-1's linear transponder despite the fact that the UHF antenna was apparently damaged prior to (or during) deployment.

AMSAT-NA has a competition to see who can record the last bits of telemetry as ARISSat-1 makes its final plunge. To decode the CW or BPSK telemetry you must use the ARISSATTLM software for Windows or Mac OS.

The CW signal is transmitted at 145,919 MHz and the BPSK signal appears at 145.920 MHz, plus or minus Doppler.

IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

The Super Murray Marathon is a canoe race held along the Murray River between Yarrawonga and Swan Hill. Each year WICEN Victoria provide communication and logistic support using HF and 2 metre equipped portable stations at intervals along the banks of the river.

This year, WICEN Victoria would like to invite all WIA Accredited Emergency Communication Operators to join the event and gain valuable training in emergency communications and message handelling, and also to have some fun.

If you don't have portable HF that is OK, as they can still find a place for you to fit into the team.

You do not need to be a member of WICEN but you do need to be a WIA Accredited Emcomms operator.

The five day event, held between December 27 and 31, is run by the YMCA as a fund raiser for their various activities in the area. During the event youy will be camping as a group at three camp sites provided by the YMCA at Cobram, Echuca and Swan Hill. Camping is easy as the YMCA provides all the food at a very reasonable cost and the YMCA has an event volunteer registration system that helps with catering, camper numbers, T shirt sizes and other admin issues.

A working with children check card is now required, but the YMCA will facilitate this by sending out the application forms to those that register on their website. The card is free for volunteers and will be helpful in the future for JOTA and other amateur radio activities.

If you are interested in training with fellow amateurs and enjoying the best the Murray region has to offer during the holiday time, you can get further

details by contacting the WICEN event organisers.

Ambulance to be used during severe weather

A report carried in Alabama's Gadsden Times says the tornadoes back in April are a reminder of the need for more eyes on the sky during severe weather.

Now a group of amateur radio operators will be able to have more technology in the field with an ambulance that has been donated for their use.

The Amateur Radio Emergency Services, part of SKYWARN, serves all of Northeast Alabama as trained storm spotters and many of its members usually are in their vehicles driving toward the storms while everyone else is trying to get away.

Joey Davis of the group said amateur radio operators have been around for many years, monitoring and reporting weather conditions.

An old ambulance from Gadsden-Etowah Emergency Medical Services was donated to the organization's group in Cherokee County.

They plan to equip it with radar and computer equipment that will help them better identify areas affected by the storm.

He said the group will be in areas affected by storms and also will have first-aid kits, bottled water and hand sanitizer for those affected, as well as the ability to charge cellphones.

Amateur Radio Newsline(tm) Report 1789 - November 25 2011

Ladies and gentlemen, with a holiday thank-you, here's our producer
Bill Pasternak, WA6ITF:

--

With Thanksgiving upon us, I just wanted to take a moment to say thank
you to all of you who have donated to the Amateur Radio Newsline
Support Fund since our call for assistance made a month ago. Thanks to
your generosity we have exceeded our goal $1000 and it looks like we
may have enough funds to hold us through the winter and maybe even into
early spring. We won't know for sure until we see how expenses are,
but right now it looks rather promising.

Also, at I want to say a special thank you to our regular monthly
contributors some of whom have been with us for years. You may be
small in number, but it's your ongoing support that makes a big
difference in keeping us going and - more important -- keeping us from
having to make weekly or monthly appeals. You know who you are and we
want you to know that you are very much appreciated.

And withn that - to all - a very Happy Thanksgiving from all of us here
at the Amateur Radio Newsline. Now here is this weeks report.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1789 with a
release date of Friday, November 25th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio responds to a wildfire in Reno, Nevada; the FCC restructures
the ham radio rules regarding 5 MHz; amateurs are asked to assist in a
space plasma experiment; improved propagation could mean records will
be set in an upcoming contest and a bit of New York City's old Radio
Roe lives on. Find out where on Amateur Radio Newsline(tm) report
number 1789 coming your way right now

RESCUE RADIO: HAM RADIO RESPONDS TO NEVADA WILDFIRE

Amateur radio was put on alert when a massive firestorm swept through a
section of South West Reno Nevada. Amateur Radio Newsline's Don

Carlson, KQ6FM, is the Nevada Section Emergency Coordinator and has this first hand report:

--

While most of the stories and reporting I do for Amateur Radio Newsline are from far away, this story hit especially close to home.

Shortly after midnight early on Friday morning of November 18th, a firestorm ignited near the affluent southwest Reno area of Caughlin Ranch. While it is currently uncertain exactly caused the blaze, a storm was in the area and with it, winds between 50 an 70 mph. This presented a major problem for firefighters, who were brought in from all over Nevada to assist the Reno Fire Department.

By dawn nearly 200 acres had already been burned destroying many homes in it's path. This brought about the opening of Washoe County's Regional Operations Center. At the request of Emergency Manager Aaron Kenneston, KE7GFF - who is himself a licensed Amateur Operator, I was summoned to open the communications center the facility. Many served agencies were already on hand, and just after 9 am we were asked to provide communications support for the American Red Cross, who had already opened 2 shelters at 2 local high schools and a third was being staged.

Emergency officials had been conducting mandatory evacuations in the area due to the fast burning blaze. More than 9500 residents had been forced from their homes and evacuated before Noon. Rob Gilmore, KI6TRK, AEC to the Red Cross contacted Joe Consolo, KD7QDL who immediately opened the radio room at the Reno Chapter office. I had set up a command net on the W7TA Repeater, owned by the Sierra Nevada Amateur Radio Society Club, as KI6TRK and I took check ins from operators offering to proceed to the shelter areas. ARES was tasked with providing information and direct communications between the shelters and the Chapter office, as well as keeping those at the EOC informed of quickly changing situations.

By late that afternoon, the fire, then named the Caughlin Fire, had destroyed 21 homes, however more than 40 had been spared by the efficient work of Nevada firefighters. Reno Fire Department reported that as of Monday morning, November 21st the Caugulin Fire was 100 percent contained and many of the residents were returning home. As we go to air, the final statistics have not yet been reported.

We in the Nevada section are also grateful for the many Amateur Radio ARES members who offered help from neighboring sections, as far away as Southern California. Your offers of help are deeply appreciated.

For the Amateur Radio Newsline, this is Don Carlson, KQ6FM, NV Section Emergency Coordinator in Reno, Nevada.

--

Don says we will have more in a future Amateur Radio Newsline reports. (KQ6FM)

**

RESTRUCTURING: FCC ADOPTS NEW RULES FOR US 5 MHZ OPERATION

The FCC adopted the use of the name 60 meter band to refer to 5 MHz amateur radio operations but United States hams are still only allowed to transmit on 5 specific channels. Burt Hicks reports:

--

The Federal Communications Commission released a Report and Order on November 18th with new rules governing the Amateur Radio Service operations in the 5MHz or 60 meter spectrum. Among its actions, the FCC the changed the regulations to permit Upper Sideband, RTTY, Data, and CW but with with specific limitations on the use of these modes. It also issued a new 60 meter band 5MHz Channel List.

The major change here was that the channel at 5366.5 Upper Sideband was deleted and replaced with with a new channel at 5357.0 kHz Upper Sideband with its center frequency at 5358.5 kHz. Upper Sideband Phone, Data, or RTTY transmissions may use the dial indicated Upper Sideband suppressed carrier frequency at 1.5 kHz below the center of the channel.

Transmissions must not exceed the 2.8kHz bandwidth on any of the channels. RTTY modes such as PSK31 must not exceed 60Hz necessary bandwidth. Data modes must not exceed 2.8kHz bandwidth. CW bandwidth must not exceed 150Hz and the CW frequency should be at the center of the channel. Data stations operating under section 97.221 automatically controlled digital station, are not allowed on these 5MHz channels. Operators transmitting data or RTTY must exercise care to limit the length of transmission so as to avoid causing harmful interference to US Government stations.

The 5 MHz band available to General, Advanced, or Amateur Extra Class license only. The maximum allowed effective radiated power is now 100 Watts P-E-P referenced to a dipole. If another type of antenna is used, the station licensee must maintain a record of either the antenna manufacturer's data on the antenna gain or calculations of the antenna gain.

Lastly, but most important, amateur radio is a "secondary user" in this band, and must not cause harmful interference to other services. Also, the Amateur Radio Service must accept any and all interference from other primary services and other nation's services. No complaints from hams about interference from other spectrum users will be accepted.

For the Amateur Radio Newswline, I'm Burt Hicks in Los Angeles.

--

The new rules were released in a Report and Order on ET Docket No. 10-98. They take effect 30 days after publication in the Federal Register. (FCC)

WORLDBEAT: RSGB BEGINS RESTRUCTURING FOLLOWING EXTRAORDINARY AGM

The results are in and the Radio Society of Great Britain has begun its own restructuring with the approval by the membership of a new governing board.

Some 135 people attended the RSGB's Extraordinary General Meeting held on Saturday, November 19th. The meeting had been called to consider a series of Resolutions to put in place an Interim Board to address some of the challenges currently faced by the United Kingdom's national ham radio society.

The gathering was chaired by RSGB President Dave Wilson, M0OBW. Those at the meeting heard from Don Beattie, G3BJ, Acting General Manager, of the issues leading up to the resolutions being proposed. A vote followed which lead to the approval of all measures brought to the table including one to create a new Interim Board.

Commenting on the meeting, President Wilson said that he was delighted that members have given such a resounding vote of confidence to move ahead with the new Interim Board. Wilson says that it clearly shows there's an appetite for change and the new Interim Board carries the responsibility for working with the membership to develop the details of the way ahead.

The new Board also released a statement. It noted in part that the Interim Board is committed to more open and consultative processes as it works on the changes needed for the RSGB. It says that it expects to start on those early in 2012.

Not everyone was happy with the changes and the new Interim Board was quick to address this as well. In their statement, the board said -and we quote:

"We want to say something to those members who voted 'no' to the resolutions today. We ask that you give us a chance to show what we are and how we will work. In return we will engage with you to gain your ideas and thoughts in exactly the same manner as we will with all other members. Should you be thinking of it, leaving the Society at this stage is the single most damaging thing you can do, and is in no-one's interest."

By way of background, the Extraordinary RSGB General Meeting came as the result of several issues. Among these were internal problems that lead to the dismissal of a former employee and the shrinking global economy that has forced many organizations to reassess their position and objectives. (RSGB, others)

HAM RADIO IN SPACE: HAMS ASKED TO HELP IN ISS PLASMA EXPERIMENT

The Central Research Institute of Machine Building in Russia has proposed an test using the worldwide ham radio community to receive a VHF packet downlink on 145.825 MHz. This, from a new plasma space experiment on the International Space Station.

The Central Research Institute is conducting a series of space plasma experiments in order to evaluate the shape of previously observed "dead" zone, or shadowing due to the firing of an onboard arc jet plasma source. Radio Amateurs are invited to participate in thispace plasma experiment known as Shadow. One matter of interest is that highly ionized exhaust plumes may scatter RF signals producing large communications free zone.

More on this experiment and how to participate is on-line at tinyurl.com/plasma-in-space and we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ANS)

RADIO LAW: MEASURE BEFORE CONGRESS MAY HELP INTERNATIONAL HAM-SAT COOPERATION

A measure now before Congress may help ease the Federal Government restrictions on United States radio amateurs engaging in collaborative projects with hams and ham radio groups in other parts of the world. Amateur Radio Newsline welcomes reporter Cheryl Lasek, K9BIK, who has this report:

--

The measure is known as H.R. 3288 and it proposes to reduce International Traffic in Arms Regulation restrictions on commercial satellite development.

Since enacted, these laws have posed the threat of heavy fines and prison sentences to any United States individual or organization if they collaborate with others overseas on certain high tech projects. This includes radio amateurs working on projects such as satellite based technology if it was deemed to be dual use. Dual use is a legal term that refers to products, information and techniques of some scientific research that could in some way be misused for nefarious

purposes. Because of this a number of amateur satellite programs have been negatively affected.

Among the ventures harmed by the International Traffic in Arms Regulations has been the New Zealand Amateur Radio satellite KiwiSAT project. A 2009 I-A-R-U Region 3 report highlights the fact that the United States International Traffic in Arms Regulations requirements had forced AMSAT North America direct its members to cease cooperation with AMSAT New Zealand in the development of the KiwiSAT ham radio bird. This, even though New Zealand is a long time staunch allies of the United States.

Now, H.R. 3288 which is titled Safeguarding United States Satellite Leadership and Security Act of 2011 has been introduced into the United States House of Representatives. Sponsored by Representative Howard Berman of California, it is in its first step of the legislative process in Congress to become law.

What opposition, if any, H.R. 3288 may run into is as it makes its way through the law-making process is at this time not known. We will do our best to keep you posted.

For the Amateur Radio Newsline, Im Cheryl Lasek, K9BIK, reporting from Zion, Illinois.

--

Additional information, including a link to the text of the bill, list of the co-sponsors, and a tracking overview as it progresses through the congressional law making system is on-line at tinyurl.com/space-bill. (AMSAT, Southgate, Universe Today, other published news reports)

RADIO LAW: CONGRESSIONAL MEASURE SEEKS TO EXTEND PLMRS NARROWNANDING TO

A measure has been introduced into the United States House of Representatives aimed at directing the FCC to extend the final deadline for private land mobile radio licensees to migrate to narrowband technology by an additional 2 years.

Sponsored by Congressman Steve Rothman of New Jersey, the measure designated as H. R. 3430 would set January 1st of 2015 as the new date when users of private land mobile two-way radio would be forced to migrate from the current 25 KHz inter-system spacing to 12.5 Khz or narrower spacing.

The new technical standard affects private land mobile operations in the 150 to 174 and 421 to 512 MHz bands only. Amateur service allocations in the 420 to 450 MHz spectrum would not be subject to the new inter-system narrowband standard. (RW)

HAM HISTORY: RADIO ROE'S LEEDS RADIO STILL GOING STRONG

According to the New York Times, the city's Radio Roe still lives. At least in one tiny but important spot to experimenters and electronics devotees.

Radio Roe was an area in lower Manhattan that was the mecca for hams and electronic experimenters during the early to mid-20th century. It was torn down in the late 1960's to make way for construction of the World Trade Center. As a result, many of the businesses that were the home to all kinds of radio parts at bargain basement prices disappeared. But not all.

According to a New York Times feature article, one company did survive into the 21st century and is still going strong. Leeds Radio that used to be owned by Bernie Goldstein never closed. It just moved across the East River to the Williamsburg area of Brooklyn. And in 1994 it was purchased by Richard Matthews who has kept up the many traditions that made Leeds Radio a must visit location on Manhattan's Vesey Street from the time it opened way back in 1923.

If you were a kid ham or kid techno-geek of the 1940s and 1950's and lived in New York City this story will bring back fond memories. Even if you were a baby-boomer ham who grew up elsewhere and ordered your parts by mail, its bound to touch a chord in your heart. Best of all you can read it on-line at tinyurl.com/leeds-radio and take a trip back in time. (KB4KCH, New York Times)

NAMES IN THE NEWS: KIRK PICKERING K4RO IS NEW NCJ EDITOR

Some names in the news. First up is Kirk Pickering, K4RO, of Pegram, Tennessee, who has been named Editor of the National Contest Journal. This effective with the January/February 2012 issue.

Pickering, who has been licensed since 1976, began writing the "Contesting 101" column in the in 2008. He says that he has been chasing DX since 1986, and in 1994, began entering contests. His current interests are mostly contesting and DXing and that he tends to enjoy CW contesting the most.

Pickering takes over from Al Dewey, K0AD, of Plymouth, Minnesota, who has served as National Contest Journal Editor since 2008. (NCJ)

**

NAMES IN THE NEWS: W4CGB ANNOUNCES NEW 6 METERS NET

And Robert Yates, W4GCB, of La Grange, Georgia says that a new and informal net has been established on 50.155 MHz at 01:30 UTC Monday nights.. That's 8:30 p.m. on the East Coast. Yates says that the purpose of the net is to keep 6 meters active even when propagation is

limited. (Via e-mail)

**

NAMES IN THE NEWS: RON MOOREFIELD, W8ILC, PRESENTED THE ALLAN SEVERSON, AB8P, MEMORIAL AWARD

Ron Moorfield, W8ILC, has been honored with the Allan Severson, AB8P, Memorial Award. This in recognition of his decades spent in service to amateur radio through his participation in ARES and other organizations.

The award was presented to Moorefiled at a meeting of the Dayton Amateur Radio Service in Kettering, Ohio on Friday, November 3rd by ARRL Ohio Section Manager Frank Piper, KI8GW. In making the presentation, Piper noted that the award to Moorefield was not only based on his long resume of service but also in the way that W8ILC carried out these tasks with integrity.

Created in 1992 as the Ohio Ham of the Year Award, it was renamed in 1999 to honor the memory of Allan Severson, AB8P. It is presented to amateur radio operators in the Ohio ARRL Section who have demonstrated a continuing dedication to the advancement of the hobby. As previously reported, W8ILC recently stepped down as ARES leader in ARES after more than half a century of service to his community. (ARRL Ohio Section)

NAMES IN THE NEWS: WB6ACU AND THE EAGLES TO CELEBRATE 40 YEARS IN 2012

Last but by no means least comes word that Joe Walsh, WB6ACU, and The Eagles will celebrate their milestone 40th anniversary by touring in 2012. In an interview with Rolling Stone Magazine, Walsh said that this celebration is not going to be a continuation of the band's recent tours. Rather, says Walsh the band is pulling out all the stops to create a new set up that'll be more than worth the price of admission.

To accomplish this, Walsh revealed that he and his mates will take to the road for about five months during the second half of the year. According to WB6ACU, they have been archiving a lot of material from the Eagles early days, including concert footage, interviews and the like. He says that these will be the visuals to go along with the songs. WB6ACU says that they will revisit some old songs and some new material as well.

The full story of Joe's plans with both the Eagles and also the James Gang can be read on-line. The U-R-L is ultimateclassicrock.com/the-eagles-tour-next-year/.

While we're at it, let's all wish WB6ACU a happy birthday. Joe celebrated birthday number 64 on November 20th. (Ultimate Classic Rock)

RADIOSPORTS: IMPROVED PROPAGATION COULD SET RECORDS FOR CQWW CW CONTEST

This CQ World Wide CW contest on November 26th and 27th holds the potential of setting some new records. This thanks to some of the best propagation in years. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

After fantastic conditions gave contesters wide open airwaves on 10 meters for the first time in eight years, it could be a repeat in the CQ Worldwide CW Contest, as high sunspot numbers continue.

Hams operating on the 10 and 15 meter bands from the Midwest report some of the best conditions in 35 years. Openings on the 10 and 15 meter bands certainly contributed to higher claimed scores in 2010. Jim Sullivan, W7EJ went from 15 million points last year to the top single operator score on record, with 19.3 million points operating from CN2R in Morocco, where he is an both an Operator and a QSL manager.

Despite the good band conditions, no one has yet come near the CQ Worldwide SSB record set by Jeff Stein-man, N5TJ, back in 1999 of 25.6 million points operating from EA8BH in the Canary Islands.

After a number of years where 10 and 15 meters were nothing more than a second radio multiplier, this year's CW test could be a repeat of the SSB leg, where those bands are wide open at the same time. The changing propagation on the high bands requires the use of a different strategy.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, from Pennsylvania.

--

The CQ Worldwide CW contest runs 0000 UTC November 26th through 2359 UTC November 27th. We hope to hear many of you on the air. (KB3TZD)

**

HAM RADIO IN SPACE: ISS ACTIVE AGAIN ON UHF PACKET

The amateur radio station located in the Columbus module of the International Space Station is currently operational on packet on 437.55 MHz.

To utilize the packet system, operators on the ground need to set the UNPROTO path to ARISS with the identification of RS0ISS for digi relay. Alternately, they may connect to the BBS using the callsign RS0ISS-1.

The packet beacon is set for 2 minute intervals so it may not appear to be active over many parts of the world but it is. N5HVO advises to simply keep listening and keep in mind the Doppler shift of + or - 10 KHz. (N5VHO)

**

WORLDBEAT: SCIENTISTS PLAYING PING PONG WITH ELECTRONS

Scientists at the Cambridge University in the United Kingdom have shown an amazing degree of control over the most fundamental aspects of an electronic circuit. That being the way in which electrons move from one place to another.

Researchers at the University's Cavendish Laboratory have moved an individual electron along a wire, batting it back and forth over sixty times almost as if it were the ball in a game of ping pong. The research finding may have applications in quantum computing transferring a quantum 'bit' between processor and memory.

This new work is called an enabling technology for quantum computers. As such, there is a lot of work going on worldwide to make this new type of processing unit that some say may solve certain complex problems much faster than classical computers. (SARL)

**

WORLDBEAT: RATS DAMAGE RADIO NETHERLANDS TRANSMITTER ON BONAIRE

Radio Netherlands is kind of saying "Oh rats!" This with word that the international shortwave broadcaster has encountered serious damage to one of its Thomson transmitters on the island of Bonaire due to an invasion of the pesky critters.

According to Media Network, the vermin have destroyed part of the transmitters high voltage power supply and the station is awaiting the arrival of spare parts have from Switzerland. Radio Netherlands hopes to have the damage repaired by the time this newscast goes to air. (MN)

**

WORLDBEAT: UK AUTO MANUFACTURERS NOT SUPPORTING DIGITAL RADIO BROADCASTING

The United Kingdom's government mandated switchover date for digital radio may need to be extended several years. This following a new survey of car manufacturers that reveals at least half are steering clear of the new entertainment technology.

As part of its Digital Britain vision, the U-K Department for Culture, Media and Sport named 2015 as the deadline for turning off its ageing but very popular analogue radio network, in favor of one based on

digital standards. The move would mean the majority of today's in-car tuners as well as home radio sets would cease to function overnight.

But new findings from Auto Express Magazine suggest the switchover could now be delayed until 2017 or later. This after a survey of 24 mainstream car manufacturers by the publicatrion has revealed that 50 percent do not offer any digital radio units for their model range, even as an optional extra. Also, almost 60 per cent of new vehicles registered this in the U.K. this year came with no option for the installation of a digital radio receiver. (MN, Auto Express, Southgate)

**

WORLDBEAT: NE ZEALAND ANNOUNCES KORDIA NATIONAL SYSTEM AWARD FOR 2012

>From New Zealand comes word that the 2012 Kordia National System Award for Historic Places is being hosted once again by The Hamilton Amateur Radio Club and Branch 12 of the NZART. This, in association with the New Zealand Historic Places Trust.

The Kordia National System Award is a described as a fun honor and one that is available to all New Zealand amateurs to demonstrate the coverage and use of the National System, to promote New Zealand history and Category 2 of Historic Places. Details are on line at tinyurl.com/historic-paces-award. (NZART)

**

ON THE AIR: CELEBRATING ARIZONA CENTENNIAL FEB 13 - 19 2011

The Central Arizona DX Association will sponsor a special event operation in celebration of the Arizona Centennial during the week of February 13th to the 19th of 2012. Operations will be on all amateur bands from 160 through 2 meters using CW, SSB, RTTY, PSK31 and several ham radio satellite modes. The callsign to listen out for is K7UGA. If it sounds familiar that's because it belonged to the late United States Senator and Arizona native son, Barry M. Goldwater.

This Central Arizona DX Association operation has received recognition from the 2012 Arizona Centennial Foundation as a sanctioned "Special Event" and from the Arizona Historical Advisory Commission as an official "Centennial Legacy Project".

During the event individual Central Arizona DX Association members will be operating from their home stations located throughout Arizona using the late Senator Goldwater's K7UGA callsign however only special operating locations from Tucson, Prescott and Phoenix will be on the air celebrating the 100th anniversary. Thart is slated to take place on Tuesday, February 14th.

If you work special event station K7UGA you can QSL with a self addressed stamped envelope to Bob Davies, K7BHM at his QRZ.com or callbook address. More about this very special Arizona Centennial

operating event is on-line at www.cadxa.org (Via e-mail)

**

DX

In DX, G3RWF will be active as 5X1NH from Uganda for the next several weeks. His operation began on November 23rd and he will concentrate on the lower bands. QSL via his home callsign.

SP2JMB andSP2TO will be on the air from Mauritius Island as 3B8GY between February 5th to the 25th. Activity will be on all HF bands using CW, SSB and RTTY. Also, both operators will be active in ARRL International DX CW Contest on February 18th and 19th. QSL via SP2JMB.

Following the cancellation of the C21A Nauru expedition, Pacific DXers team members now plan to be active from Tuvalu as T2T through December 8th. QSL as directed on the air.

LA6VM who was the co-organizer and team leader on the E35X expedition to Eritrea in 1993 is back in the news. Word is that he has obtained the callsign E35X and may be active again. No other details are available as we go to air.

Lastly, word that HB9DTH is now retired and living in Slovaquia. He has received the callsign OM0DX and says that his on-the-air time will be mainly RTTY and CW contesting. QSL electronically using either eQSL or Logbook of the World. No bureau QSL's are being accepted for this one.

(Above courtesy of various DX news sources)

**

THAT FINAL ITEM: BREAKING THE SPEED OF LIGHT

And finally this week, researchers at CERN which is the world's biggest physics lab say they have ruled out one possible error. An error that could have distorted their surprising measurements of earlier this year that appeared to show particles traveling faster than light. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

Many physicists reacted with skepticism in September when measurements by French and Italian researchers seemed to show subatomic neutrino particles breaking what Nobel Prize-winning physicist Albert Einstein considered the ultimate speed barrier. The European Organization for Nuclear Research said more precise testing has now confirmed the accuracy of at least one part of the experiment.

One key test was to repeat the measurement with very short beam pulses. The test allowed scientists at CERN to check if the starting time for the neutrinos was being measured correctly before they were fired 454 miles underground from Geneva to a lab in Italy. The researchers say

that these results matched those from the previous test, ruling out one potential source of systematic error.

According to Albert Einstein's 1905 Special Theory of Relativity, nothing can travel faster than 186,282 miles per second which is the speed of light. But the CERN researchers claimed last September that when the margin of error in their experiment allowed for at just 10 nanoseconds their neutrinos traveled 60 nanoseconds faster. A nanosecond is one-billionth of a second.

For the Amateur Radio newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Scientists at CERN stress that only independent measurements by labs elsewhere would allow them to declare that the result of their experiment was a genuine new finding. Also, these latest findings are already being challenged by other research teams. (Science On-Line, BBC, Telegraph UK, and other published news reports)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW saying 73 and a very Happy Thanksgiving from southern Mississippi, and we thank you for listening.

GB2RS NEWS

Sunday 27th November 2011

The news headlines:

* RSGB EGM Results

* EME Conference info on Twitter

* Changes to the 5MHz band in USA

135 people attended the RSGB EGM held on Saturday 19 November. The meeting resulted in Special Resolution 1 to create the Interim Board being passed with 85 percent of those voting at the meeting or by proxy voting for the Special Resolution. For Ordinary Resolutions 2-9 to appoint individual members to the Board, the votes ranged between 83 and 86 percent of those voting. Special Resolution 1 required a 75 percent majority, the others a simple majority. Details of the meeting, including a recording of proceedings and the detailed report from Electoral Reform Services can be found online at www.rsgb.org/EGM/. The new Board now starts work immediately and regular updates will be carried on the RSGB website and in RadCom.

There is now an official Twitter information feed for the 15th International EME Conference to be held in Cambridge in August 2012. The Twitter feed can be found at twitter.com/moonbounce2012. More information on the conference is available online at www.eme2012.com.

On November 18 the FCC announced changes for amateur radio operation at 5MHz in the USA. The key changes are that the FCC deleted the channel 5366.5 USB with a centre frequency of 5368.0kHz, and replaced it with channel 5357.0kHz USB with a centre frequency of 5358.5kHz. Changes have been made to now allow upper sideband, RTTY, data and CW; with specific limitations, as well as a maximum power level of 100 watts PEP effective radiated power referenced to a dipole. The changes won't become effective until 30 days after the publication of the announcement. Full details can be read at www.arrl.org/news.

Roger, G3MEH is looking at the feasibility of running an Advanced course early next year. It would need eight Sunday afternoon sessions running from 2pm to 6pm for tuition at The White Hill Community Centre, Chesham HP5 1AG. If the course ran on consecutive Sundays then sitting the exam on Saturday 3 March would be just possible, otherwise the next opportunity would be on Thursday 9 May. If you are interested in the course, please contact Roger, by e-mail to roger@g3meh.com.

And now for the details of rallies and events for the coming week

The final rally of the year is due to take place on 4 December. The Bishop Auckland Radio Amateurs Club Rally will be held in Spennymoor Leisure Centre, Co Durham DL16 6DB. Doors open at 10.30am and admission is £1.50 with accompanied under 14s free. There will be trade stands and a Bring & Buy. More details from Mark, G0GFG on 01388 747 497. Now for the news of special events

G4PF and M0GWW will be running a special event station to celebrate Lancashire Week, using the callsign GB0LD. The NoV finishes today, 27 November, with the Loyal Toast being read at 9pm tonight, which is Lancashire Day. The station will be run from the village of Hoghton in central Lancashire and will use all bands from 70cm to 160m. More information can be found on QRZ.com.

GB2NFG will be operating today, Sunday 27 November 2011, 1000 to 1600UTC as part of the 20th anniversary celebrations open day for the New Forest Group of the National Vintage Tractor and Engine Club. The event is being held at Copythorne Village Hall, Pollards Moor Road, Copythorne, Southampton SO40 2NZ. Operation will take place on the HF bands and 2m. There will be vintage tractors and other vintage vehicles on show as well as various exhibitions and stands. Admission is free and radio amateurs and their families would be especially most welcome. For further details contact Keith, G8MZF on 02380 849 395 or call him on 145.500MHz on the day.

And now the HF DX news compiled from 425 DX News and other sources

Jonathan, G0DVJ, Mike, W0MU and Jim, N1NK will operate as J6M from St. Lucia as a team in the CQWW CW contest that finishes as midnight tonight, 27 November.

Following on from his recent visit to Guinea in West Africa with the 3XY1D team DL7DF is now headed for Kenya for a holiday until 6 December. He will reactivate his Kenyan callsign, 5Z4HW, which he had previously used in February 2004 and February/March 2008.

A team of German amateurs will be active from Banana Island off the coast of Sierra Leone until 4 December. They will use the callsign 9L0W and for the island chasers the IOTA reference is AF-037. QSLs go via DK2VW.

Steve White, G3ZVW will once again be active as ZD8N from Ascension Island until 2 December. Activity will be on 10 to 80 metres using CW, SSB and the digital modes. He is also expected to participate in the CQWW DX CW Contest. QSL via his home callsign, by the bureau or direct.

Phil, F4EGS, is back in Chad and active as TT8PK until 23 December. He has been reported a number of times although activity is limited to his spare time. QSL via F4EGS.

Mark, 6W/AA1AC from will be on the air from 4 to 11 December from Senegal. He plans to be on 80 through 10m. QSL via the bureau or direct

to his home call.

Peri, HB9IQB, will be in Palestine in December and has a licence to operate as E4/HB9IQB. He'll be using a K2/100 into wire verticals mostly on CW on 12, 17 and 30. More details on www.hb9iqb.ch/palestine.html. Now the contest news

The CQWW DX CW Contest takes place over the whole weekend, 26 and 27 November, finishing at midnight tonight. With propagation on the upper HF bands improved over recent years, at times we can expect the CW segments of all the contesting bands to be very busy indeed. The exchange is signal report and CQ Zone. The UK is Zone 14.

On Tuesday 29 November the 70MHz UK Activity Contest takes place between 2000 and 2230UTC. Using all modes the exchanges is signal report, serial number and locator.

The ARRL 160m CW Contest runs from 2200UTC Friday evening to 1600UTC Sunday afternoon on 2 to 4 December. For UK stations, the action takes place during the hours when North America and the UK are both in darkness, around 2200 to 0800UTC. Work American stations including KL7, KH6 and US overseas territories and Canadian stations only. For single-ops there are QRP, low-power, high-power categories. It's similar for multi-op stations, except that there's no QRP category. A vertical antenna or an inverted-L with a high vertical section and an efficient radial or earthing system are very much to be desired for this one. The exchange is signal report and American and Canadian stations also send their ARRL/RAC section number.

Next Sunday, 4 December, the 144MHz AFS takes place. This will be the third in this season's Super League competition. From 0900 to 1700UTC, using all modes, the exchange is signal report, serial number and locator.

On Tuesday 6 December the 144MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 14th to the 20th of November, compiled by Neil Clarke, G0CAS on the 21st of November.

First this week the latest smoothed monthly sunspot numbers which are for February, March and April are 33.4, 36.9 and 41.8 respectively. Without being to optimistic this sunspot cycle could be higher than presently predicted. How much higher, well, we will have to just wait and see. The peak is due around the start of 2013.

The solar disc started with 13 sunspots groups visible on the 14th. As some groups rotated out of view more were coming into view on the opposite side of the Sun. Most were small and quiet but a few groups produced numerous C class solar flares everyday. Solar activity was low everyday except for the 15th which increased to moderate when three small M1 class solar flares took place. Considering the number of solar

flares taking place the impact on propagation was minimal. Solar flux levels declined from 161 units on the 14th to 140 by the 19th and the 20th. The average was 146. The 90 day solar flux average on the 20th was 138 units, that's three units up on last week. X-ray flux levels declined from C1 units on the 15th to B6 by the 20th and the average was B8 units. Geomagnetic activity was quiet everyday. The period started with an Ap index of zero on the 14th. The most disturbed day was the 15th with an Ap index of only 6 units. The average was Ap 2 units, making it one of the quietest weeks of the year. Solar wind data from the ACE spacecraft saw solar wind speeds around the 350 kilometres per second on most days but increased briefly to 480 kilometres per second on the 16th. Particle densities remained low everyday. Bz showed little variation throughout. On the 19th Bz remained positive all day.

And finally the solar forecast. This week the more active side of the Sun is expected to be coming into view. Solar activity could be moderate on some days. Solar flux levels look set to rise and be around the 170's later in the week. There are now no coronal hole disturbances expected and if no coronal mass ejections take place that are directed towards Earth then a quiet geomagnetic week is expected. MUFs during daylight hours at equal latitudes should be well above 30MHz for the whole of the UK. Darkness hour lows should be around 10MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 34MHz. The optimum working frequency with a 90 per cent success rate will be about 26MHz. The best time to try the path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

November 28, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NJ1Q & ARRL DX, K2PF, N3QQ, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, K8GI, K8YSE, KE8G, W8GEX (60m News), W8MP, AT International, CX3ZAN, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F8DVD, I1HYW, I1JQJ/IK1ADH & 425 DX News, JR3QFB, OZ6OM & 50 MHz DX News, RSGB IOTA Web Site, UT5UGR, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 18th-November, through Friday, 25th-November there were 220 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5K, COLOMBIA. Siso, HK3W, will use the special callsign 5K3W during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW ONLY.

5Z, KENYA (Reminder). Sigi, DL7DF, will be on holiday with his XYL Sabine in Kenya between November 23rd and December 6th. He plans to be active as 5Z4HW and operate on all bands, 160-10 meters using CW, SBB, RTTY, PSK31 and SSTV as often as possible. The location is the Diani Beach at the coastline of Kenyanear Mombasa. QSL via his home callsign, direct or by the DARC Bureau. For more details and updates, visit: http://www.dl7df.com/5z/index.html

6O, SOMALIA (Op Cancelled!/Change of Plans). Darko, J28AA/E70A, who was expected to be active as 6O0DX from Somalia between November 21-30th, has cancelled his operation due to security concerns in Galkayo. However, Darko will now be active during the CQWW DX CW Contest (November 26-27th) from Djibouti as a 10 meters/QRP entry.

8Q, MALDIVES. Operators Bert/CX3AN and Mario/CX4CR will be active as 8Q7HU from Maafushi Island, Kaafu Atoll (AS-013), between January 25th and February 5th, 2012. Activity will be on 80-6 meters using CW, SSB and the Digital modes. There will be a special emphasis on South America.

9G, GHANA. Mark, W8MP, an airline pilot who travels periodically to Accra and plans to be active as 9G5MP, informed OPDX on Wednesday that he is heading back to Ghana. This is his 3rd trip there this month. Look for activity between November 25th and 1800z on the 27th. He plans to partic-ipate in the CQWW DX CW Contest (November 26-27th) as a Single-Op using 100w and a dipole. He now has a QSL Manager - W3HNK.

9J, ZAMBIA. Niko, S53A, is now active as 9J3A from the Kafue National Park (WFF-9JFF-003, WWL KH35) until November 30th. This is his fourth operation from Zambia. Activity will be mostly during the CQWW DX CW Contest (November 26-27th) as a Single-Op, possibly as a Single-Band (10m) or All-Band (depending on conditions)/Low-Power entry. He will operate from the rain forest, under the tent, with a generator. There is no electricity, neither a Cell-Phone signal. This could be a very dangerous operation with a lot of poisonous insects, snakes, crocodiles, wild pigs or even lions can visit a tent in the middle of the night. QSL via S57S (not S53A, not S57A), directly or by the Bureau (a very long wait, see details on QRZ.com).

9N, NEPAL. Just a reminder to look for Dov, 4Z4DX, as 9N7DX during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via 4Z4DX.

9X, RWANDA. Carl, SM6CPY will be active as 9X0PY from Rwanda between December 24th and January 7th, 2012. Activity will be holiday style on all bands but with a focus on the higher bands. QSL via his home callsign, direct or by the Bureau.

A5, BHUTAN. Shinya, JA2PSV, has been active in Thimphu as A52SV since October and will be there until September 2013. Activity has been during his spare time, mainly on 15/12/10 meters using CW, SSB, RTTY and PSK.

He uses a FT-450D running 100 watts into a vertical wire whip. Look for him to be active during the CQWW DX CW Contest. QSL via LoTW and by the Bureau to JA2PSV. Visit his Web page at: http://www.mars.dti.ne.jp/hirano/bhutan/a52sv/a52sv.html

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R from Tumon (OC-026, USI GU003S, WLOTA L-0064) during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Don/JH5GHM, Mikiawa/JR7OMD, and Nozomu/JE8KKX. QSL via JH7QXJ or LoTW.

AO1, SPAIN (AAW Activity). Operators Fernando/EA1GHT, Ju&#65533;n Carlos/EA1AUM, Dani/EB1LA, Javi/EC1KV, Carri/EA1CUB, Juanjo/EA1WX and Luis/EA1CS will be active as AO1POL (WAP-222) during the 9th WAP Antarctic Activity Week between February 20-26th, 2012. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and the Digital modes. They hope to be in the CQWW 160m SSB Contest (February 24-26th, 2012). QSL via EA1GHT. For more details about the 9th WAP Antarctic Activity Week, visit: http://www.waponline.it
Several stations could be active before and after the official dates and all will count for the WAP Awards. Join in with your special callsign to celebrate Antarctica with WAP group!

C5, THE GAMBIA (Update/Callsign Change). The Czech-Slovak team, who are active as C50C until November 28th, will now be active as C5C (not C5A) during CQWW DX CW Contests (November 26-27th). QSL via Brani, OM2FY. The complete details can be found at: http://www.om0c.com

E2, THAILAND. Tana, E27EK, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign direct.

EM0, UKRAINE (Special Event). Members of the Black Sea Contest Club (BSCC) are very pleased to announce their special marine mobile operations in order to popularize the Club's activities between December 1st and February 28th, 2012. They will be using the callsign EM0BSCC/MM. As a member of Black Sea Contest Club (BSCC), Yuri, UT1FG/MM, will be operating and will use the above special callsign from his marine mobile station. Yuri is reportedly here on business, so activity will be during his free time. Operations are expected on all amateur bands 160-2 meters, 70cm including the Satel-lites. For more details about BSCC, please visit their Web site at: http://www.bscc.in

FM/TO5, MARTINIQUE (Update). Dimitry, UT5UGR, will be active as FM/KL7WA from Martinique (NA-107) between November 23-30th. Activity will include a Single-Op/All-Band/High-Power entry in the CQWW DX CW Contest (November 26-27th) signing TO7A. QSL via UT5UGR.

FY, FRENCH GUIANA. Larry, F6FVY, will be active as FY5KE during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via FY5KE, by the Bureau or direct.

GRID ACTIVITY (Update/Delay). Yuri, UT1FG, who was expected to start activating "Wet grids" as UT1FG/MM traveling across the Atlantic Ocean starting on November 25th, informs OPDX that his ship is delayed and will not arrive at the Panama Canal until December 7th.

GU, GUERNSEY. Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL via GU4YOX, direct or LoTW.

HH2, HAITI. Pierre, HB9AMO, will once again be active as HH2/HB9AMO from Haiti between November 26th and January 8th, 2012. Activity will be holiday style (local evenings and weekends) and only on CW using a TS-50 into a wire antenna and tuner. QSL via PA7FM. For more details, updates, pictures of his previous operations, and an online log search, visit: http://www.hhhb9amo.pa7fm.nl

HK, COLOMBIA. Members of the DXColombia Amateur Radio Club (DXARC) will be active from the "Jumanji Contest Station" during the CQWW DX CW Contest (November 26-27th) using the following callsigns and bands:
HK1N - Operator Jim; Single-Op/Single-Band (10m)
HK1R - Operator Jorge; Single-Op/Single-Band (15m)
HK3TU - Operator Cam; Single-Op/Single-Band (20m)
HK1X - Operator Pedro; Single-Op/Single-Band (40m)
HK1MW - Operator Bolmar; Single-Op/Single-Band (80m)
HK1AA - Operator Bob; Single-Op/Single-Band (160m)
Visit the DXARC Web page at: http://dxarc.org

HQ2, HONDURAS. Roberto, IV3IYH, will be active as HQ2X during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (10m) entry. QSL via IK2ILH. Activity before and after the contest he will sign HR5/NQ5W (QSL via W0MM).

II0, ANTARCTICA. Massimo, IW0HEU, is now active as II0ZM (WAP ITA-01) from the Italian Mario Zucchelli Station at Terra Nova Bay in the Antarctica until mid February 2012. Activity will be on 20 and 40 meters, SSB only. Per his QSL Manager, Massimo is active between 0700-1000z and from 1800z and ahead. He works in the operation room and the equipment used on HF (Ham Bands) is the same used for his QRL, that's why his time is so limited. It is suggested to check the following frequencies: on 20m - 14195, 14205, 14233 or 14335 kHz +/- QRM; on 40m - 7174 kHz. Logs are sent weekly to his QSL Manager, so the cards are answered the same day they arrive and monthly to those who request via bureau. QSLs will be printed by the end of November. QSL via IW0EFA.

IOTA NEWS.....
AS-102. Yuri, N3QQ, will be active possibly as BO2YA/BW/N3QQ (he told OPDX he is not 100% sure yet) from Kinmen Island between December 3-6th. Activity will be on 40-10 meters using CW and SSB. QSL via N7RO.

NA-240. (Update/NEW IOTA!) Members of the Russian Robinson Club (RRC) and with the support of the Bethel Amateur Radio Club (BARK) will activate the last new IOTA in Alaska in the Bethel County

IOTA Group around January 5-8th, 2012 (depending on weather and transportation availability). The callsign will be KL7RRC/p. The group's main reason for this winter activation is to help jump start the RSGB IOTA Marathon. See details at: http://www.rsgbiota.org/marathon/index.php The current team members are: Yuri N3QQ, Tim/NL8F, and Yuri/ UA9OBA. QSL via UA9OBA (Europe/Russia) and N7RO. For more details and updates, see: http://www.na-234.com

KH2, GUAM (OC-026). Aki, JR3QFB/JD1BNX/W3JH, will be active as W3JH/KH2 from Guam between November 30th and December 5th. He informs OPDX that his activity will be mainly SSB with some RTTY, and mainly on 17/15/12 meters. Also, look for possible activity in the TARA RTTY Melee (December 3rd). QSL via JR3QFB.

KG4, GUANTANAMO BAY. Norman, AH0AJ, is now active as KG4AJ from Guantanamo Bay for the next two years. He is expected to be in the CQWW DX CW Contest (November 26-27th). QSL via his home callsign.

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (10m)/High-Power/ Assisted entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

KH7, HAWAII. Marko, N5ZO, will be active as KH7M (the Pu'u O'o Radio Club callsign) during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via KH6ZM.

KH7, HAWAII. Members of the Pacific (Oahu) Contest Club will be active as KH7X during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. Operators mentioned are Mike/KH6ND, Joe/KH6MB, John/KH6SH, Alex/ KH6YY and Kimo/KH7U. QSL via K2PF.

LOGBOOK OF THE WORLD (Update - Backlog Is Clearing). The ARRL Letter reports this week: "Logbook of The World (LoTW) is continuing to accept and process logs, including logs from this weekend's ARRL November Phone Sweepstakes Contest. Currently, the processing delay is at 30 hours,

down from 45 hours last week. As of November 23rd, there are approximately 857,000 QSOs in 3335 logs still waiting to be processed. If you have already uploaded a log, please do not upload it again; by doing so, you will only add to the queue. Do not send entire logs that contain previously uploaded QSOs; use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. By following these guidelines, you'll help LoTW process the backlog at a faster pace. Thanks again for your patience."

LY100, LITHUANIA (Special Event). Vilmantas, LY3BY, will operate LY100SP (LY100 South Pole) between December 5-25th, celebrating the 100th anniversary of Roald Amundsen, the first man reaching the South Pole. Activity will be on the HF bands mostly CW. Reference number WAP-206. QSL via his home callsign, by the Bureau or direct to LY3BY: Vilmantas Morkunas, P.O.Box 88, LT-76002 Siauliai, Lithuania.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/High-Power entry. QSL via N4AO.

OH0, ALAND ISLAND. Jukka, OH6LI, will be active as OH0V in the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single Band (40m) entry. He plans to use all 5 yagis on 40m atop Mount Geta. For details, view the Web page at: http://www.qsl.net/oh0v

OY, FAROE ISLANDS. Carsten, OY1CT, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/High-Power entry. This will be a part time operation. QSL via OY1CT.

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

RI1, ANTARCTICA. Oleg, UA1PBA/ZS1ANF, will be operating as RI1ANF from
Bellinghausen Base (WAP RUS-01) from February-March 2012 until the end
of 2012 or the beginning of 2013. On the way on to Antarctica (end of
February) he will try to operate from the Icebreacker "Ak. Fedorov" as
callsign/MM. Alex, UA1PAW, is already at Novo Runway (WAP MNB-06) waiting
the license RI1ANR. He will be there until February/March 2012. Slava
(ex-UA1PAI) is on board the "Akademik Fedorov". He will be working at
the Molodezhnaya Base (WAP RUS-08) from mid-December 2011 until mid-March
2012 operating as RI1ANA, then he will be wintering with RI1ANF at
Bellingshausen. Slava and Oleg plan to activate the 160 and 80 meter
bands there. Ivan, R1ANY, is still active from Bellinghausen and will
end his shift next April 7th, 2012.

SILENT KEY.....
* It has been reported that Don Rohn became a Silent Key (SK) on November

22nd. Don was the former owner and CEO of Rohn Manufacturing (Rohn
Towers). OPDX and its readers, as well as the many of us who own
Rohn towers, would like to send out our deepest sympathy to the family
and friends of Don Rohn.

* It has been reported that Jean Pierre, F9RM, became a Silent Key (SK)
recently. The specific date was not provided. He was licensed in 1948
and REF member 5570. He was a real DXer with DXCC Mixed 338/380 and
Phone 338/379, and held the first place position on the IOTA Honor
Roll for a long time. OPDX and its readers would like to send out our
deepest sympathy to the family and friends of F9RM.

T2, TUVALU (Update/Contest Callsign). Members of the "Pacific DXers" continue to be active as T2T from Tuvalu (OC-015) until December 8th. Activity will be on all HF bands, 160-6 meters using CW, SSB, RTTY and PSK31. Operators Jay/K4ZLE, Eddie/VK4AN and Bill/VK4FW will be active as T2V during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry, while the other members of the team will continue to operate non-contest modes and bands as T2T. QSL Manager is the Pacific DXers (see Web page), or by the Bureau via VK4FW. Bureau requests are also accepted by E-mail to eliminate sending your QSL via the Bureau (saves time!). PLEASE NOTE: VK4FW is the current QSL Manager for Pacific DXers: Bill Horner, 13 McConnell Rd, Maidenwell, QLD 4615, Australia --or-- via E-mail: QSL-Mgr@pacific-dxers.com
LoTW and eQSL will be uploaded within 12 months after the operation finishes. For more details and updates, visit: http://t2t.pacific-dxers.com/T2T.html

T8, PALAU. Al, JA9APS, will be active as T88KF from Palau between February 17-21st. Activity will be holiday style probably on 40-6 meters using SSB, CW and RTTY, with a TS-570S and R8 vertical. QSL via his home callsign. Direct address is: Narumi Kawai, 1-10-14 Suwanokawara, Toyama, 930-0088 JAPAN.

TC7, TURKEY. Andrey, RA9CKQ, will be active as TC7B from TRAC (YM7KA) club station located in Asiatic Turkey during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via W3HNK.

TM100, FRANCE (Special Event/WAP Op). Francois, F8DVD, will activate special event station TM100SP (TM100 South Pole) during the whole month of December. Activity is to commemoration of 100th anniversary of Roald Amundsen's journey to become the 1st explorer to reach the South Pole on December 14, 1911. Operations will be on HF bands, 40-10 meters, mostly SSB, and his operation will count for WAP-225 for the "Worldwide Antarctic Program" (WAP) award. QSL via F8DVD: Fran&#65533;ois BERGEZ, 6, rue de la Libert&#65533;,
F-71000 MACON, France.

TN, REPUBLIC OF CONGO. Nicolas, TN9SN, will be active as TN9SN from the Congo possibly until July 2012. Activity will be on all HF bands including 6 meters. QSL via IZ1BZV direct, or by LoTW or eQSL.

UK, UZBEKISTAN. Fedor, UK9AA, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (160m)/Low-Power entry using a 5 element full size yagi on 160m (Boom is 153m). QSL via his home callsign direct.

V3, BELIZE. Operators Travis/AF6WU and Kjerstin/KJ0VDA will be active as V31WU and V31DV, respectively, from Belize sometime in June 2012. Activity will be active on all HF bands. QSL via AF6WU.

VK8, AUSTRALIA. Operators Thomas/OZ1AA and Alan/VK8AV will be active as VK8AR (the Alice Springs ARC callsign) during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via VK8AR.

VP5, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW from the VP5JM Hamlet on the Island of Providenciales (NA-002, WLOTA 1476) between November 23rd and December 14th. Activity will be on 160-6 meters using CW and SSB. He also plans to be entered in the following three contests using the callsign VP5CW: CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry, ARRL 160m Contest (December 2-4th) and the ARRL 10m Contest (December 10-11th). QSL via his home callsign direct (QRZ.com address).

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via the LoTW or direct using the info on QRZ.com.

XV9, VIETNAM. Mike, OM2DX, will be active as XV9DX from Hanoi, and is working for the Embassy of the Slovak Republic. He will be in the CQWW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via OM3JW.

The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 26-27th, 2011)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2011 CQWW DX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

1125. I NEED ICOM STUFF TO REPAIR MINE

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-26 05:33:13 UTC
From: justme <jbleaux@gmail.com>
Message-ID: <6gu0d7hf7vpqoqheic77hg9pregt8n8m5u@4ax.com>
Source record: 3865

Hi,

I would like to buy anything related to Icom 745/751 radios, parts,
too, even the radio itself
working or not.

Thank you.

jbleaux@gmail.com

SARL NEWS - SUNDAY 27 NOVEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

DOC WITHDRAWS PROPOSED ECA AMENDMENTS

NOMINATIONS FOR SARL AWARDS INVITED

RADIO AMATEURS ASKED TO HELP IN ISS PLASMA EXPERIMENT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

DOC WITHDRAWS PROPOSED ECA AMENDMENTS

The Department of Communications has withdrawn the proposed ECA amendment bill for further consultation with Government. The amendments to the Electronic Communications Act would have diminished ICASA's authority on several fronts including frequency allocation and management and could have given the Minister more power over these issues. There was widespread opposition to the proposed amendments. It was high on the SARL agenda to be raised in the SARL feedback on the proposed amendments. It is not certain when DOC will publish revised changes to the ECA. To date the SARL received only comments from two radio amateurs. As matters currently stand no further action is required.

NOMINATIONS FOR SARL AWARDS

Members and clubs are invited to submit nominations to Council for the following SARL awards.

Honorary Life Membership - the SARL's highest honour.

Willie Wilson Gold Badge Awarded by Council to the amateur that gave exceptional and meritorious service to the League.

Jack Twine Award To recognise qualities such as unselfishness, clean operating and a genuine interest in Amateur Radio and its affairs. This prestigious Award will be made to Amateurs who, in the opinion of their fellow amateurs and the League's Council, exemplify the qualities desirable in a Radio Amateur.

Arthur Hemsley 2 metre Trophy Awarded by Council to a Radio Amateur for his/her individual achievements with transmissions in the 2 metre amateur band. This award is made for extraordinary performance on EME or modes such as tropospheric propagation. It is not for the longest distance worked but rather for persistence in achieving something special on 2 metres.

Barney Joel Trophy Awarded by Council to any member of the SARL for the best performance during the year whilst working HF mobile. This award could be made for performance by an individual in rally or other public event communication etc.

Icom Excellence Award This award is bestowed annually by Council on the amateur who through his/her activity in the Amateur Service has brought international recognition to South Africa by either the achievement of a VHF/UHF long distance record which is internationally recognized by the IARU, or by service to the Republic of South Africa or the SARL in the field of scientific research using the amateur spectrum, or in promoting the amateur service internationally or as Council may determine from time to time.

Joseph White Plaque Awarded by Council to any member of the SARL for exceptional achievements in the 432 MHz band during the past year. This is not awarded for the longest distance worked, but for all round achievements.

Bert Buckley Six metre Trophy Awarded by Council to any radio amateur for his/her individual achievements with transmissions in the six metre amateur band. This award is not for the longest distance worked but for outstanding work or activity on six metres.

LoTW DELAYS DIMINISHING

Logbook of The World (LoTW) is continuing to accept and process logs. Currently, the processing delay is at 30 hours, down from 45 hours last week. As of November 23, there are approximately 857 000 QSOs in 3 335 logs still waiting to be processed. If you have already uploaded a log, please do not upload it again; by doing so, you will only add to the queue. Do not send entire logs that contain previously uploaded QSOs; use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. By following these guidelines, you'll help LoTW process the backlog at a faster pace. The ARRL thanks LoTW users for your patience.

RADIO AMATEURS ASKED TO HELP IN ISS PLASMA EXPERIMENT

The Central Research Institute of Machine Building in Russia has proposed an test using the worldwide amateur radio community to receive a VHF packet downlink on 145,825 MHz from a new plasma space experiment on the International Space Station.

The Central Research Institute is conducting a series of space plasma experiments in order to evaluate the shape of previously observed "dead" zone, or shadowing due to the firing of an onboard arc jet plasma source. Radio amateurs are invited to participate in this space plasma experiment known as Shadow. More on this experiment and how to participate is on-line at tinyurl.com/plasma-in-space.

SA QSL

Peter Hers reports that when he experimentally placed the SA QSL system back on the web, it adversely affected the overall stability of the web thus he removed it again for further testing. He is continuing work on the system.

FREE SSTV ONLINE BOOK

This item was obtained from WIANEWS.

Martin, OK2MNM, has made his new book "Image Communication on Short Waves" available free on the web.

You can either read it online or download the chapters in PDF format.

The book can be found at http://www.sstv-handbook.com/.

You can join the MMSSTV Yahoo Group at
http://groups.yahoo.com/group/MM-SSTV/

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is declining with only a few C-class flares produced during the week. Sunspot 1 356 has however a "beta-gamma" magnetic field that harbours enough energy for M-class solar flares. The sun's surface is still peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 88, down on last week's value of 103.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

27 November - Digital competition. 30 November - Last day to submit logs for Pears HF DX-expedition. 03 December - Flea market of the West Rand Amateur Radio Club at 12:00. 31 January 2012 - Last day for

submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 27th November 2011

IRTS Committee Meeting

Club Representatives of affiliated clubs are asked to send their email details in order to be kept up to date with notifications of upcoming IRTS committee meetings. Please send email addresses to info /at/ irts.ie or to Hon. Secretary Ger McNamara ei4gxb/ at/ gmail / dot /com The Next Committee meeting will take place on Saturday 10 December at 11.00 at the Maldron Hotel in Portlaoise, and club reps are encouraged to attend.

ECHO Ireland

The December issue of Echo Ireland will go to print in the early days of December. With the CQWW CW contest taking place that means a deadline for ECHO Ireland is two weeks from now, that is the first few days in December. No later please. Your co-operation is gratefully appreciated.

Mayo Rally

The annual Mayo Rally took place in Castlebar on Sunday of last week. There was a good attendance of traders and punters on the day, with plenty of buying, selling and eyeball QSOs taking place. We also noted that Dave EI9FBB, our local DXCC card checker, was kept busy.

On Saturday night, ahead of the rally itself, Mayo Radio Experimenters Network, the rally organisers, had arranged presentations on Amateur Television and on Logbook of the World. Pat EI2HX gave us an excellent introduction to Amateur Television, showing us some of his collection of antennas, transmitters, receivers and connectors. For those in the audience more used to working with equipment designed for Kilohertz or Megahertz frequencies, the "Gigahertz" hardware Pat works with seems almost exotic.

Dave EI9FBB, who is not long back from DXpeditioning with the T32C group on Kiritimati, explained the ins and outs of the ARRL's Logbook of the World - an online alternative to paper QSL cards for those

working towards a DXCC award. Dave outlined the steps involved in setting up and maintaining a Logbook of the World account and also covered the security measures in place to ensure the integrity of the system.

Ham Radio on the Increase

There are over 700,314 ham radio licence holders in the United States, according to the FCC. There has been an increase of over 40,000 ham radio licences in the last five years alone. The ARRL refers to this era as the 'golden years.' According to Allen Pitts of the ARRL, he reckons that the USA has had over 20-25,000 new hams per year.

RTE

RTE may charge licence-fee payers for access to certain parts of its online operations, it has been revealed. The broadcaster is looking at ways to increase its revenue from its online and digital business. No firm decisions have yet been made.

Space Plasma Experiment

The Space Plasma experiment "Shadow" onboard the International Space Station (ISS) takes place using 145.825 MHz FM AX.25 packet radio at the end of this week Nov 25-28 and again on Dec 2-5.

DX News

Brian ND3F is at present active from the Bahamas as C6AQQ. He will be there till 6 December with activity mostly on the lower bands. QSLs go via his home call and also Logbook of the World.

Jim ND9M is back on the island of Diego Garcia in the Chagos Archipelago. The good news for the prefix chasers is that Jim has been issued a short-term special prefix licence, VQ91JC, for use until 4 December. After that date he will be using his usual callsign VQ9JC. He expects to be on the island till early March next.

For the 60m enthusiasts there is news from Chris GM3WOJ, who is now active as ZK2V on Niue Island in the Pacific, that he has permission to operate on 5403.5 kHz. This special permit is only valid from 1 - 7 December local time.

A Belgian group operated from the island of Rockall at the beginning of October and a number of EI stations were among the 1100+ stations that made it into the log. QSLs have already been printed and are on the way to their lucky recipients. To those who were not in the log in October there are rumours that another group will try to activate this difficult and dangerous location in the summer of 2013.

New TV Repeater

South Dublin Radio Club is in the process of installing a new television repeater with coverage over the greater Dublin area. The repeater, which is located on the three rock mountain, will transmit on 2390Mhz and receive signal in on 1249Mhz. While not on the air yet, initial tests have proved sucessful with perfect pictures received 60 miles away at the EI2ATR Cavan repeater site. The repeater will be linked by radio to the existing TV repeater system currently operating in Co Cavan, This repeater currently transmits on 1276.5Mhz, 2370 Mhz and 10.040Mhz and gives good coverage of Cavan/Louth/Meath Area.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1128. NZART Headquarters Infoline special issue 30s

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-28 05:29:33 UTC
From: "ZL1AMW (infoline)" <zl1amw@nzart.org.nz>
Message-ID: <E64E6009D82B4A24A6DD73A39C4EC414@AlanLaptop>

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

NZART Headquarters Infoline Special Issue 30s

28th November 2011

Increase in Amateur Power Limit

As announced by our President, Roy Symon, ZL2KH, in the November Official Broadcast, NZART is pleased to advise members that Radio Spectrum Management has agreed to our request that the general power limit for Amateur bands be increased.

>From 30 November 2011, the power limit for most bands will rise from 500 watts to 1000 watts peak envelope power (pX), as defined in ITU Radio Regulation 1.157. The only exception to this increase is for those bands (130 to 190 kHz, 505 to 515 kHz, 26.95 to 27.30 MHz and 921.00 to

928.00 MHz) which currently have lower limits and, in these cases, the current limits will continue to apply.

This is a very satisfactory conclusion to the HBARC Remit to the 2011 NZART Conference and will assist NZ Amateurs to:

* participate in weak signal work including EME, meteor scatter, DXing etc;

* remain competitive, despite our remoteness, when participating in contests.

For further information on licence conditions, please see the updated Amateur General User Radio Licence (GURL) on the RSM website:

http://www.rsm.govt.nz/cms/licensees/types-of-licence/general-user-licenc
es/amateur-radio-operators

Don Wallace, ZL2TLL, NZART Administration Liaison Officer

6W, SENEGAL
Mark,6W/AA1AC, announced to show up from La Sonome from Dec 4-11.
QSL via homecall.

BV, TAIWAN, AS-020
The special event station BV100 will take part in the upcoming
ARRL 160m CW Contest from Taiwan (AS-020). QSL via BV2KI.
See also: http://www.bv100.tw/EN

BY, CHINA, AS-102
Yuri,N3QQ, plans to activate Kinmen (Quemoy) Island (AS-102)
as BW/N3QQ in CW and SSB on 40-10m from Dec 3-6. QSL via N7RO.

F, FRANCE
The "Council of Europe Radio Amateur Club" (CERAC-TP2CE) is going to
activate the special event station TP50CE on Dec 2-4. Occasion is the
50th anniversary of the European Social Charter. QSL via F5LGF.
See also: http://ewwa.free.fr

Roald Amundsen together with his team was the first person to reach
the South Pole on Dec 14, 1911. Francois,F8DVD, is going to activate
the special callsign TM100SP (WAP 225) mainly in SSB on 10m-40m during
December to celebrate this special achievement. QSL via F8DVD.

GJ, JERSEY, EU-013
Martin,G3ZAY, Michael,G7VJR, Joe,JA1LZR, Harumi,JF1PJK, and
Yutaka,JQ2GYU, will be QRV in all modes on all bands (focus: lowbands)
signing GJ6UW from December 2-7. QSL via M0BLF & LoTW.

HH, HAITI, NA-096
Pierre,HH2/HB9AMO, is working only in CW during his spare time (evening
and weekend) until January 9. QSL via PA7FM, LoTW.

J6, ST LUCIA, NA-108
The Buddies in the Caribbean group specialised on DXpeditions with low power and Buddipole. They are visiting St. Lucia again from Dec 4-12. The OPs Budd,J68FF (W3FF), Guy,J68UN (N7UN), David,J6/WD9CMD (WD9CMD), Joe,J6/N7BF (N7BF), Steve,J6/WF2S (WF2S), Tom,J6/K9CJM (K9CJM), Bill,J6/AA40C (AA4OC), and Barclay,J6/WU1B (WU1B), plan to run three stations in CW, SSB, RTTY and PSK on 160m-10m.
They will use the callsign J68UN in the ARRL 10m Contest (Dec 10/11).
QSLs via homecalls (direct), LoTW, eQSL.
You can find more information on the websites:
http://suitcasedxpeditions.com
http://www.n7un.com
http://sites.google.com/site/caribbeanbuddies

JD1/MT, MINAMI TORISHIMA, OC-073
Take,JG8NQJ/JD1, plans to show up again on all bands from Minami Torishima (Marcus Island, OC-073) in December. QSL via homecall.
Logsearch at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

KG4, GUANTANAMO BAY, NA-015
Norman,AH0AJ, is signing KG4AJ from Guantanamo Bay (NA-015) for the next two years. QSL via homecall.

KH2, GUAM, OC-026
Yoshiaki,W3JH/KH2 (JD1BNX), plans to visit Guam (OC-026, USi GU003S, WFF KFF-110, WLOTA 0064) from Nov 30 until Dec 5.
He may join the TARA RTTY Melee Contest as well.
QSL via JR3QFB, unfortunately only direct.

LY, LITHUANIA
Vilmantas,LY3BY, will use the special call LY100SP (WAP-206) mainly in CW on HF from Dec 5-25. QSL via homecall.

LZ, BULGARIA
Members of the "Balkan Sports Club" will activate the special callsign LZ1363PTT during December. QSOs are good for the "All Bulgarian Saints" award also. QSL via LZ1KZA. See: http://www.balkanclub.org/awards.htm

PA, THE NETHERLANDS
Approaching the end of the 65th anniversary of the International Short Wave League (ISWL) Fred,PA0FAW, will be QRV as PG65ISWL from Dec 1-28.
Listen for him mainly in CW/PSK and only little SSB (PAFF-005).
QSL via bureau, direct, eQSL, no LoTW.
SWL reports are welcome. See also: http://www.iswl.org.uk

SV, GREECE
The special event station SX100A celebrates the 100th birthday of the Greek warship "Georgios Averof" from Dec 2-4. The station is operated from the radio shack of the ship. QSL via bureau.

UR, UKRAINE
Following special event stations are celebrating 20 years of Ukrainian independence from Dec 1-30:
EM20C (via UX5PC) EM20L (via US0LW)

EM20LTD (via UR3LTD) EM20UJ (via UR5UJ)
EM20UKR (via UR7UC) EM20UU (via US7UU)
EM20V (via UR2VA) EN20C (via UX7CQ)
EN20UO (via UX5UO) EN20UP (via UT4UP)
EN20UZ (via UR5UZ) EN20W (via UR4WWE)
EO20IGN (via US7IGN) EO20IO (via UX3IO)
EO20IZ (via UX5IZ) EO20K (via UR4KWA)
EO20M (via UX7MA) EO20UD (via UR7UD)
EO20UM (via UT0UM) EO20UR (via UT7UR)
EO20UU (via UT7UU) EO20ZZ (via US0ZZ)

A few members of the Black Sea Contest Club (BSCC) will be active as
EM0BSCC/mm from Dec 1 until Feb 28. QSL via UU0JM.
More information is available online at: http://www.bscc.in

V5, NAMIBIA
A German team will visit Namibia from December until January 2012.
Mathias,V5/DJ2HD, Wolfgang,V5/DH3WO, Ulmar,V5/DK1CE, and Ewald,V5/DJ2BQ
will be QRV in CW, SSB and RTTY on 160m-10m like this:
V5/DJ2BQ Dec 2 -Jan 16
V5/DJ2HD Dec 26-Jan 16
V5/DH3WO Dec 26-Jan 5
V5/DK1CE Dec 26-Jan 5
QSLs for V5/DK1CE via DH3WO, all other QSLs via homecalls.

VP5, TURKS AND CAICOS ISLANDS, NA-002
Dave,W5CW, is still active from Providenciales, North Caicos (NA-002,
WLOTA 1476) signing VP5/W5CW until Dec 14. He will also be QRV as VP5CW
in the ARRL 160m CW Contest (Dec 2-4) and ARRL 10m Contest (Dec 10-11).
QSL via homecall, unfortunately only direct.

XV, VIETNAM
Mal,VK6LC, plans to make CW and SSB pile-ups on 20m/17m/12m signing
XV2LC from Dec 2-8. QSL via homecall, unfortunately only direct.

Mike,OM2DX, is working in the embassy in Hanoi and can be found working
on the bands as XV9DX or 3W1M. QSL via OM3JW.

ZF, CAYMAN ISLANDS, NA-016
If you are still missing ZF you should listen for Bill,K9HZ, who plans
to become active as ZF2HZ from Rum Point/Grand Cayman Island (NA-016,
WLOTA 1042, Loc. EK99II). QSL via homecall, LoTW.

ZK2, NIUE ISLAND, OC-040
Chris,GM3WOJ, has a temporary license for the 60m band as ZK2V for a
limited time (5403.5 kHz; Dec 1,1100 UTC, until Dec 8,1100 UTC).
See also: http://www.zk2v.com

SILENT KEY
The DX community is mourning for Jean Pierre,F9RM, who was licensed
since 1948. Our thoughts are with Jean Pierre's family and friends.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Dec 2-4: ARRL 160m Contest, CW only
Dec 3/4: TOPS Activity Contest
Dec 3: TARA RTTY Melee
Dec 4: 10m RTTY Contest
Dec 10/11: ARRL 10m Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AN-016, several, Antarctica: Starting in December 2011 Felix,DL5XL, and
Lars,DL1LLL, will be QRV as DP0GVN from the German Neumayer III Station
(IOTA AN-016, AA DL-03, WAP DEU-08, WFF DLFF-022). Felix is going back
to Germany in February 2012 and Lars is preparing for the overwintering
until Feb 2013. QSL via DL5EBE (bureau/direct).

EU-013, GJ/MJ, Jersey: Martin,G3ZAY, Michael,G7VJR, Harumi,JF1PJK,
Joe,JA1LZR, and Yutaka,JQ2GYU, will be active as GJ6UW in SSB/CW/RTTY
on all bands from Jersey (IOTA EU-013, WLOTA 0818) from Dec 2-7.
If the conditions on 160m and 80m are good they want to listen
especially for Asia and Japan. QSL via M0BLF (bureau/direct/LoTW).

1130. Weekly Highlights of Solar and Geomagnetic Activity, 21 - 27 November 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-11-29 22:30:23 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20111129223007.C79AC33C8E@panix2.panix.com>

Highlights of Solar and Geomagnetic Activity
21 - 27 November 2011

Solar activity was low. Region 1356 (N15, L=230, class/area Ehc/400
on 21 November) was the most region significant during the period.
Region 1354 (S17, L=268, class/area Dai /220 on 20 November) began
the period with a steady decline in area and complexity, ending as a
simple Axx group. As Region 1354 declined, Region 1356 grew in spot
count and magnetic complexity. It produced seven C-class x-ray
flares and ten optical flares on the 22nd, the largest of which was
a C4 at 22/0404Z. Several coronal mass ejections (CMEs) were
observed throughout the week; however Type II radio emissions were
only reported on 23/0847Z (1008 km/s) and 25/2154Z (931 km/s). The
sole CME expected to threaten earth was a full halo event on
26/0710Z that originated from a filament eruption near N08W49
accompanied by a long duration C1 flare. The CME was first evident
in LASCO C2 imagery at 26/0712Z and also easily seen in STEREO-A
COR2 imagery. Its velocity was estimated to be 790 km/s.

A greater than 10 MeV proton flux greater than 10 pfu event began
26/1125Z associated with the filament eruption described in the
solar summary. This event was still in progress at the time of this
report and reached a maximum of 80 pfu at 27/0125Z.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels the entire period.

Geomagnetic field activity was generally quiet. Brief unsettled to
minor storm periods were observed at high latitudes on 22 and 24
November associated with prolonged negative Bz.

Forecast of Solar and Geomagnetic Activity
30 November - 26 December 2011

Solar activity is expected to be at predominately low levels with a
chance for isolated M-class activity due to the anticipated return
of several active regions.
```

The current 10MeV proton event in progress is expected to end by prior to the beginning of the outlook period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels the entire period.

Geomagnetic field activity is expected to begin the forecast period at unsettled to active levels as a coronal hole high speed stream becomes geoeffective. Conditions should persist for a day or so before calming to mostly quiet levels from 01 December onward. Another coronal hole high speed stream is expected on 09 and 10 December, when activity may again increase to unsettled and active conditions. Mostly quiet conditions are anticipated once again from 11 - 23 December before the next coronal hole high speed stream is forecast to be geoeffective and produce unsettled to active conditions on 23 December. Mostly quiet conditions are forecast from 24 December through the end of the period.

1131. [RAC-Bulletin] RAC Bulletin 2011-038E RAC - CaféPress Site.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

WIANEWS WEEK COMMENCING DECEMBER 04 2011.

MORE POWER TO YOU! -

WIA OFFICE MANAGER MAL BROOKS ON OFFICE CLOSURE AND WIA AGM. -

RSGB Commonwealth Century Club Jubilee Award 2012. -

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING DECEMBER 4 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

MORE POWER TO YOU!

We start this WIA bulletin by listening to NZART President, Roy Symon, ZL2KH,
in their November Official Broadcast.

"NZART is pleased to advise members that Radio Spectrum Management has agreed to
our request that the general power limit for Amateur bands be increased. From
30 November 2011, power limit for most bands will rise from 500 to 1000 watts
peak envelope power (pX), as defined in ITU Radio Regulation 1.157.

The only exception to this increase is for those bands (130 to 190 kHz, 505 to 515 kHz, 26.95 to 27.30 MHz and 921.00 to 928.00 MHz) which currently have lower limits and, in these cases, the current limits will continue to apply.

This is a very satisfactory conclusion to the HBARC Remit to the 2011 NZART Conference and will assist NZ Amateurs to:

participate in weak signal work including EME, meteor scatter, DXing etc;

remain competitive, despite our remoteness, when participating in contests.

For further information on licence conditions, please see the updated Amateur General User Radio Licence (GURL) on the RSM website."

(Don Wallace, ZL2TLL, NZART Administration Liaison Officer)

As soon as it became available, the WIA provided the ACMA with a copy of the amended New Zealand amateur General User Radio Licence, pointing out that many Australian amateurs would seek to rely on the New Zealand decision and also again expressing concern at the long delay that had occurred in the consideration of our own submission.

On 15 October 2010 the WIA had lodged a submission with the Australian regulator, the ACMA, seeking a power increase for Advanced licensees on the amateur primary allocations on a case by case basis.

The WIA argument and proposal was fully set out in the Comment in the November 2010 issue of Amateur Radio magazine.

After that, at the request of the ACMA, the WIA provided further information. Representatives of the WIA met with ACMA staff from the Licensing Development Section of the Infrastructure Regulation Branch on the 16th May 2011 to clarify certain aspects of the submission and the additional information that had been provided.

As soon as it became available, the WIA provided the ACMA with a copy of the amended New Zealand amateur General User Radio Licence, pointing out that many Australian amateurs would seek to rely on the New Zealand decision and also again expressing concern at the long delay that had occurred in the consideration of its submission.

The ACMA has told the WIA that the delay is regretted, but that it was committed to resolving the issue, taking into account the New Zealand decision, within the next three weeks.

I'm Geoff Emery, VK4ZPP, and I've been thinking.

Let me start by referring you to www.wia.org.au home page. In the news last week an item from Michael, VK3KI, explaining the logic behind the ACMA discussion paper on proposed price rises for different services. You will see that President Michael explains that these rises only apply to services delivered by ACMA not the contracted examination service conducted by the Institute.

I received a forwarded email containing the ACMA documents from one of my radio club members and reading the covering email and the explanatory document sent

shivers down my spine. And rightly so as it would suggest that to complete a Foundation assessment wouldn't have left much change out of $400. This seemed like the death knell of all our efforts in growing the hobby.

After forwarding this information to the club, the Queensland Advisory Committee via Mike VK4QS and our worthy News Editor, VK4BB, I was rewarded by a reply from Graham, the next day, directing me to Michael's explanation.

So for all the other amateurs who were spooked like me it is gratifying to find a simple explanation that allows the blood pressure to drop. However 2 things strike me, namely that the discussion paper was released on the 6th November and the forwarded email was dated 21st November; secondly the Australian Government publishes a writing style guide to help the public service draft documents which are clear, concise and unambiguous so why were we amateurs looking as if we were being shafted?

I'm Geoff, VK4ZPP and that's what I think.....how about you?

(qnews dec 4)

ACMA proposes changes to Melbourne commercial radio service 3MP

The Australian Communications and Media Authority is seeking public comment on a proposal to amend the operating conditions of Melbourne commercial radio broadcasting service 3MP.

3MP is also known by its on-air ID's 3MTR and MTR1377.

The ACMA is proposing to increase 3MP's transmitter power and change the directionality of its radiation pattern to improve reception in northern and western Melbourne.

(sourced to acma)

Personalised learning the new way forward for Australian students

According to Susi Steigler-Peters, author of Personalised Learning and Telstra General Manager for Education, today's student is transforming how education is delivered and how new technologies can provide an enhanced learning experience.

"Today's students are growing up in an environment saturated with technology and, as a result, the old broadcast method of teaching doesn't fit anymore.

"Students are looking for a robust learning ecosystem that is 'learner centric', taking into account the needs, interests, and learning style of the student and leveraging technology in a meaningful and engaging way," Ms Steigler-Peters said.

Schools could make use of services such as video conferencing, unified communications, SMS, MMS and mobile devices.

The research also highlights the opportunity that smartphones and tablets provide teachers in the classroom, such as schedules, assignments and room changes sent straight to students' phones.

While on the go, students can post learning content and comments to class wikis or blogs and use instant messaging to collaborate.

The Personalised Learning whitepaper was launched at the Connectivity: Creating Learning Futures Conference in Melbourne.

A full copy of the white paper can be found online at www.telstra.com/education

CTCSS TONE ON THE PADDINGTON 2 METRE REPEATER - VK2ROT on 147.025 MHz

Listeners should note that the CTCSS access tone on this repeater has been changed to 91.5 Hz to help combat interference and also to be in common with most other Australian repeaters.

The Paddington 70 cm repeater tone remains unchanged for the time being.

Police Roundup http://www.vicpolicenews.com.au/

Announcing the Centre Victoria RadioFest No. 5, the date is Sunday the 12th of February. It is the major event in Victoria and will be held at the Kyneton Racecourse.

The Organising Committee from Amateur Radio Victoria is now busy developing the program - keep a watch on the website for more details.

Mini-lecture program coordinator Peter Cossins VK3BFG is reporting that he has secured Australia's first showing of home-brew digital television.

Also part of the program is a look behind the scenes at the ACMA, Digital Slow Scan TV and the Super DX station ZL6QU at Quartz Hill by its Chair of its Committee 1997-2011 and avid contester, Brian Miller VK3MI ZL1AZE.

The Centre Victoria RadioFest is on Sunday the 12th of February, put it in your diary right now.

Points are contact are:
Commercial Traders Liaison, Barry Robinson VK3PV 0428 516 001
Second hand tables are space, Ross Pittard VK3CE 0408 533 107
Club Corner Precinct, Tony Hambling VK3VTH 0423 635 152

(Bruce Lees VK3FFF)

A birthday not to be forgotten easily

The introduction of the limited edition Amateur Radio Victoria Centenary Award has certainly proven to be the success story of the year.

Although logs for the month-long special callsign VK100ARV are still being tallied, many thousands of QSOs were logged as radio amateurs around Australia and overseas were anxious to make contact.

It began on the Melbourne Cup weekend and ended last Tuesday with the duo of Terry Murphy VK3UP and Tony Hambling VK3VTH giving their all.

Thank you to the Scout Radio Electronics Unit, Western & Northern Suburbs Amateur Radio Club, The Digital Slow Scan TV Group, The VK3RTV Gang and the Sunraysia Radio Group.

Individual operators included Luke Steele VK3HJ, Peter Freeman VK3PF, Joe Walsh VK3XN, Michele Grant VK3FEAT and Keith Proctor VK3FT. All of their contributions toward the Centenary are now within the VK100ARV roster online

theTARCinc 2011 Christmas Party and Monster Auction happens on Sunday afternoon December 11th from 2-00pm at the VK4TJS Satellite Dish City.

During the afternoon the Mystery XMAS Pressie auction will take place so make sure you bring a suitably wrapped pressie for this fun event.

Bring your eskys full of drink (no glass please), your comfy camp chairs or picnic blankets for the BBQ, your cozzies if you want to go for a swim, some treasure for the Monster Auction, lots of small change for your Monster Auction and Pressie Auction purchases and your appetites -

A call for catering numbers is now underway. Make sure you get your numbers in to Gavin VK4ZZ otherwise you will go hungry

December 11th from 2-00pm.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

Last Saturday there was a good roll-up to the club's Christmas function which was held at 4 Mile creek hotel, Strathpine. It was good for many of the partners of members to also meet each other as well. Unfortunately Santa was not able to make the function but he did say that he would be coming later in the month.

The calendar of events for the rest of a really busy month is as follows:

Mon 5 December, a normal Social Meeting
Sat 10 December, 9.00am start, the Working bee. This has been shifted a number

of times but we have no room left for another shift this year.
The priority tasks for the morning are:

1. Replace the guttering on the roadside of the club house and recover whatever may be reusable as spares for failure on the opposite side. If you have ladders and tools for spouting-guttering type work could you bring them to the club.

2. Install Brackets and wiring for the 6 metre Yagi. The wiring is available at the club and will comprise 3 core cabling for the rotator and coaxial for the antenna feed. Again tools, ladders and cabling tools are needed as well as hammers, power drills etc for wiring installation, and finally,

3. Move the Kitchen Bench. This requires removal of screws fixing cabinet to base. Again power tools, screwdrivers, chisels, drills etc are needed. The base is to be left as is only the top is to be shifted. Roger, VK4ZLQ, estimates that it will take about 30 minutes to move the cupboard contents out, 20 minutes to shift and refix the bench, 30 minutes to restore the contents.

Monday 12 December, a General Meeting night and the last one for 2011.

Monday 19 December, it is the 3rd Monday is normally Technical Talk but nothing has been scheduled as yet.

Monday 26 December, the club will not be open,

Tuesday 27 December, Boxing Day, it is the Bunnings' Sausage Sizzle. There is an early morning start at 7.30am. Even if you cannot
complete a full morning or afternoon your attendance for
some part of the day would be greatly appreciated by all.
Please reply back to the club secretary, Roger, VK4ZLQ,
whether you can or cannot assist.

Monday 2 Jan 2012, the club is not anticipated to be open on this evening.

Well that's what is happening for the next month.
So it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

I'm Geoff Emery, VK4ZPP and I've been thinking.
Going back to February, this year, the Council of Australian Governments, COAG , adopted a report on emergency preparedness. This is available on the Attorney General's website under Emergency Management Australia.

By now you will have seen the TV adds and probably received the "Get Ready" brochure in the mail. You will notice that every household is requested to have an emergency kit which will provide support for 3 days.

I have previously issued reminders at the approach of the summer storm season for amateurs to prepare their station and have a go kit.

A recent program of the ABC Radio National "Future Tense" addressed the issues of emergency and disaster communications with particular emphasis on the worth of social media. The Qld Police Facebook postings were mentioned as a successful

implementation of this technology. However we all know that the capacity of the mobile phone system is soon overloaded during crises and internet connections usually require mains power. One fallen tree over the power lines can take this away. I believe that hobby radio amateur, CB and 4WD club land mobile can all make a big difference when the frailty of new technology deserts us.

That's what I think... how about you?

For QNews, this is Geoff VK4ZPP.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

USA Amateur Radio exams at Hamfest India-2011

An interesting one this, USA Amateur radio exams are scheduled to be conducted during the Indian (VU) Hamfest-2011 on 10th Dec 2011 at 5.30 PM.

Anyone who is interested can avail this opportunity and get their license before Christmas and New year celebrations!.

Even though walk-ins are allowed (subjected to VE team decision on the spot), it's strongly recommended to register!

http://sites.google.com/site/ab9usvu2ipl/

Speaking of US EXAMS, news that the USA a report that a six year old has gained her ticket.

Priscilla Harder KD0PLJ of Newton, Kansas earned her Technician class licence during a session held at the Kansas State Convention.

A part of a radio amateur family, her dad is Kent N0XOS and mother is Dana KB0RAT. Their youngest child is Phebe who hopefully will get her call sign in a couple of years.

Being within a radio amateur family is of great benefit as far as interest and learning is concerned.

The Australian Foundation Licence has proven to be popular and its recommended for individuals with a reading and concept ability at least a 10-year old.

(sourced to arv)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

AMATEUR RADIO AND THE ROCK N ROLL WORLD.

Joe Walsh WB6ACU celebrates

The Eagles reach their 40th anniversary by touring in 2012. In an interview with Rolling Stone Magazine, Joe WB6ACU said the band will pull out all the stops to create a new set up well worth the price of admission.

He revealed that he and his mates on the classic rock group will take to the road for about five months.

Joe WB6ACU said a lot of material had been archived from the Eagles early days, including concert footage, interviews and the like.

(ultimateclassicrock.com/the-eagles-tour-next-year/)

"Crocodile Rock" Amateur Group will be operating the special event callsign GB2PG on 3/4th Dec and 10/11th Dec 2011 from Ardrossan, Scotland.

This event is to commemorate the 90th anniversary of the first shortwave transatlantic radio signals being received in Ardrossan by the American Paul Godley in December 1921.

The station will be active mostly on 80 - 10 metres SSB with some CW.

QSL QTHR via Buro or GM0DEQ.

For live blog updates please visit
http://gb2pg.blogspot.com/

A reminder that if you have been putting off working through the ARISSat-1 repeater, receiving SSTV pictures, or submitting telemetry, the next few weeks will be your last opportunity to be a part of this satellite's history.

Since deployment in August, ARISSat-1 has descended about 60 km, and is currently losing more than 1.5 km per day. The rapid rate is partially the result of the recent solar activity on the atmosphere, significantly increasing the drag.

The predictions by several individuals and groups are all converging toward a re-entry in January or February, 2012.

The orbit period changes about 30 seconds per day, and that will increase steadily. Be certain to update your tracking program Keps from Space-Track or CelesTrak before each pass.

They issue revised versions 3-5 times daily.

As the descent continues, this will become even more critical to copying the telemetry beacon.

==========

NEWS FROM ARNEWSLINE USA

HAMS ASKED TO HELP IN ISS PLASMA EXPERIMENT

The Central Research Institute of Machine Building in Russia has proposed a test using the worldwide ham radio community to receive a VHF packet downlink on 145.825 MHz This from a new plasma space experiment on the International Space Station.

The Central Research Institute is conducting a series of space plasma experiments in order to evaluate the shape of previously observed "dead" zone, or shadowing due to the firing of an on-board arc jet plasma source.

Radio Amateurs are invited to participate in this space plasma experiment known as Shadow. One matter of interest is that highly ionized exhaust plumes may scatter RF signals producing large communications free zone.

More on this experiment and how to participate is on-line at tinyurl.com/plasma-in-space

RATS DAMAGE RADIO NETHERLANDS TRANSMITTER ON BONAIRE

Radio Netherlands is kind of saying "Oh rats!" This with word that the international shortwave broadcaster has encountered serious damage to one of its Thomson transmitters on the island of Bonaire due to an invasion of the pesky critters.

According to Media Network, the vermin have destroyed part of the transmitters high voltage power supply and the station is awaiting the arrival of spare parts have from Switzerland. Radio Netherlands hopes to have the damage repaired by the time this newscast goes to air.

==========

WEIRD AND WONDERFUL

Now here is something to ponder in the Weird and Wonderful File.
Submitted by Kevin, VK4KEV, recently returned from Macquarie Is.

Why do we say 73 at the end of a QSO?

It's not, as some think, the legacy of an archaic code; rather it is a very, very special number and needs to be celebrated regularly.

Why is 73 so special?

Spell it out and you'll find it has 12 letters in its name.

Indeed this is the smallest integer to do so.

Read on and see why this is significant.

The mirror of 73 is 37 and this is the 12th prime number,
73 is the 21st prime number and guess what multiplies to make 21?
Yep, 7 & 3!

To make 73 even more interesting it is a palindrome in binary - 1001001 which is the same backwards or forwards.

Of the 7 digits used to represent 73 in binary, 3 are ones.

So you think it's coincidence that we wind up our QSO's with 73?

No - let's celebrate that unique number -

73 for now!

I'm Geoff, VK4ZPP

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E

2012

January VK Ross Hull Memorial VHF UHF Contest

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

June Long Weekend (vk4 time) VK Shires Contest.

July First full weekend NZART Memorial Contest

August VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Phil is in Chad and active as TT8PK until 23rd December.
Activity is limited to his spare time.
QSL TT8PK via F4EGS.

Mark, 6W/AA1AC on the air from 4th to 11th December from Senegal.
He plans to be on 80 through 10m.
QSL via the bureau or direct to his home call.

Special prefixes for Canadian radio amateurs

To celebrate the 75th Anniversary of CBC/Radio Canada, 1st of December to the
31st of December 2011, Canadian Amateurs may use the following prefix,

VG for VA,

VX for VE,

XJ for VO,

XK for VY.

Peri, HB9IQB, will be in Palestine in December and has a licence as E4/HB9IQB.
Mostly on CW on 12, 17 and 30.
www.hb9iqb.ch/palestine.html

Morse celebrations

Members of the Japan A1 Club will activate the following special
call sign until December 31st:

8J1MORSE, 8J1MORSE/2, 8J1MORSE/3 etc,
according to the district from which they are active from. Activity is to
celebrate 220th anniversary of Samuel Morse's birthday.

Operations will be mainly CW, with some SSB (to explain the novices how to
join the CW community). Some special awards are also available too.

QSL by the Bureau

Logs will be uploaded to LoTW as well.

For more details, the English rules and information are available at:
http://8j1morse.a1tokai.net

Just a reminder for the prefix hunters that the station LM9L40Y
will be on the air until the end of December.

This call is operated by members of the LA9L radio club in Norway and is
to celebrate the 40th anniversary of the club.

AWARDS

RSGB Commonwealth Century Club Jubilee Award 2012

2012 is the Queen's Diamond Jubilee and mindful that the Queen is the head of
the Commonwealth of Nations we are pleased to announce a new operating award
for 2012.

To qualify for an attractive certificate all you need to do is to work as many
different countries and call areas on the Commonwealth Century Club list
during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from
www.beru.org.uk/CCCaward/CCCindex.html

G3PJT@btinternet.com

To commemorate the 25th anniversary of the FISTS Club founding a new award has
been established.

Announced in the latest edition of the FISTS Downunder magazine, it marks the
founder as the late Geo Longden G3ZQS and comes in three versions.

The FISTS Club was founded in 1987 after recognising a need for a club in which
veteran operators would help newcomers and less-experienced operators learn and
improve CW or Morse code proficiency.

FISTS Downunder is the chapter in Australia and New Zealand.

In summary

Version 1 is a basic open ended award for working 25 unique prefixes
Version 2 is the same but with a time limit
Version 3 is confined to working FIST members.

With increased propagation on HF the new and established FISTS awards are
expected to be popular indeed.

Full details are headed Prefix Awards at
http://www.fistsdownunder.org/awards.htm

Technology Show Gives Thumbs Up For Amateur Radio

Tech Talk Radio is a weekly IT and technology show with a listening audience of thousands of technology enthusiasts and professionals, it is aired across a network of 25 broadcast stations.

This week's show featured an interview with Robert Broomhead VK3DN talking about amateur radio.

Various aspects of amateur radio were covered in a concise fashion through the lengthy interview. Robert VK3DN told how he had visited schools where students chatted with orbiting astronauts, and drew on his experience at this year's IARU Region 3 ARDF Championships held at Maldon.

FISTS Club - Americas www.fists.org

FISTS Club Down Under say the 2011 Christmas Key is a miniature camelback key made by GHDTelegraph Key in Sendai City Japan, incorporating traditional Japanese craftsmanship with GHD's impeccable engineering and finish.

In keeping with GHD's larger keys, the Morse Express 2011 Christmas Key is fully adjustable, with precision pin bearings at the trunnion, miniature binding posts, comfortable knob, and perfect balance. The contacts are hard-silver and the finish is satin chrome plate.

The distinctive base is beautifully grained mahogany, and the knob is hand-turned.

GHD's Toshihiko Ujiie uses both modern and traditional techniques to produce a miniature key that will be equally at home in the radio shack, in the field, or decorating a Christmas tree.

According to Marshall Emm N1FN "The Christmas keys have always been a labour of love for me and my first priority has always been usability. GHD has brought considerable expertise to the precision manufacture of the Christmas keys, and the 2011 is about as small as you can make a key and still have good functionality.

The 2011 key measures 5.08 cm by 2.86 cm at the base and it weighs less than 57 gm. The 2011 Christmas Key is a LIMITED EDITION of 180 keys priced at $89.95, plus shipping and handling. Each key has a label with Christmas2011 and a unique serial number.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

AMSAT-NA VP Operations, Drew Glasbrenner, KO4MA reported today,
"It is with a heavy heart I report that AO-51 has ceased transmission
and is not responding to commands."

Drew wrote, "The last telemetry data indicated that the third of six batteries was approaching failure to short, and observations indicate the voltage from

three cells is insufficient to power the UHF transmitters.

We have tried leaving the satellite in an expected state where if voltages climb high enough, the 435.150 transmitter may possibly be heard."

The command team will regularly attempt communications with the satellite over the coming months (and years). There is always the possibility that a cell will open and we could once again talk to our friend while illuminated.

AO-51. It's 7 year mission has been extraordinary.

** Meteorscatter Propagations in December 2011 **

December is, as usual, characterized by the return of one of the
most active (and probably the most reliable) major annual showers:
the Geminids. Geminids maximum is expected to occur on December
14th, 17h30m UT, with ZHR = 120 hr-1 at peak. The Geminids peak
is typically quite broad (thus ensuring a several-days-long period
of good MS activity) , although the rates sometimes decay fairly
quickly after the maximum. Have a look to Geminids predictions and
tips, as well as those for other minor showers in December 2011

** HK0NA Malpelo Isl. DXpedition 2011/2012 **

Recently three US members (K4UEE, N4GRN and W6IZT) of the Malpelo 2012 DXpedition flew to Cartagena, Colombia and met with six of their Colombian counterparts. The purpose of the two day meeting was to make some critical decisions about the upcoming DXpedition to Malpelo Island. Also, checklists and inventories were finalized and all team members' responsibilities were assigned.
Since it is highly unlikely that the various Colombian authorities will permit another DXpedition to Malpelo anytime soon; a decision was made to extend the DXpedition to 16-17 days from the previous 12-14 day plan. The approximate dates of operations will be January 21, 2012 through February 5/6, 2012.
Four team members will travel with all equipment, radios, antennas and infrastructure to Malpelo in early January. They will be transported by the Colombian Navy. They will arrive about two weeks prior to the rest of the Team and will set up camp, the two operating sites, radios and antennas. They will spend about 30 days on the island. This will allow the rest of the team to begin radio operations immediately upon arrival by chartered vessel.
As mentioned there will be two operating sites, each with a complete complement of antennas and radios with amplifiers. The first operating site will be co-located with the Colombian marine's camp on the east side of the island. It is clear to East Coast USA, EU and Africa. In order to have a clear shot at JA/Asia, the Pacific region and W6/W7; the second operating site will be located near the top of the highest mountain peak on the island. However, to lessen the physical risks to the team members, the operating site will be located on platforms situated below the actual peak. Still, it will be a 45 minute uphill climb to reach the platforms. The antennas for that site will be on the top of the mountain peak. At times, there will be as many as nine stations QRV with the capability of dual mode operations on all bands.
Safety of the team is paramount. We will be installing a winch system to hoist team members and all of our equipment from our chartered ship's Zodiac onto the island. From there, manpower will carry the equipment the 300 meters straight uphill to the marine camp. The trail to the elevated operating site is extremely dangerous. We will utilize harnesses and safety ropes to minimize the risks. This is going to be a difficult and expensive DXpedition
Every effort will be made to maximize QSOs while protecting the safety of the team members. It is a delicate balance. Your financial support is necessary and gratefully accepted.
Contributions can be made via our website at: www.hk0na.com/sponsors
We plan periodic press releases with information of interest. Also watch the website for breaking news.

RAC Bulletin 2011-039E - Radio Amateurs of Canada Executive for 2012-2013
2011-11-30

It gives me great pleasure to announce your incoming Radio Amateurs of Canada Executive members for 2012-2013.

RAC President - Geoff Bawden, VE4BAW
First Vice President - Ian MacFarquhar, VE9IM
Chief Field Services Officer - Doug Mercer, VO1DM
Chief Information and Technology Officer - James Hay, VE2VE
International Affairs Officer - George Gorsline, VE3YV
Regulatory Affairs Officer - Bill Gade, VE4WO
RABC Representative Officer - Norm Rashleigh, VE3LC
Honourary Legal Counsel - Marcel Mongeon, VA3DDD
Corporate Secretary - Paul Burggraaf, VO1PRB

There were no candidates for Treasurer, Public Information Officer or the Member Services Officer positions. I would like to thank Nominations Committee Chairperson Ed Frazer VE7EF and the RAC Directors for their assistance in the Executive nomination and election process.

Congratulations are extended to the Executive members above and thank you for your service and willingness to step forward for the national organization.

On behalf of the Board of the Radio Amateurs of Canada, I wish to express a sincere "Thank You and Happy Retirement from the RAC" to VPIA Daniel Lamoureux, VE2KA for his many years of dedicated service in numerous roles to the RAC. Last but not least, a sincere "Thank You" to VPRA Richard Ferch, VE3KI for his three terms keeping the regulatory side on the forefront and to Treasurer Margaret Tidman, VA3WXM for taking on the financial reigns the past two years.

Paul Burggraaf VO1PRB
RAC Corporate Secretary

==> + FCC NEWS: FCC GRANTS SECONDARY SERVICE ALLOCATION TO WIRELESS
BROADBAND MEDICAL MICROPOWER NETWORKS

In their regular meeting on Wednesday, November 30, the four FCC
Commissioners unanimously agreed to allocate spectrum and adopt service
and technical rules for the utilization of new implanted medical
devices that operate on 413-457 MHz (70 cm). These devices will be used
on a secondary basis as part of the Medical Data Radiocommunication
Service in Part 95 of the FCC rules. The Amateur Radio Service also has
```

a secondary allocation on the 70 cm band. These new rules are the result of a Notice of Proposed Rule Making that the FCC released in March 2009. A Report & Order that will define these new rules is expected soon.

According to the FCC, these devices would greatly expand the use of functional electric stimulation to restore sensation, mobility and function to those persons with paralyzed limbs and organs; they would be implanted in a patient and function as wireless broadband medical micropower networks (MMNs).

Calling the new rules an "advance[ment of] its mobile broadband agenda," the FCC said this will create "a new generation of wireless medical devices that could be used to restore functions to paralyzed limbs. Medical Micropower Networks (MMNs) are ultra-low power wideband networks consisting of multiple transmitters implanted in the body that use electric currents to activate and monitor nerves and muscles." The Commission also noted that its National Broadband Plan -- released in 2010 -- observed "that the use of spectrum-agile radios and other techniques can significantly increase the efficient use of radio spectrum to meet growing demand for this valuable resource. MMNs illustrate how advanced technology can enable the more efficient use of spectrum to deliver innovative new services." Read more here <http://www.arrl.org/news/fcc-grants-secondary-service-allocation-to-wireless-broadband-medical-micropower-networks>.

==> + AMATEUR RADIO IN SPACE: AMSAT ANNOUNCES END OF OSCAR 51 MISSION

AMSAT-OSCAR 51 <http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=1> -- the popular FM repeater satellite -- has likely reached the end of its operational lifespan. AMSAT-NA Vice President of Operations Drew Glasbrenner, KO4MA, issued the following statement on November 29: "It is with a heavy heart I report that AO-51 has ceased transmission and is not responding to commands. The last telemetry data indicated that the third of six batteries was approaching failure to short, and observations indicate the voltage from three cells is insufficient to power the UHF transmitters. The IHU [internal housekeeping unit] may continue to be operative. Initial tests with the S band transmitter were also not positive, although more attempts are in order. We have tried leaving the satellite in an expected state where if voltages climb high enough, the 435.150 transmitter may possibly be heard. The command team will regularly attempt communications with the satellite over the coming months (and years). There is always the possibility that a cell will open and we could once again talk to our friend while illuminated. Thanks to all who helped fund, design, build, launch, command, and operate AO-51. Its 7 year mission has been extraordinary."

==> + ON THE AIR: THE ARRL 10 METER CONTEST -- GET ON WHILE THE BANDS ARE HOT!

Ten meters -- in case you haven't heard, is alive in a big way! That means that the ARRL 10 Meter Contest -- coming up the weekend of December 10-11 -- is going to be the one of the best we've seen in years! During this event, many propagation modes will be available: Sporadic-E will help you work stateside stations, a touch of meteor scatter in the morning will give you split-second chances to work stations -- you'd better be quick, though! -- and DX stations will be plentiful, thanks to the return of F2 propagation. ARRL Contest Branch Manager Sean Kutzko, KX9X, said that he keeps hearing from numerous hams who have been licensed only three or four years, telling him that they've never experienced a 10 meter opening because they weren't licensed during the last solar cycle peak: "A common phrase I'm hearing is, 'Now I understand what all the Old-Timers in my club were talking about -- 10 meters is great!' With a concentration of activity for the contest, there will be an opportunity for the first time in several years to experience the beauty of a wide-open 10 meter band. With so much excitement worldwide over the great conditions, the 2011 ARRL 10 Meter Contest could see the highest level of participation in a very long time!" Read more here <http://www.arrl.org/news/the-arrl-10-meter-contest-get-on-while-the-bands-are-hot>.

==> + ON THE AIR: 2012 MALPELO DXPEDITION TO BE EXTENDED

The HK0NA DXpedition to Malpelo -- an island located approximately 235 miles from Colombia's Pacific coast -- is scheduled for early 2012. Organized by the DX Radio Amateur Club out of Colombia, the DXpedition boasts an international team of 16 operators from eight countries. According to DXpedition leader Jorge Prieto, HK1R it is highly unlikely that the various Colombian authorities will permit another DXpedition to Malpelo anytime soon. With this in mind, he said that the dates of the DXpedition will be extended by two to three days from the previous 12-14 day plan. The approximate dates of operations will be January 21-February 5/6, 2012. Operations are planned on 160-6 meters on CW, SSB and Digital modes, including EME. Malpelo is currently #12 on DX Magazine's 100 Most Needed Countries Survey. Read more here <http://www.arrl.org/news/2012-malpelo-dxpedition-to-be-extended>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of November -- takes a look the 2011 Division elections, the latest happenings at W1AW, microwave bandplanning, freshman engineering students getting their Technician tickets, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-40>.

==> + LOGBOOK OF THE WORLD: LOTW PROCESSING UPDATE

Logbook of The World (LoTW
<http://www.arrl.org/logbook-of-the-world>) is continuing to accept and
process logs, including logs from this past weekend's CQ World Wide CW
Contest. Before the contest, LoTW had just about caught up with the
backlog, but due to the high number of logs submitted after the
contest, is once again seeing delays. As of December 1, the processing
delay is at 22 hours -- down from 45 hours last week -- with
approximately 830,000 QSOs in 2500 logs still waiting to be processed.
If it has been more than 48 hours since you uploaded a log to LoTW and
your log has not yet been processed, please upload it again. Remember:
Do not send entire logs that contain previously uploaded QSOs -- use
the date range option when signing logs, selecting only those QSOs in a
specific date range to upload to LoTW. Thanks again for your patience.

==> LAUREN CLARKE JOINS ARRL STAFF AS INDIVIDUAL GIVING MANAGER

The ARRL is pleased to welcome Individual Giving Manager Lauren Clarke
to the Headquarters staff in Newington. Lauren -- who will be working
in the ARRL Development Office -- will be taking over the many funds in
the Development Office, such as the Diamond Club
<http://www.arrl.org/the-arrl-diamond-club>, the Education & Technology
Fund <http://www.arrl.org/education-and-technology-fund>, the Spectrum
Defense Fund <http://www.arrl.org/spectrum-defense-fund> and the W1AW
Endowment Fund <http://www.arrl.org/w1aw-endowment-fund>. This will
allow ARRL Chief Development Officer Mary Hobart, K1MMH, to shift her
focus to the ARRL Second Century Campaign
<http://www.arrl.org/files/media/News/ARRL_Second_Century_Campaign_Vision_Sta
tement.pdf>.

Though Lauren comes to the ARRL with more than 20 years of
experience in non-profit fundraising, this is her first experience with
a technology organization. "My background has been primarily focused on
the social services and arts side of the coin," she said. "I've worked
with the United Way, the Greater Hartford Arts Council and the
Wadsworth Athenaeum. I am very excited to be here at the ARRL. The
League does wonderful work and it is wonderful to see how our members
embrace it and Amateur Radio."

Lauren expressed her appreciation to the ARRL volunteers, members and
staff who have welcomed her here at ARRL Headquarters: "Everyone has
all been very welcoming and helpful as I learn about Amateur Radio and
work toward getting my Amateur Radio license. We are definitely a team
in the Development Office, and I hope to build on the hard work of Mary
and Development Associates Margie Bourgoin, KB1DCO, and Maryann
Macdonald to continue raising funds to support the ARRL's initiatives."

As she learns more about the ARRL and Amateur Radio, Lauren said she
finds that her primary interest is Emergency Communications and the
ARES® program. "With so many terrible storms and natural disasters that
have hit the US and other countries recently, I am proud to be
associated with an organization that supports the volunteers who
quickly step in to help people and their communities during these
disasters," she explained. "I am looking forward to the Dayton

Hamvention® in May and meeting many of our members and donors in person."

"When Lauren joined the Development staff, she dove right in, working on the departmental budget details and 2012 plan," Hobart said. "She has taken a fresh look at some key fund raising programs and she is adding value to whatever she does. The ARRL is very fortunate to have in Lauren an experienced Development professional who shares our fund raising philosophy and is building solid relationships with staff and donors. I am confident that Lauren has a bright future at ARRL."

Lauren and her husband live in the Greater Hartford area. They have two children: a daughter who is attending Tufts University and a son in high school. Lauren and her family are active in the local Labrador Retriever rescue organization and serve as foster parents for dogs awaiting adoption. She also enjoys recreational rowing and gardening. If you would like to discuss giving opportunities with the ARRL -- or would just like to welcome Lauren to the ARRL family -- you can reach her via e-mail <lclarke@arrl.org> or by phone at 860-594-0348.

==> DAYTON HAMVENTION: CHARLES KAISER, KD8JZR, NAMED DAYTON HAMVENTION® ASSISTANT GENERAL CHAIRMAN

On November 21, 2012 Dayton Hamvention® General Chairman Mike Kalter W8CI, announced that Charles Kaiser, KD8JZR, would take over as Assistant General Chairman of the largest hamfest in the US. Kaiser is replacing Josh Long, KD8BVD, who stepped down due to work commitments. "I am lucky to find someone who is as committed as Charles," Kalter said. "He has served on a number of committees and knows Hamvention well. I know he will be an excellent assistant." Kaiser, who is retired, said that he considered the time requirements carefully before accepting the position and is ready to devote as much time as needed to ensure that the 2012 Hamvention is a success. Read more here <http://www.arrl.org/news/charles-kaiser-kd8jzr-named-dayton-hamvention-assistant-general-chairman>.

==> SOLAR UPDATE

Tad "Like the Moon and the stars and the Sun <http://www.youtube.com/watch?v=EqP3wT5lpa4>" Cook, K7RA, reports: November conveniently ended on the last day of the data reporting period for the upcoming bulletin, so we can now look at recent averages. Solar Cycle 24 continues to turn up. We have a new high for the trailing three month daily sunspot number average. Starting with the three month period ending in December 2010 and going through November 2011, they were: 30.1, 35.3, 55.7, 72.3, 74.4, 65.9, 61.5, 63, 79.6, 98.6 and 118.8. There hasn't been a three month period with average daily sunspot numbers above 118.8 since way back in June, July and August 2003, when the average was 121.9. The latest forecast from NOAA/USAF has the solar flux on December 1-11 at 145, 140, 135, 135, 140, 135, 135, 145, 150, 150 and 155, and then at 160 on December 12-18. The planetary A index on December 1-10 at 8, 8, 7, 7, 5, 7, 5,

5, 8 and 8, and then 5 on December 11-22. In case you missed it, we had an extra bulletin on Monday morning <http://www.arrl.org/news/the-k7ra-solar-update-193>, and last week's bulletin was a day early <http://www.arrl.org/news/the-k7ra-solar-update-192>. Look for more information on the ARRL website on Friday, December 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Instant Karma! (And We All Shine On) <http://en.wikipedia.org/wiki/Instant_Karma%21>.

==> + ARRL CONGRATULATES: ALLEN BAKER, KG4JJH , WINS NOVEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for November is Allen Baker, KG4JJH , for his article "Build Your Own DSP Speaker. " Congratulations Allen! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the December issue today.

==> HAMS LISTEN TO MARS SCIENCE LABORATORY SIGNAL

As NASA's Mars Science Laboratory was streaking away from Earth just seven hours after its November 26 launch, amateurs using the AMSAT-DL <http://www.amsat.org/amsat-dl/adl-engl.html> facility in Bochum, Germany eavesdropped on its 10 GHz telemetry signals. At 21:45 UTC, the spacecraft was about 70,000 miles from Earth, heading for a rendezvous on the red planet in August 2012. James Miller, G3RUH, remotely reconfigured the Bochum tracking and receiving system, aiming the 20 meter parabolic dish antenna toward the Mars Science Laboratory. According to Miller, the signal had a spin-modulation of +/-3.5 Hz at two revolutions per minute. The dish at Bochum is also used by AMSAT-DL to automatically receive real-time solar data from the NASA STEREO A/B satellites. The data is transmitted to a NOAA server in the US via the Internet.

==> + AMATEUR RADIO FUN: THE NIGHT BEFORE CHRISTMAS -- FROM A HAM'S PERSPECTIVE

Just in time for the Holidays, Gary Pearce, KN4AQ, has created a video version of Clement Clark Moore's poem A Visit from St Nicholas -- more commonly known as The Night Before Christmas -- but Pearce's version has a decidedly Amateur Radio twist. With a guitar accompaniment by Don Mercz, WA3AYR, A Ham's Night Before Christmas features QST magazine covers, Gil cartoons and Christmas-themed QST advertisements from days gone by. Click here <http://www.youtube.com/watch?v=c_9REVC4dtc> to watch the video on the ARRL YouTube channel.

==> THIS WEEK ON THE RADIO

This week:

- December 2 -- NCCC Sprint
- December 2-4 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 3 -- TARA RTTY Melee; Wake-Up! QRP Sprint
- December 3-4 -- TOPS Activity Contest
- December 4 -- 10 Meter RTTY Contest
- December 6 -- ARS Spartan Sprint

Next week:

- December 9 -- NCCC Sprint Ladder
- December 10-11 -- ARRL 10 Meter Contest
<http://www.arrl.org/10-meter>; CWops Mini-CWT Test; International
Naval Contest
- December 11 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 11-18 -- NA High Speed Meteor Scatter Winter Rally
- December 14 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint
- December 14-15 -- CWops Mini-CWT Test
- December 16 -- NCCC Sprint Ladder; Russian 160 Meter Contest;
AGB-Party Contest
- December 17 -- OK DX RTTY Contest; RAC Winter Contest; Feld Hell
Sprint
- December 17, 2011 -- January 1, 2012 -- Lighthouse Christmas Lights
QSO Party
- December 17-18 -- Stew Perry Topband Challenge; Croatian CW Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page

MERRY CHRISTMAS FROM HQ

NZART Headquarters Infoline Issue 243

02 December 2011

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· RSM Call Sign Clean Up

· Intruder Watch request

· FMTAG recommendations

· Housekeeping

>From the Business Manager ZL2DL

Debby Says…Thank you to all those who paid their subscription on or before the 30 November in order to be eligible for the membership prize draw.

The draw was held under police supervision using random number generating software on Thursday 1st December. I am pleased to advise that the Icom Hand Held Radio was won by John Moore ZL4TIO of Pine Hill Dunedin. Congratulations John, we look forward to a photo in the Jan/Feb issue of Break In, when you receive your prize.

Break In advertising…As you all know Break In is the official journal of NZART. One very important way to ensure costs in production of this are kept at a reasonable level, is advertising. AND WE NEED MORE advertisers.

Perhaps you may know someone in business who is looking for advertising space in the coming year.

Thinking outside the square on this, for example perhaps an insurance broker or retirement homes, maybe, although this may sound morbid, funeral homes.

There are many possibilities and I know the Break In advertising manager would be very keen to hear from you if you have some suggestions. Please contact either Lorne Douglas ZL2AHB on advertmanager@nzart.org.nz or me here at HQ.

HQ closed…Although it is yet to be confirmed, headquarters will be closed through the two short weeks over the Christmas period. Dates of closure will be advertised on the NZART web page.

Finally as this will be the last issue of Info-line for this year, I would like to thank all those contributors who help to make each issue more enjoyable and you the readers for your interest. The next issue of Info-line will be sent out on Friday 6th February 2012.

In the meantime…have a very happy and safe holiday season

Debby ZL2DL

Callsign Clean-up

Further to the information in Headquarters Infoline Issue 221, Radio Spectrum Management have advised that they have now completed emailing Amateurs, who have a client email address in SMART, asking them to update their contact details. This exercise resulted in a low level of phone calls to the RSM Business Service Centre and a low number of emails to RSM so the records appear to be more accurate than originally thought.

RSM will now progressively attempt to contact the 2000 Amateurs who do not have an email address by post over the next few months asking them to update their Client Records.

Intruder Watch: Russian Numbers stations on 20 Metres.
Region 1 IARUMS have reported a number of stations appearing on 14280 kHz in A3E/AM mode at 1000 GMT/UTC on Wednesday 2 November and Wednesday 16 November.

Apparently this is the 1010 GMT/UTC schedule, 1000 GMT/UTC schedule is on 12365 kHz. They have been using this schedule since January 2009.

The Russians change the frequencies every few months, but are also reusing old schedules. These are of Russian origin.

Russia within Region 1 has a Primary allocation in the range 14250 - 14350 for the Fixed Service i.e. numbers stations, so the activity of the numbers station is certainly legal.

If you do hear numbers stations, outside this range, please report them to MS@NZART.ORG.NZ or via the various route available to you.

FMTAG NOTES FOR HQ INFOLINE 243 - 2nd DECEMBER 2011

PROPOSALS

Branch 60 Taupo has applied for a VHF Linking Station (VLS) at Maroanui, located at TOPO50 BF36 634.01 323.75, to provide a link between the Maroanui 675 repeater and the Taraponui 725 repeater. The link transmit frequency will be 147.850 MHz and the receive frequency will be 147.250 MHz.

FINAL RECOMMENDATIONS TO COUNCIL

None this time.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Jan/February 2012 issue of Break-In-closes on 10 January 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 5 January 2012 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail:
zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on Sunday 18th December 2011. Next HQ-Infoline e-mailed on FRIDAY 6th February 2012. Closing date for this is Thursday 5th February.

1143. [RAC-Bulletin] RAC Bulletin 2011-040E - Notice to TELUS customers using the @RAC aliases.

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-02 07:46:08 UTC
From: rac-bulletins@eton.ca
Message-ID: <4ED881C2.4080803@rac.ca>
Source record: 3883
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2011-040E - Notice to TELUS customers using the @RAC aliases.
2011-12-02

Starting on Nov. 23 there has been a significant increase in
unsolicited bulk e-mail arriving for @rac.ca e-mail addresses. TELUS
chose to stop accepting messages after only a short period each day
resulting in most @rac.ca aliases destined for TELUS customers being
significantly delayed.

Messages are again being accepted by TELUS.

Owing to TELUS policies it has become necessary to have the e-mail
server block any messages which are normally marked as spam and
destined for TELUS customers. There is the possibility that some
legitimate messages may not be delivered. While I will try to make
what adjustments I can to avoid this TELUS customers should be aware
that TELUS has wrongly identified legitimate e-mail addressed to
@rac.ca aliases as spam.

To all other destinations we will continue to simply mark messages as
possible spam to allow members to make their own final determination.

While I apologize for this inconvenience, it is caused by TELUS overly
aggressive anti-spam policy.

James R. Hay, VE2VE
Vice President Technical and Administrative Services
Radio Amateurs of Canada

Amateur Radio Newsline(tm) Report 1790 - December 2 2011

Amateur Radio Newsline report number 1790 with a release date of
Friday, December 2nd, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. An unwanted Christmas present as new rules
on BPL to take effect on December 21st, the AO-51 ham radio satellite
falls silent while ARISSSat One may be approaching its last days in
space; hams in Germany hear the Mars Space Laboratory as it wings its
way toward the red planet, New Zealand hams get a power upgrade, and
the controversary over the speed of light continues. Find out the
latest details are on Amateur Radio Newsline(tm) report number 1790
coming your way right now.

THE BPL FIGHT: FCC SECOND R&O RULES TAKE EFFECT DECEMBER 21

Barring any last minute appeal by the American Radio Relay League or
another entity, the FCC's latest order to revise rules for access
Broadband over Powerline systems is set to become effective on December
21st. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, reports:

--

The commission's second Broadband Over Powerline or BPL Report and
Order was published in the Federal Register on November 22nd making the
effective implementation date December 21st. However, Petitions for
Reconsideration concerning it are also due on that same date. As such
there is speculation that the ARRL may ask for a reconsideration before
the implementation date arrives.

As previously reported here on Amateur Radio Newsline, the ARRL had
argued there should be mandatory notching of the amateur bands to a
level 35 dB below the general emission limit to reduce the likelihood
of harmful interference to amateur stations. In the Second Report and
Order the commission decided not to adopt mandatory notching. Instead,
the agency increased the requirement for BPL systems to have the
ability to notch frequency bands to at least 25 dB. This is an
increase of 5 dB from the prior requirement of 20 dB.

The ARRL called the increase in notch depth a step in the right
direction but said that doesn't go far enough to protect the amateur
radio spectrum from harmful interference of the type known to be

generated by Broadband over Powerline data transmission systems. The ARRL is on record as stating that it believes that now is the time to fix the rules by imposing mandatory notching of BPL signals in all of the Amateur Service spectrum. This is so that any new entrants will be competing on a level playing field with the existing Broadband over Powerline firms that have recognized the need for notching out of the amateur bands.

In other matters addressed in the Report and Order, the FCC also made technical adjustments to its rules for determining the distance between a power line and a measurement antenna and for determining site-specific extrapolation factors. This as part of a measurement standard modification for determining whether a BPL system is in compliance with the maximum allowable levels of radiated emissions.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, from near Pittsburg, Pennsylvania.

--

While Broadband over Powerline has failed in the marketplace as a medium for delivering broadband connectivity to consumers, the technology is perceived to have some `smart grid' power delivery and system monitoring applications.

**

HAM RADIO IN SPACE: AO-51 GOES QRT

The AO-51 ham radio satellite has gone QRT. AMSAT-North America Vice President of Operations, Drew Glasbrenner, KO4MA says that the bird has ceased transmission and is not responding to any commands from the ground.

Glasbrenner's announcement came on Tuesday November 29th. In making public word of the demise of AO-51, KO4MA, noted that the last telemetry data received had indicated that the third of six batteries that power AO-51 was approaching a short circuit condition. Also that further observation indicated the voltage from three remaining cells was insufficient to power the UHF transmitters. Initial tests with the S-band transmitter were also not positive either, although more attempts are expected.

Glasbrenner says that the control team tried leaving the satellite in a configuration where if voltages climb high enough, the 435.150 transmitter may possibly be heard. He says that the command team will regularly attempt communications with the satellite over the coming months noting that there is always the possibility that a cell will open from its short circuited state and make AO-51 useful once again.

And in a related item, word that Clint Bradford, K6LCS, is attempting to document the last VHF and UHF communications through AO-51. To find out more go to his special Web page for at tinyurl.com/AO51-DCARR.

The AO-51 ham radio satellite was on-orbit and serving the world-wide ham radio community for the better part of 7 years. (ANS, K6LCS, Others)

**

HAM RADIO IN SPACE: ARISSAT-1 APPROACHING LAST DAYS ON-ORBIT

If you have been putting off trying to make contacts through the ARISSat One on-orbit repeater, the next few weeks will be your last opportunity to be a part of this satellite's history.

Since deployment in August, ARISSat One has descended about 60 km, and is currently losing more than 1 point 5 km per day. The rapid rate is partially the result of the recent solar activity on the atmosphere, significantly increasing the drag.

The predictions by several individuals and groups are all converging toward a reentry of ARISSat One into the Earths atmosphere in January or February of 2012. Heating will become significant before then.

The orbit period changes about 30 seconds per day, and that will steadily increase. As the descent continues, this will become even more critical to copying the telemetry beacon.

The ARISSat One team says that getting good telemetry in this period will provide it with valuable information to be used in future projects. The latest information on the orbital health of ARISSat One is on-line at www.arissat1.org.

(WA4SCA)

**

WORLDBEAT: NEW ZEALAND HAMS GRANTED POWER INCREASE TO A FULL GALLON

Hams in New Zealand are celebrating. This with word that their regulatory authority has granted then a power increase of up to one Kilowatt. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Nelson, New Zealand with more:

--

It has been suggested as a Christmas gift arriving early for amateur radio operators in New Zealand. That's the news from the countries Communications Regulator, Radio Spectrum Management that it has agreed to a request from New Zealand's National Amateur Radio Society, NZART, that the general power limit for Amateur bands be increased. NZART Members were informed of the news by their President Roy Symon, ZL2KH, on the Society's National Broadcast on Sunday 27th November.

>From the 30th November 2011, the power limit for most NZ amateur bands bands will rise from 500 watts to 1000 watts peak envelope power as defined in ITU Radio Regulation 1.157. The only exception to this power increase is for those bands (130 to 190 kHz, 505 to 515 kHz, 26.95 to 27.30 MHz and 921.00 to 928.00 MHz) which currently have lower limits

and, in these cases, the current limits will continue to apply.

This result is seen as a very satisfactory conclusion to the Hawkes Bay Amateur Radio club Remit submitted to the 2010 NZART Conference. It will assist New Zealand Amateurs to participate in weak signal work including EME, meteor scatter, DXing etc and to also remain competitive, despite New Zealand's remoteness, when participating in contests.

Reporting from sunny Nelson, New Zealand, I'm Jim Meachen ZL2BHF for Newsline.

--

According to ZL2BHF, a November 28th news release from the Wireless Institute of Australia's Peter Young, VK3MV, indicates that the New Zealand decision may well be the needed catalyst for the ongoing discussions between that national society and the Australian regulator ACMA. This in regard to a similar power increase for Australian Advanced class licensees. (NZART)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9UVI repeater of the Peoria Amateur Radio Club serving the city of Peoria Illinois.

(5 sec pause here)

**

REACHING OUT: ARRL TO RELEASE NEW VIDEO AIMED AT MAKER COMMUNITY ON DECEMBER 27

'The DIY Magic of Amateur Radio' is a new 8 and one half minute video from the American Radio Relay League to be released on Tuesday, December 27th. Its target audience is the world-wide maker and hacker community. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

According to the ARRL, the show is directed toward the D-I-Y or Do It Yourself movement. This is a fairly new leisure time interest that is inspiring a whole new generation of techno hobbyists. It also could be a pool of future technologists who might want to become hams if they knew morew about our hobby and that's the reason the new video was created.

To do this, Executive Producer Allen Pitts, W1AGP and Producer Bill Pasternak, WA6ITF brought together an all-star team consisting of several well known film makers along with some newcomers to ham radio movie making.

Directed by Hollywood's Dave Bell, W6AQ, the video which is titled "The Do It Yourself Magic of Amateur Radio" was recorded on location in Ohio, Texas, North Carolina, California, Utah and on-orbit aboard the International Space Station.

It's script was written by Henry Feinberg, K2SSQ, of West Orange New Jersey. Feinberg is a former producer of the award-winning Watch Mr. Wizard science television series. A winner of several Cine Golden Eagle awards, K2SSQ is also the ham radio operator who created the umbrella space communicator seen in the Steven Spielberg motion picture "ET the Extraterrestrial."

The show is hosted by famed New York City based maker community leader and fashion designer Diana Eng, KC2UHB. Mark Abramovich, NT3V, serves as the show narrator.

Original music was provided by Andrew-John Huddleston, Oh-Zed-5-E, and his Denmark-based group "The Ham Band."

Dave Booth, KC6WFS, of Santa Clarita, California was the shows principal videographer.

According to the ARRL, the new video will be simultaneously released on its Facebook, Twitter and YouTube pages, and will be also be available at www.arrl.org. DVD copies for showing to large audiences in high definition 16 by 9 wide screen and standard 4 by 3 definitions will be available at a later date.

For the Amateur radio Newsline, I'm Cheryl Lasek, K9BIK, reporting from Zion, Illinois

--

Again that's Tuesday, December 27th at about 10 a.m. Eastern U.S. time for the release of the new ARRL video titled The Do It Yourself Magic of Amateur Radio. It's a magic carpet ride into a pair of techno-hobby worlds that compliment one another very well. (ARRL, DIY Production Team)

**

RADIO IN THE MEDIA: FOX NEWS REPORTS HAM RADIO GROWTH

Fox News reports on the boom in Amateur Radio licenses in the United States. According to Fox, in October the FCC logged 700,314 licenses, with nearly 40,000 new ones issued in the last five years.

In her report Michelle Macaluso interviews John Pritchett W6JWK. She also shows an Amateur Radio Direction Finding competition. Her story is titled Radio Days Are Back: Ham Radio Licenses at an All-Time High. You will find it on-line at tinyurl.com/fox-ham-stats. (QRZ.COM)

**

RADIO LAW: WALDEN RELEASES SPECTRUM AUCTION MEASURE

United States House of Representatives Communications Subcommittee Chairman Greg Walden, W7EQI, and other GOP panel members have introduced a version of a broadcast spectrum incentive auction bill. The measure would authorize the FCC to reclaim spectrum from broadcasters for re-auction and compensate them from the proceeds. It also sets aside money to compensate broadcasters who elect not to give up spectrum for the costs of moving to another channel or sharing channels with another broadcaster. It also covers the costs incurred by cable operators of moving their systems to accommodate such a change. The end result of the bill is to allocate spectrum for an interoperable broadband public safety network. That also would align the measure more closely with the Senate version that has already passed out of the Commerce Committee there. More on this proposed measure is on-line at tinyurl.com/walden-auction-bill. (B&C)

**

RADIO BUSINESS: MIRACLE ANTENNA SUSPENDS ORDER TAKING DUE TO ILLNESS OF VA2ERY

If you are planning to purchase a product from Miracle Antenna, be aware that the company has temporarily stopped taking orders. According to a notice on its website, online ordering has been temporarily suspended due to medical illness and to please check back with us soon.

For those not aware, Miracle Antenna is the Montreal Canada-based company that manufactures the very popular Miracle Whip and other accessory items that are extremely popular with both the QRP and H F back-pack communities. An e-mail received by Bryan Herbert, KE6ZGP, and forwarded to Newsline confirms that Robert Victor, VA2ERY, is quite ill and that his family has stepped in to help with running the business.

According to the e-mail to Herbert, for the moment the Victor family is only filling standing orders and answering e-mails. Anyone wishing to contact the family or to send get well wishes to Robert Victor, VA2ERY, may do so by e-mail to info (at) miracleantenna (dot) com. For information updates please keep an eye on miracleantenna.com. (KE6ZGP, others)

**

RADIO BUSINESS: MORSE DECODER FOR MAC

If you are a ham who uses an Apple computer, then here's something just for you. The Southgate news reports that Morse Decoder is a simple to use Mac OS X application for translating Morse Code sounds into text. The program uses the built-in microphone on an Apple Mac with both audio filtering and DSP signal analysis.

Morse Code Decoder also includes a built-in spectrogram to detect the audio frequency of the Morse Code tones, and an optional narrow band audio filter to help filter out background noise.

More information is on-line at tinyurl.com/mac-morse-decoder. And if you do give Morse Decoder a try please let us know how well it works. Nobody here at Amateur Radio Newsline has a Mac to try it ourselves. (Southgate)

**

HAM HONORS: DAYTON HAMVENTION SOLICITING NOMINATIONS FOR 2012 AWARDS

>From now through January 15th he nominating period is open for the 2012 Dayton Hamvention Awards. As in previous years, the Hamvention will honor three deserving individuals with the Technical Excellence, Special Achievement, and Amateur of the Year Awards. Also receiving recognition will be a ham radio group or organization which will be selected as Radio Club of the Year. To be considered for any of these awards the nominations must be submitted no later than January 15, 2012. Nomination forms and instructions on how to file are on-line at hamvention.org/awards.php. (WS8B, Hamvention 2011)

**

NAMES IN THE NEWS: HAMVENTION 2012 GETS NEW ASSISTANT GENERAL CHAIRMAN

Also from the Dayton Hamvention comes word that General Chairman Mike Kalter W8CI, announced the appointment of Charles Kaiser, KD8JZR, as the events new Assistant General Chairman. Kaiser replaced Josh Long, KD8BVD, who stepped down because of work commitments.

The Dayton Hamvention is the world's largest amateur radio gathering. It opens May 18, 2012, and runs for three days at the Hara Arena in surban Trotwood, Ohio. This will be its sixty-first consecutive year and planners believe that more than 20,000 people will attend the 2012 outing

For more information about Dayton Hamvention 2012 please visit the website at www.hamvention.org or e-mail media@hamvention.org on the World-Wide-Web. (Hamvention)

**

NAMES IN THE NEWS: HAM HELPS OPEN NEW SPACE EXHIBIT AT AMERICAN MUSEUM OF NATURAL HISTORY IN NYC

The American Museum of Natural History has raised the curtain on its brand new space exhibition with help from two seasoned space travelers one of whom is an amteur radio operator.

NASA astronauts Mike Massimino and John Grunsfeld, KC5ZTF both flew on the last space shuttle mission to service the Hubble Space Telescope. The two were on hand at the museum to introduce a new exhibition called "Beyond Planet Earth: The Future of Space Exploration."

The American Museum of Natural History is located on Central Park West at 79th Street in New York City. The new space exhibit will run through August 12, 2012. More is on-line at

www.amnh.org/exhibitions/beyond. (Space.com)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: SOUTH AFRICA'S DEPARTMENT OF COMMUNICATIONS WITHDRAWS UNPOPULAR AMENDMENTS

In news from around the world, word that South Africa's Department of Communications has withdrawn a proposed and very controversial Electronic Communications Act amendment bill. This, for further consultation with that nations government leadership.

The proposed amendments to the Electronic Communications Act would have diminished the Independent Communications Authority of South Africa power on several fronts. This would have included frequency allocation and spectrum management by giving a government Minister more power over these issues.

There was widespread opposition across South Africa to the proposed amendments. At airtime it is not certain as to when South Africa's Department of Communications will publish revised changes to the Electronic Communications Act, if at all.

According to the South African Radio League this issue was high on its agenda to be considered and discussed. Now however as matters currently stands, the SARL sees no further action required at this time. (SARL)

**

WORLDBEAT: RSGB ANNOUNCES UK CLUB OF THE YEAR COMPETITION

If you like n the United Kingdom, this one is for you. The Radio Society of Great Britain has announced its Club of the Year Competition now open.

The Club of the Year Competition is described as an RSGB Regional Team initiative designed to encourage local radio clubs to do more in their communities to promote amateur radio. Locally based, the idea is get recognition of a club's efforts by the amateur radio community.

The competition will be independently judged and will concentrate on a club's contribution to promoting amateur radio, its contribution to training and education, its work in charitable activities and general

club activities. Each region will get to present its own trophy and all the trophy winners from around the UK will be entered into a national competition where we select a National Club of the Year and two runner ups.

More about this competition is on-line at www dot rsgb dot org slash clubooftheyear. This is an idea that other national societies around the world might want to consider making into a global competition event. (Southgate)

**

RADIO IN SPACE: HAMS HEAR MARS SCIENCE LAB AS IT FLIES TOWARD MARS

The world's largest ever built extraterrestrial explorer is on its way to Mars. The six-wheeled, one-armed robotic rover named Curiosity known officially as the Mars Science Laboratory blasted off from Cape Canaveral at 10:02 a.m. Eastern time on Saturday, November 26th. It was carried into space on board an Atlas Five launch vehicle. The journey to Mars will take 8&#65533; months and cover 354 million miles.

Meantime a group of radio amateurs have received signals from the Mars Science Laboratory using an AMSAT DL amateur radio facility in Germany. Barely 7 hours after launch, the X-band telemetry signal from the lab was received using the ham radio station at the German AMSAT group's resource at Bochum.

This is believed to be the first reception of the Mars Science Laboratory outside of the NASA Deep Space Network. The signal, received by the ham operators was with the probe at a distance of 112,000 km from Earth. Telemetry said the enroute lab had a spin-modulation of +/- 3.5 Hz at 2 revolutions per minute.

The Mars Science Laboratory is expected to arrive at the red planet in August 2012 after a nine month flight. (AMSAT DL)

**

ON THE AIR: CELEBRATING THE CBC/RADIO CANADA 75th ANNIVERSARY

On the air, listen out for some special prefixes to be used by Canadian hams during the month of December. From December 1st to the 31st the prefixes . VG, VX, XJ and XK will be utilized by those Canadian radio amateurs who wish to help celebrate the 75th Anniversary of the Canadian Broadcasting Corporation and Radio Canada.

Better known as CBC/Radio-Canada, the famed broadcaster offers programming in English, French and eight aboriginal languages on its domestic radio service. It also broadcasts in nine languages on its international radio service known as Radio Canada International. A recent addition is its Web-based eight language RCI Viva. This is described as being a service for recent and aspiring immigrants to Canada. (Georgian Bay Amateur Radio Club, Wikipedia Commons)

**

DX

In DX, word that six operators from the U.S. and Canada will be active from Kiritimati Island between January 17th and February 2nd. The group will operate from the same location that the recent T32C expedition utilized. They also will take part in the 2012 CQ World Wide 160 meter CW Contest from January 27th to the 29th as T32XX. QSL via KB8TXZ.

AH0AJ will beactive as KG4AJ from Guantanamo Bay for the next two years. QSL only via his home callsign.

Members of the Pacific DXers will be on the air from Tuvalu as T2T through December 8th. Activity is on 160 through 6 meters using CW, SSB, RTTY and PSK31. Logbook of the World and eQSL will be uploaded within 12 months after the operation is completed. QSL via VK4FW direct or via the bureau.

Lastly, CX3AN and CX4CR will be active on the air as 8Q7HU from Maafushi Island in the Maldives between January 25th and February 5th. Their operations will be on 80 through 6 meters using CW, SSB and several digital modes with a special emphasis on contacting South America. QSL this one as directed on the air.

Above from various DX news sources)

THAT FINAL ITEM: SCIENTISTS REJECT OTHER SCIENTISTS ON NEUTRINO FASTER THAN LIGHT

A Follow-up to last weeks story about a group of researchers at CERN who say that they have shown particles that can exceed the speed of light. An international team of scientists in Italy studying the same neutrino particles has now rejected the findings and saying their tests had shown it to be wrong. Here's Amateur Radio Newsline's Bruce Tennant, K6PZW, with the latest on this scientific controversary:

--

As reported last week, the September announcement of particles exceeding the speed of light along with the recent finding after new studies backed up the original claim has caused a firestorm of sorts in the scientific world. This was because it seems to suggest Albert Einstein's ideas on relativity, and much of modern physics, are based on a mistaken premise.

The first team, members of the OPERA experiment at the Gran Sasso laboratory south of Rome, said they recorded neutrinos beamed to them from the CERN research center in Switzerland as arriving 60 nanoseconds before light would have done. But ICARUS, another experiment at Gran Sasso argues that their measurements of the neutrinos energy on arrival contradict that reading.

In a paper posted on the same website as the OPERA results, the ICARUS team says their findings refute a faster than light interpretation of the OPERA result. They argue, on the basis of recently published studies by two top U.S. physicists, that the neutrinos pumped down from CERN, near Geneva, should have lost most of their energy if they had travelled at even a tiny fraction faster than light.

But in fact, the ICARUS scientists say, the neutrino beam as tested in their equipment registered an energy spectrum fully corresponding with what it should be for particles traveling at the speed of light and no more. Physicist Tomasso Dorigo, who works at CERN, the European Organization for Nuclear Research, and the U.S. Fermilab near Chicago, said in a post on the website Scientific Blogging that the ICARUS paper was very simple and definitive.

Under Einstein's 1905 Special Theory of Relativity, nothing can travel faster than light. That idea lies at the heart of all current science of the cosmos and of how the vast variety of particles that make it up behave. There was widespread skepticism when the OPERA findings were first revealed, and even the leaders of the experiment insisted that they were not announcing a discovery but simply recording measurements they had made and carefully checked.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Other experiments are being prepared at Fermilab and at the KEK laboratory in Japan to try to duplicate OPERA's findings. Confirmation from one of these would open the way for a full scientific discovery to be declared. Failure to duplicate the OPERA team findings would likely put the matter to rest. At least for the time being. (Published news sources)

GB2RS NEWS

Sunday 4th December 2011

The news headlines:

* RSGB Club of the Year competition reminder

* Experimental D-Star repeater

* 5MHz operation from Niue Island

The RSGB Club of the Year Competition, sponsored by Waters and Stanton, is an RSGB Regional Team initiative designed to encourage local radio clubs to do more in their communities to promote amateur radio. Locally based, the idea is get recognition of your club's efforts by the amateur radio community. Independently judged, the competition concentrates on your club's contribution to promoting amateur radio, its contribution to training and education, charitable activities and general club activities. Each region presents its own trophy and all the trophy winners from around the UK are entered into a national competition where we select a National Club of the Year and two runner ups. There are trophies for the national winners and cash prizes too, so it is well worth entering. Details are available on the RSGB website at www.rsgb.org/clubooftheyear.

The Mid Cornwall Beacon and Repeater Group has obtained an NoV from Ofcom to operate an experimental D-Star repeater on the existing GB3HB repeater frequencies on 70cm. It will have the callsign GB7MC and operation will commence today, 4 December. The output frequency will be 433.375MHz and the input frequency will be 434.975MHz. The existing GB3HB voice repeater has now been closed down and removed for refurbishment and updating. The experimental D-Star repeater, GB7MC, will continue to operate during 2012 until the new GB3HB voice repeater is ready. For more information, or to send a report, go to the group's website at www.mcbarg.co.uk.

For 60m band enthusiasts there is news from Chris, GM3WOJ. He is now active as ZK2V on Niue Island in the Pacific and has obtained permission to operate on 5403.5kHz. This special permit is only valid from 1 to 7 December local time.

James Miller, G3RUH remotely reconfigured the tracking and receiving system at the AMSAT-DL amateur radio facility in Bochum, Germany to receive the NASA Mars Science Laboratory X-Band telemetry. The signal was received automatically, no-one had to be physically on-site. Read

the full story at www.uk.amsat.org.

A very interesting TV programme from 1979 can now be watched on the web. Called Wartime Radio: The Secret Listeners, the programme is illustrated with archival film and photographs as well as interviews with those involved. The documentary traces the evolution of civilian involvement in radio-based intelligence during both world wars. Take a look at www.eafa.org.uk/catalogue/5108.

Congratulations to G4DEZ, who was the highest placed UK station in the IARU Region 1 September 145MHz Contest single operator entry. He was placed 35th out of 1178 entries, with his best DX being OL3Y. The Parallel Lines Contest Group, G8P, was the highest placed UK multi-operator entry. They were placed 6th from 388 entries, with the best DX being OE1W. Congratulations to both entries. And now for the details of rallies and events for the coming week

The final rally of the year is due to take place today, 4 December. The Bishop Auckland Radio Amateurs Club Rally will be held in Spennymoor Leisure Centre, Co Durham DL16 6DB. Doors open at 10.30am and admission is £1.50, with accompanied under 14s free. There will be trade stands and a Bring & Buy. More details from Mark, G0GFG on 01388 747 497.

Saturday 17 December sees the 10th Waters and Stanton annual Christmas open day, which is sponsored by Yaesu UK Ltd. Chelmsford Amateur Radio Society, Essex CW Club, RSGB rep Mark Sanderson and staff from Yaesu will be in attendance.

Friskney & East Lincolnshire Communications Club Mid-Winter Tabletop Sale and Auction will take place on 3 January at the Friskney Village Hall, Church Road, Friskney, Lincolnshire PE22 8RR. The event includes the Special Event Station GB2YR. Doors open 7pm and entry is £1.50. Tables are 2 for 1 at £4 and there will be free tea & coffee. Details from Ian Donnelly, 2E0XOD, 07554 362 020.

Now for the news of special events We have no details of special events for the forthcoming week.

And now the HF DX news compiled from 425 DX News and other sources

Buddies in the Caribbean is a group of amateur radio operators who specialise in DXpeditions with low power and a Buddipole. They are visiting St Lucia again from 4 to 12 December. They plan to run three stations in CW, SSB, RTTY and PSK on 10 to 160m. They will use the callsign J68UN in the ARRL 10m Contest on 10 and 11 December. For details of the operators, Google Buddies in the Caribbean. QSLs via home callsign direct, Logbook of the World and eQSL.

Martin, G3ZAY, Michael, G7VJR, Harumi, JF1PJK, Joe, JA1LZR, and Yutaka, JQ2GYU, will be active as GJ6UW on SSB, CW and RTTY on all bands from Jersey, which is IOTA EU-013, from 2 to 7 December. If the conditions on 160m and 80m are good they want to listen especially for Asia and Japan. QSL via M0BLF either via the bureau, direct or via Logbook of

the World.

Volker, DL8WEM will be active as J79WE from Dominica, which is NA-101, until 8 December. He operates mainly CW on 10 to 40 metres. QSL via his home callsign.

Now the contest news

The ARRL 160m CW Contest runs until 1600UTC on Sunday afternoon, 4 December. For UK stations, the action takes place during the hours when North America and the UK are both in darkness, around 2200 to 0800UTC. Work American stations including KL7 and KH6 plus US overseas territories and Canadian stations only. For single-ops there are QRP, low power and high power categories. It's similar for multi-op stations, except that there's no QRP category. A vertical antenna or an inverted-L with a high vertical section and an efficient radial or earthing system are very much to be desired for this one. The exchange is signal report and American and Canadian stations also send their ARRL or RAC section number.

Today, Sunday, 4 December, the 144MHz AFS takes place. This will be the third in this season's Super League competition. From 0900 to 1700UTC, using all modes, the exchange is signal report, serial number and locator. On Tuesday 6 December the 144MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The next Amateur Television Repeater Contest takes place from 1200UTC on Saturday 10 December until 1200UTC on Sunday 11 December using all amateur TV repeaters. Stations are encouraged to participate, or just look for increased amateur TV activity on their local TV repeater. Talkback is most likely to be found on 144.75MHz FM. Details of how to enter the contest can be found on the BATC website, www.batc.org.uk; entrants do not need to be BATC members.

And now the solar factual data for the period from the 21st to the 27th of November, compiled by Neil Clarke, G0CAS on the 28th of November.

The solar disc had numerous sunspot groups visible every day. Most were small and quiet but several were large enough to produce small C class solar flares, 39 in total for the period. The occasional solar flare produced small coronal mass ejections. On the 26th a long duration C1 solar flare and an associated eruptive filament produced a large coronal mass ejection. Solar flux levels declined from 142 units on the 22nd to 133 by the 26th, the average was 138. The 90 day solar flux average on the 27th was 141, that's three units up on last week. X-ray flux units declined from B5.1 units on the 21st to B3.9 by the 26th. The average was B4.4 units. Geomagnetic activity was quiet every day with the highest daily figure of Ap 6 units on the 22nd and the 27th. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between a slow 240 kilometres per second to a normal 470 kilometres per second. Particle densities were low

throughout. Bz never varied more than minus and plus 9 nanoTeslas for the period.

And finally the solar forecast. This week the active side of the Sun is expected to be rotating out of view. Solar activity should be low every day with the chance of increasing on the occasional day. Solar flux levels should decline and be around the 150's by next weekend. Providing no coronal mass ejections head our way geomagnetic activity should be at quiet levels all week. MUFs during daylight hours at equal latitudes are expected to be well over 30MHz for the whole of the UK. Darkness hour lows should be around 10MHz every day just before local sunrise. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 32MHz. The optimum working frequency with a 90 per cent success rate will be about 25MHz. The best time to try this path will be between 0800 and 1300 hours. Overall, the long path will be several megahertz down and a couple of hours later than the short path.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS First, some advance information. Friskney & East Lincolnshire Communications Club will be running Foundation and Intermediate courses in February and March 2012. For further details contact Ant Freeman, M0HAZ, on 07956 654 481.

On Monday 5 December Gloucester Amateur Radio & Electronics Society is operating on HF or VHF. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 5 December South Birmingham Radio Society is on the air and making plans for the Christmas party. Contact Don, on 01214 581 603.

On Monday 5 December Welland Valley Amateur Radio Society is starting its 2m club net on 145.275MHz FM and then QSYing to 4m. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Monday 5 December Wythall Radio Club is holding an Advanced exam. Details from Colin, M0GJM, on 07598 540 507.

Leicester DX Club has changed its meeting to Tuesdays at 7.30pm. Meetings currently take place at the Winstanley Arms, Braunstone LE3 2WB, but a new venue will be announced after Christmas. Details from

Ellen, M0HEL on 07902 626 920.

On Tuesday 6 December Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 6 December Forest of Dean Amateur Radio Group continues its Foundation training course. Details on 01594 549 110.

On Tuesday 6 December Friskney and East Lincolnshire Communications Club is having its Christmas dinner. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 6 December Loughborough & District Amateur Radio Club is having a video evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 7 December Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 7 December Midland Amateur Radio Society is holding an open meeting with the shack on the air and running training classes. Details from Norman, G8BHE, on 07808 078 003. On Wednesday 7 December Telford & District Amateur Radio Society is holding a committee meeting at Stafford Park. HQ is closed. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 8 December South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 9 December Bromsgrove & District Amateur Radio Club is holding its Christmas dinner. Contact Chris, M0BQE on 01905 776 869.

On Friday 9 December Coventry Amateur Radio Society is having an introduction to Projection 2012. Contact John, G8SEQ, on 07958 777 363.

On Friday 9 December South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Friday 9 December Wythall Radio Club is holding its Christmas party. Details from Colin, M0GJM, on 07598 540 507.

On Saturday 10 December Lincoln Short-Wave Club is in the shack and holding its Saturday surgery. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Saturday 10 December Welland Valley Amateur Radio Society is holding its Christmas dinner. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

Next week, on Wednesday 14 December, Lincoln Short Wave Club will be holding a teleconference workshop with Bob Heil, K9EID. Using a 2-way Skype video and audio link, there will be a facility to interact with Bob, who is not only a microphone maker for amateur radio but also for

many top musicians including Stevie Wonder and Joe Walsh. There will be a £1 admission charge, which will include tea, coffee and biscuits. More information from Steve Burke, by email to activitiesofficer@G5FZ.co.uk.

NEWS FOR THE NORTH OF ENGLAND On Monday 5 December Angel of the North Amateur Radio Club is holding an Advanced examination. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 5 December Sheffield Amateur Radio Club is having a talk on amateur radio in Spain by Nevil Brinnen, G3VDV. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 5 December Thornton Cleveleys Amateur Radio Society is having a natter night. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 6 December Chester & District Amateur Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343825.

On Tuesday 6 December Halifax & District Amateur Radio Society is holding Foundation and Intermediate training courses including an on the air session and discussion about 2m collinear aerials. Details from Anthony Vinters, G0WFG, on 01422 822636.

On Wednesday 7 December Denby Dale Radio Club is having a talk on transistor characteristic curves by Ian G4LUG. Details from Richard, M0RBG, on 07976 220 126. On Thursday 8 December Ripon & District Amateur Radio Society is having a talk on RAYNET. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 8 December South Manchester Radio and Computer Club is having a talk about 42 years ago by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Friday 9 December East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 10 December Denby Dale Radio Club is visiting LAM Communications. Details from Richard, M0RBG, on 07976 220 126.

NEWS FOR NORTHERN IRELAND Mid Ulster Amateur Radio Club will be holding an Intermediate course over 12 weeks, starting Wednesday 11 January 2012. Foundation licensees wishing to advance to the next step should register for the course by Monday 12 December. To register go to www.muarc.com/courseapplicationform.htm and complete the form. More information can be gained by contacting the exam secretary Martin, MI0YMF, on 02838 852 712.

NEWS FOR SCOTLAND On Tuesday 6 December Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Wednesday 7 December Ayr Amateur Radio Group is having a talk on ILLW in Western Scotland. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday 8 December Aberdeen Amateur Radio Society is on the air. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 9 December Borders Amateur Radio Society is having a demonstration and talk on PSK and slow scan TV by Landles Fairbairn, GM4XZZ. Details from MM0YLG on 07944 912 751.

On Saturday 10 December Cockenzie & Port Seton Amateur Radio Club is holding its Christmas night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 4 December Worthing & District Amateur Radio Club is holding its breakfast meeting at the Goring Cafe. Contact Phil, G4UDU, on 01903 816 684.

On Monday 5 December Braintree & District Amateur Radio Society is having a club social. For more information contact John, M5AJB, on 01787 460 947.

On Monday 5 December Burnham Beeches Radio Club is holding its Christmas event. Contact Dave, G4XDU, on 01628 625 720. On Monday 5 December East Kent Radio Society is having an HF operating evening with Paul, M3PSE. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 5 December Surrey Radio Contact Club is having a talk on the GSM mobile phone network infrastructure by David Smith, M0SXD. Contact John, G3MCX, on 02086 883 322.

On Tuesday 6 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 6 December Chelmsford Amateur Radio Society is holding a club meeting. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 7 December Chesham & District Amateur Radio Society is holding a general meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 7 December Norfolk Amateur Radio Club is having an informal, construction and shack evening. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 7 December Worthing & District Amateur Radio Club is having a talk on Hollywood science by Jonathan Hare, G1EXG. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 8 December Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 8 December Echelford Amateur Radio Society is holding its Christmas party. Contact John, G4GSC, on 01784 451 898.

On Thursday 8 December Edgware & District Radio Society is having a junk sale. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 8 December Lowestoft & District PYE Amateur Radio Club is running its construction competition. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 8 December Reading & District Amateur Radio Club is holding its AGM followed by a cheese and wine evening. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 8 December Shefford & District Amateur Radio Society is having a mince pie Evening. Contact John Burnett, M6JBV, on 07860 804 793.

On Friday 9 December Cambridge & District Amateur Radio Club is having a talk on nanowave communications and the new red LED beacon by Jenny Bailey and Bernie Wright. Contact Ron, G3KBR, on 01223 501 712.

On Friday 9 December Itchen Valley Amateur Radio Club is holding its Christmas social and quiz. Details from Liz, M0ACL, on 02380 254 599.

On Friday 9 December Mid-Sussex Amateur Radio Society is holding its Christmas dinner. Contact Peter, G4AKG, on 01444 239 371.

On Friday 9 December Wimbledon & District Amateur Radio Society is having its Christmas social. Contact Andrew Maish, G4ADM, on 02083 353 434.

NEWS FOR THE SOUTH WEST On Wednesday 7 December Taunton & District Amateur Radio Club is having a talk on the SteppIR antenna by Kelvin, M0AID and Rob, G0WSC. More information from Peter Robinson, G0EYR, on 07811 635 819.

On Wednesday 7 December Thornbury & South Gloucestershire Amateur Radio Club is having a talk by Rex, G4RAE on how he got into amateur radio. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 7 December Trowbridge & District Amateur Radio Club is holding its Christmas social & presentation night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 8 December South Bristol Amateur Radio Club is having a talk on social networking. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 8 December Swindon & District Amateur Radio Club is holding its Christmas dinner. Contact Den, M0ACM, on 07810 317 750.

On Thursday 8 December Yeovil Amateur Radio Club is having a talk on logging by M0WOB & M6AIG. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 9 December North Bristol Amateur Radio Club is holding its Christmas party. More information from Dick on 01454 218 362.

On Friday 9 December Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 5 December Dragon Amateur Radio Club is visiting Waters and Stanton. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 6 December Wrexham Amateur Radio Society is closed. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

On Thursday 8 December Aberystwyth & District Amateur Radio Society is having Morse and mince pies with Dyson, GW3DRV. Details from Ray, GW7AGG, on 01970 611 853.

On Friday 9 December Newport Amateur Radio Society is having a hands on evening, getting the FR50B going. More information from Ross Clare, GW3NWS, on 01633 880 146.

SARL NEWS - SUNDAY 04 DECEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

News received late yesterday afternoon is that the key of Bert Howes, ZS6HS, stopped operating in the age of 96 years in 1 Military Hospital in Pretoria on 3 December. Unfortunately no more details are available at the time of uploading this bulletin. Our sincere condolences to his near and far relatives and friends.

It is with deep regret that the Boland Amateur Radio Club must announce that the key of Frans Byleveld, ZS1RF, became silent on 30th August 2011 in the age of 81 years. Frans was a founding member of The Boland branch of the SARL in 1948 and later an honorary member of the Club. Our sincere condolences go to his XYL Leonie, children, other relatives and friends.

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

THE NIGHT BEFORE CHRISTMAS

Just in time for the Christmas season, Gary Pearce, KN4AQ, has created a video version of Clement Clark Moore's poem A Visit from St Nicholas -- more commonly known as The Night Before Christmas -- but Pearce's version has a decidedly Amateur Radio twist. With a guitar accompaniment by Don Mercz, WA3AYR, A Ham's Night Before Christmas features QST magazine covers, Gil cartoons and Christmas-themed QST advertisements from days gone by. You can listen to it or download it from the Amateur Radio TODAY link on www.sarl.org.za.

RADIO AMATEURS LISTEN TO MARS SCIENCE LABORATORY SIGNAL

As NASA's Mars Science Laboratory was streaking away from Earth just seven hours after its November 26 launch, amateurs using the AMSAT-DL facility in Bochum, Germany eavesdropped on its 10 GHz telemetry signals. At 21:45 UTC, the spacecraft was about 115 000 km from Earth, heading for a rendezvous on the red planet in August 2012. James Miller, G3RUH, remotely reconfigured the Bochum tracking and receiving system, aiming the 20 metre parabolic dish antenna toward the Mars Science Laboratory. According to Miller, the signal had a spin-modulation of +-3,5 Hz at two revolutions per minute. The dish at Bochum is also used by AMSAT-DL to automatically receive real-time solar data from the NASA STEREO A/B satellites. The data is transmitted to a NOAA server in the US via the Internet.

GET A 2012 ARRL HARDCOVER HANDBOOK OR ARRL ANTENNA BOOK THIS CHRISTMAS

The SA Amateur Radio Development Trust has both the hardcover versions of the ARRL 2012 Handbook and the new edition of the ARRL Antenna Book in stock. To order visit www.amateurradio.org.za/books.htm. Orders will be dispatched by parcel post starting 9 December. Order now to get the books delivered before Christmas. The SAARDT website also gives a description of the content of the two new books.

AO-51 GOES QRT

The AO-51 amateur radio satellite has gone QRT. AMSAT-North America Vice President of Operations, Drew Glasbrenner, KO4MA, says that the bird has ceased transmission and is not responding to any commands from the ground.

Glasbrenner's announcement came on Tuesday 29 November. In making public word of the demise of AO-51, KO4MA, noted that the last telemetry data received had indicated that the third of six batteries that power AO-51 was approaching a short circuit condition. Also that further observation indicated the voltage from three remaining cells was insufficient to power the UHF transmitters. Initial tests with the S-band transmitter were also not positive, although more attempts are expected.

Glasbrenner says that the control team tried leaving the satellite in a configuration where if voltages climb high enough, the 435,150 transmitter may possibly be heard. He says that the command team will regularly attempt communications with the satellite over the coming months noting that there is always the possibility that a cell will

open from its short circuited state and make AO-51 useful once again.

The AO-51 amateur radio satellite was in orbit and served the world-wide amateur radio community for the better part of 7 years.

TAKE VHF ON HOLIDAY WITH YOU

Now that the holiday season is starting and many are planning to leave for the coast, it may be a good idea to take a low power VHF transceiver along including a small Yagi antenna for 144 MHz and enjoy the Tropo propagation. You will experience many strong Tropo openings during hot humid days and also about an hour after sunset at night when distances up to 400 km or even longer could be covered on SSB and FM.

If your transceiver is also equipped for 50 MHz, then take a small two or three element Yagi with you, as unexpected Sporadic-E openings in the December and January months can provide strong country-wide contacts during the mornings and/or afternoons even on low power.

Just imagine sitting around a braai fire at night with a beer in one hand and a microphone in the other making unusual contacts. Enjoy your holiday with VHF RF!

CLUB NEWS

At the AGM of the Southern African Antique Wireless Association held on the 12th November 2011, Richard, ZS6TF, was elected as President for 2012. The rest of the committee remains as is for the year ie, Rad, ZS6RAD, - Technical Advisor; John, ZS1WJ - Western Cape; Andy, ZS6ADY - PRO and Newsletter Editor.

The committee would like to thank Don, ZS5DR, outgoing President, for his contribution to the AWA over the past 2 years.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is declining further with only a few C-class flares produced during the week. Sunspot 1 363 appears to be growing and the potential for an isolated M-class flare remains. The sun's surface is still peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 88.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31

January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium. Also: Submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1039
BID: $OPDX.1039
December 5, 2011 (from Murfreesboro, Tennessee)
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NC1L, NJ1Q & ARRL DX, K2PF, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, KH6BZF, KM6HB, N6GQ, WB6RSE, K8GI, K8YSE, KE8G, W8GEX (60m News), W9ILY, N0VD, WA0ROI, AT International, CE3FZL, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, GM0DEQ, I1JQJ/IK1ADH & 425 DX News, JI5RPT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PS7AB, PT7WA, RSGB IOTA Web Site, UT7UT, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), XV4Y and ZL3IO for the following DX information.

** EDITOR'S SPECIAL NOTICE: The bulletin was sent out (remotely) a day early this week because your editor is on the road heading back home to Ohio from Murfreesboro, Tennessee.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-November, through Sunday, 4th-December there were 239 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S0, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3D2/R, ROTUMA. Antoine, 3D2AG, will be on a Christmas holiday with his family and plans to do small "green" radio operation as 3D2AG/p from Rotuma (OC-060) between December 9th and January 9th, 2012. It is reported that this will be a "small ecological barefoot activity on all bands (80-6m) except 160m, sponsored by the French company 'TOTAL' within the framework of the sustainable development of the insular communities of the Pacific (supply of the batteries, the 3 solar panels of 50 watts and QSLs)". His station will be 100w, using all modes (SSB/CW) with an ICOM 706, FT-757GX and Kenwood TS-440S, into a Spiderbeam 5 band antenna, a 5 element yagi for the 6m and doublets for the 40/60/80 meters. This station will be fed only by batteries and solar panels. A special QSL will be printed on recycled paper to confirm the contacts. QSL via his home callsign, direct only (QRZ.com address).

A3, TONGA (Family Holiday). NODXA/OPDX's good friends Holger/ZL3IO (DL7IO), Birgit/ZL3IQ (DL7IQ) and daughters Sassi/ZL2GQ and little Xenia will be going for a week long family holiday to Tonga in late January 2012. This is not a planned DXpedition, but they will have a K3 and a vertical antenna. Holger tells OPDX readers to look for A31IO (Holger), A31YL (Birgit) and A31GQ (Sassi). However, he states that he can't promise too much activity, but their licenses are valid for 1 year, and Tonga is only a 3 hr. flight for them. This might be a preplude for a more serious activity. QSL via their home callsign (see QRZ.com).

CE, CHILE. H&#65533;ctor, CE3FZL, from the capital of Santiago, plans to be active on SSB during the ARRL DX Contest, December 9-10th. QSL to his home callsign (see more information in QRZ.com).

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
5X1VJ &#65533; Uganda; 2011 Operation
Special thanks to John Sharp, K2SHA, for his help in acquiring this supporting documentation!

E4, PALESTINE (Update). Peri, HB9IQB, who has been granted a license by the Ministry of Telecommunications & Technology in Ramallah and plans to be active as E44PM, is expected to be operational at 0001z, December 16th, or possibly a few hours before that. Operations will last for 7 days. He announced this past week, "Taking into consideration the many E-mails from SSB Ops, I will try to spend not less than 20% of the time in that mode. CW will be main mode." For more details and updates, visit the following Web page at: http://www.hb9iqb.ch/palestine.html

EM20/EN20/EO20, UKRAINE (Special Event). Members of the Ukrainian Amateur Radio League (UARL) are celebrating their 20th anniversary using the following special prefixes between December 1-30th. The current list of the callsigns are (as known) as follows:
EM20C via UX5PC EN20UARL via UT5UIA EO20K via UR4KWA
EM20LTD via UR3LTD EN20UO via UX5UO EO20M via UX7MA
EM20L via US0LW EN20UP via UT4UP EO20UD via UR7UD

EM20UARL via UT7UT EN20UZ via UR5UZ EO20UM via UT0UM
EM20UJ via UR5UJ EN20W via UR5WA EO20UR via UT7UR
EM20UKR via UR7UC EO20IGN via US7IGN EO20X via UT5XA
EM20UU via US7UU EO20IM via UW5IM EO20?? via UT2HC
EM20V via UR2VA EO20IO via UX3IO E?20UU via UT7UU
EN20C via UX7CQ EO20IZ via UX5IZ EO20ZZ via US0ZZ

ET3, ETHIOPIA (Update/Reminder). Operators Krassy/K1LZ, David/K3LP, Al/K3VN, Bill/N2WB and Paul/N6PSE will be active from Addis Ababa between December 8-13th. Activity will be from the ET3AA club station. The goals of their trip are to install antennas at the Addis Ababa University, administer VE Ham Radio Examinations and the creation of the "University of Addis Ababa - Technology Incubation Program (TIP)". For the complete details, see: http://www.k3lp.com/et3aa_december_2011.htm
The ET3AA DXpedition team's operating goals from the club station are as follows: Krassy/K1LZ will operate as ET3AA on 80/40 meters, and David/K3LP will operate as ET3AA on 160/30 meters, during the evening to early morning hours (local time 7:00 PM to 7:00 AM). Operators Al/K3VN, Paul/N6PSE and Bill/N2WB will operate during the day and early morning hours on all the other bands using SSB using the ET3SID callsign (from Sid's QTH) and ET3AA from the university's club station. QSL Manager for ET3AA and ET3SID for this trip "ONLY" is Bob, N2OO. PLEASE NOTE (Caution): "Please do not merge other QSOs you've made with ET3SID and ET3AA into same envelope not related to this trip. Bob will only have the logs for the ET3AA and ET3SID for the days between December 8-13th, 2011. Thank you!"

FS, ST. MARTIN. Tom, DL2RUM, will be active as FS/DL2RUM from St. Martin (NA-105) between now and December 11th.. activity will be on CW, SSB and RTTY, using 600 watts. For QSL route, please use the information on the following link because he is moving:
http://dl2rum.de/dl2rum/DL2RUM_Home.html

GB2, SCOTLAND (Special Event). The Scot's, Crocodile Rock Amateur Group (CRAG) will be operating the special event callsign GB2PG on December 3-4th and December 10-11th, from Ardrossan, Scotland. This event is to commemorate the 90th anniversary of the first shortwave transatlantic radio signals being received in Ardrossan by the American Paul Godley in December 1921. The station will be active mostly on 80&#65533;10 meters SSB with some CW. Operators will be Bob/GM0DEQ, Robbie/GM0SEI and Dave/GM6HGF. QSL QTHR via Bureau or GM0DEQ. For live blog updates, please visit <http://gb2pg.blogspot.com/> and share the experience.

HK0NA, MALPELO ISLAND (Press Release #4): "FOR IMMEDIATE RELEASE - Malpelo DXpedition 2012 (Nov. 28, 2011) -- Contact: bob@k4uee.com
EDITORS: E-mail K4UEE to request high res. pictures!

Recently three U.S. members (K4UEE, N4GRN and W6IZT) of the Malpelo 2012 DXpedition flew to Cartagena, Colombia, and met with six of their Colombian counterparts. The purpose of the two day meeting was to make some critical decisions about the upcoming DXpedition to Malpelo Island. Also, checklists and inventories were finalized and all team members' responsibilities were assigned.

Since it is highly unlikely that the various Colombian authorities will permit another DXpedition to Malpelo anytime soon, a decision was made to extend the DXpedition to 16-17 days from the previous 12-14 day plan. The approximate dates of operations will be January 21, 2012 through February 5-6th, 2012.
Four team members will travel with all equipment, radios, antennas and infrastructure to Malpelo in early January. They will be transported by the Colombian Navy. They will arrive about two weeks prior to the rest of the Team and will set up camp, the two operating sites, radios and antennas. They will spend about 30 days on the island. This will allow the rest of the team to begin radio operations immediately upon arrival by chartered vessel.
As mentioned there will be two operating sites, each with a complete complement of antennas and radios with amplifiers. The first operating site will be co-located with the Colombian marine's camp on the east side of the island. It is clear to East Coast USA, EU and Africa. In order to have a clear shot at JA/Asia, the Pacific region and W6/W7, the second operating site will be located near the top of the highest mountain peak on the island. However, to lessen the physical risks to the team members, the operating site will be located on platforms situated below the actual peak. Still, it will be a 45 minute uphill climb to reach the platforms. The antennas for that site will be on the top of the mountain peak. At times there will be as many as nine stations QRV with the capability of dual mode operations on all bands.
Safety of the team is paramount. We will be installing a winch system to hoist team members and all of our equipment from our chartered ship's Zodiac onto the island. From there, manpower will carry the equipment the 300 meters straight uphill to the marine camp. The trail to the elevated operating site is extremely dangerous. We will utilize harnesses and safety ropes to minimize the risks. This is going to be a difficult and expensive DXpedition. Every effort will be made to maximize QSOs while protecting the safety of the team members. It is a delicate balance.
Your financial support is necessary and gratefully accepted. Contributions can be made via our website at: http://www.hk0na.com/sponsors
We plan periodic press releases with information of interest. Also, watch the website for breaking news.
Thanks,
Jorge Prieto, HK1R - DXpedition leader
Co-leaders: Bob Allphin, K4UEE
Gregg Marco, W6IZT "

IOTA NEWS.....
SA-071. A QRP DXpedition, by the Cantareira DX Group, was expected to be on the air as ZV2LOW from Montao de Trigo Island this past weekend (December 3-4th). This is not an IOTA expedition, but an operation by a group of QRP enthusiasts. Activity was to be on the QRP frequencies:
CW - 14060, 18096, 21060, 24906 and 28060 kHz
SSB - 14285, 18130, 21385, 24950 and 28360 kHz
PLEASE DO NOT QSL. QSL cards will be automatically sent via

the Bureau. LAST MINUTE UPDATE: Due to bad weather, the ZV2LOW
operation was canceled. The station will be active from elsewhere
and of course will not count for SA-071.

ISWL ACTIVITIES. The ISWL's 65th anniversary celebrations are now in
their final month. The "GB65ISWL" callsign will be active throughout
the month from various locations. Also, the "PG65ISWL" callsign will
be activated by Fred, PA0FAW, between December 1-28th. Activity will
be mainly CW, PSK and with some SSB possible from FF-PA-005. QSL via
direct (see QRZ.com), by the Bureau, including eQSL.cc and SWL reports
are very welcome. PLEASE NOTE: LoTW will not be used. The following
two club callsigns will also be used throughout the month:
GX4BJC/A - Operated from Walton on the Naze, in Essex, by Herbie,
G6XOU. (ISWL Council Member & QSL Bureau Manager).
(WAB Square ◆M22 - England & IOTA ◆U-005).

MX1SWL/A - Operated from Great Sutton, in Cheshire,
(/A WAB Square ◆J37 - England & IOTA ◆U-005).

MX1SWL/P - Operated from other English locations, by Geof, M0BAU.
(/P WAB Squares can be requested during the QSO. IOTA
is EU-005).

More information is available at: http://www.iswl.org.uk or QRZ.com

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from
Chichijima Island (AS-031), Ogasawara, between December 24th and January
2nd, 2012. Activity will be on 80-6 meters, including the satellites,
using CW, SSB and the Digital modes (NO 6m EME). QSL via his home callsign
JI5RPT. His log search will be available on his Web site at:
http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at:
http://twitter.com/jd1bly

KH6BZF PROPAGATION FORECAST/REPORT (December 5-11th)....

KH0, MARIANA ISLANDS. Operators Buchi/JO3FRH and Masa/JE4SMQ will be
active as KH0UY and KH0K, respectively, from Saipan (OC-086, USI NI002S,

WLOTA 1333), Northern Mariana Islands between January 7-10th, 2012. Activity will be on 80-6 meters, plus the satellites. QSL via their home callsigns, direct or by the Bureau.

LOTW (LoTW Processing Update). The ARRL Letter reports: "Logbook of The World (LoTW) is continuing to accept and process logs, including logs from this past weekend's CQ World Wide CW Contest. Before the contest, LoTW had just about caught up with the backlog, but due to the high number of logs submitted after the contest, it is once again seeing delays. As of December 1st, the processing delay is at 22 hours -- down from 45 hours last week -- with approximately 830,000 QSOs in 2500 logs still waiting to be processed. If it has been more than 48 hours since you uploaded a log to LoTW and your log has not yet been processed, please upload it again. Remember: Do not send entire logs that contain previously uploaded QSOs -- use the date range option when signing logs, selecting only those QSOs in a specific date range to upload to LoTW. Thanks again for your patience."

MOBILE WEB-CLUSTER. Kelly, N0VD, reports: "For what it's worth, I have been playing with 'mobile spots' over the past few years. I originally wrote a native Blackberry app a couple of years ago that could interface with the DX cluster, but never released it to the public. Over the past few months I've had the motivation to develop a mobile enhanced DX web cluster in order to broaden the accessibility to a wider variety of mobile devices. While it is still in Beta and currently being developed, it can be accessed at <http://m.dx2go.com>. If you have a smart phone from the last couple of years, you should be able to get full use of the site.
While I believe the mobile web cluster to be stable, there are sure to be bugs that I have not found.
Development will also continue on the Blackberry app as well as a new Android app to hopefully be released in the near future. A fully functional desktop website is also in development and I hope to release it to the public soon. When that happens, I will likely retire the old DX Central website as it has been in auto-pilot for years and sorely out of date.
Anyway, it's been interesting (or frustrating) trying to develop something compatible with a wide range of devices. Hopefully it will be something of value to a larger audience at least I can check to see if 160M is open and not have to get out of bed!"

NP2/WP2, U.S. VIRGIN ISLANDS. Chuck, WA0ROI, will be active as WP2/WA0ROI from St. Croix between December 7-13th. Activity will include an entry in the ARRL 10M Contest (December 10-11th), signing as NP2N. QSL via WA0ROI, by the Bureau or direct, or LOTW to WP2/WA0ROI.

Fred, IK7JWX, informs that all th direct QSLs for the recent GDXF & SDXF operations from Herne Isand (AF-068) and Park of Dakhla (CNFF-007) have been sent out.

QSL MANAGER CHANGE. Buzz, NI5DX, reports that he has assumed the duties of QSL Manager for Abdulla, A71CV, whose previous manager (A71AN) is now a SK. Abdulla will soon send Buzz his logs and the two will work on the design of a new QSL card. Once the design is complete it will be sent to UX5UO for printing. This process could take as long as 6-8 weeks, so no cards should be expected from NI5DX until the cards are received from the printer.

QSL MANAGER CHANGE. Dick, W0RAA, originally reported that N1NK would handle the QSL Manager duties for J6/W0MU and the contest callsign of J6M which was used in the CQWW CW Contest this past weekend. That has changed and all QSL requests should go to Mike, W0MU, at his QRZ.COM address.

QSL MANAGER CHANGE. Ralph, K2PF, reports that effective immediately, he is taking over QSL responsibilities from AA7V for VP2V/N3DXX. QSL direct only.

QSL RECEIVED VIA LoTW: 3DA0HC, CE2/VE7SV, CO8TW, D60VB, DP6T, FY5KE, G3NKC, HC2A, HK1N, IK7JWY, KH6LC, KH7X, KL8DX, NP2KW, OD5PY, PJ2T, PW7T, RG9A, SM2EKM, SQ5M, ST2AR, UN6P, VA7ST, VE6BBP, VE7AX, VK9CW,

VK9CX, WL7E, XU7ACQ, YL2PP, YB1ALL and ZD8ZZ

QSLS RECEIVED VIA MAIL: 3A2LF, 3D2AD, 4U1ITU, 4W6A, 5R8NL, 5W1A, 5W8A, 8Q7EJ, 8R1EA, 9A2YM, 9Q50ON, A52PP, A71CT, AH0J, C31CT, DL2JRM/P, E51CG, EK6LP, EK6TA, ES5QD, FG4NN, FM5BH, FP/G3ZAY, GD4IHC, GM0GAV, GW3LEW, JA5AUC, JY6ZZ, LX8RTTY, M0TIX, MM0RAI/p, OD5NJ, PJ5/SP6IXF, RI1ANC, SV2ASP/A, TF3CW, TM5SM, UN8GV, V85TL, VK0KEV, VP2MSC, VP2MVX, VR2XMT and Z30U

QSLS RECEIVED VIA THE BUREAU: 5R8VB, 7P8VB, 7Q7VB, 8Q7DV, 9J2VB, 9U0VB, 9X0VB, DR1A, ER6A, HH2/OH2TA,SN3R, SN3X, TM89YON, TO5T, TX1B, V85/UA4WHX, YB41AR, YE8S, YE9FCCC, Z2/UA4WHX and Z23MS

V3, BELIZE. Guenter, DL2AYK, will be active as V31YK from Belize between February 27th and March 11th, 2012. Activity will be on 80-10 meters, possibly 6 meters, using CW, SSB, RTTY and possibly some PSK31. He also plans to be active in the ARRL DX SSB Contest (March 3-4th) as a Single-Op entry. QSL via his home callsign, direct or by the Bureau.

V6, MICRONESIA. Operators Chip/K7JA and his XYL Janet/KL7MF will be active as V63RR and V63QQ, respectively, from Pohnpei Island (OC-010) between December 5-2th. Activity will be strictly holiday style on 20-6 meters. QSL via K7JA.

VK, AUSTRALIA. Tino, VK3EGN, will be active in the CQ 160-Meter CW Contest (January 27-29th) as a Single-Op entry. He states that he will be using a 3 element vertical HW beam (kite lifted) antenna from Ocean Grove Beach. QSL via VK3EGN to the Bureau.

W6, UNITED STATES (Special Event). Mark, KM6HB, in conjunction with the Anaheim Police Radio Club (W6APD), will operate as W6W from December 8-11th. This special event will commemorate the 70th anniversary of the heroic Marine Corp stand at the battle for Wake Island in the early days of World War II. Please know that W6W will be operating form the Southern California area and does not count as KH9. A picture QSL card will be available. No certificate is being offered. Operating frequencies will be 80-10 meters in the general portions of the bands. More information is available at QRZ.com under W6W. QSL via KM6HB: Mark McMullen, P.O. Box 27271, Santa Ana, California 92799.

XV, VIETNAM. Yan, XV4Y (ex-XV4TUJ), located in Mekong delta (south of Vietnam), informs OPDX that "conditions on 80m have greatly improved and in the last days good DX results showed my setup is not that bad." Yan states, "During my spare time this winter (high season for work here) I will focus on 80m CW mainly to Japan, Pacific and North America around 1400z. Family life and work does not allow me good operating time to Europe (early morning here). Many stations are active from Viet-Nam this winter and that is good news. However few are present on low bands. People who want to try work XV on 80m could follow my twitter account (XV4Y) where I announce my DX schedule. QSL via OK1DOT, LoTW and eQSL." Yan's Twitter and Web page can be found at: http://twitter.com/#!/XV4Y/followers

http://xv4y.radioclub.asia
Also, to learn more about Yan, read his QRZ.com page.

YN, NICARAGUA. Jeff, N6GQ, will once again be active as YN2AA from Grenada, Nicaragua. He informs OPDX that he will be there a few days before the ARRL DX SSB Contest (March 3-4th, 2012). Activity will be on 160-10 meters, possibly 6 meters EME (maybe 2m too). Jeff will use a K3 radio and 1 KW amp into the following antennas: a Tribander, 2 element 40m beam, wires and beverages for 80/160m. QSL via NN3W, by the Bureau or direct. U.S. stations, please send SASE; DX stations, please send SAE with GS or IRC. Bureau service will take time. Logs will also be uploaded to LoTW.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 4th December 2011

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary next year. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

IRTS Committee Meeting

Club Representatives of affiliated clubs are asked to send their email details in order to be kept up to date with notifications of upcoming IRTS committee meetings. Please send email addresses to info /at/ irts.ie or to Hon. Secretary Ger McNamara ei4gxb/ at/ gmail / dot /com The Next Committee meeting will take place on Saturday 10 December at 11.00 at the Maldron Hotel in Portlaoise, and club reps are encouraged to attend.

New Zealand's radio hams get 1 KW

Radio Amateurs in New Zealand received an early Christmas present from their regulator the MED, permitted power levels will be doubled to 1000 watts PEP output The change took effect on November 30, 2011.

New kids on the block

Newly established Enniskillen Amateur Radio Society has just completed its first Foundation Course / Exam.

4 candidates have successfully passed with flying colours.

We are based in the heart of Enniskillen itself.

We will be seeking interest from those wishing to take either the FOUNDATION / INTERMEDIATE course in the new year, dates to be confirmed.

Please feel free to contact us via earsni / at/ btopenworld/ dot /com
or visit our website www.earsni.co.uk

Further information regards courses & our meetings will be
available on-line should you wish to attend.

Everyone more than welcome.

Johnny Cash Special Event Station

Members of the Northeast Arkansas Radio Club (NEARC) USA, will be
conducting the inaugural Johnny Cash Birthday Celebration Special Event
Station on what would have been the late Country Music Hall of Fame and
Rock and Roll Hall of Fame member's 80th birthday, January 26, 2012
beginning at 12:00pm Central time (1800 hrs. UTC).

Satellite AO-51

Satellite AO-51 has ceased transmission and is not responding to
commands. The last telemetry data indicated that the third of six
batteries was approaching failure to short, and observations indicate
the voltage from three cells is insufficient to power the UHF
transmitters. Initial tests with the S band transmitter were also not
positive, although more attempts are in order. We have tried leaving
the satellite in an expected state where if voltages climb high enough,
the 435.150 transmitter may possibly be heard, stated Drew KO4MA
AMSAT-NA VP Operations

South Dublin Radio Club talk on GPS

This Tuesday 6th of December Martin EI9GCB will be giving a talk on the
Global Positioning System

As well as a general explanation of how GPS works he will cover his
experience of GPS chip design for mobile phone applications. These
chips, smaller than 4mm in size are capable of receiving GPS, FM Radio,
Glonass and Bluetooth and are included inside many modern smartphones.

Along with showing the chip and associated circuit there will be
demonstration of GPS mobile phones and navigation devices

Visitors are welcome to attend at 8pm at the community centre on the
Marian Road in Rathfarnham.

http://www.southdublinradioclub.ie

Marconi Auction

A two day auction of Marconi memorabilia will take place at the D4
Berkeley Hotel Dublin on December 13th and 14th 2011. Among the
interesting items will be two lengths of the original Marconi-code
ticker tape, measuring 24inches and 19inches framed.

DX News

The 'Buddies in the Caribbean DXpedition Group' are off on another trip to St Lucia. The group specialize in 100 watt or less low power radios and the Buddipole portable antenna system. Eight U.S. operators are expected to take part and each will have his own J6 callsign. During the ARRL 10m contest on 10/11 December the call J68UN will be used. They plan to be on the island from 4 - 12 December.

Another Caribbean station to look for on the weekend 10/11 December is V25R from the island of Antigua. This is K6IF and QSLs go via his home call.

AA1AC will be in Senegal from 4 - 12 December. He will use the call 6W/AA1AC.

Pierre HB9AMO is back in Haiti until 8 January. He will be active as HH2/HB9AMO. The operation will be CW only using a TS-50 into a wire antenna and tuner. QSL info is via PA7FM.

For those interested in contacts with Antarctica look out for the call II0MZ. This station is being operated by Massimo IW0HEU from the Italian Mario Zucchelli Station at Terra Nova Bay in Antarctica. He will be there until mid February and has been active on 14333 kHz recently from 1700z onwards.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1151. Ohio/Penn DX Special Bulletin #1039.1

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-05 11:12:27 UTC
From: "Tedd Mirgliotta (KB8NW)" <kb8nw@barf80.nshore.org>

SB DX @ WW < KB8NW $OPDX.1039.1
Ohio/Penn DX Special Bulletin No. 1039.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1039.1
BID: $OPDX.1039.1
December 5, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and K3LP for the following DX information.

ET3, ETHIOPIA (ET3AA Youth Development Project; DX-Pedition 2011).
Dave Collingham, K3LP, sent the following press release to OPDX on December 4th (edited):

"Members of our team will depart Washington Dullas Airport in Virginia on Wednesday morning, December 7, 2011, headed to Addis Ababa, Ethiopia, where we will be greeted by Sid May (ET3SID).
See <http://www.k3lp.com/et3aa_december_2011.htm> for additional information and updates.

Our team will include David Collingham (K3LP - Team Leader), Paul Ewing (N6PSE), Al Hernandez (K3VN) and Bill Beyer Jr. (N2WB). My good friend Krassy Petkov (K1LZ) informed me today that his participation is not possible due to a serious health issue with his father in Bulgaria. Our prayers are with you Krassy.

The duration of this trip will be 8:30 AM December 8, 2011, through 10:30 PM, December 13, 2011.

The primary goal of the trip is related to Youth Development at the Addis Ababa University - Institute of Technology. Fifty-eight (58) students have been studying to take the US FCC Amateur Radio License exams since my last visit in August 2011. Student numbers taking the tests by type are:
58 �echnician License (Element 2) exam
44 �eneral License (Element 3) exam
5 �xtra License (Element 4) exam

Our team will administer the examinations in accordance with the ARRL's VEC requirements for Volunteer Examiners (VEs). David Collingham (K3LP) will be the VE Team Liaison on this trip with Paul (N6PSE), Al (K3VN) and Bill (N2WB) participating as Volunteer Examiners.

The tests will be conducted at 9:00 AM to 12:00 PM on Saturday,
December 10, 2011. Another session will be held on Monday, December 12,
2011, for retests and General/Extra Class license exams. Our team members
will sponsor and pay 100% of student exam fees.

The other goals with this trip are:
b) Creation of "University of Addis Ababa - Technology Incubation
Program (TIP)"
c) Low Band Antenna Installation (160 & 80 Meters) at University
d) Activate ET3AA and ET3SID on 160M thru 6 Meters using CW and SSB

There are only two radios (one at the university and one at Sid's home)
for use during this trip. The legal authorization to bring additional
equipment into the country requires the Ethiopian government security
approval prior to entry. Future trips will involve bring additional
equipment that can be donated to students.

Our team will operate from Sid May's QTH using the call sign ET3SID and
from the university using the call ET3AA call sign. Look for us on 160
thru 6 Meters using CW and SSB. I'll work with students to install 160
Meter vertical and 80 Meter four square antennas during this trip. All
antenna, coax, control cable, four square box, etc. supplies will be
donated to the club.

QSL Manager for ET3AA and ET3SID for this trip only: N2OO (Bob Schenck)
Please do not merge other QSL requests for QSO's you've made with ET3SID
and ET3AA in the same envelop not related to this trip. Bob will only
have the logs for the ET3AA and ET3SID for Dec. 8-13, 2011. Thank you!

We look forward to working you from Ethiopia.

Sincerely,

David Collingham • K3LP"

RAC Bulletin 2011-041E - Address/phone number/email updates needed.
2011-12-05

December 5, 1011

Every month RAC sends out renewal notices to members whose
membership is to expire in a month. Every two months the TCA
+magazine is mailed.

However members move and do not send a change of address notice to
headquarters or do not update their information online @
+rac.ca, including phone numbers and email addresses.

Canada Post charges us for returned mail and members do not get
their renewal notices or their TCA magazine.

This is a reminder to please send a change of address notice to
headquarters or update your information online @ rac.ca,
+including phone number and email address.

If you know a ham that has moved in the last year remind them to
make these changes.

We are looking for new addresses for:

VE3NY, VA2AX, VE3RBO, VE7CJZ, VE9JEF, VE3GNM, VE1AIP,
VE3YT, VE3DDD, VE3FGV, VE2VW, VE5LQ, VE5VL, VE5VT, VE3LUJ
VE6BBE, VE3HMG, VE7BWW, VE6FS, VE7CDL, VE4ZD, VE6KY, VE6SAR, VE7PW,
VE3BZF, VE7WQ, VE1JIM, VE4AT, VA3QR, VA3MEW, VA3NV,
VA3COX, VE6LEN, VE7MLT, VE7ECW, VE7HLO
VA7SND, VA2RC, VE7JCR, VE4JP, VA3GAX, VA2RJC, VE2TAW

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3D2, FIJI, OC-060
Antoine,3D2AG, will conduct a small "green" radio activity as 3D2AG/p
from Rotuma (OC-060, grid loc. RH87) from Dec 9 until Jan 9, 2012:
Ecologically correct barefoot on 80m-6m. In the context of sustainable
development of insular communities of the Pacific, the company TOTAL
sponsors the batteries, three 50 watt solar panels and the QSL cards
printed on recycled paper. He will use an ICOM 706, FT757GX and TS440S,
a 5 band Spiderbeam, Doublets for 40m/60m/80m and a 6 ele yagi for 6m
with 100 watts in SSB and CW. His batteries are powered only by the
solar cells. QSL via homecall, unfortunately only direct.

4S, SRI LANKA, AS-003
Peter,DC0KK will be QRV as 4S7KKG during his stay on Sri Lanka (AS-003)
from Dec 12 until Mar 10, 2012. His dipoles will be mounted on palms.
Peter prefers CW and digital modes like RTTY, PSK and WSJT.
QSL via homecall. The QSLs will be confirmed after his return home.

5W, WESTERN SAMOA, OC-097
Joe,DL4RDJ, is working as 5W0OJ on HF from Western Samoa (OC-097).
QSL via homecall.

CE, CHILE
Hector,CE3FZL, plans to take part in the upcoming ARRL 10m Contest.
QSL via homecall, unfortunately only direct.

DL, GERMANY
The special event station DP30OVW is activated by the German OV I45
noch until Dec 31 to celebrate its 30th anniversary.
QSL via bureau & LoTW.

ET, ETHIOPIA
David,K3LP, Krassy,K1LZ, Al,K3VN, Paul,N6PSE, and William,N2WB, are
planning a DXpedition to Ethiopia from Dec 8-13. They want to put up

some antennas on the roof of the university of Addis Abeba, will do
US Ham license exams, install a "Technology Incubation Program (TIP)"
and do some radio operations from the club ET3AA and from ET3SID.
QSLs for these operations via N2OO.

FR, REUNION, AF-016
Jean,FR/F6CAM, is active on the bands until Jan 10, 2012.
QSL via homecall.

FS, ST MARTIN, NA-105
Tom,FS/DL2RUM, will be QRV in CW, SSB and RTTY running 600 watts from
St Martin (NA-105) until Dec 12. QSL via homecall.
More information can be found at: http://dl2rum.de

G, ENGLAND, EU-005
The ISWL will activate following callsigns during December:
GX4BJC/A from Walton on the Naze in Essex by Op Herbie,G6XOU,
(/A WAB Square TM22 - England, EU-005, WLOTA LH-1841) and
MX1SWL/A & MX1SWL/p from Great Sutton in Cheshire by Op Geof,M0BAU,
(/A WAB Square SJ37 - England, EU-005, WLOTA LH-1841).
QSLs via G6XOU.

HV, HOLY VATICAN
The special event station HV50VR is celebrating the 50th anniversary
of the radio station "Santa Maria di Galeria" of Radio Vatican (opened
in 1957). The medium-wave antenna has four 94m high masts with wire
antennas. QSL via I0JBL, unfortunately only direct.

JA, JAPAN, AS-077
The special event station 8J6HAM will be activated between Dec 10 and
Mar 5, 2012, for the 11th Nishinihon (or West Japan) Ham Fair.
QSLs for QSOs on HF via bureau, QSLs for satellite QSOs via JA6PL.

KH2, GUAM, OC-026
Haru,JA1XGI, will be QRV as W8XGI/KH2 from Guam (OC-026, WLOTA 0064,
USI GU003S, WFF KFF-110) working on 20m-10m (30m/17m/12m preferred)
mainly in CW from Dec 12-15. QSL via JA1XGI, LoTW.

KP2, US VIRGIN ISLANDS, NA-106
Chuck,WP2/WA0ROI, will be QRV from St. Croix (NA-106) from Dec 7-13.
He will sign NP2N in the ARRL 10m Contest. QSL via WA0ROI and LoTW.

PJ2, CURACAO, SA-099
Marty,PJ2/K2PLF, is active mainly in RTTY on 30m/17m/12m until Dec 13.
He will join the ARRL 160m CW Contest and the ARRL 10m Contest as PJ2T
together with other OMs.
QSLs for PJ2T via W3HNK, PJ2/K2PLF via homecall.

T8, PALAU, OC-009
Ark,UA4CC, will operate in holiday style signing T8CC or T88UU in all
modes on all HF bands from Dec 7-16. QSL via homecall, LoTW.

UA, RUSSIA
The special call R1941RB remembers the battle of Moscow 70 years ago
until Dec 11. QSL via R2DX, LoTW.

UN, KAZAKHSTAN
48 special event stations will be activated from 11 provinces to
celebrate 20 years of Kazakhstan's independence from Dec 1-31:
UP20B (via UN7BWA) UP20BCF (via UN7BCF)
UP20BEW (via UN7BEW) UP20BI (via UN7BI)
UP20C (via UN8CWN) UP20CAD (via UN7CAD)

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
28 November - 04 December 2011

Solar activity was low all week. On average, seven small and
magnetically simple spotted regions were present at any given time
during the period. Of these, Region 1363 (S22, Lo=108,
class/area=Eki/430 on 04 December) was the most productive, with
five C-class flares and 4 optical flares to its credit. It appeared
on the disk on 29 November as a small Hsx-alpha group and ended the
period as the largest and most magnetically complex (beta-gamma)
group on the disk. Despite its size and complexity, Region 1363 did
not produce the largest x-ray flare of the week. That honor belongs
to Region 1362 (N08, Lo=131, class/area=Eso/220 on 03 December)
which produced C4 04/1615Z. The second largest x-ray flare of the
period, a C3 from Region 1364 (N18, Lo=105, class/area=Hsx/60 on 30
November) occurred on 30/2028Z. At least one CME was observed each
day in coronagraph imagery, mostly attributed to filament eruptions.
None of the CMEs had any significant geoeffective component.

The greater than 10 MeV protons at 10 pfu exceeded threshold during
the period. The event began at 26/1125Z, reached a maximum flux of
80 pfu at 27/0125Z and ended at 28/0145Z. This event was associated
with a filament eruption observed early on 26 November.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels 28 November - 01 December and at moderate levels on 27
November and 02 - 03 December.

The geomagnetic field on 27 November was at quiet to unsettled
levels, with isolated high latitude active periods. The disturbed
conditions were caused by a CIR in advance of a weak CH HSS. Most of
28 November was quiet. A 45 nT Sudden Impulse at the Boulder
magnetometer at 28/2154Z signaled the arrival of a CME from 26
November. Unsettled to minor storm periods followed at all
latitudes. Quiet to unsettled levels, with isolated high latitude
```

active periods, returned by midday on 29 November and lasted until early on 03 December. The exception was the latter half of 30 November when a solar sector boundary crossing and prolonged southward IMF Bz triggered minor to major storm periods at high latitudes. Active to minor storm conditions were also observed at high latitudes between 03/0900-1500Z with the passage of a transient feature. The field returned to quiet to unsettled levels for the remainder.

Forecast of Solar and Geomagnetic Activity
07 December - 02 January 2012

Solar activity is expected to be at predominately low levels with a chance for isolated M-class activity through the forecast period

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels the entire forecast period

The geomagnetic field is expected to be at mostly quiet to unsettled levels through most of the forecast period. Coronal hole high speed streams are expected to bring active conditions on 14 November and again on 26-29 December.

1156. Good old solar

The ARRL Contest Update

Published by the American Radio Relay League
****

December 7, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- It's Alive! - The ARRL 10 Meter Contest
- Key Contest for Rookies - ARRL Rookie Roundup
- Don Rohn, Tower Pioneer - Silent Key
- Can You Place The States?
- CQ WW Photos from PJ4T
- ARRL UHF Contest Extended Results
- Franklin Array Antenna - An Original
- Height and Takeoff Angle by K5WMG
- Is There Ringin' In Your Ears?

NEW HF OPERATORS - THINGS TO DO

Check out those 10 meter conditions in the upcoming ARRL 10 Meter Contest <http://arrl.org/10-meter>. As writeup author Scott K7ZO points out in his "pre-writeup" on the contest's web page, good conditions feed on themselves with increased activity so don't miss out! The following weekend finds the second CW version of the ARRL Rookie Roundup <http://arrl.org/rookie-roundup> for newcomers to ham radio - will there be a three-peat winner?

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

My flying fingers miscombobulated the call sign of Midge K7AFO in the Nov 23rd issue - apologies! I hope I am not banned from the kitchen and her corn chowder...and Jim K1TN pointed out that CW, the mode, began in the 1920's while it was just the Morse, the code, that was devised in the early 1800's.

John W6BXQ reminds your editor that the 219-220 MHz allocation is limited to digital data messaging so CW is not allowed everywhere on the ham bands.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

December 10-11

- ARRL 10 Meter Contest
- 28 MHz SWL Contest
- UBA Winter Contest
- AWA Bruce Kelly QSO Party--CW
- NA High-Speed Meteor Scatter Contest--Digital
- SKCC Weekend Sprintathon--CW
- Great Colorado Snowshoe Run--CW
- NAQCC Monthly QRP Sprint--CW (Dec 14)
- CWops Monthly Mini-CWT Test (Dec 14)
- Russian 160 Meter Contest (Dec 15)

December 17-18

- ARRL Rookie Roundup--CW
- Feld-Hell Happy Birthday Sprint
- OK DX RTTY Contest
- RAC Winter Contest
- Lighthouse Christmas Lights QSO Party
- Croatian CW Contest
- Stew Perry Top Band Distance Challenge--CW
- Holiday Spirits Homebrew Sprint--CW
- Run For the Bacon--CW (Dec 19)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Don Rohn <http://www.wirelessestimator.com/breaking_news.cfm#Don_Rohn>, leader of Rohn Towers during its growth from a small TV-tower manufacturer to an industry giant, died on Nov 21st at the age of 72. Rohn towers are by far the most common in ham radio and set the standard by which towers are judged. (Thanks, Bill K3WA)

Array Solutions <http://arraysolutions.com/> has released some new models in the AS-300 ICE Surge Arrestor product line. The design applies a saturable inductor to help dissipate surge energy in the feed line as described in the device manual. There is a multi-arrestor version of the product for mounting on a single-point entry, as well.

The new Alpha 4040 auto-tuner by RF Concepts/Alpha Amplifier <http://www.rfconcepts.com/> is truly a heavy-duty product, rated at 4 kW maximum over the 1.8 - 30 MHz range. The tuner uses vacuum-variable capacitors and a new multiple-contact edge-wound inductor in a Tee configuration. The front panel features an LCD screen and can even display impedances in a Smith Chart <en.wikipedia.org/wiki/Smith_chart> format.

Keep your prefix list up-to-date - to celebrate the 75th Anniversary of the CBC/Radio Canada, Canadian amateurs may substitute the following prefixes between December 1-31, 2011:

- VG for VA
- VX for VE
- XJ for VO
- XK for VY

For example, VX3AT is really VE3AT. (Thanks, AMSAT www.amsat.org <http://www.amsat.org/>, newsletter ANS-338)

The previous issue's Conversation regarding prompt log submissions was in reference to those submitting logs electronically. There are plenty of good reasons that logs might not be ready to send right after the contest - for example, rovers and mobile stations usually keep paper logs that must be transcribed or a station on an expedition might be far from email. The point was - if in preparing your log you are changing the information to what you think you "should" have copied, that's going too far - nothing more.

Speaking of mobiles - if you operate your mobile station in the ARRL 10 Meter Contest <http://arrl.org/10-meter>, you must stay within one state or province. If your travels take you beyond that boundary, you must either change your operation to use a different call sign or submit your log as a checklog.

More plaque sponsors have stepped forward for the upcoming Stew Perry <http://jzap.com/k7rat/stew.html> contest on 160 meters:

- Sponsor - Category
- K7FL - Top Score 100% Search & Pounce
- N7UA - Top Score High Power
- N2KW - Highest rate for 1 hour w/o bust
- K6ND - K6SE Memorial-Top Score World
- NA0Y - Top Score USA
- F8BPN - Top Score EU- Low Power
- EI4HQ - Perhaps you were Irish and didn't know it (Top # of calls containing sequential "EI")
- N9ADG - Top Score Asia

(Thanks, Lew W7EW)

Here's a book that is definitely going on my to-read list: Wi-Fi and the Bad Boys of Radio by Alex Hills. The Wired magazine review <http://www.wired.com/geekdad/2011/11/a-history-of-wi-fi/> definitely piqued my interest as it mentions Mr Hill's progressions from ham radio through college radio stations to field experience and finally to the development of Wi-Fi technology that we almost take for granted today. Until we can't get it...that's where the "Bad Boys of Radio" come in. I'll leave those acquaintances for you to discover!

Three great articles await you in the December issue of the Potomac Valley Radio Club Newsletter <http://pvrc.org/Newsletters/dec2011.pdf>: a report on the recent High Speed CW Championships by Ken KE3X, a recounting of the CQ WW SSB from Thailand by Fred K3ZO, and a wire beam design by Jim K4QPL. Good reading and photos, too!

The QRP ARCI web page <http://www.qrparci.org/> is now updated to list the entire roster of QRP ARCI 2012 contests through December of 2012. (Thanks, QRP ARCI Contest Manager, Jim K9JWV)

Web Site of the Week - Hams love maps and contesters are the mappiest of the lot - well, maybe next to DXers - so how well do you have the US states placed in your memory? Try this drag-n-drop online test <http://jimspages.com/States.htm> for fun! (Thanks, Bob N6TV)

WORD TO THE WISE

Listen - listen to the call sign the CQing station responds to and don't be a lid - stand by if it's not very close to your call. Too many stations just keep calling and calling, regardless of who the CQer comes back to. If you're transmitting, you're not listening and can't tell what the CQing station is doing. Give a couple of calls, then listen - it's a lot easier to get through that way.

==> SIGHTS AND SOUNDS

Diego LU8ADX recently participated as part of the PJ4T team in the 2011 CQ WW SSB Contest and has published an extensive photo album <https://picasaweb.google.com/116979053033309598589/PJ4Bonaire?authuser=0&authkey=Gv1sRgCP-C44HLhOboJA&feat=directlink>
of his experiences. Can you find the drempels?

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X reports that the 2011 ARRL August UHF Contest's extended writeup <http://www.arrl.org/contests> is now online. Sweepstakes log submissions total 1404 for CW and right at 1800 for Phone - no wonder it was so hard to hold a frequency! In addition, plaques and certificates for the 2011 ARRL RTTY Roundup are also now in the mails - an early present for the lucky recipients!

An updated version of the ARRL 160 Meter CW Log Analyzer <http://tinyurl.com/7xjxypc> is ready for your download, including the "One click" Cabrillo import feature. For fun and a good luck at the difference between the first and second halves of the contest, import your log for the first half of the contest into the worksheet labeled "Position 1" and the second into "Position 2". (Thanks, Bob K0RC)

The 2011 Canada Day contest results and writeup are now posted online <http://www.rac.ca/en/rac/programmes/contests/> at the Radio Amateurs of Canada (RAC) web site. The results will also be published in the next The Canadian Amateur (TCA) magazine (Jan / Feb issue). (Thanks, Bart VE5CPU)

>From the Pacific Northwest comes word that the Salmon Run log season has closed and the fish counted for a total of 290 logs. Results have been posted <http://www.wwdxc.org/images/stories/SalmonRun/2011%20results.pdf> and nets are being repaired for next year! (Thanks, Jim K7WA)

Kansas QSO Party results <http://www.ksqsoparty.org/> are now ready with lots of soapbox and information. The 33 stations using 1x1 call signs made 21,509 QSOs with 4,851 unique stations, an average of 652 contacts per operator. (Thanks, Cliff K0CA)

Results for the new August CW Open <http://www.cwops.org/cwopen.html> have been published. The sponsors report that participation met their expectations and the format of three separate operating periods was interesting. The sponsors have changed the contest date to September in 2012 to avoid conflicts with other contests and will make other adjustments to the format. (Thanks, Alan AD6E)

The Logs Received web page for the 10-Meter RTTY Contest <http://rttycontesting.com/the10meterrttycontest/logs.html> has been updated with logs received up to about an hour ago. 426+ logs have been submitted so far in the first 24 hours. Activity was good worldwide with lots of spots though run rates weren't high. The solar flux rose throughout the week and the contest started with an SFI of 160 and moved up to 164 during the contest with low A and K index numbers: The A dropped from 8 to 5 and the K from 2 to 0. There was a lot of interesting spotlight propagation that moved around the world as the ionosphere changed - a great warmup for the ARRL 10 Meter contest this weekend and ARRL RTTY Roundup in about a month. The contest picked up three new plaque sponsors and now has nine plaques sponsored. (Thanks, Don AA5AU and Ed W0YK)

The recent SKYWARN day sponsored by the National Weather Service also heated up the bands as reported by Deb N9SJ. From a portable vehicle station, she and Steve WD9CIR made 979 contacts hitting 46 states, at least 3 Canadian provinces and 3 DX stations not to mention 69 of the 105 NWS WFO's on the air.

Did you have a great experience in a recent ARRL contest? If so, while it's still fresh in your memory, share it with us and the writeup authors using the ARRL Soapbox web page <http://www.arrl.org/soapbox>. Photos are especially welcome!

Doug KR2Q gives the Pileup web site <http://pileup.ru/> by Valery, R5GA his "SUPER GREAT" rating. The website compiles claimed scores from sponsors and from 3830, presenting the information sorted in several useful ways. There are also sections for related comments, published videos, and side-by-side comparisons. Wow!

Another popular compilation, the 3830 CQ WW SSB Soapbox <http://www.eskimo.com/%7Emwdink/3830/> comment compilation is online as well! (Thanks, Dink N7WA)

OPERATING TIP

If you answer a CQing station and they respond with an error in your call, the most reliable way to be sure they have your call correct is to send only your call sign again and not the exchange. Don't send the exchange until the CQer responds with your correct call - then send your exchange.

==> TECHNICAL TOPICS AND INFORMATION

The Franklin array <http://www.aktuellum.com/circuits/antenna-patent/patents/242342.pdf> of half-waves in phase is common in ham radio VHF/UHF omnidirectional antennas but not many hams know that it was once popular, but difficult, in the AM broadcast industry <http://www.radiomagonline.com/media/ar/0701/107br0703lg.jpg>, as well. These required a serious amount of tower and property to put up and guy. (Thanks, Paul W9AC)

A recent online edition of EE Times included a nice EMC-basics design article <http://www.eetimes.com/design/analog-design> on battery charger designs from a standpoint of minimizing RFI. The article is a good introduction to EN standards, as well.

Don't toss those PL-259 backshells left over from removing a connector - put them to work! Cover and wrap the back end with tape or a plastic cap and you will have a nice screw-on water-resistant cover for an SO-239. It's not waterproof, but it sure helps!

The Case of the RF Disturbances <http://www.designnews.com/author.asp?section_id=1368&doc_id=235952&> is the latest tale of resolving radio-related rebellion from Design News magazine's Tales of Sherlock Ohms series. Get out the aluminum foil, Kenneth!

In a discussion of using external fans to provide extra cooling for amplifiers, it was pointed out that if the fan is in the exhaust (hot) air stream, avoid fans with blades that age or warp in the heat or that have oiled bearings.

One of the originals in the field, Radioshack <http://www.radioshackdiy.com/> is now selling DIY Arduino-based kits as part of "The Great Create" project for Do-It-Yourself projects. It is encouraging that so much attention is being paid to building electronics and other gadgetry - an excellent pathway to ham radio if we can get the word out!

In the latest edition of QRP ARCI's QRP Quarterly I noticed a neat method of homebrewing large air-wound coils <http://www.ad5x.com/images/Articles/CoilRevB.pdf> by Phil AD5X. It uses flexible grommet strips as the support structure with the result very similar to the B&W Miniductor product. Whether you prefer QRP or QRO, every issue of QRP Quarterly is jam-packed with building ideas applicable to nearly every shack and their contests are fun, too.

Kevin KI8IR notes that while, "it may be common practice with a lot of hams to refer to the PL-258 as a 'barrel' adapter but in the RF Test/Measurement world <http://www.microwaves101.com/encyclopedia/connectors.cfm> an adapter that is female on each end, such as the PL-258, is referred to as a 'bullet' and the male-male same-series adapters are referred to as a barrel." We learn something new every day!

Technical Web Site of the Week - Mike K5WMG has written and published a good paper <http://radio.n0gw.net/radio12.pdf> illustrating the effects of height-above-ground on vertical takeoff angle for beam antennas. It shows why a good "first tower" height of 50 feet works well and why higher performance antennas need that extra vertical "oomph".

==> CONVERSATION

Rather than get into semi-hemi-demi-quaverings of year-end auld lang syne waves (next time, I promise) it seemed better to print a repurposing of a tune I'm sure you'll recognize. You might also enjoy the work of Peter K3ZM as he adapts "My Favorite Things <http://lists.contesting.com/pipermail/3830/2011-December/238491.html>" to the view of a contester - nice job!

Ringin' In Your Ears

Steelied from the Dan's "Reelin' in the Years" by Dr Beldar

Your chance to make the Top Ten
You can see it fading fast
So you grab a channel on a
Band you think is gonna last
You wouldn't know an Eimac
If you held it in your hand
The things you think are useful
I can't understand

(CHORUS)
Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

You been tellin' me you're a winner
Since you were seventeen
In all the time I've known you
You still haven't won a thing
The weekend in Aruba
Didn't turn out like you planned
The things that pass for know-how
I can't understand

Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

I've spent a lot of money
And I've worked a lot of guys
The trip we made to KH6
Is etched upon my mind
After all the things I've tried to teach
You search and pounce the band

The way you run a pileup
I can't understand

Is there ringin' in your ears
Callin' away the time
Is the frequency now clear
Or are you stealin' mine?

73, Ward N0AX

==> CONTESTS

7 December through 20 December 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL 10 Meter Contest--Phone,CW, from Dec 10, 0000Z to Dec 11, 2400Z. Bands (MHz): 28. Exchange: RS(T) and State/Prov or serial. Logs due: Jan 11. Rules <http://www.arrl.org/contests>

ARRL Rookie Roundup--CW, from Dec 18, 1800Z to Dec 18, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See web. Rules <http://www.arrl.org/contests>

28 MHz SWL Contest--Phone,CW, from Dec 10, 0000Z to Dec 11, 2400Z. Bands (MHz): 28. Exchange: Log ARRL 10 Meter Contest QSOs. Logs due: Jan 31. Rules <http://swl.veron.nl/swlcontest.htm>

UBA Winter Contest--Phone,CW,Digital, from Dec 10, 1700Z - See website. Bands (MHz): 1.8-7. Multiple operating periods. Exchange: RS(T) and UBA section or serial. Logs due: 3 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

AWA Bruce Kelly QSO Party--CW, from Dec 10, 2300Z - See website. Bands (MHz): 3.5,7. Multiple operating periods. Exchange: RST, Xmtr type, power, name. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

SKCC Weekend Sprintathon--CW, from Dec 11, 0000Z to Dec 11, 2359Z. Bands (MHz): 3.5-28. Monthly on the second Sunday. Exchange: RST, S/P/C, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/>

Great Colorado Snowshoe Run--CW, from Dec 11, 2100Z to Dec 11, 2259Z. Bands (MHz): 14. Exchange: RST, S/P/C, class, CQC number or power. Logs due: 30 days. Rules <http://www.cqc.org/contests>

NAQCC Monthly QRP Sprint--CW, from Dec 14, 0130Z to Dec 14, 0330Z. Bands (MHz): 3.5-14.Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Dec 14, 1300Z - see website. Bands (MHz): 1.8-28. Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Russian 160 Meter Contest--Phone,CW, from Dec 15, 2100Z to Dec 15, 2300Z. Bands (MHz): 1.8. Exchange: RS(T), serial, square ID (see website). Logs due: Jan 20. Rules <http://www.radio.ru/cq>

Feld-Hell Happy Birthday Sprint--Digital, from Dec 17, 0000Z to Dec 17, 2400Z. Bands (MHz): 3.5-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

OK DX RTTY Contest--Digital, from Dec 17, 0000Z to Dec 18, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and CQ Zone. Logs due: Jan 15. Rules <http://www.crk.cz/ENG/DXCONTE.HTM>

RAC Winter Contest--Phone,CW, from Dec 17, 0000Z to Dec 17, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial. Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests/>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 17, 0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

Croatian CW Contest--CW, from Dec 17, 1400Z to Dec 18, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.9acw.org/>

Stew Perry Top Band Distance Challenge--CW, from Dec 17, 1500Z to Dec 18, 1500Z. Bands (MHz): 1.8. Exchange: 4-char grid square. Logs due: Jan 31. Rules <http://jzap.com/k7rat/stew.rules.txt>

Holiday Spirits Homebrew Sprint--CW, from Dec 18, 2000Z to Dec 18, 2359Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, ARCI number or Power. Logs due: Jan 3. Rules <http://www.qrparci.org/contests>

Run For the Bacon--CW, from Dec 19, 0200Z to Dec 19, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

ARRL Rookie Roundup--CW, from Dec 18, 1800Z to Dec 18, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: See web. Rules <http://www.arrl.org/contests>

NA High-Speed Meteor Scatter Contest--Digital, from Dec 11, 0000Z to Dec 15, 0200Z. Bands (MHz): 50-222. Exchange: Both calls, grid square, acknowledgement. Logs due: Jan 15. Rules <http://www.ykc.com/wa5ufh>

RAC Winter Contest--Phone,CW, from Dec 17, 0000Z to Dec 17, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial.

Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests/>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 17,
0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or
ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

==> LOG DUE DATES

7 December through 20 December 2011

- December 10 - Wake-Up! QRP Sprint
<http://qrp.ru/modules/sections/index.php?op=viewarticle&artid=7&page=1>
- December 14 - JIDX Phone Contest
<http://www.jidx.org/jidxrule-e.html>
- December 15 - 10-Meter RTTY Contest
<http://www.rttycontesting.com/the10meterrttycontest/rules.html>
- December 20 - EPC PSK63 QSO Party
<http://eu.srars.org/index.php?option=com_content&task=view&id=66&Itemid=141>
- December 20 - LZ DX Contest <http://lzdx.bfra.org/rulesen.html>
- December 20 - ARRL EME Contest <http://www.arrl.org/eme-contest>

WIANEWS WEEK COMMENCING DECEMBER 11 2011.

Hear from WIA Director VK3JNI Phillip Adams

What Good Is An F Call? Onno vk6flab discusses.

Col VK3LED with Rrrrewind.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING DECEMBER 11 2011.

A newly commissioned 3G mobile phone cell on Thursday Island was suffering
interference traced to foreign equipment operating on the wrong frequency
and not in accord with the Australian allocations.

Australian Communications and Media Authority Field Staff traced the interference
source to Hammond Island to the immediate north of Thursday Island.

A company there providing maritime services, with engineering support in the
Torres Strait, was using radio links that operated on Hammond Island and other
islands. These radio links had the capability of operation outside the correct
frequency range for the Australian Spectrum and it had developed a
communications error.

A warning notice was issued and the company rectified their radiocommunications equipment resulting in the radio links operating in the correct frequency range and the Optus interference to their 3G cell been resolved.

The issue of interference by radiocommunications equipment designed for other countries but operated within Australia continues to be a challenge for Field Operations and the ACMA.

It has in the past found long distance telephones operating on amateur and aeronautical frequencies and issues a warning to those buying as tourist overseas and online to make sure their purchase complies in Australia.

(ACMA VIA ARVICTORIA)

The ACMA proposes changes to radio services in Oberon and Ravenshoe

The Australian Communications and Media Authority is seeking public comment on proposed changes to radio services in Oberon, New South Wales, and Ravenshoe, Queensland.

The ACMA is proposing to make available:

FM frequency 101.5 MHz, with a maximum power level of 100 watts, for an in-fill transmitter for the 2BS commercial radio broadcasting service at Oberon

FM frequency 91.3 MHz, with a maximum ERP of 250 watts (W), for an in-fill transmitter for the 4AM commercial radio broadcasting service at Ravenshoe.

The ACMA also proposes to vary the frequency allotment plan to reflect the addition of those proposed in-fill transmitters.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Good morning broadcast listeners;

I am pleased to announce that Bob, VK6POP has agreed to join the WIA National Field Day committee. Bob brings both a wealth of experience and the VK6 perspective to the national high profile publicity event.

The next WIA National Field Day is the weekend of 14 and 15 of April 2012.

Many new operators start out with a minimum of equipment and try their hand at the VHF or UHF Bands. One of the challenges that new operator to our bands face is that of geography. With low radiated power, the hills just always seem to be in the way.

The team lead by Peter VK3AJ, from the Scout Radio & Electronics Service Unit in Victoria have been quietly developing a UHF repeater network across the Dandenong Ranges that not only fills in many of the black spots in the hills, it also provides linked coverage to many of the growth areas of outer Eastern Melbourne. Known as the VK3 ScoutNET, the repeaters of VK3RAJ, VK3RSA and VK3RSB are permanently linked.

Plans are now underway to further extend this linking to provide a reliable network for both new and established operators who may wish to use the network. The network could also be utilized in times of an emergency in the coverage area

The team from the SRESU should be proud of this initiative.

I wish you Seasons Greetings and a Safe New Year.
This has been Philip VK3JNI for the WIA News.

This is Mal VK3FDSL

I wish to advise that the National Office of the WIA will close for the Christmas break at 4pm Melbourne time on Friday 23rd December. We will re-open at 10am Melbourne time on Monday 16th January 2012.

During that time no examinations or callsign recommendation applications will be processed nor book orders dispatched. Book orders placed after Monday 19 December are unlikely to be dispatched before the office reopens in January. Orders for exam packs received before 21 December will be dispatched before Christmas.

The Wireless Institute Of Australia extends to all radio amateurs very best wishes for the festive season

I'D SOONER BE FISHING

Every now and then members let us know they receive spam emails claiming to be from the WIA and wanting to obtain personal information, this sort of email activity is called PHISHING (pronounced fishing).

Phishing is a way that the bad people on the internet attempt to acquire information from us such as usernames, passwords and credit card details by claiming to be from a trustworthy entity (in our case the WIA). Customers of Banks and other financial institutions are typically the major targets of Phishing scams however they seem to have a go at people from any organisation including organizations like ours. So remember, should our WIA office staff ever need to verify your membership or personal details, they will contact you directly by telephone, never by unsolicited email.

HAMS ACROSS AUSTRALIA.

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Way back when milk was delivered unpasteurised, radio broadcasters largely depended on the telephone service for program relay to affiliated stations and from OB's. Then along came Sputnik and the amateur radio Oscars.
Moving along, Australia got on board by launching its own commercial satellites.
In the meantime amateur operators were pointing antennas at the sky and working the world using vhf through to microwave frequencies.

It was like magic when television footage circled the world in hours with the aid of satellite networks. Now actuality coverage of events is the norm rather than waiting for the aeroplane having to deliver cine film to illuminate previous radio and press reports.

In the mix of things, it was thought a good idea to relay broadcast material through satellites. It certainly provided benefits but as experience has shown, these extra-terrestrial relays are subject to fades from meteor showers and moisture attenuation.

The reliability of the old system was sacrificed, and as I understand it many of the networks have abandoned satellite relay for fibre-optic services.

I find it frustrating to lose programs on radio and/or TV because of rain falling on some remote ground station. Funnily the pay TV and the satellite internet services can be unaffected whilst I am hearing "we apologise for this break in service" messages. It demonstrates a lot of principles of signal propagation that we touched on when studying for our amateur tickets. Even the big boys don't get it right, at times.

I'm Geoff Emery and that's what I think....how about you.

TARC Project Night this Tuesday

This Tuesday December 13th the TARC Project Night will be happening at the Townsville Club Rooms atop SES HQ Green Street West End from 7-30pm.

This the last Project Night for the year and the last time you will be able to let the magic smoke out under controlled conditions in 2011.

All welcome !

(tarc)

DISCUSSION POINT

What use is an f-call?

Participation is a Promise made. Now what do I mean by that?

A little while ago I was listening to a conversation on HF, I cannot recall the exact band, but the conversation took in amateurs across much of the country. It had been going for about 20 minutes and a new participant, an f-call, asked for a transmission report from the assembled group.

The f-call, likely a new participant apologised for butting in and also commented that he was broadcasting outside his band - which at the time I checked and as far as I could tell, he wasn't. The group ignored the out-of-band comment and several dutifully and helpfully responded with their various signal reports but after about 5 minutes, the tone of the conversation changed and statements about power levels and abuse were being made. This turned into accusations about using excess power, about using 100 Watts to get across the country, about how an f-call was abusing the airwaves, mind you most of it was innuendo, nudge, nudge, wink, wink.

After about 15 minutes of increasing discussion a new station was heard, who commented that he had some 14,000 contacts on his books and that when his license was still drying he too had been accused of exceeding his legal 28 Watt limit.

Unbeknownst to him, several amateurs descended on his shack at the time, measured his output and found it to be 27 Watts. He pointed out that while there were

going to be cases where people exceeded their privileges, it shouldn't be the first thing that came to mind when a particular contact was made. The station also complemented the f-call on their setup and wished them well with their contacts.

His comments lasted for some 5 minutes and the group subdued almost immediately.

At the time I wondered if those who'd previously been accusing the f-call had forgotten what QRP, broadcasting with 10 Watts or less SSB, is all about and I wondered if there might be value in encouraging participation in QRP contests. In case you're wondering, an f-call is really a QRP station.

While I know how easy it is to change the power setting on my radio, and how easy it might be to get away with doing that, it doesn't mean that because you can, you will. Under the instruction of an advanced licensee I've changed the power setting on my radio as well, only to find that the extra power made little or no difference whatsoever.

I've played with antennas and noticed that it's not how much power you have, but what you do with it that determines the outcome of the contact. As I've said in the past, I've talked to the USA on 10 Watts in amazed reply to their 450 Watts.

I'm sure that there are times that extra power will get you where you need to go, but I think we should also remember that each of us, regardless of our license, has the ability to borrow, buy or build a massive amplifier and hook that up to our radio. Just because we can, doesn't mean we do.

Ultimately, you're in
control of your own radio and your own responsibilities and license conditions. You are ultimately the one who knows if you did the right thing or not.

Of course if you abuse your privileges, consequences will result.

I started with Participation is a Promise made. When you get your license and your kit and start broadcasting, you are participating in the Amateur Radio community. Your license stipulates that you shall only broadcast on certain frequencies, with a certain mode and power level. As a licensee, that's what you promise to do.

Let's give people the benefit of doubt and encourage their legal participation, rather than accusing them on-air about their perceived misdeeds.

I'm Onno, vk6flab

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

The next Foundation course at VK2WI will be January the 22nd.

The assessments will then be held during the Trash and Treasure morning which is Sunday the 29th of January.

Details are to be found on the ARNSW web site www.arnsw.org.au under exams. Inquiries to education@arnsw.org.au or the office telephone 02 9651 1490 and leave contact details.

Next year there will be a total of six one day Foundation courses conducted at VK2WI - in the odd numbered months. There is expected to be a Standard and Advanced upgrade course during the year.

ARNSW Assessors will again be conducting all grades of license exams at the Central Coast Field Day at Wyong in February.

REAST Training, Education & Assessment

Four students from New Town High School have now gained their qualifications for their Foundation Licence. They are Jacob Nichols, Aleksandis Price, Matthew Iles and Brendan Coulson.

Congratulations and we look forward to hearing you on the air.

If you are interested in participating in this examination session in future then please contact learning organiser Reg VK7KK on 0417 391 607, immediately or email on regemm@ozemail.com.au.

(73, Reg VK7KK, REAST Education Officer and Assessor)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Ham radio licenses hit an all-time high

The Sun Journal reports that aside from the latest smartphone, ham radio has become the newest trend in communication, reaching an all-time high of more than 700,000 licenses in the United States.

They say "For nearly 100 years, ham radios have been a reliable form of communication, allowing people to connect with others all around the world. They have come in especially handy in times of an emergency."

A Ham Radio Population Map by N0HR shows the countries of the world resized relative to the number of amateur radio licenses and is worthy of a quick peek.

More on this growth trend shortly in VK1WIA National News.

sunjournal.com/news/approved/0001/11/30/ham-radio-licenses-hit-all-time-high/1122718

See the Ham Population map at n0hr.com/ham_radio_population.htm

==========

NEWS FROM ARNEWSLINE USA

FOX NEWS REPORTS HAM RADIO GROWTH

Fox News reports on the boom in Amateur Radio licenses in the United States.

According to Fox, in October the FCC logged 700,314 licenses, with nearly 40,000 new ones issued in the last five years.

In her report Michelle Macaluso interviews John Pritchett W6JWK. She also shows an Amateur Radio Direction Finding competition. Her story is titled Radio Days Are Back: Ham Radio Licenses at an All-Time High.

You will find it on-line at
tinyurl.com/fox-ham-stats

ARRL TO RELEASE NEW VIDEO AIMED AT MAKER COMMUNITY ON DECEMBER 27

'The DIY Magic of Amateur Radio' is a new 8 and one half minute video from the American Radio Relay League to be released on Tuesday, December 27th. Its target audience is the world-wide maker and hacker community. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

According to the ARRL, the show is directed toward the D-I-Y or Do It Yourself movement. This is a fairly new leisure time interest that is inspiring a whole new generation of techno hobbyists. It also could be a pool of future technologists who might want to become hams if they knew more about our hobby and that's the reason the new video was created.

To do this, Executive Producer Allen Pitts, W1AGP and Producer Bill Pasternak, WA6ITF brought together an all-star team consisting of several well known film makers along with some newcomers to ham radio movie making.

Directed by Hollywood's Dave Bell, W6AQ, the video which is titled "The Do It Yourself Magic of Amateur Radio" was recorded on location in Ohio, Texas, North Carolina, California, Utah and on-orbit aboard the International Space Station.

It's script was written by Henry Feinberg, K2SSQ, of West Orange New Jersey. Feinberg is a former producer of the award-winning Watch Mr. Wizard science television series. A winner of several Cine Golden Eagle awards, K2SSQ is also the ham radio operator who created the umbrella space communicator seen in the Steven Spielberg motion picture "ET the Extra-terrestrial."

The show is hosted by famed New York City based maker community leader and fashion designer Diana Eng, KC2UHB. Mark Abramovich, NT3V, serves as the show narrator.

Original music was provided by Andrew-John Huddleston, Oh-Zed-5-E, and his Denmark-based group "The Ham Band."

Dave Booth, KC6WFS, of Santa Clarita, California was the shows principal videographer.

According to the ARRL, the new video will be simultaneously released on its Facebook, Twitter and YouTube pages, and will be also be available at www.arrl.org. DVD copies for showing to large audiences in high definition 16 by 9 wide screen

and standard 4 by 3 definitions will be available at a later date.

For the Amateur radio Newsline, I'm Cheryl Lasek, K9BIK, reporting from Zion, Illinois

Again that's Tuesday, December 27th at about 10 a.m. Eastern U.S. time for the release of the new ARRL video titled The Do It Yourself Magic of Amateur Radio. It's a magic carpet ride into a pair of techno-hobby worlds that compliment one another very well. (ARRL, DIY Production Team)

HAMS HEAR MARS SCIENCE LAB AS IT FLIES TOWARD MARS

The world's largest ever built extra-terrestrial explorer is on its way to Mars. The six-wheeled, one-armed robotic rover named Curiosity known officially as the Mars Science Laboratory blasted off from Cape Canaveral at 10:02 a.m. Eastern time on Saturday, November 26th. It was carried into space on board an Atlas Five launch vehicle.

The journey to Mars will take 8 months and cover 354 million miles.

Meantime a group of radio amateurs have received signals from the Mars Science Laboratory using an AMSAT DL amateur radio facility in Germany. Barely 7 hours after launch, the X-band telemetry signal from the lab was received using the ham radio station at the German AMSAT group's resource at Bochum.

This is believed to be the first reception of the Mars Science Laboratory outside of the NASA Deep Space Network. The signal, received by the ham operators was with the probe at a distance of 112,000 km from Earth. Telemetry said the enroute lab had a spin-modulation of +/- 3.5 Hz at 2 revolutions per minute.

The Mars Science Laboratory is expected to arrive at the red planet in August 2012 after a 9 month flight.

June 9-10 VK Shires Contest.

June 25 VK/trans Tasman Contest 160 metres SSB

July First full weekend NZART Memorial Contest

August 11-12 VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Notice to all 6 metre users.

Owing to an as yet unresolved interference issue at the repeater site,
the GGREC 6 metre repeater VK3RDD has now had CTCSS access enabled. The
frequency is 91.5Hz. Although most 6 metre users have radios with CTCSS
capability, GGREC apologise to those who will no longer have access to the
repeater without installing a tone encoder to their radios.

If they track down and eliminate the interference in the future, the access tone
may be disabled but as it is common these days to have tone access on repeaters,
it may be left on.

REWIND

The First Municipal Electric Street Lighting in Australia Commenced in New South Wales in November of 1888.

Tamworth was the first town in Australia to be lit by electricity just 9 years after the invention of the incandescent electric light bulb.

The first lamps were Vacuum Carbon. In 1907 Electric lighting was made available to homes and shops supplied during the day from a battery charged overnight when the dynamos were run for the street lights.

The Tamworth PowerStation Museum was opened on 9th November, 1988, the centenary of the installation of electric lighting in Tamworth. It was the first Australian all electric museum and is housed in Tamworth's restored Municipal Electric Showroom building (built as the Tamworth Municipal Electricity Works in 1907) and a modern reconstruction of the original engine house for the Tamworth power station on its original site.

The "History and development of Electricity" is a unique feature of the Tamworth PowerStation Museum.

This includes a special pictorial display of the pioneers of electricity and their discoveries, leading to the modern electrical world we live in.

The Museum has special working displays including a generator that demonstrates the principle of Faraday's first dynamo, and a working installation of the electric telegraph - the first practical use of electricity.

The Museum has several exhibition areas displaying early electrical appliances used for washing, cleaning, heating, cooking, cooling and entertainment.

FROM THE DELTA TO THE DMZ

Yan, XV4Y, in Mekong delta southern Vietnam, says that "conditions on 80m have greatly improved and in the last days good DX results showed my setup is not that bad."

Yan states, "During my spare time I will focus on 80m CW mainly to Japan, Pacific and North America around 1400z."

People who want to try work XV on 80m could follow twitter account XV4Y where he announces his DX schedule.

Yan's Twitter and Web page can be found at:
http://twitter.com/#!/XV4Y/followers
http://xv4y.radioclub.asia

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Ohio/Penn DX Special Bulletin No. 1039.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1039.2
BID: $OPDX.1039.2
December 8, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network ARRL Awards Blog and K3LP for the following DX information.

DXCC NEWS (DXCC and Russian Prefix Information). The following is from the ARRL Awards Blog Page at: http://www.arrl.org/awards-blog
"The DXCC Desk Clarifies Russian Prefixes Which Count for European Russia
--
For the purposes of the DXCC and WAC awards, the following Russian prefixes count as European Russia:

Any call with the prefixes UA through UI and the numbers 1, 2, 3, 4, 5, 6, 7.

Any call with the prefix U and the numbers 1, 2, 3, 4, 5, 6, 7.

Any call with the prefixes RA through RZ and the numbers 1, 2, 3, 4, 5, 6, 7.

Any call with the prefix R and the numbers 1, 2, 3, 4, 5, 6, 7.

Exception:

Prefixes R, U, UA-UI, and RA-RZ, the number 2, and suffixes beginning with F or K, count as Kaliningrad. Also, some legacy calls such as UA2CZ are in Kaliningrad.

And from 1 December, 2011 forward, any QSO (with any date) with stations using the following prefixes, count for European Russia:

Any call with the prefixes UA through UI, or the prefix U, and the numbers 8, and 9, followed by a suffix beginning with the letters F, G, or X (Perm and Komi).

Any call with the prefixes RA through RZ, or the prefix R, and the numbers 8, and 9, followed by a suffix beginning with the letters

F, G, or X (Perm and Komi).

Since Russia joined CEPT, there are stations active with call signs that do not indicate DXCC entity, such as RA/N6TR who operated from Asiatic Russia, and RA/SM6LRR who operates from European Russia. These types of portable call signs will be managed individually in the DXCC system."

ET3, ETHIOPIA (ET3AA Youth Development Project; DX-Pedition 2011). Dave Collingham, K3LP, sent the following press release to OPDX on December 8th (edited):
"Good Evening DXers:
Our Team, David (K3LP - Team Leader), Paul (N6PSE), Al (K3VN) and Bill (N2WB) arrived at the Addis Ababa, Ethiopia International airport this morning at 7:30 AM, Thursday, December 8, 2011. Our amplifier, 1,000 feet of coax, power meters, 160 and 80 meter antennas and other items were all held in Customs until about 1:30 PM. After paying the required 65% tax fees for electronic equipment and providing a letter from the university, we now have all the equipment in hand.
Paul (N6PSE), Al (K3VN) and Bill (N2WB) arrived at Sid's home, had dinner and headed for bed. They plan to get up early and be on the air around 3:00 AM local time on Friday, December 9th.
I was able to set-up a laptop PC, CW Keyer and other equipment at the ET3AA university station and made about 50 QSOs on 10 meters CW about 1.5 hrs before local sunset. There was a nice opening to EU and NA at the same time. Stations were being heard and worked from W5, W8, W4, W3, W2 and W1 areas. I QRTed after a brief exchange of QSOs in order to complete more enhancements to the station.
On Friday, I plan is to install the 160 meter and 80 meter vertical antennas with the students. In addition, if time permits, we complete a 10 Meter 6 element Vee Beam at 70' that could be used during the 10 meter contest. We will have both the ET3SID and ET3AA stations on for the 10 meter contest.
I'll (K3LP) be on 160 meters Friday at Sunset thru Sunrise, 1.823 MHz for JA and 1.835 MHz. I'll be using the 500w solid-state amp. Depending on the activity, I may bounced to 80 meters CW for a few minutes. We were not able to get a large amp into the country during this time.
We'll see everyone on the band tomorrow.

Take care,
David -K3LP"

Thursday, January 5, 2012.

==> + FCC NEWS: FCC COMMISSIONER MICHAEL COPPS ANNOUNCES RESIGNATION

On Monday, December 5, FCC Commissioner Michael Copps notified
President Obama that he would resign as Commissioner effective January
1, 2012. If the Senate does not confirm a successor prior to Copps'
departure, the FCC would be down to three commissioners: two Democrats
and one Republican. Only three sitting Commissioners may be members of
the same political party. At present, Chairman Julius Genachowski,
```

Copps and Mignon Clyburn are Democrats. Robert McDowell is the lone Republican since Meredith Attwell Baker left the Commission in June 2010.

"Yesterday, I submitted to the President notice of my intention to resign my post as Commissioner effective January 1, 2012," Copps said in a press release <http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db1206/DOC-311361A1.pdf>.
"Should the Senate confirm my successor prior to that date, or should the Senate adjourn sine die <http://en.wikipedia.org/wiki/Adjournment_sine_die> before January 1, I would of course be leaving sooner."

Copps has served as a Commissioner since May 2001. In January 2009, he took on the additional role of acting FCC Chairman, following the resignation of then-FCC Chairman Kevin J. Martin. Copps relinquished the chairmanship to Julius Genachowski after Genachowski was confirmed by the US Senate and sworn into office in June 2009. Read more here <http://www.arrl.org/news/fcc-commissioner-michel-copps-announces-resignation>.

==> + ON THE AIR: NEW RULES FOR 60 METERS HAVE YET TO TAKE EFFECT

Last month, the FCC released <http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters> a Report & Order (R&O) detailing new rules for the 5 MHz (60 meters) Amateur Radio band. These rules have not been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. Any radio amateur who is operating under the new rules before this time is in violation of the current rules. The official date for these new rules will be announced on the ARRL website as soon as the information is available.

==> + ON THE AIR: ROUND UP THOSE CW QSOS IN THE ARRL CW ROOKIE ROUNDUP

The ARRL's Rookie Roundup comes around again on Sunday, December 18. This time, the focus is on CW operation. The Rookie Roundup is an on-the air event is designed to help newly licensed amateurs build their HF and 6 meter operating skills. Similar to the ARRL Novice Roundup that ran from 1952 until 1995, the Rookie Roundup combines a competitive event with some on-the-air training, bringing fun and Elmering into the 21st century. Three Rookie Roundups -- SSB, RTTY and CW -- are held each calendar year: The CW running of the Rookie Roundup will take place Sunday, December 18 from 1800-2359 UTC. Read more here <http://www.arrl.org/news/round-up-those-cw-qsos-in-the-arrl-cw-rookie-roundup>.

==> + WARM UP THIS WINTER WITH THE JANUARY 2012 ISSUE OF QST

The January issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. Our annual Do-It-Yourself (DIY)

issue has projects you can build this winter while you count down the days to the warm summer months. You'll also find product reviews, operating tips and upcoming on-the-air events that will start your new year off right.

If you're in the market for an easy-to-build -- and easy-to use -- VHF/UHF portable antenna, then look no further. In his article "A 2 Meter and 70 cm Portable Tape Measure Beam," John Portune, W6NBC, presents an antenna that will "measure up" when you want to work satellites or go transmitter hunting. When it comes to the family car, sometimes you need to be a bit discreet when installing your mobile rig, at least in the name of marital harmony. Thomas E. Nolan, W3EX, presents "A Low-Impact Mobile Installation," which offers a unobtrusive way to go mobile -- without looking like you've packed your complete shack in the car.

As you sit in front of the roaring fire, do your thoughts turn to your Novice days and the excitement and joy of working those first stations? Kim Johnson, KC0JQH, relives the memories in his article "Building a Dream Novice Station." Kim built his transmitter, receiver and voltmeter from plans in the 1963 ARRL Handbook. As hams, we have known for a long time how much fun it can be to build your own equipment -- and then use it to get on the air. ARRL Media and Public Relations Manager Allen Pitts, W1AGP, along with a slew of talented hams, has produced a video to be released December 27 that tells non-ham DIYers how Amateur Radio is the perfect activity for them. In his article "The DIY Magic of Amateur Radio," Pitts explains how Amateur Radio and DIY hobbyists make a wonderful fit.

QST Editor Steve Ford, WB8IMY, takes a look at the WiNRADiO WR-G31DDC Excalibur software defined receiver in this month's Product Review. He says this receiver "offers excellent performance. Despite the wealth of features found in the accompanying software, it's easy to set up and enjoy." ARRL Contributing Editor Howard Robins, W1HSR, checked out the AvMap G6 APRS navigation system, saying that it "builds on the success of the G4 and G5 [versions]. The new version is smaller and more capable than previous models, yet it is still easy to hook up and use." QST Technical Editor Joel R. Hallas, W1ZR, test drove the TE Systems 1410G 2 meter linear amplifier. "This is a very nice amplifier in terms of construction and operation," he writes, although "there is some room for further optimization of its preamp configuration and transmit IMD levels."

Of course, there are the usual columns you know and expect in the January QST: Happenings, Hints & Kinks, The Doctor Is IN, Technical Correspondence, How's DX, Vintage Radio and more. Look for your January issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> SUPPORT ARRL: RENEWED IRA PROVISION ON CHARITABLE GIVING MAKES IT EASY TO SUPPORT ARRL THROUGH 2012

In December 2010, President Obama signed the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 <http://taxes.about.com/b/2010/12/20/the-tax-relief-act-of-2010-income-tax-provisions.htm> (HR 4853 <http://www.gpo.gov/fdsys/pkg/BILLS-111hr4853enr/pdf/BILLS-111hr4853enr.pdf>) into law as Public Law 111-312. This law provided sweeping changes to the rules that govern federal estate taxes, gift taxes and generation-skipping transfer taxes. The law authorized those individuals who are at least 70.5 years old to donate up to $100,000 from their Individual Retirement Account directly to a qualified charity -- such as the ARRL -- in a Trustee-to-Trustee transfer; this charitable gift would not have to be reported on a tax return (no IRA income is reported and no charity deduction is reported). This keeps the giver's adjusted gross income lower and avoids any adjustments in Medicare premiums. The provisions in HR 4853 have been extended for two years and will expire on December 31, 2012.

Individuals who are interested in supporting the ARRL using this vehicle should consult their tax and/or financial advisors to determine the impact of such a gift. "This is the perfect time of year for members who qualify and are in a position to consider a direct contribution to the ARRL," said ARRL Chief Development Officer Mary Hobart, K1MMH. "Such gifts may support the Spectrum Defense Fund <http://www.arrl.org/spectrum-defense-fund>, the Education & Technology Fund <http://www.arrl.org/education-and-technology-fund>, the W1AW Endowment Fund <http://www.arrl.org/w1aw-endowment-fund> or one of the other ARRL permanent funds <http://www.arrl.org/list-of-permanent-funds>."

==> + NOMINATION DEADLINE APPROACHING FOR ARRL INTERNATIONAL HUMANITARIAN AWARD

The deadline to nominate an amateur or group of amateurs for the 2011 ARRL International Humanitarian Award is coming up -- December 31, 2011. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

As one of the few telecommunication services that allows people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need. Read more here <http://www.arrl.org/news/nomination-deadline-approaching-for-arrl-international-humanitarian-award>.

==> AMATEUR RADIO IN SPACE: FASTRAC-1 SATELLITE DIGIPEATER ACTIVE

As of 1600 UTC December 2, the FASTRAC-1 satellite (FO-69) is open for use as a packet radio digipeater. Anyone with a 1200 baud packet TNC and a VHF/UHF FM transceiver can try it. If you own satellite tracking software <http://www.amsat-na.com/store/category.php?c=Software>, you'll find the latest orbital elements on the FASTRAC Web site <http://fastrac.ae.utexas.edu/for_radio_operators/users/phpBB3/predictedorbit.php>.
FASTRAC-1 receives at 145.825 MHz and transmits at 437.345 MHz. The digipeater alias is FAST1. To connect to ARRL Headquarters station W1AW through FASTRAC-1, for example, you would send the following packet:

C W1AW VIA FAST1

Reports of your results are welcome via e-mail <fastracsats@gmail.com>, or at the FASTRAC Facebook page <http://www.facebook.com/fastracsats>.

==> + ON THE AIR: SPECIAL PREFIXES ON TAP FOR CANADIAN STATIONS THIS MONTH

If you are a prefix hunter, take note: Stations in Canada will be sporting new prefixes <http://www.rac.ca/en/amateur-radio/regulatory/callsigns/special-event.php>. To celebrate the 75th anniversary of the CBC and Radio Canada, radio amateurs in Canada have been granted permission to use special prefixes for the month of December. Hams with call signs beginning with VA may use the prefix VG; those call signs beginning with VE may use VX; hams whose call signs with a VO prefix may use XJ, while call signs beginning with VY may use XK. -- Thanks to The Daily DX <http://www.dailydx.com/> for the information

==> SOLAR UPDATE

Tad "I've seen sunny days that I thought would never end <http://www.youtube.com/watch?v=-T35WXFOmwI>" Cook, K7RA, reports: Eight new sunspot groups appeared over December 1-7, with the average daily sunspot number for the week rising more than 9 points to 133.9. The verage daily solar flux also rose exactly 19 points to 156.5. The latest forecast from USAF/NOAA has solar flux at 150 on December 8, 155 on December 9-10, 150 on December 11-12, 145 on December 13-14, 150 on December 15, 160 on December 16-18, and 155 on December 19-22. The planetary A index for the same dates is expected to be 5 on December 8-10, 8 on December 11, and 5 on December 12-22. Geophysical Institute Prague sees a quiet week ahead, with quiet conditions December 9-11, quiet to unsettled December 12 and quiet again on December 13-15. Conditions should be good for the ARRL 10 Meter Contest <http://www.arrl.org/10-meter> this weekend. Look for more information on the ARRL website on Friday, December 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by James Taylor's Fire and Rain

<http://en.wikipedia.org/wiki/Fire_and_rain>.

==> + SILENT KEY: SPACE PIONEER JACK TOWNSEND, W3PRB (SK)

John W. "Jack" Townsend, Jr, W3PRB, of Cabin John, Maryland, passed away October 29 due to complications from lung cancer. He was 87. Townsend -- an ARRL member -- was a rocket and satellite pioneer who was influential in creating the first meteorological, communications and Earth viewing satellite systems. He joined NASA's Goddard Space Flight Center <http://www.nasa.gov/centers/goddard/home/index.html> in 1959 and later served as its Director from 1987-1990.

In 1949, Townsend joined the US Naval Research Laboratory as a research physicist, instrumenting V-2 <http://en.wikipedia.org/wiki/V-2> rockets (captured from Germany at the end of World War II), Viking <http://en.wikipedia.org/wiki/Viking_%28rocket%29> and Aerobee <http://en.wikipedia.org/wiki/Aerobee> sounding rockets for upper air research. When NASA was created in 1958, he transferred with his Branch and the Vanguard Project <http://en.wikipedia.org/wiki/Vanguard_project> into the new agency, becoming Chief of its Space Sciences Division. He helped form NASA's Goddard Space Flight Center, and became the Assistant Director for Space Science and Satellite Applications. Townsend was named Deputy Director of Goddard Space Flight Center in 1965 and continued to serve in that capacity until 1968. Read more here <http://www.arrl.org/news/space-pioneer-jack-townsend-w3prb-sk>.

==> QRP GROUP OFFERS FREE KIT BUILDING SERVICES TO HAMS WITH PHYSICAL LIMITATIONS

Members of the Four States QRP Group (4SQRPG <http://www.4sqrp.com/index.php>) -- a group of kit aficionados centered in Kansas, Missouri, Oklahoma and Arkansas -- are offering kit building services at no charge to hams who, due to physical limitations, need assistance with building. Hams who wish to have kits built for them need to visit the 4SQRP website and purchase one or more of the six kits offered <http://www.wa0itp.com/4sqrpkitindex.html>. "This is a free service," 4SQRP Member Terry Fletcher, W0ITP, told the ARRL. "The builders donate their time, skill and knowledge. Their only motivation is to help needful hams."

==> THIS WEEK ON THE RADIO

This week:

- December 9 -- NCCC Sprint Ladder
- December 10-11 -- ARRL 10 Meter Contest <http://www.arrl.org/10-meter>; CWops Mini-CWT Test; International Naval Contest
- December 11 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 11-18 -- NA High Speed Meteor Scatter Winter Rally
- December 14 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint
- December 14-15 -- CWops Mini-CWT Test

Next week:

- December 16 -- NCCC Sprint Ladder; Russian 160 Meter Contest;
AGB-Party Contest
- December 17 -- OK DX RTTY Contest; RAC Winter Contest; Feld Hell
Sprint
- December 17, 2011-January 1, 2012 -- Lighthouse Christmas Lights QSO
Party
- December 17-18 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 18 -- ARRL Rookie Roundup (CW)
<http://www.arrl.org/rookie-roundup>; QRP ARCI Holiday Spirits Homebrew
Sprint
- December 19 -- Run for the Bacon QRP Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2012 -- ARRL New York/Long Island Section Convention
<http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-rad
io-university-2012>,
Bethpage, New York
- January 27-28, 2012 -- ARRL Mississippi State Convention

Amateur Radio Newsline(tm) Report 1791 - December 9 2011

Amateur Radio Newsline report number 1791 with a release date of
Friday, December 9th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Utah hams are called up as winds cause
emergency dispatch communications delays; the FCC grants secondary use
status to micro-power medical networks at 70 centimeters; an
Afghanistan broadcaster becomes an intruder on 40 meters and an old
holiday poem is revisited from a ham radio point of view. Find out the
details are on Amateur Radio Newsline(tm) report number 1791 coming
your way right now.

RESCUE RADIO: UTAH HAMS ASKED TO ASSIST AFTER SHERIFF DISPATCH CENTER
OVERLOAD

Ham radio operators were called out to assist authorities after the
Davis County Utah Sheriff's dispatch service suffered a communications
overload. We have more in this report:

--

As a wind storm swept across the city of Bountiful, Utah, on Thursday,
December 1st, the local sheriff's office soon found its emergency
response dispatch system overloaded. At times precious minutes were
being wasted as operators tried to contact units in the field only to
find their messages delayed. That's when Davis County Sheriff's
Lieutenant Brad Wilcox decided to call in some assistance from the
local ham radio community. Contacted was Gary Johnson, N7DND, of the
Davis County Amateur Radio Club who picks up the story from here:

--

N7DND: "When he said that the telephone system and the UCAN system
were becoming saturated with phone calls and emergencies, he wanted a
backup. So he asked us to activate."
--

It took Johnson only a short time to get an information net established
on the club repeater with a total of 18 hams responding. The next step
was to find out where they were needed and the jobs they might be
required to do:

--

N7DND: "I asked the Sheriff what were his first needs and his first needs were for two people to come to the Sheriff's Office and go to the ecomm room and act as people who would work with him and the Sheriff's Office to pass health and welfare traffic. So that was about 10 in the morning and it evolved from there."

--

And evolve it did. Again Gary Johnson, N7DND:

--

N7DND: "There were 18 operators that took part. I continued to be Net Control and worked through that as we needed to. About 1 p.m. I turned Net Control over to another amateur at our local hospital and then I went down and assumed the responsibility with Bountiful city and activated the people that I needed to in order to take care of their health and welfare needs.

"The net went on until about 16:00 Utah time. At that point the Sheriff released us to go back to work for our owqn served agencies. The next morning we started at around 8 a.m. and we were working again until about 5 p.m. that night. 17:00 hours that at night."

--

The hams were activated a third time on Sunday, December 4th to provide communications assistance for volunteers from the local L-D-S church took on the arduous task of cleaning away numerous fallen tress. Johnson says that the ham radio communications team assisted in the dispatch of people to the locations where they were needed and directed the trucks loaded with storm debris to the dump areas. Johnson says that by early evening the clean-up was complete and the ham radio volunteers were able to stand down.

With a hearty congratulations to the hams of Davis County Utah on a job well done I'm Don Carlson, KQ6FM in Reno.

--

The work performed by the volunteer ham radio operators was featured in a news report on K-S-L television in Salt Lake City. The story titled Ham Radio Come to the Rescue During Utah Wind Storm. You can see it on line at tinyurl.com/utah-windstorm-hams. (ARNewsline(tm))

**

RESCUE RADIO: NO HAMS FOR MUMNBAI INDIA DISASTER SERVICE

DNA India reports on the lack of amateur radio operators for a ham radio emergency communications system set up in Mumbai. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has more:

--

The DNA India news report says that in order to enhance its emergency communication system the Brihan Mumbai Municipal Corporation or B-M-C has established ham radio stations at its headquarters and several other sites that it oversees. The only problem is that so far the B-M-C has not been able to find anyone to operate them.

To remedy this situation the B-M-C decided to send 40 of its disaster control operators for free amateur radio training. Now the six-month course has come to an abrupt end with no new operators produced by the effort.

An official speaking on condition of anonymity told the newspaper that the course to obtain an Indian ham radio license is very technical. It's actually part of a radio engineering program that normally takes two years to be completed. But the same training was being imparted in span of six months and making it all but impossible to grasp. The article infers that as a result of the complexity of the training that there were few who actually completed it.

For the Amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD near Pittsburg, Pennsylvania.

--

According to the DNA India article, even those who are able to pass India's ham radio exam still face other hurdles. It notes that the Indian amateur radio licensing system seems to be plagued with bureaucracy. After passing the licensing test it can take 12 to18 months for government officials to process the license application. More is on-line at tinyurl.com/India-emcomm-hams. (Southgate, DNA India)

FCC NEWS: FCC GRANTS SECONDARY SERVICE ALLOCATION TO WIRELESS BROADBAND MEDICAL MICROPOWER NETWORKS

Ham radio will soon be sharing the 70 centimeter band with micro-power medical devices.

At its regular meeting on Wednesday, November 30, the four-member FCC Commission unanimously agreed to allocate spectrum and adopt service and technical rules for the utilization of new implanted medical devices that operate on 413 to 457 MHz spectrum. These devices will be used on a secondary basis as part of the Medical Data Radiocommunication Service in Part 95 of the FCC rules.

According to the FCC, these devices would greatly expand the use of functional electric stimulation to restore sensation, mobility and function to those persons with paralyzed limbs and organs; they would be implanted in a patient and function as wireless broadband medical micropower networks or MMN's.

These new rules are the result of a Notice of Proposed Rule Making that the FCC released in March 2009. A Report & Order that will define

these new rules is expected soon.

As hams already know, the Amateur Radio Service in the United States also has a secondary allocation on the 70 cm band from 430 to 450 MHz. While it's unlikely that these flea power devices will bother very many radio amateurs, its unknown what affect ham radio will have on the ability of these devices to share spectrum with hams or any other users of the entire 413 to 457 MHz 70 centimeter allocation. (FCC, ARRL)

**

INTRUDER WATCH: NATIONAL RADIO AFGHANISTAN ON 40 METERS

Uli Bihlmayer, DJ9KR, reports that National Radio Afghanistan is operating on 7 point 2 MHz in the amateur Radio 40 meter band. DJ9KR says via the IARU-Region 1 website that he monitored the station on November 28th as being centered on 7200 kHz and covering 7195 through 7205 kHz with its audio sidebands.

DJ9KR says that the best way to handle this situation is to inform your nation's telecommunications agency if you are suffering interference from National Radio of Afghanistan and ask them to file an international complaint. Another recommended procedure is to file a report with the Intruder Watch coordinator in your nation. (IARU-R1 Website)

**

HAM RADIO IN SPACE: ISS SHADOW BEACON EXPERIMENT POSTPONED

The recently announced Plasma Thrust space "Shadow-beacon" experiment using amateur radio has been postponed until after the delivery of a new rig next April. This, because of a problem with the current gear on-board the orbiting outpost.

Sergey Samburov RV3DR, of the Russian space corporation "Energia" is among those responsible for amateur radio operations from the ISS. He says that the onboard radio was self switched onto the standard simplex frequency of145.825 MHz instead of the required duplex 144.360 / 145.825 MHz digipeater mode because of the old age of the gear. It has been in use more than 10 years.

Samburov says that a new radio is planned to be delivered to the ISS by cargo vehicle in April. Because of this, Mission Control Center plans to hold the "Shadow-beacon" sessions in May or June of 2012. Look for more space related ham radio news items later on in this weeks report. (ARISS)

repeater network serving all of Central Florida.

(5 sec pause here)

**

RADIO LAW: NEW EAS RULES BEFORE THE END OF 2011

According to Radio World Consultant Gary Timm's AWARE Forum Blog reports that the new EAS rules may be out by the end of this month. Amateur Radio Newsline's Jim Damron, N8TMW, reports:

--

In his postings postings Timm writes that based on two recent informal conversations with FCC staffers it was stated that the FCC intends to release its revised Emergency Alert System rules covering the use of the Common Alerting Protocol in EAS alerts by the end of 2011.

The FCC had released its proposed EAS Common Alerting Protocol rules last May 26th and has been considering the public comments it received on those proposed rules since that comment period closed on August 4th. The regulations will likely be the final EAS Common Alerting Protocol rules stated in an FCC Report and Order, and no further comment will be accepted on those implemented rules.

>From Charleston, West Virginia, I'm Jim Damron, N8TMW, reporting.

--

Timm writes that despite the follow-up investigation of problems involving last months national EAS test, the commission still feels it can meet its year-end target for release of the new rules. (CGC, B&C, others)

**

ENFORCEMENT: FCC AFFIRMS TWO FINES FOR UNLICENSED OPERATION

The FCC fined two people for unauthorized operations of a radio station. In the first case the regulatory agency affirmed an earlier proposed $15,000 monetary forfeiture issued to John E. Criteser, Jr.. This, for operating an unlicensed transmitter on 95.1 MHz in Lake Park, Florida. The agency said in its decision that Criteser did not respond to an October notification.

In the second matter, the commission reaffirmed an earlier $10,000 fine against Neil Davis for operating an unlicensed transmitter on 96.1 MHz in Fort Lauderdale, Florida. Davis too, did not respond to the initial Notice of Apparent Liability and that's why the FCC escalated the penalty to the level of forfeiture.

Both Criteser and Davis were given the customary 30 days to pay or to file an appeal. If they fail to respond this time their cases may be turned over to the Justice Department for collection. (FCC)

**

ENFORCEMENT: FLORIDA CABLE COMPANY FINED FOR MULTIPLE INFRACTIONS

Still in Florida, the FCC has affirmed a $25,000 monetary forfeiture issued to St. George Cable, Inc which is the operator of the cable television system in St. George Island, Florida, for willful and repeated violation of sections 11.35(a), 76.605(a)(12), 76.611(a), and 76.1801 of the Commission's rules. The alleged violations involved St. George's failure to install Emergency Alert System equipment; operation of its cable system with excessive signal leakage; and failure to register its cable system with the Commission.

This past September 30th the Enforcement Bureau's Tampa Office issued a Notice of Apparent Liability for Forfeiture in the amount of $25,000 to St. George based on the then alleged violations. To date St. George has not filed a response. Based on the information before it, the FCC now says that it has affirmed the forfeiture and given the company the customary 30 days to pay the fine or to file an appeal. (FCC)

**

TELECOMMUNICATIONS NEWS: THREE CABLECASTERS GIVE UP CREATING THEIR OWN WIRELESS NETWORKS

Cable companies Comcast, Time Warner Cable and Bright House Networks are giving up on their idea of creating their own wireless network. On Friday, December 2nd the three cable giants announced that that they have agreed to sell their wireless licenses to Verizon Wireless and will instead become resellers of the Verizon Wireless service.

Cable companies have long held the ambitions to open a second service to challenge frontrunners AT&T and Verizon by setting up their own wireless networks. In the meantime, some of them have partnered with Sprint Nextel and Clearwire to offer wireless service. The deal between Comcast, Time Warner Bright House Networks with Verizon will net the three cable delivery service providers some $3.6 billion dollars. The complete story is on-line at tinyurl.com/wireless-cable-deal. (Published news reports)

**

RADIO LAW: SPECTRUM AUCTION BILL APPROVED BY HOUSE COMMUNICATIONS SUBCOMMITTEE

A follow-up to last weeks story on a House Communications Subcommittee Spectrum Auction bill. In a 17 to 6 vote the Republican version of the spectrum incentive auction measure that would give the FCC the authority to pay broadcasters for voluntarily giving up spectrum to be auctioned for broadband use has been approved. The measure, backed by Subcommittee Chairman Greg Walden, W7EQI, of Oregon also contains a funding clause to help broadcasters left behind for moving or sharing channels and the establishment of a nationwide interoperable emergency communications network.

That $3 billion measure is three times as much as Democrats were proposing in their version. The bill will now go to full committee for markup, where Democrats said they hoped they could negotiate compromises, though they got no promises from the Republican majority.

A separate Senate bill has passed the Commerce Committee and is awaiting a floor vote. If both are approved and signed into law by President Obama, the ensuing auction is projected to return at least $15 billion to the treasury for deficit reduction after paying out all the expenses for the projects and reimbursements contained in the bill. (B&C)

**

NAMES IN THE NEWS: COPPS TO STEP DOWN AS FCC COMMISSIONER

FCC Commissioner Michael Coops has notified President Barack Obama that he plans to resign as an FCC Commissioner effective January 1, 2012. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

Michael Copps is one of the longest seated FCC Commissioners. He has served in that position since May 2001 and in January 2009, he took on the additional role of acting FCC Chairman. That, following the resignation of then-FCC Chairman Kevin Martin. Copps voluntarily relinquished the chairmanship to Julius Genachowski after the latter was sworn into office in June 2009.

His public letter of resignation gave no reason for his departure from the FCC, however Copps indicated that he plans to speak about broadband expansion and other issues as a private citizen. Copps has long been a vocal critic of media consolidation. In 2010 he was the only commissioner to vote against Comcast's takeover of NBC Universal.

If the Senate does not confirm a successor prior to Copps' departure, the FCC will be meeting with only three commissioners. At present, Chairman Julius Genachowski, Commissioner Mignon Clyburn and the departing Copps are Democrats. By law, only three of the five Commissioners may be members of the same political party.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, watching the politics in D.C. from Zion, Illinois.

--

Since June 2010 when Meredith Attwell Baker left the Commission, Robert McDowell has been the lone Republican commission member. (Published news reports)

**

HAMVENTION NEWS: NO INCREASE IN FLEA MARKET SPACE COST IN 2012

The Dayton Hamvention has announced that Flea Market vendor space cost will not be changing in 2012. All in-aisle Flea Market vendor spaces

will still be $70.00 each with end of aisle spaces remaining at $100.

Also, ham radio clubs can rent 4 spaces in a row or front to back, excluding end spaces, for $100. This after providing they supply proof that the club exists at time of payment.

Also those making club purchases are advised to do so directly with the Flea Market Sales Office and not on-line. This is because the Flea Market Committee will have to adjust the prices before your payment is made.

For more information please contact the committee by e-mail to fleamarket (at) Hamvention (dot) org (Hamvention)

**

HAM HAPPENINGS: 2012 QCWA NATIONAL CONVENTION TO TAKE PLACE IN RENO NEVADA

The first Western states Q-C-W-A National Convention in been over a decade will take place September 24th through the 27th in Reno, Nevada. The venue selected is the Harrah Hotel and Convention Center which is located in downtown Reno which is less than a block from the underground Amtrak train station. It also provides free shuttle service to and from the Reno International airport.

The convention is being hosted primarily by the Northern California Chapter 11 which is at this time soliciting assistance from other Western states QCWA groups. To volunteer your service or for more information on this upcoming event please contact the conventions chair by e-mail to WB6IMX (at) ATT (dot) net. (QCWA)

HAM HAPPENINGS SATELLITE ARC CELEBRATES ITS 50th ANNIVERSARY

While this is short notice, the Satellite Amateur Radio Club at Vandenberg Air Force Base in California, will be celebrating the 50th anniversary of the club and OSCAR-1 which it was formed to support in 1961. Operation will be on Saturday December 12th from 6:00 AM to 9:00 PM Pacific time. The call to listen out for is W6AB using SSB on 80 through 10 meters. QSL information can be found on QRZ.com page for W6AB. (KA6BFB)

EMERGING TECHNOLOGY: NEW VERSION OF ROS RELEASED

A new version of ROS data software has released by author Jos&#65533; Alberto Nieto Ros, EA5HVK. The updates include improved performance for High Frequency N-V-I-S communications.

Also, as of December 1st the code structure of ROS HF was changed in order to support mid to low band NVIS propagation. Versions prior to 6.8.4 will be incompatible with the latest version. There is no change to the Medium Frequency and E-M-E modes. You can download the new version of ROS from rosmodem.wordpress.com/2011/01/10/ros-2. (ROS)

TECH TIP: A FREE ACCESSORY FOR YOUR iPHONE 4S

According to photographer and news photo-journalist Tony Buittitta, KD6AJG, your Apple ear buds can also be used as a cable release for the new iPhone 4S while using it as a camera. Tony says that you simply plug the supplied ear buds into the iPhone, launch the camera app, steady the shot using your favorite stand then squeeze the + button on the ear buds. Your iPhone 4S will take shot that is as steady as a rock. Tony adds that the best part is, the cable release comes included in the box. He says that this tip is especially great for long exposures. (KD6AJG)

HAM RADIO IN SPACE: NASA TO COVER ALL ASPECTS OF NEXT CREW TO ISS LIVE

NASA Television will cover Expedition 31 pre-launch activities, launch and docking to the International Space Station orbital laboratory during the next several weeks.

Expedition 30 NASA astronaut Don Pettit, KD5MDT, Russian Soyuz Commander Oleg Kononenko, RN3DX and European Space Agency Flight Engineer Andre Kuipers, PI9ISS are scheduled to launch on Dec. 21st at 7:16 a.m. Central Standard Time from the Baikonur Cosmodrome in Kazakhstan. Their trip to the I-S-S will take two days. They are set to dock to the station at approximately 9:20 a.m. on Friday, December 23rd.

Pettit, Kononenko and Kuipers will join Expedition 30 Commander Dan Burbank, KC5ZSX, Russian Flight Engineers Anton Shkaplerov and Anatoly Ivanishin, who have been on the station since November 16th. The three will remain on the station until May as members of the Expedition 31 crew.

For a complete schedule of streaming netcast times please visit www.nasa.gov/ntv. (NASA)

HAM RADIO IN SPACE: FASTRAC 1 NEEDS YOUR HELP

The FASTRAC satellites have been in operation for more than a year and the team has been able to get a lot of data from them. But over the last month the team noticed that one of FASTRAC-1's on board microcontrollers which controls one of the experiments has not been booting up correctly. The team has done everything possible to correct this issue apart from turning it off which can only happen if the batteries fall below a specific charge level.

Since the satellites have been power positive throughout this whole year the only way this can happen is if the satellites transmit more often. Given that one of FASTRAC goals has always been to eventually provide a platform for amateur radio enthusiasts to use after the primary mission was over, the team has decided to open up FASTRAC-1 to the amateur radio community with the hope as more people use it to digipeat through the satellite, the battery levels will diminish and cause a hard reset of the microcontrollers on board.

The satellite is configured so that hams were able to begin using it to digipeat on December 2nd. To increase the chances of causing a hard reset, it was requested that as many amateur radio enthusiasts as possible try to digipeat through the satellite on the weekend of December 10th.

If you are successful at digipeating through the satellites or have any problems doing so please let us the team know by e-mail to fastracsats (at) gmail (dot) com or via the Facebook page www.facebook.com/fastracsats. (FASTRAC)

RADIO IN SPACE: NEW WEATHER SAT TO COVER WEST COAST

The National Oceanic and Atmospheric Administration has a new weather satellite covering the west coast. GOES-15, which was launched last May has completed its certification process and is replacing the old GOES-11 in a fixed orbit over the Pacific Ocean located in a geostationary orbit midway between the U.S mainland and Hawaii.

GOES is an acronym that stands for Geostationary Operational Environmental Satellite. Originally slated for a five-year mission, GOES-11 has been serving meteorologists since 2000. Animation of the new GOES-15's water vapor imagery is available at tinyurl.com/goes-15

DX

In DX, an operation from Clipperton Island is being planned by the Cordell Expeditions for next year. Operations using the call TX5Q are expected to take place between March 10th and 15th of 2012. QSL's will be via N7CQQ.

SM6CPY will be active as 9X0PY from Rwanda between December 24th and January 7th, 2012. His operation will be holiday style on all bands but with a focus on 20 through 10 meters QSL to his home callsign, direct or via the bureau.

Seven Spanish amateur radio operators will be on the air active as AO1POL during the 9th Antarctic Activity Week between February 20th and the 26th, 2012. Their operation will be on 160 through 10 meters, including the 30, 17 and 12 meter bands. Modes to be use include CW, SSB and the Digital modes. QSL via EA1GHT.

KH0UY and KH0K will be operational from Saipan in the Northern Mariana Islands between January 7th to the 10th. Their activity will be on 80 through 6 meters, plus the satellites. QSL via their home callsigns of JO3FRH and JE4SMQ, either direct or by the bureau.

Lastly, WA0ROI will be active as stroke WP2 from St. Croix through December 13th. QSL to WA0ROI, direct, via the bureau or electronically using Logbook of the World.

(Above from various DX news sources)

THAT FINAL ITEM: A HAMS NIGHT BEFORE CHRISTMAS FROM KN4AQ

Just in time for the Christmas season, Gary Pearce, KN4AQ, of Amateur Radio Video News has created a video version of Clement Clark Moore's poem The Night Before Christmas. But Gary's version has a decidedly Amateur Radio twist. With a guitar accompaniment by Don Mercz, WA3AYR, "A Ham's Night Before Christmas" features QST magazine covers and Christmas-themed advertisements from days gone by. We asked Gary how it all came about:

--

KN4AQ: "Years ago; back in the early 1990's the first two lines of the poem ".twas the night before Christmas and through 2 meters, not a signal was keying up any repeaters' just ram over abd over and over through my head. I didn't any of the rest of the poem written at that time. And for several year I thought `.I've go to do this."

"And then I was talking to a friend of mine about this and she volunteered to get me the rest of the poem. And I transcribed the lines from the original Clement Clark Moore poem into the ham radio version.

"I think my version goes on longer than the original. I have not looked at them side by side. I performed it at a local radio club for several years just live in front of the club. Finally I recorded it at an audio studio I work at."

--

So how did it go from a poem to a video? Again, Gary Pearce KN4AQ:

--

KN4AQ: "Last year I got a Christmas present from another friend; a ham who did the guitar accompaniment and I thought that would make a perfect accompaniment. And I thought that would make a perfect background to the poem. So I put them together.

"Then I thought `.well I do video for a living and I really need to make a video out of this one. So what can I use for pictures? I really cannot afford to go out and shoot pictures. I can't get actors. Animation would be cool but that's expensive and time consuming. And then I thought that QST often does a Christmas oriented cover for their December issue. And I know people at QST and Ill ask permission, and they did. But there were not enough of them, so I thought that I will go for the ads as well. The ads are often Christmas themed. So I pulled those out.

"I edited it together and I found a surprising number of images that fit the poem pretty well."

--

So KN4AQ used his skill as a video editor and produced a video that we think could easily go viral and become a true ham radio holiday classic. If you want to enjoy a few minutes of seasonal joy, you can watch Gary's video is on-line at tinyurl.com/KN4AQ-Night-Before-Christmas. (KN4AQ)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please don't forget that Tuesday morning, December 27th, is the kick-off of the ARRL's new Do It Yourself public relations campaign and the release of the video "The DIY Magic of Amateur Radio." More on this will be on-line at www dot arrl dot org as the date approaches.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Davis, W2JKD, in Vero Beach, Florida, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 11th December 2011

The news headlines:

* Distance Learning for the Advanced Exam

* AMSAT-UK net news

* GB2RS news broadcasts over Christmas

Following the successful conclusion of the June to December distance learning course with the Advanced exam last Monday evening the Bath-based team are planning to do it all over again. There are over 40 names on the waiting list already, but there is room for more; the last course started with 64 students and eight tutors. The next virtual course will start at the end of January and head for the July exam. The exam can be sat either in Bath or at a local exam centre. There are no fees for the classes but students will need a copy of the RSGB Advance! textbook and will, of course, need to pay the exam fee of £37.50. The team are considering changing a deposit that will be refunded to those that see the course through to the end; those that drop out donate their deposit to a radio charity. How does it work? Each week, students will receive guided reading instructions and revision questions to test recollection and/or understanding. Tutors will mark e-mailed answers and will provide worked solutions in return. Tutors will also provide points of clarification on request. The material is supplemented by additional exercises and video demonstrations on YouTube. Further details can be had from Steve Hartley, G0FUW, who is QTHR, listed on www.QRZ.com and can be emailed via G0FUW@tiscali.co.uk.

The AMSAT-UK net is held every Sunday morning at 10am local time on 3.780MHz LSB plus or minus QRM. The net is open to all and anyone wishing to find out more about amateur satellite operating is welcome to call in. Recording of previous nets can be heard at http://tinyurl.com/AMSATnet.

The last GB2RS script for this year will be dated 18 December 2011. There will be no GB2RS scripts prepared for 25 December and 1 January, although some newsreaders may wish to conduct news nets with their regular listeners. GB2RS News will recommence on 8 January 2012. The RSGB would like to take this opportunity to thank the dedicated band of newsreaders for another year of service to the amateur radio community.

It looks like the AO-51 amateur radio satellite that was in orbit and serving the world-wide amateur radio community for the better part of 7 years has finally gone QRT. The last telemetry data received had indicated that the third of six batteries that power AO-51 was approaching a short circuit condition. Further observation indicated the voltage from three remaining cells was insufficient to power the UHF transmitters. The command team will regularly attempt communications with the satellite over the coming months as there is always the possibility that a cell will open from its short circuited state and make AO-51 useful once again. And now for the details of rallies and events for the coming week

Saturday 17 December sees the 10th Waters and Stanton annual Christmas open day, which is sponsored by Yaesu UK Ltd. Chelmsford Amateur Radio Society, Essex CW Club, RSGB rep Mark Sanderson and staff from Yaesu will be in attendance.

Friskney & East Lincolnshire Communications Club's mid-winter tabletop sale and auction will take place on 3 January at the Friskney Village Hall, Church Road, Friskney, Lincolnshire PE22 8RR. The event includes the special event station GB2YR. Doors open 7pm and entry is £1.50. Tables are 2 for 1 at £4 and there will be free tea & coffee. Details from Ian Donnelly, 2E0XOD, 07554 362 020.

Now for the news of special events

We have no details of special events for the forthcoming week.

And now the HF DX news compiled from 425 DX News and other sources

AH0AJ will be active as KG4AJ from Guantanamo Bay for the next two years. QSL only via his home callsign.

Pierre, HB9AMO is back in Haiti until 8 January. He will be active as HH2/HB9AMO. The operation will be CW only using a TS-50 into a wire antenna and tuner. QSL info is via PA7FM.

Peri, HB9IQB will be active as E44PM from Palestine for a couple of weeks starting on 16 December. He plans to operate CW, SSB and RTTY on 10 to 40 metres with a focus on CW and 12, 17 and 30 metres. QSL via his home callsign, direct or bureau and LoTW. Further information, log search included, can be found at www.hb9iqb.ch/palestine.html.

Now the contest news

The 432MHz UK Activity Contest takes place on 13 December from 2000 to 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

The RAC Canadian Winter Contest takes place on the 17th. There are nine entry categories with various power levels, single- and multi-op, CW- and phone-only, multi-single and multi-multi. A certificate is awarded to the top scoring station in each DXCC entity, so several could be awarded to UK stations. Running for the full 24 hours using CW and

`phone only on the 1.8 to 144MHz bands, the exchange is signal report and serial number, although Canadian stations will give their Province code as well.

On 20 December, the 1.3GHz UK Activity Contest takes place from 2000 to 2230. Using all modes, the exchange is signal report, serial number and locator. And now the solar factual data for the period from the 28th of November to the 4th of December, compiled by Neil Clarke, G0CAS on the 5th of December.

The solar disc had numerous sunspot groups visible every day, some small and others larger that produced small C class solar flares every day. Interestingly, the majority of sunspot groups for the last few months have been located in the northern hemisphere. Several erupting filaments also took place and produced coronal mass ejections, but none headed our way. Solar flux levels increased steadily from 138 units on the 28th to 164 by the 4th. The average was 151. The 90 day solar flux average on the 4th was 144, that's three units up on last week. X-ray flux levels varied little day to day and averaged B5.5 units. Geomagnetic activity was quiet to just unsettled every day. The most disturbed day was the 30th with an Ap index of 10 units. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds 370 and 500 kilometres per second. Particle densities increased to 24 particles per cubic centimetre on the 29th and 20 on the 2nd. The remaining days densities were low. Bz varied no more than between minus 12 and plus 10 nanoTeslas.

And finally the solar forecast. Looking at the latest images from the STEREO Behind spacecraft shows a large `active region' that will be in view by the time this report is broadcast. Therefore, solar activity could be at least moderate levels or even higher provided the group is still active. Solar flux levels should be around the 170's for most of the period. Geomagnetic activity is expected to be quiet every day unless a coronal mass ejection heads our way. MUFs during daylight hours at equal latitudes should be well above 30MHz for the whole of the UK. Darkness hour lows should be a around 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of approaching 40MHz. The optimum working frequency with a 90 per cent success rate will be about 32MHz. The best time to try this path will be between 1100 and 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 12 December Gloucester Amateur Radio & Electronics Society is holding its Christmas draw & Leta's buffet. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 12 December South Birmingham Radio Society is having a field day planning meeting. Contact Don, on 01214 581 603.

On Monday 12 December Stratford Upon Avon District Radio Society is holding a test equipment evening with John, G0JUQ. Contact G0CHO, on 01608 664 488.

On Monday 12 December Sutton Coldfield Amateur Radio Society is holding a general meeting with discussions and is on the air. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 13 December Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 13 December Forest of Dean Amateur Radio Group is having a talk on CASHOTA and delta loops by Chris, M0DOL. Details from Adrian Lane, 2E0SDR, on 01594 549 110.

On Tuesday 13 December Loughborough & District Amateur Radio Club is having a fun quiz night. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 13 December Mid-Warwickshire Amateur Radio Society is holding its Christmas meeting. Details from Don, G4CYG, on 01926 424 465.

On Tuesday 13 December Worcester Radio Amateurs Association is having its Christmas meal. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 13 December Wythall Radio Club is holding a committee meeting. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 14 December Lincoln Short-Wave Club is hosting a Bob Heil Workshops, to be carried out via a live video link from Bob's home in the States on to a large screen in Aisthorpe Village Hall. There will be a microphone provided to ask Bob questions. Visitors are welcome, Light refreshments will be provided and there will be a cover charge of £1. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 14 December Midland Amateur Radio Society is holding its Christmas party and 80th birthday exhibition. Details from Norman, G8BHE, on 07808 078 003. On Wednesday 14 December South Kesteven Amateur Radio Society is having its last informal evening of the year. Contact Nigel, M0CVO, on 01476 402 550.

On Thursday 15 December South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581

603.

On Friday 16 December Bromsgrove & District Amateur Radio Club is having a review of the year. Contact Chris, M0BQE on 01905 776 869.

On Friday 16 December Coventry Amateur Radio Society is having a curry night. Contact John, G8SEQ, on 07958 777 363.

On Friday 16 December Leicester DX Group is having its Christmas party at the Winstanley Arms. Contact Ellen, M0HEL, on 07902 626 920.

On Friday 16 December South Birmingham Radio Society is holding its Christmas party. Contact Don, on 01214 581 603.

On Friday 16 December Worcester Radio Amateurs Association is having a beer and skittles night at Good Rest Tavern. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Saturday 17 December Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND On Monday 12 December Sheffield Amateur Radio Club is holding its Christmas dinner. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 12 December Thornton Cleveleys Amateur Radio Society is holding an auction. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 13 December Chester & District Amateur Radio Society is having its Christmas social. Contact Bruce Sutherland, M0CVP, on 01244 343825.

On Tuesday 13 December Halifax & District Amateur Radio Society is having a talk on how not to be a Tony Hancock by Paul, G8SJA from the Calderdale RAYNET group. Details from Anthony Vinters, G0WFG, on 01422 822636.

On Tuesday 13 December Stockport Radio Society is holding its AGM. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 14 December Hambleton Amateur Radio Society is holding a junk sale. More information from Tony Wilson, G3MAE, on 01609 881 530.

On Wednesday 14 December Hornsea Amateur Radio Club is having its Christmas party. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 15 December Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 07876 085 631. On Thursday 15 December South Manchester Radio and Computer Club is having a talk on GPS vehicle tracking by Chris, G8KRG. Details from Ron, G3SVW, on 01619 693 999.

On Friday 16 December East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND On Monday 12 December Greenisland Electronics Amateur Radio Society is on the air on 2m. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

On Tuesday 13 December Mid Ulster Amateur Radio Club is holding its Christmas dinner. Contact Brian, MI0TGO, via email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND On Tuesday 13 December Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 13 December Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946 192.

On Wednesday 14 December Lothians Radio Society is having its Christmas meal. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 15 December Aberdeen Amateur Radio Society is having five minute talks. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 16 December Ayr Amateur Radio Group is having its Christmas dinner. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Friday 16 December Borders Amateur Radio Society is having its Christmas dinner. Details from MM0YLG on 07944 912 751.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 12 December Chelmsford Amateur Radio Society is holding a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

On Monday 12 December Coulsdon Amateur Transmitting Society is holding its AGM. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 12 December Felixstowe & District Amateur Radio Society is having its Christmas noggin, video & mince pies. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 12 December West Kent Amateur Radio Society is holding its Christmas social, to which non members are welcome to attend. Details from Keith, G4JED, via email to westkentars@googlemail.com. On Tuesday 13 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 13 December Chelmsford Amateur Radio Society is holding its club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 13 December East Kent Radio Society is having its Christmas dinner. Details from Karl Davies, M1DFM, on 01227 710 120.

On Tuesday 13 December Harwell Amateur Radio Society is holding its AGM. Contact Malcolm, G8NRP, on 01235 524 844.

On Tuesday 13 December Verulam Amateur Radio Club is having its Christmas bun fight. Ralph, G1BSZ, 01923 265572, g1bsz@aol.com

On Wednesday 14 December Chesham & District Amateur Radio Society is holding its Christmas party at the QTH or Roger, G3MEH. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 14 December Fareham & District Amateur Radio Club is visiting the HMS Collingwood radio museum. More information from Derek Clarkson, G4JLP, on 01329 823 405.

On Wednesday 14 December Norfolk Amateur Radio Club is holding its Christmas party. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 14 December South Essex Amateur Radio Society Club is having a social and radio night. Details from Dave, G4UVJ, on 01268 697 978.

On Wednesday 14 December Southgate Amateur Radio Club is holding its AGM. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 14 December Worthing & District Amateur Radio Club is holding its Christmas party. Contact Phil, G4UDU, on 01903 816 684.

On Thursday 15 December Colchester Radio Amateurs are having their Christmas social. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 15 December Cray Valley Radio Society is having Christmas drinks. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 15 December Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

Ohio/Penn DX Special Bulletin No. 1039.3

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1039.3
BID: $OPDX.1039.3
December 9, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and K3LP for the following DX information.

ET3, ETHIOPIA (ET3AA Youth Development Project; DX-Pedition 2011). Dave Collingham, K3LP, sent the following press releases to OPDX on December 9th (edited):

Good Evening DXers:
I got the 160 meter antenna up today, 127' vertical (abt 5 ' L at the end) with four ground radials 128' each.
I also sent an email to Igor (UY5LW) and Yarik (UW7LL) asking them to join our team this evening through the weekend to expand radio and amplifier count.
We have a perfect SWR on 160 meters and noise level is about S7-8.
Our goal for the ACOM 2k or 1010 was not possible due to security.
I was able to bring and pay tax on a 500w solid-state amp (Ameritron) ALS-500M. It works fine on 15, 20 and 40, but only 200w on 80 & 160.
Real bummer! I've install earth ground on radio, amp and all power supplies. Still the same issue.
If Igor arrives this evening, we'll put their amp on 160. If not, it's going to be 200w on 80 & 160 m until we resolve issue.

David - K3LP

Hello DXers:
The 160 and 80 meter bands exhibited the typical large city noise - 20+ noise level. I installed a 400' beverage with no success. It looks like the best time is going to be at sunrise (5:30 AM to 6:30AM local) and sunset. The noise level reminded me of what I experienced for two days in Iraq (YI9) 1 year ago.
Since the ET3AA license is issued to a specific location, it's not an option to find a remote location. This morning (Saturday - Dec. 10), our team heads to the university to administer the student exams (Qty 58

tech, 34 general and 5 extra).
Paul (N6PSE), Al (K3VN) and Bill (N2WB) have been active each day
from Sid's QTH as ET3SID.
Igor (UY5LW) and Yarik (UW7LL) will arrive today at 1:00 PM local
time, they will be part of our team through Monday morning. I'll have
them get on the air as ET3AA with me with a second rig around 2:00 PM
today.
We look forward to more 10 meter QSO's - I was able to work North
America about an hour before and half hour after our sunset.
I know everyone is looking for 160 and 80 meters. We'll try a few
more tricks today to try and make it happen.

Take care,
David - K3LP

SARL NEWS - SUNDAY 11 DECEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

(PAUSE)

In the news today:

SOME 40 SARL MEMBERS MISSING FROM THE ICASA RECORDS

FASTRAC 1 NEEDS YOUR HELP

LOGBOOK OF THE WORLD FACILITIES

NATIONAL RADIO AFGHANISTAN INTRUDES ON 40 METRES

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SOME 40 SARL MEMBERS MISSING FROM THE ICASA RECORDS

Colin de Villiers, ZS6COL, has been working on bringing the SARL and ICASA records in line. During the process some 40 members were found to be on the SARL records that are not in the ICASA Data base. Technically speaking these persons are using their call signs illegally.

At the SARL - ICASA quarterly liaison meeting held on Thursday 8 December ICASA agreed to send emails to the affected persons requesting that they complete an application form for an amateur license and to submit the completed form as soon as possible. This will enable ICASA to correct their records. If you receive such an email from ICASA during next week please respond as quickly as possible.

Several other issues were discussed and will be fully reported on in the SARL Update to members which will be sent via email to all members during next week and will be posted on the web after that.

FASTRAC 1 NEEDS YOUR HELP

The FASTRAC satellites have been in operation for more than a year and the team has been able to get a lot of data from them. But over the last month the team noticed that one of FASTRAC-1's on board microcontrollers, which controls one of the experiments, has not been booting up correctly. The team has done everything possible to correct this issue apart from turning it off which can only happen if the batteries fall below a specific charge level.

Since the satellites have been power positive throughout this whole year the only way this can happen is if the satellites transmit more often. Given that one of FASTRAC goals has always been to eventually provide a platform for amateur radio enthusiasts to use after the primary mission was over, the team has decided to open up FASTRAC-1 to the amateur radio community with the hope, as more people use it to digipeat through the satellite, the battery levels will diminish and cause a hard reset of the microcontrollers on board.

To increase the chances of causing a hard reset, it is requested that as many amateur radio enthusiasts as possible try to digipeat through the satellite on this weekend

If you are successful at digipeating through the satellites or have any problems doing so please let us the team know by e-mail to fastracsats@gmail.com. Frequency and information on how to digipeat can be found on the Facebook page www.facebook.com/fastracsats.

LOGBOOK OF THE WORLD FACILITIES

Times they are a-changing. The majority of South African DXers have already learned the joys of confirming new countries through the Logbook of the World. Instead of waiting for months or years like in the olden days, most of us now wait days or weeks for confirmations. And it is free! DXCC applications are now routinely processed within a week.

Unfortunately, LotW currently only makes provision for the ARRL's DX Century Club (or DXCC), Worked All States and VHF/UHF Century Club (or VUCC). Support for other awards is still being implemented.

Several South Africans are now actively chasing US States using LotW confirmations only. Participants include ZS2DL, ZS2EZ, ZS2Y, ZS4TX and ZS6EZ. Most of them have already completed several bands and modes.

For other awards, paper cards are still mostly required. Tjerk Lammers ZS6P, the League's Awards Manager, can check cards for most awards, including DXCC. CQ Magazine awards, including Worked All Zones, can be checked by Donovan van Loggerenberg, ZS2DL, or Chris Burger, ZS6EZ. Contact them directly for more information.

You can see a list of South African award holders on zs6ez.org.za/lists.

A great thanks to Tjerk, Donovan and Chris for their, also free, unselfish service to fellow radio amateurs.

NATIONAL RADIO AFGHANISTAN INTRUDES ON 40 METRES

Uli, DJ9KR, reports that National Radio Afghanistan is operating on 7 200 kHz covering 7 195 through 7 205 kHz with its audio sidebands. Please monitor the station and send reports to Fred Scheepers whose email address is zs1fcs@telkomsa.net.

SARL OFFICE HOLIDAY CLOSURE

The SARL office will be closed over the Christmas and New Year weekend from 23 December. The office will open again on 3 January 2012.

GIVE A BOOK AS A CHISTMAS PRESENT

Last week SARL News gave details of the new 2012 ARRL Handbook and the new Antenna Books. They are still available in hardcover. The SA Amateur Radio Development Trust also has the Satellite Handbook, Basic Antennas and Small Antennas for Small Spaces available. Get the full details on www.amateurradio.org.za/books.htm.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at predominately low levels declining further with only minor C-class flares detected during the week. The sun's surface is still peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 95.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also waking up with some very nice TEP openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium. Also: Submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary next year. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

Echo Ireland

The December issue of Echo Ireland was posted to members during the week. The cover picture shows some of the antennas used during the recent DXpedition to Christmas Island while inside, Paul EI5DI writes about the planning of the expedition and the team's experiences on the island.

Closer to home, Islands On The Air contesters will know that Great Blasket Island was activated during the 2010 and 2011 IOTA contests: Ark EI9KC tells the story of both activations along with the group's plans for 2012. Island DXpeditions are also the subject of an article on activations of the remote islands of St. Kilda and Monarchs by a group of European operators which included Stan EI6DX.

The technical articles in this issue include one by Dave EI6AL on setting up a remote control station, while Tony EI5EM explains how to customise and re-scale moving coil meters and Liam EI9DVB tells us about the construction of a binary adder using only passive switches. There is also an article by Tom EI3AL on Shannon Aeradio which includes the history of the service along with information on the equipment, frequencies and modes in use.

This issue's HF Happenings column includes a full explanation of the Reverse Beacon Network as well as coverage of recent and upcoming DX. There is, of course, another excerpt from the HX Files, bringing us more information on the ATV adventures of Pat EI2HX.

South Dublin Radio Club Christmas Party 2011

This year's South Dublin Radio Club Christmas Party will take place on this Tuesday the 13th of December. Then the club will then take a break until Tuesday 10th of January 2012.

The venue for the party will be the same as last year, "The Morgue", Templeogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members & visitors can choose from the bar menu until 9.00 pm.

Limerick Radio Club

The Annual Christmas Quiz will take place on Wednesday 14 December in the Limerick Institute of Technology at 7.30pm and a great night of fun fun is guaranteed, so brush up on your radio theory, general knowledge etc. Great prizes are available on the night and all are welcome. The club wishes all members a very Happy Christmas and prosperous 2012.

Louth Erne Amateur Radio Club

Lough Erne Amateur Radio Club, winner of the UK runner-up RSGB Club of the Year Award has donated half the ?500 prize money to the Share Centre.

Share is a charity and Ireland's largest residential activity centre. The Club's award-winning successes used Share as base for meetings, activities, examinations and the Lough Erne Rally, which will next be in Share's big Arena on Sunday 1 April 2012.

RSGB now seeks Club of the Year entries based on 2011. Lough Erne ARC urges more clubs to enter what is a useful audit of club aims, activities and achievements.

Mid Ulster Amateur Radio Club

The Committee of the Mid Ulster Amateur Radio Club would like to take this opportunity to extend Seasons Greetings to all on air. To get the Club members in the mood, the annual Christmas Dinner will be held on the 13th December. Details are a listed on the Club website at www.muarc.com This year the Club enjoyed a busy and varied calendar with the regular commitments and many new dates offering the opportunity to both promote Amateur Radio and to, of course, play radio. A series of successful Foundation Courses brought the year to a close. A 12 week Intermediate Course starts the new year, (see www.muarc.com) and with the Club call-sign MN0VFW getting the first airing of the year with a charitable activation for the RNLI SOS Week towards the end of January, it all promises to be another action packed year for the dedicated Mid Ulster team. Have a merry Christmas and a

prosperous 2012.

DX News

Haru JA1XGI will be QRV from the Pacific island of Guam from 12 - 14 December. He will use the callsign W8XGI/KH2. Look for him on all bands 20 - 10m. He plans to operate mainly on CW and QSLs go via his home call in Japan. Peter DC0KK is returning to Sri Lanka and will be active again as 4S7KKG until 11 March next year. He prefers CW and digital modes and uses dipole antennas. Norman 5B4AIF is travelling to Belize in Central America and will operate as V31NB from 16 - 27 December. He will be using the shack of V31MD and plans to be active in the OK-OM DX RTTY Contest on 17th December. QSL info is via EB7DX. Peri HB9IQB has been issued with the callsign E44PM by the authorities in Palestine. He hopes to start this one-man expedition around 16th December. Main priority will be CW and the WARC bands but due to many requests he now promises up to 20% SSB. QSL info is via his home call and also Logbook of the World.

70cm to help paralyzed patients

Bloomberg report on the FCC (USA) approval for medical devices designed to help paralyzed patients by using 426-432 MHz and 438-444 MHz for transmitting signals to incapacitated limbs.

Experimental D-Star Repeater

The Mid Cornwall Beacon and Repeater Group has obtained an NoV from Ofcom to operate an experimental D-Star repeater on the existing GB3HB repeater frequencies on 70cm. It will have the callsign GB7MC and is in operation since December 4th 2011..The output frequency will be 433.375MHz and the input frequency will be 434.975MHz.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-December, through Sunday, 11th-December there were 238 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JX, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S0, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4S, SRI LANKA. Peter, DC0KK, will once again be active as 4S7KKG from Sri Lanka (AS-003, WLOTA 0762) between December 11th and March 11th, 2012. Activity will be mainly on CW and the Digital modes. QSL via

DC0KK, by the Bureau or direct (see QRZ.com). LoTW on request. All QSLs for all QSOs will be sent via the QSL Bureau.

8th IDXC. The 8th International DX Convention will take on April 22nd, 2012, and will be held in Capaccio Paestum, Salerno, Italy. The convention will have the following presentations: FW0R (Wallis & Futuna) 2012, HK0NA (Malpelo) 2012, T32C (East Kiribati) 2011, VP8ORK (South Orkney) 2011 and possibly others. For more details and updates, watch the following Web page at:
http://www.dxitalia.it/index.php?option=com_content&view=article&id=
&Itemid=X

A6, UNITED ARAB EMIRATES. Gerry, VE6LB, will once again be active as A6/VE6LB from Dubai between December 20th and January 10th. Activity will be limited (holiday style) using 100 watts into a G5RV antenna (40-10m), but with a focus on 12/10m and mainly on CW. QSL direct via his home callsign (QRZ.com address) or LoTW and eQSL. Bureau QSLs can be requested via E-mail at: ve6lb@telus.net
Visit his Web page at: http://www.telusplanet.net/public/telwest/ve6lb.htm
On-line log will be available at:
http://logsearch.de/index.php/online-logsearch

DXCC NEWS.....
* It has been reported that HZ1FI QSLs are being rejected. Reason given = no documentation received by ARRL.

* Following the DXCC Desk's clarification on Russian prefixes which counts for European Russia (see OPDX.1039.2), Boris, E73Y, disputes the line "Any call with the prefix U and the numbers 1, 2, 3, 4, 5, 6, 7". Boris states that the U5 callsigns has been used for WWII veterans in Ukraine not European Russia." The Russian callsign system was changed in mid-2010. Complete details of the changes can be found on the IARU Region I Web site at:

http://www.iaru-r1.org/index.php?option=com_content&view=article&id=48:new-russian-callsign-system&catidA:hf&Itemid=

E5, SOUTH COOK ISLANDS. Bill, N7OU, who flew back from Manihiki, North Cook, on December 6th, reports that he made 16,250 QSOs as E51MAN. He was active this past weekend during the ARRL 10m Contest as E51NOU from Rarotonga, South Cook, CW only. He informed OPDX that he will be uploading his E51MAN and E51NOU logs to LoTW (ASAP) after his return to the USA this week. Also, he will miss the last part of the 10m contest because he will fly back to the USA at 1000z, on December 11th.

ET, ETHIOPIA. David, K3LP, and a group of operators are now active from the club station ET3AA and the QTH of ET3SID until December 13th. QSL both callsigns for "only this particular operation in December", via N2OO. In a short press release on Saturday, David mentioned that their ARRL VE Team completed the FCC License test session on December 10th, at the University of Addis Ababa. The results are:
Technician Exam: General Exam:

61 Tested 3 Tested
53 Passed 0 Passes
They expect a large turn out on Monday, December 12th, at the University
of Addis Ababa for the General (about 34) and Extra Class (5) exams.

HU2, EL SALVADOR (Update). A team consisting of Juergen/DF7TT, Ruediger/
DK8YY, Oliver/DL2ARD, Rene/DL2JRM, Ralf/DL3JJ (Team Leader), Ingolf/DL4JS,
Daniel/DL5SE, Lu/DL8ALU, Jaroslav/OK4MM, Andres/YS1AG, Mario/YS1GMV, Mario/
YS1MAE and Florencio/YS1ZC will be active as HU2DX from Capricho Beach
House, Barra de Santiago, El Salvador, between January 29th and February
10th, 2012. Most of the team members are from the successful 2008 5T5DC
Mauritania DXpedition. Activity will be on 160-10 meters with the main
focus on the lower bands and using up to 4 stations on the air. Their
radios (all with amps): 2 x K3, 1 x K2 100W and for the Digimodes a FT-840.
Antennas are: 160m Phased Array @ 2 x 26m Spiderbeam Pole, 80m Phased
Array @ 2 x 18m Spiderbeam Pole, Spiderbeam 20-10m, Spiderbeam 17/20/30m
and 2 x SteppIR Vertical 40-6mm (phased for 40m or single for Highbands).
The group is looking for support (see Web page for info). QSL via DH7WW, by
the Bureau or direct to: Ulrich Moeckel, Muldenstasse 1, 08304 Schoenheide,
GERMANY. For more information, a Web page is now available at:
http://www.hu2dx.de

IOTA NEWS.............
AS-079. Takeshi "TAKE", JS6RRR, will be active as JS6RRR and JI3DST/JS6
from Miyako Island (AS-079-005) between 0800z, December 23rd
and 0000z, January 5th, 2012. Activity from Miyakojima City,
Okinawa (JCC#4714), will be on 160/80/75/40/30/20/17/15/12/10/6
meters using CW, SSB, RTTY, PSK31 and FM. Take will also go to
Ikema-jima (AS-079-001) and Kurima-jima (AS-079-003) one or two
times during this stay. This can change due to work situations
or rainy weather and travel time. QSL via the Bureau is the
best, but if you want to send direct, see QRZ.com (under the
callsign JI3DST: 2-18-26, Hannan-cho, Abeno-ku, Osaka-city,
Osaka 545-0021, Japan.

APPROVED IOTA OPERATIONS. Fred, IK7JWX, reports that the following
operations during the period of August to October 2011, have been
provided acceptable validation and are therefore approved for IOTA
credit: 5C2B (AF-068), 5C2J (AF-068), 5C2P (AF-068), 5C2S (AF-068),
CN8QY/P (AF-068), MM0RAI/P (EU-189), 4W6AA (OC-232), YB9WZJ/P (OC-239),
YB0MWM/9 (OC-239), PQ8OP (SA-045) and PQ8XB (SA-045). Also, G3KMA
(28 Oct. 2011).

PJ2, CURACAO. Jeff, K8ND, will once again return to Curacao Island (SA-099, WLOTA LH-0942) for the 19th time to activate the Signal Point Station - PJ2T, between December 14-20th. He states that he will be there to 'explicitly' be in the Stew Perry 160m Contest (December 17-18th) and to beat the score by Jerry, PJ2/WB9Z, from 2005: 5059 points (385 QSOs in 229 grids). QSL PJ2T via W3HNK.

PJ2, CURACAO. Members of "The NN6NN RTTY Team" will be activating PJ2N from the Signal Point Station - PJ2T on Curacao Island (SA-099, WLOTA LH-0942) during the 2012 ARRL RTTY Round-Up (January 7-8th, 2012). Operators mentioned, Ron/N6EE and Chet/W6XK, will be enter the contest as a Multi-Op/High-Power entry. By the way, these two operators currently hold the world record during for their 2003 VP5NN operation. Look for the operators to be active on the Digital modes before and after the contest as PJ2/N6EE and PJ2/W6XK. QSL via LoTW or direct to NN6NN.

QSL MANAGER OF THE YEAR AWARD. John, K1XN, announced this past week: "The Golist QSL Manager Data Service is reviving its 'QSL Manager of the Year Award'. The purpose of this award it to recognize the service of QSL Managers world wide for the service they provide to the World Wide Amateur Community. Nominations for this award will be accepted by the Golist from DX and Contest clubs, world wide, for the year of 2012. Each DX club and Contest club is encouraged to poll their members

for their nominations for the Top 5 QSL Managers for 2012. The definition of a QSL Manager for this award is any person that confirms contacts via QSL Card for any station other than their Primary Call Sign. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters as voted by members of their club. Votes should be tabulated and sent to the Golist by August 1st, 2012, to be eligible for the QSL Manager of the Year award. Each club world wide may only send one submission for voting purposes. Records of submission will be maintained by the Golist.
A plaque, donated by QRZ-DX / THE DX MAGAZINE, will be awarded to the QSL Manager of the Year selected at the W4DXCC Convention held in Pigeon Forge Tennessee in September 2012.
The recognized format for your clubs submission is as follows:
In the Body of the Message include:
Club Name
Club Officer (Name, Call Sign, club office and email address)
Top 5 QSL Manager Nominees (list name and callsign)
In the subject line of your official email: QSL Manager of the Year-2012."

Les, WB8LES, who is active as T6LB from FOB (Forward Operation Base) Shank, Loghar Province, Afghanistan, has reportedly been stateside for about 2 weeks now and is starting to get to the pile of QSL cards. It was also reported that it looks like he may be changing employment and go back to flying trans-Atlantic charter jets.

QSL RECEIVED VIA LoTW: 3V8SS, 4Z1UF, 6V7N, 7Q7VB, 9X0VB, C91VB, CR6K, DF9ZP, DM5TI, EA4URE, EI8HT, EL2A, EL2WS, FG5FU, FG5LA, FS/DL2RUM, G8APB, GM3POI, H40KJ, HB9FBG, HI3A, HI3TEJ, IV3RAV, J6/WF2S, JA0FSB, JA3QOS, JA5FDJ, JA8TGI, JH2IEE, KH2L, KL7AC, LZ1MS, LZ2MP, LZ9W, MM0AMW, OE8SKQ, OH0Z, OK1AMF, P40L, PB1TT, PJ4X, PU5AAD, RA4CC, S51ZZ, S55O, SM3EVR, SU9VB, TF3SG, TG9ADM, UN6P, UN7PBY, UP6P, UR3IFD, UU5WW, VA7RN, VE1OP, VE3KP, VP2MWG, XE2B, YL2KF, YN2CC, YQ6A, Z37M and ZK2V

QSLS RECEIVED VIA MAIL: 3D2R, 3DA0GF, 4K9W, 4W6A, 6O0M, 7Z1HL, 8Q7SO, 8R1AK, 9G5SG, 9M2CLN, A52IR, AP2NK, C4N, CT1DSC, D9A, EA9EU, EL8RI, ET3AA, FR4NT, GJ7DNI, HV50VR, J79KT, JV5A, JW3TR, LT1F, MM0AMW, OD5NJ, PJ7X, PJ7XK, PQ8P, UA9CUA, VP8LP, VP9HE, XV2YL, YB0AKM, YL2BJ, ZD7VC and ZD8ZZ

QSLS RECEIVED VIA THE BUREAU: 4L7O, 5W0KH, 7Z1HL 8Q7SO, 9G5SG, 9M2TO, AD7UV/KH2, AH0BT, AL5A/WH0, B1Z, BT3WX, CW1GM, DL60DARC, DU1IST, EA6AIV, J5V, K0FRI/KH2, KB0OBU/KH2, P29VEK, PJ4/KP2I, SE2T, T30ZF, T32SI, T8CW, TO5T, UK/JI2MED, VK9DWX, VP2MNK, WH0DX, YJ0NA, YW5F and ZK2DL

SILENT KEY. The members of the Northern Ohio DX Association lost a great friend/member, Don Schmidt, N8AC, on December 3rd. His DXCC totals were 343/329. Don retired from NASA Lewis Research Center as an Electronic Research Technician after 31 yrs., and was a also a WWII veteran during the Berlin Air Lift, as well as during the Korean War. OPDX and its readers would like to send out our deepest sympathy to the family and friends of N8AC.

T32C PRESS RELEASE (Bulletin #10). Don, G3XTT, FSDXA T32C Publicity Officer, sent out the following on December 11th (edited): "It's about six weeks now since the team returned home from Christmas Island, and we wanted to update everyone and answer some of the questions we are being asked.
TOTALS, RECORDS: Firstly, as most of you will know, our final QSO total was 213,116, the first time any DXpedition has exceeded the magic 200k (some will recall that, with D68C, we were the first to exceed 100k). We also worked 49,535 uniques, another world record. Just a few short weeks before the trip started we wondered whether we could manage a respectable total at all, as it had become clear that our container of equipment would not arrive and we would have to hand carry everything. In the event, team members and others, including our major sponsors, rallied round and we were able to run up to ten stations, eight of them equipped with linears, along with a very respectable array of vertical antennas for 160 through 10 and, later in the trip, an 8-element Yagi for 6m. What also came as a very pleasant surprise was the upturn in HF conditions just days before we started 10 and 12m propagation was well above what we had dared to hope.

Partly as a result of those improvements in propagation, we are particularly proud of the number of European QSOs included in that total, some 59,673. A breakdown of our QSOs appears on the Club Log website: http://www.clublog.org/charts/?c2C#r

Other records that we broke included the band records for 30m,15m and 12m and those for CW (102,216), SSB (88,416) and RTTY (19,225). Another record was with North America (109,327).

6 METERS: Just a word about our 6m operation. Not only did the container fail to arrive, but Kazu JA1RJU, our 6m guru, had to cancel his participation at the last minute for health reasons (as we reported in a previous bulletin). It was left to team members Michael/DG1MGZ, Mike/G3WPH and Bob/MD0CCE to learn 'on the job'. Not only did they manage seven EME QSOs in two continents (it would have been more, but the 6m linear developed a fault), but they also managed 103 terrestrial QSOs, including some quite long-haul ones into the USA and South America (possibly due to some early 6m F2 propagation?).

THE CONTAINER: We are regularly asked what happened to the shipping container with its six tons of gear. The good news is that, while we were let down by local agents and shippers in the Pacific area, there is no problem with shipping on the main routes, and it is currently on its way back to the UK, scheduled to arrive in late January.

QSLing: Full details of how to request a 'traditional' QSL appear on our website, so are not repeated here. You can send a direct or bureau card, or make an online request. The card design has been finalized and we plan to start mailing cards in January after the Christmas postal rush.

As for Logbook of the World, we promised an upload within six months and, in practice, it will be very much earlier. We wanted to upload as clean a log as possible and have made some 500+ editorial changes to the log as

a result of feedback from the log uploads to Club Log and notes received from many of the Deserving. But we are very conscious that many of you want to do a DXCC update before year-end. Therefore, LoTW permitting, we plan to start the upload on 15 December 2011, just over six frenetic weeks after our return from T32C. Uploading 213k QSOs is a huge task and we don't necessarily expect it to go smoothly first time (D68C, 3B9C and 3B7C all experienced problems), so the upload may take several days to complete.

We have a team of 10 QSL managers ready to start processing the T32C cards and we estimate that we will eventually confirm around 140,000 QSOs.

StarQSL, our internet-based QSLing system, has been enhanced recently by its author John, G3WGV. Major developments include a new batch import facility to work directly with Club Log's OQRS, incorporating an address label printing facility. We will be printing direct to QSL cards this time. Various improved ergonomics have also been introduced to help speed up the QSLing program.

Just a word too about QSLing our earlier DXpeditions, as T32C has prompted renewed interest in getting missing cards from those trips. The following have taken over QSLing responsibilities for our 3B7C and 3B9C DXpeditions:

3B7C QSLs should now be sent to: 3B9C QSLs should now be sent to:
Jim Steel M0ZAK Derek Moffatt G3RAU
6 Central Avenue Mill House
Shepshed Middle Street
Leics LE12 9HP Glentworth, Gainsborough
United Kingdom Lincs DN21 5BZ
United Kingdom

Email addresses for both Jim M0ZAK and Derek G3RAU are shown on QRZ.com.

PRESENTATIONS, ARTICLES: An early DXpedition write up has already appeared in the WIA (Australia) journal and one is in preparation for Brazil (in Portuguese, tnx PY2WAS). The RSGB's RadCom will carry a four-page article in the January issue and the latest edition of the CDXC (Chiltern DX Club, the UK DX Foundation) Digest is very much a 'T32C Special'. We have also accepted invitations to present at Dayton and Visalia and at next year's RSGB Convention as well as at the LADX (Norway) and ARI (Italian) events. We expect to feature on the program at Friedrichshafen and other national and local clubs over the next 12 months.

DVD, etc.: A DVD is currently in preparation and orders can be placed via the website. We expect it to start shipping in January – there is 25 hours of material to be edited down! The DVD will also include the 3B7C story.

THANKS: Once again, we want to offer our thanks to every individual and organization who have supported our efforts to put Christmas Island on the air in a big way. We have acknowledged all sponsors on our website. By the completion of the project and thanks to our sponsors (corporate, club and individual), donations through OQRS and with QSL cards, and taking into account projected sales of some of our equipment, we expect to just about break-even.

We must, though, finally add our thanks to the staff of the Captain Cook Hotel and, indeed, to all those local residents we met on the island. It's a great place, with good fishing and a friendly welcome from all.

And to all our fellow amateurs, a Happy Christmas from those of us who encountered ?Christmas? early this year!"

Don Field G3XTT, (don.field@gmail.com) (FSDXA Publicity Officer)
T32C website <www.t32c.com>
CDXC website <www.cdxc.org.uk>
Global Sponsor: Yaesu
Major Corporate Sponsors: Martin Lynch & Sons, Redweb Technologies, Nevada Radio
Major Club Sponsors: ARRL Colvin Award, GDXF German DX Foundation), CDXC (Chiltern DX Club, The UK DX Foundation), RSGB DXpedition Fund

T6, AFGHANISTAN. J?rgen "Joe", 5Q2J/OZ2JBC, will be active as T6JP during sometime in 2012. Joe is an electronic mechanic in the Danish Army. QSL via 5Q2J. More details will be forthcoming.

TO4, MAYOTTE. Operators Giovanni/IK5BCM, Giuseppe/IK5CBE and Giovanni/IK5CRH will be active as TO4M from Mayotte between January 28th and February 5th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via IK5CRH.

V3, BELIZE. Operators Alex/DO5ALX and Torsten/DG7RO will be active as V31RU and V31TF, respectively, from Corozal, Belize, between February 4-26th, 2012. Activity will be on 30/17/12 bands using SSB and RTTY. There is a possibility that they will enter the CQ WPX RTTY Contest (February 11-12th). QSL via their home callsigns.

V3, BELIZE. Bob, N7MSU, will once again be active as V31SU from Belize between February 26th and March 15th. Activity will be mainly 40-20 meters using CW, SSB and PSK31. Operations will be from various locations which including Caye Caulker, Orange Walk Town, San Ignacio and Gales Point. QSL via his home callsign, by the Bureau or direct (see QRZ.com for address and instructions).

V4, ST. KITTS. Jon, W5JON, will be active again as V47JA from his Calypso Bay vacation home, located 300 feet from the Caribbean Sea (CQ Zone:8, IOTA NA-104, Grid FK87pg), between February 28th and March 28th, 2012. Activity will be on 80-6 meters SSB, including 60 meters. He plans to operate in both the ARRL International DX SSB Contest (March 3-4th) and the CQ WPX SSB Contest (March 24-25th), as a Single-Op/All-Band entry. The station's equipment is a Kenwood TS-590S, Yaesu FT-857D, and SB200

amplifier. Antennas are a 80-10m multi-band dipole, metal roof (called "Galvalume", which the vertical uses as the ground radials) with mounted S9 (18 ft. and 31 ft. verticals) and a 6m 3 element yagi. Look for his XYL Cathy, W5HAM, to also be active occasionally as V4/W5HAM. All QSLs go to his home callsign, W5JON. Also LoTW.

XU, CAMBODIA. A group of JA operators plan to be active from Sihanoukville between January 14-22nd. Operators mentioned are Masumi/JA3AVO (XU7AVO), Takeo/JA3BZO (XU7AEN), Kunio/JA1CJA/JH3LSS (XU7CJA), Tsuguya/JA3UJR (XU7UJR), Shozo/JA3HJI (XU7HJI pending) and Tatsuo/JA3ARJ (XU7ARJ pending). Activity will probably be like last time on 160-6 meters using CW, SSB and Digital modes. Also look for satellite activity on 2m and 70cm. QSL via their home callsigns.

YV0, AVES ISLAND. The 4M5DX Group states that they are still looking for no more than 7 or 12 days to operate from Aves Island (NA-020, ARLHS AVE-001, WLOTA L-0216) with transportation from the Venezuela Navy.

RAC Bulletin 2011-044E - New Manager of NARED, the National Amateur Radio Emergency Database
2011-12-10

Doug Mercer VO1DM CEC RAC Vice President Field Services is pleased to announce the appointment of Pat Barrett, VE3RNH Manager NARED effective immediately. Pat has an extensive management background and most recently sat on the Ontario Restructuring Commission chaired by RAC Director Bill Unger VE3XT. Pat is active with ARES, the Barrie Amateur Radio Club, and speaking with her she is looking forward to moving NARED forward, adding her knowledge and experience. If you have ideas or suggestions I know she would like to hear from you. Contact her at ve3rnh@rac.ca.

In making this announcement, also also would like to extend a warm 'thank you old friend' to Merv Halvorsen VE3TSA the outgoing NARED Manager. Merv, I knew I wouldn't have you for long, and sincere thanks for all of your efforts.

Highlights of Solar and Geomagnetic Activity
05 - 11 December 2011

Solar activity was at predominantly low levels for the summary
period. From 05 - 06 December, two regions dominated the disk in
size and solar flare production, Region 1363 (S21, L=108,
class/area=Eki/620 on 05 December) and Region 1362 (N08, L=131,
class/area=Eso/220 on 03 December). Both regions produced multiple
C-class events with Region 1363 responsible for the largest event of
the period, a C6/Sf flare at 05/2325 UTC. From 07 - 10 December,
Region 1374 (S17, L=352, class/area=Dso/210 on 11 December) and
Region 1375 (N08, L=356, class/area=Cso/140 on 11 December)
dominated the disk, each producing several small C-class events. The
only days of the summary period with activity at very low levels
were 06 and 11 December . Multiple coronal mass ejections (CMEs)
were observed throughout the week, however, none of them were
geoeffective.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels from 05 - 09 December. A return to background levels
was observed on 10 December.

Geomagnetic activity was at predominantly quiet levels during the
summary period. From 05 - 08 December, quiet conditions were
observed at all latitudes. On 09 December, an isolated period of
active conditions was observed at high latitudes. On 10 December,
quiet to unsettled conditions were observed as a coronal hole high
speed stream (CH HSS) moved into a geoeffective position. Solar wind
speed increased from around 330 km/s to around 500 km/s at the ACE
spacecraft and the total IMF rose to around 11 nT. Another isolated
period of active conditions was observed at high latitudes on 11
December as a result of the CH HSS effects.

Forecast of Solar and Geomagnetic Activity
14 December - 09 January 2012
```

Solar activity is expected to be at predominately low levels with a chance for isolated M-class activity from 12 - 22 December. A decrease to predominantly low levels is expected from 23 -24 December as Regions 1374 and 1375 rotate off the disk. An increase to a slight chance for M-class activity is expected on 25 December as Region 1363 returns and remain for the duration of the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels the entire forecast period (14 December - 09 January).

Geomagnetic field activity is expected to be at mostly quiet levels from 14 - 25 December. Quiet to unsettled conditions are expected on 26 - 29 December due to effects from a recurrent CH HSS. A return to quiet levels is expected from 30 December - 04 January followed by an increase to quiet to unsettled levels on 05 - 06 January due to effects from a second recurrent CH HSS. Mostly quiet conditions are expected for the remainder of the period.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-12-15
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

E51EME - 6m dxpedition to the South Cook Islands - Just leaving for
Rarotonga in the Cook Islands until late January. I'll be replacing
the 5 element Yagi at E51CG's QTH with a 7 element Yagi and will be
active on 6m with my IC706 and a HB 8877 PA ... mostly looking for
Es and F2 propagation, but might appear on JT65a EME at my moonrise
or moonset (both over water) during the low degredaation days.

Again this year F1DUZ and F6APE will catch the moon from Guadeloupe Island as FG4KH (FK96HF) LATEST NEWS from Phil, F1DUZ, dated 2011-12-05: FG4KH 70cm setup is ready to go !
The last try has been done with success, all is working at the best! The internet connection is good at FG4KH, so the working frequencies for JT65 and CW will be selected on site depending of birdies. The activity will be a holidays style with more on the week-ends, especially the second one. the operations will start on the 28/12. The main activity will run in JT65B mode but I hope to catch some big guns in CW , so skeds will be welcome. Please, if you are interested for a CW QSO, send me a mail at duz@orange.fr so we can arrange a sked. The informations about the daily and next activity will go through MMMonVHF and the log on line on our web-site. Please give us a call ! If you have no elevation but good set up on 70cm, try us at your moonset or moonrise! See you soon from the French West Indies ! SOURCE: tnx to Phil, F1DUZ, direct to MMMonVHF

E2E EME-DXpedition in Thailand around April 2012 - I am happy to announce that there will be an EME-DXpedition in Thailand around 18th of April. A group of Expats (HS0ZFZ, HS0ZFD, HS0ZGQ and me HS0ZIL) are planning to activate some rare squares in northeastern Thailand daywise! The special callsign will be "E2E". The DXpedition will take place in order to assist the "Radio Amateur Society of Thailand (RAST)", who had lost all their equipment at the Club Station HS0AC in BANGKOK during last flood. So any donations for this activity are welcome and will be transferred to RAST Treasurer An own website and/or an DX-Blog on http://www.mmmonvhf.de/ will be setup in the near future. Stay tuned on these sites for further informations!!! Pictures of the destroyed Club Station can be seen here: http://www.qsl.net/rast/ 73 to all

WIANEWS WEEK COMMENCING DECEMBER 18 2011.

We urge you to read the WIA FRONT PAGE NEWS service regularly,
http://www.wia.org.au

NOW, THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING DECEMBER 18 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The proposal to allocate a part of the medium frequency band to the amateur
service at the World Radio Conference in 2012 received a boost this week with
the release of the Asia-Pacific Common Proposals that were developed at the
5th Meeting of the APT Conference Preparatory Group for WRC-12.

During this meeting the various nations of the Asia-Pacific region discussed
many of issues that will be addressed at WRC12 and attempted to come to a
regional consensus position.

The proposal of interest to the amateur service is "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services" and this proposal was supported by a comfortable margin of Asia-Pacific administrations responding to the voting request.

The successful development of a regional position supporting an amateur MF allocation increases the chances that the proposal will be accepted at WRC-12.

The amateur radio service is represented at the APT meetings by delegates from the International Amateur Radio Union Region 3 and by members of national amateur radio organisations who are part of delegations from each national administration Dale Hughes was a member of the Australian delegation to this meeting and the earlier meeting in Hong Kong in December 2010, nominated and paid for by the WIA.

Dale will be representing the amateur service as a member of the Australian delegation to WRC-12, again nominated by the WIA.

http://www.wia.org.au/newsevents/news/2011/20111214-2/index.php

You know it's history that makes us who we are today and helps guide us not to repeat mistakes!

The WIA's archive in Bayswater has been steadily sorting documents, some dating back prior to the foundation of organised amateur radio in Australia in 1910.

During the "100th year" in 2010, many documents and articles were received as a result of the "Call for Articles" column in AR. Some submissions have been, or will be published in the WIA's magazine. All will be kept and added to the archive shelves to assist those researching wireless/radio history at some later date.

You are able to help preserve our history by forwarding relevant historical information in your possession.

WIA is particularly seeking material relating to radio activities within Australia. You may have been involved in some activity of importance, or related to an earlier amateur whose paper work may still be held in the family. If you were an office bearer of the Institute, or one of the more active clubs, you may have copies of official correspondence with the old PMG's Department relating to early special permits, e.g. for modes like RTTY, ATV, Moon Bounce or early repeaters. Even copies of OT's licences and permits are very worthy of preserving, for they all help to build up an accurate image of days gone.

The Institute's Archive, is rapidly developing into a source of historical material not only relating to the development of amateur radio in Australia but also radio communication generally in this part of the world.

Please forward suitable material to the Bayswater office, marked "Attention Archive" or you may contact the WIA Historian, Peter Wolfenden, VK3RV on email vk3rv@wia.org.au

The WIA's Freedom of Information request early this year, reported in the Comment column of the April issue of the WIA's Amateur Radio magazine, revealed that the ACMA did not have any documents disclosing ACMA's policy or procedures relating to inspections.

The WIA has continued to discuss these matters with the ACMA and now we have been able to publish an agreed statement on inspections. The full statement can be found on the WIA website, currently as a news item on wia.org.au

But let me outline some aspects of the statement.

Let me put on one side cases where a radio inspector can enter premises pursuant to a warrant issued by a court on the basis of evidence of significant breaches of the Radiocommunications Act or in an emergency to stop actual interference to certain safety services.

Those situations apart, Radio Inspectors acting under that Act do not generally have automatic rights to enter an individual property unless permission is granted by the occupier of the property.

Amateur station inspections are normally a routine activity, often with an educational objective. Ordinarily, an Inspector should arrange a mutually convenient time by telephone with a licensee to inspect the licensee's station. If the licensee is aged under 18, the appointment should be made through a parent or guardian, and the inspection should be carried out in the presence of the parent or guardian.

The ACMA points out that in some cases, where an Inspector is working in a particular area, it may be convenient to visit amateurs in the area for station inspections when it may not be possible to make an prior appointment by telephone. It has been agreed that the following steps will be taken in such cases when an Inspector has been unable to make an appointment:

1 The ACMA staff will select the licensee(s) to be visited by the proximity of their station(s) to other work in an area;

2 The ACMA staff will ascertain the age of each licensee to be visited;

3 If the licensee is aged under 18, contact shall be made through a parent or guardian or other adult;

4 Upon arrival, the Inspector shall identify himself and display his or her identification card. The WIA advises that the licensee should note the name(s) of the Inspector(s);

5 The Inspector shall request permission to enter and to inspect the station. If it is not convenient to do so the inspector should advise the licensee that the inspection may take place at another time more convenient to both the ACMA and the licensee.

6 The ACMA staff shall always ensure that if the licensee is aged under 18 any inspection is carried out at all times in the presence of a parent or guardian or other adult.

7 The licensee shall assist the Inspector in the conduct of the inspection and possible testing of equipment.

The agreed statement ends with the following:
It is expected that ACMA staff and Amateur operators will work co-operatively in accordance with the above procedure and always bear in mind the individual rights of the licensee.

Please read the full statement on the WIA website, http://www.wia.org.au

Hello everyone, Merry Christmas from the members of the Central Coast Amateur Radio Club.

I'm Rod, VK2FVRJ.

Well, It's just 70 days until the Central Coast Amateur Radio Club (CCARC) Field Day at Wyong, Sunday 26th February 2012.

The largest Amateur Radio gathering in the Southern hemisphere.

Each year the Central Coast Amateur Radio Club plays host to Australia's leading suppliers of amateur radio and electronic equipment, as well as over 1500 amateur radio enthusiasts looking for that elusive Field Day bargain.

So, don't forget to mark the date on your calendar, save those pennies and we'll see you at Amateur Radio's Big Day Out in 2012

For further information, please go to the Field Day website,
http://www.fieldday.org.au

or Central Coast Amateur Radio Club
http://www.ccarc.org.au

Once again, the Central Coast amateur Radio club wishes all amateur radio operators and their families, a very merry Christmas and a safe and Happy New Year.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

>From time to time there are issues which come up in our families, our workplaces and our clubs. These can start out as seemingly simple ideas but they can spark a gut reaction which raises the heat above normal.

Part of the process of moving along our club activities is getting people to follow common goals. This can be running a club station in a contest, having a project to build or even arranging a get together for members and their families. There are so many opportunities for group activities in amateur radio.

Part of the trick is to choose activities that will keep the bulk of members involved and excited. The other part of the trick is not to be limited by the will of one or a small group in the club. For club life to work, just as for our personal life to work, we must be prepared to compromise and accept compromise.

When we make our choices is the time for clear heads and cool thoughts and like in fox hunting, it is when we can properly get red-faced and excited in completing the project.

I'm Geoff Emery and that's what I think....how about you?

TARC Xmas Lights Tour

Get out your Santa Hats, flashy pins and glad rags and get ready for a magical mystery tour of the light fantastic in Townsville!

Particularly if you are travelling through the area make contact on the RAT repeater system now because the world famous TARC Xmas Lights Tour is on again, happening Friday evening December 23rd.

It's a Drive Yourself Dazzling Spectacular and all mobile shack chariots will need to monitor 146.5MHz during the tour to hear instructions from Santa's guide vehicle.

Embarkation point will be at the Picnic Tables and Playground, northern end of The Domain before the 6pm departure time.

Contact Gavin VK4ZZ on mobile 0427 182469 or on email vk4zz@wia.org.au or via VK4RAT.

DISCUSSION POINT

What use is an f-call?

In 1905 George Santayana said: "Those who cannot remember the past are condemned to repeat it."

If you're new to Amateur Radio like me, you don't remember the past because you don't know it. While I could dig up the history going back to 1900 or so, I'll encourage you instead to let your fingers do that walking and read that on the Internet yourself. One particularly interesting document I stumbled on is called "History of Radio call-signs in Australia", a must read.

Having just received my foundation license, I was unaware how recent the development of an f-call actually is. In May 2004 the ACMA published a report on the "Outcomes of the Review of Amateur Service Regulation" which among many outcomes recommended the introduction of an entry-level licensing option in Australia, similar to the foundation license in the UK.

The submissions at the
time, over two-thirds in favour of a foundation licensing option, cited the need

to make the amateur service more accessible to potential amateurs. There were other outcomes which you can read online.

On 21 October 2005 the ACMA issued the first Foundation Licence, VK4FRST to Amanda who still holds that license today.

In 2005, the Foundation license
looked slightly different to what it does today. At the time, you were permitted 3 Watts for FM, AM and CW broadcasts and 10 Watts for SSB. This changed on the 3rd of February 2006 when the ACMA notified the WIA that 10 Watts was allowed on all permitted emission modes for a Foundation License.

Now I was never going to be giving you a history lesson, you knew that from the start. What I was trying to point out is that the privileges we enjoy today come from a background of development, driven by Amateurs, like yourself, asking questions and making recommendations. It comes from input from the
Wireless Institute of Australia, it comes from developments overseas.

Next time you key your microphone, think about what went before, and if you're not sure, spend an hour online and have a read. I'm sure you'll find things you didn't know. Perhaps you'll be inspired to write down and document some of your own achievements.

One thing's for certain. If it's not written down, it didn't
happen and if that's the case, no-one will know if they're repeating the same lesson you just learnt.

I'm Onno, vk6flab

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART AR Victoria and the WW sources of the WIA.

NOMINATION DEADLINE APPROACHING FOR ARRL INTERNATIONAL HUMANITARIAN AWARD

The deadline to nominate an amateur or group of amateurs for the 2011 ARRL International Humanitarian Award is coming up -- December 31, 2011. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

As one of the few telecommunication services that allows people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries.

The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need.

IC chip inventors birthday

We celebrate the birthday of the late Robert Norton Noyce, nicknamed "the Mayor of Silicon Valley", who co-founded Fairchild Semiconductors and along with Jack Kilby invented the integrated circuit.

While in college his physics professor got hold of two of the very first transistors out of Bell Laboratories and Noyce was hooked.

The field was so young that when Noyce went to MIT in 1948 he knew more about transistors than many of his professors.

His first job was as a research engineer, he then joined the Shockley Semiconductor Laboratory and later co-founded Fairchild Semiconductors. Noyce and Gordon Moore founded Intel in 1968 when they left Fairchild and it became a market leader.

The integrated circuit was one of the stepping stones toward what he take for granted today, the ubiquitous microprocessor.

Noyce was born on December 12, 1927 and died in 1990 at the age of 62. He was looked up to as a father-figure to an entire generation of entrepreneurs and gave the Silicon Valley its name.

==========

NEWS FROM ARNEWSLINE USA

FCC GRANTS SECONDARY SERVICE ALLOCATION TO WIRELESS BROADBAND MEDICAL MICROPOWER NETWORKS

Ham radio will soon be sharing the 70 centimetre band with micro-power medical devices in the USA.

At its regular meeting on Wednesday, November 30,
the four-member FCC Commission unanimously agreed
to allocate spectrum and adopt service and
technical rules for the utilization of new
implanted medical devices that operate on 413 to
457 MHz spectrum. These devices will be used on a
secondary basis as part of the Medical Data
Radiocommunication Service in Part 95 of the FCC rules.

According to the FCC, these devices would greatly
expand the use of functional electric stimulation
to restore sensation, mobility and function to
those persons with paralysed limbs and organs;
they would be implanted in a patient and function
as wireless broadband medical micro power networks or MMN's.

These new rules are the result of a Notice of
Proposed Rule Making that the FCC released in
March 2009. A Report & Order that will define
these new rules is expected soon.

As hams already know, the Amateur Radio Service
in the United States also has a secondary

allocation on the 70 cm band from 430 to 450
MHz While it's unlikely that these flea power
devices will bother very many radio amateurs, its
unknown what affect ham radio will have on the
ability of these devices to share spectrum with
hams or any other users of the entire 413 to 457
MHz 70 centimetre allocation.

June 9-10 VK Shires Contest.

June 25 VK/trans-Tasman Contest 160metres SSB

July First full weekend NZART Memorial Contest

August 11-12 VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

IRTS will be celebrating its 80th anniversary next year. Details of a worldwide
contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012
have just been announced.
Full rules and information are available at www.irts.ie/cqir or by email to
cqir@irts.ie

ROUND UP THOSE CW QSOS IN THE ARRL CW ROOKIE ROUNDUP

The ARRL's Rookie Roundup comes around again on Sunday, December 18.
This time, the focus is on CW operation. The Rookie Roundup is an
on-the air event is designed to help newly licensed amateurs build
their HF and 6 meter operating skills. Similar to the ARRL Novice
Roundup that ran from 1952 until 1995, the Rookie Roundup combines a
competitive event with some on-the-air training, bringing fun and
Elmering into the 21st century. Three Rookie Roundups -- SSB, RTTY and
CW -- are held each calendar year: The CW running of the Rookie Roundup
will take place Sunday, December 18 from 1800-2359 UTC. Read more here
http://www.arrl.org/news/round-up-those-cw-qsos-in-the-arrl-cw-rookie-roundup

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

KH0UY and KH0K will be operational from Saipan in the Northern Mariana Islands
between January 7th to the 10th. Their activity will be on 80 through 6 meters,
plus the satellites.
QSL via their home call signs of JO3FRH and JE4SMQ.

HB9IQB, has been granted a license by the Ministry of Telecommunications & Technology in Ramallah, and plans to be active as E44PM.

Operations will last for 7 days from December 6.

He announced this past week, "Taking into consideration the many E-mails from SSB Ops, I will try to spend not less than 20% of the time in that mode. CW will be my main mode."

For more details and updates, visit

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking about the matter of our Sunday News broadcasts.

I would like to offer my deep appreciation to all who make it possible. The correspondents, the rebroadcasters and clubs who keep the news coming. Especially I thank our inveterate News Editor, Graham, VK4BB who with his support crew spend many volunteer hours on making it happen. Home life and work manage to allow our broadcast team to follow the Amateurs code, somehow keeping life in balance.

Many thanks to you all and to our listeners - may you enjoy the best festive season offerings and all the New Year can offer.

I'm Geoff VK4ZPP and that's what I think....how about you?

ANNUAL NEW YEAR BREAK FOR VK2BWI BROADCASTS

The VK2BWI slow morse practice broadcasts, heard weekly on thursday evenings at 2000 hours local time, on 3.550 MHz, will be taking a break over the new year.

The last broadcast for 2011 will be on Thursday the 22nd of December. Broadcasts will resume on Thursday the 2nd of February 2012.

Ross VK2ER and Geoff VK2BGP would like to thank listeners for their support and interest throughout the year. Call-backs remained more or less constant in number and were always much appreciated.

NEW VERSION OF ROS RELEASED

A new version of ROS data software has released by author Jos&#65533; Alberto Nieto Ros, EA5HVK. The updates include improved performance for High Frequency N-V-I-S communications.

Also, as of December 1st the code structure of ROS HF was changed in order to support mid to low band NVIS propagation. Versions prior to 6.8.4 will be incompatible with the latest version.

There is no change to the Medium Frequency and E-M-E modes.

You can download the new version of ROS from
rosmodem.wordpress.com/2011/01/10/ros-2

HAM RADIO IN SPACE: ISS SHADOW BEACON EXPERIMENT POSTPONED

The recently announced Plasma Thrust space
"Shadow-beacon" experiment using amateur radio
has been postponed until after the delivery of a
new rig next April. This, because of a problem
with the current gear on-board the orbiting outpost.

Sergey Samburov RV3DR, of the Russian space
corporation "Energia" is among those responsible
for amateur radio operations from the ISS. He
says that the onboard radio was self-switched
onto the standard simplex frequency of145.825 MHz
instead of the required duplex 144.360 / 145.825
MHz digipeater mode because of the old age of the
gear. It has been in use more than 10 years.

Samburov says that a new radio is planned to be
delivered to the ISS by cargo vehicle in
April. Because of this, Mission Control Centre
plans to hold the "Shadow-beacon" sessions in May
or June of 2012.

(ARNewsLine)

REWIND

PYE - Calling V.H.F.

A 1955 instructional film, produced by the Cambridge based Pye Telecommunications for sales engineers on V.H.F. communications equipment and how to sell it.

Stephen Jack describes how V.H.F. communications can benefit the police, ambulances and taxis and factories. He explains three classes of prospect, those who know V.H.F. and want it, those who know but think they don't want it and those who don't yet know. The salesman must convince their customers of the economics of V.H.F. communications and how the scheme is worthwhile to them.

Pye was an electronics company founded in Cambridge, and has been known as Pye Radio Works Ltd, Pye Ltd, Pye Telecommunications, Philips Radio Communications Systems (PRCS), Philips Telecom-PMR and Simoco International Ltd.

It was founded in 1896 by William George Pye, an employee of the Cavendish Laboratory, and manufactured instruments that were used for teaching and research Pye Communications Ltd division was formed in February 1944, where it designed and produced radio communications equipment when the war ended.

This company developed and grew into the leading UK producer of mobile radio equipment for commercial, business, industrial, police and government purposes.

SOCIAL SCENE 2012

15TH IARU REGION 3 CONFERENCE hosted by V.A.R.C. in Ho-Chi-Minh City, Vietnam.

JAN 23-FEB 17 YEAR 2012
World Radio Conference, Geneva 23rd January TO 17th February 2012

FEB 12 VK3 CentreVictoria Hamfest, Kyneton Racecourse.

All roads will lead to the RadioFest at Kyneton less than an hour
from Melbourne, Ballarat and Bendigo.

Major traders are there, a huge area for second-hand sellers and
a club corner for displays and promotion.

The Centre Victoria RadioFest, Kyneton Racecourse is on Sunday the
12th of February.

Points are contact are:
Commercial Traders Liaison, Barry Robinson VK3PV 0428 516 001
Second hand tables are space, Ross Pittard VK3CE 0408 533 107
Club Corner Precinct, Tony Hambling VK3VTH 0423 635 152

FEB 26 VK2 CCARC WYONG FIELD DAY

APR 14-15 VK WIA National Field Day.

MAY 3-18 VK5 YL International 2012 Australia (vk5tmc@bigpond.com)

MAY 5- 6 VK4 RADAR and MARC Clairview Gathering

MAY 25-27 VK3 WIA Annual Conference Mildura

As we get ready for the Christmas break, may I remind you of the
WIA Annual Conference, to be held in Mildura on May 25, 26 and 27
next year.

I visited Mildura a couple of weeks ago, and met with Noel and
Garry from the Sunraysia Club and I am convinced it will be a
great event.

I also know many people who are planning to come, who say they
will register soon.

May I ask that if you are planning to come, you register now and
book your hotel now. That will really help us in our planning!

Also, may I remind you that the Board will be meeting in February
and we would like to plan the 2013 Annual Conference. If you club
or a group of clubs is thinking of suggesting that the WIA 2013
Annual Conference be held with your support in your interesting

area, please let us know soon and before February.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

4J, AZERBAIJAN
The very first amateur radio callsign in Azerbaijan "RA29" was issued
in Goygol (formerly known as Helenendorf) 85 years ago. The special
event stations 4J29RA and 4K29RA are celebrating this event.
QSL via 4J5T.

5V, TOGO
Arnaud,F4FOO, will appear as 5V7MA in SSB on 20m and 10m during his
spare time from Dec 19 until Jan 4. He will use a TS-450S, an IC-706
and a Hexbeam. QSL via bureau to his homecall.
See also: http://www.f4foo.com/5v7ma.htm

A6, UNITED ARAB EMIRATES
Gerry,A6/VE6LB, will be active in holiday style running 100 watts into
a G5RV antenna in CW mostly on 10m/12m from Dec 20 until Jan 10.
QSL via homecall, LoTW.
See also: http://www.telusplanet.net/public/telwest/ve6lb.htm

CE, CHILE
The special event station XR45EI is celebrating the 45th anniversary
of the newspaper "La Estrella De Iquique" until Dec 25.
QSL via CE1SZZ (Caupolican Marquez Vergara, editor since 1997).

E4, PALESTINE
Peri,HB9IQB, will show up as E44PM in CW/SSB/RTTY on 40m-10m for one
week starting on Dec 16. His equipment includes an Elecraft K2/100 with
KAT-100 and vertical antennas. QSL via homecall & LoTW.
See also: http://www.hb9iqb.ch/palestine.html

E5, SOUTH COOK ISLANDS, OC-013
Andy,AB7FS (E51AND, ZK1AND and ZK2AND), will be QRV in holiday style

signing E51AND from Arorangi Beach on Rarotonga (OC-013) from Dec 19-31
He makes slow CW with a hand key on 14050 kHz +/- QRM and you can find
him also in the ANZA net (14183 kHz on 0515 UTC).
He writes: "I am not a DXer, rather a ragchewer - so please be patient
with my operating style. I am on the air to have fun, more than working
a maximum number of contacts in a short period of time." Being a member
of the Straight Key Century Club (SKCC #7723) he is also interested in
QSOs with other club members. QSL via homecall.

PJ2, CURACAO, SA-099
Jeff,K8ND, is going to visit Curacao (SA-099, WLOTA LH-0942) for the
19th time to activate PJ2T from "Signal Point" from Dec 14-20.
He will take part in the Stew Perry 160m Contest and wants to surpass
the score of Jerry,PJ2/WB9Z, from 2005 (5059 points/385 QSOs/229 Grids)
QSL via W3HNK. See also: http://www.pj2t.org/ccc/default.htm

UR, UKRAINE
The special event station EM1000USK celebrates the millenium of the
St. Sophia Cathedral in Kiev until Jan 31, 2012. QSL via UT8UF.

V3, BELIZE
Norman,5B4AIF, will be QRV as V31NB from Placencia (at V31MD's rental
shack) in SSB from Dec 16-27. He also plans to join the upcoming
OK/OM DX RTTY Contest. Unfortunately QSL only direct via EB7DX.
See also: http://www.clublog.org/logsearch/V31NB

OPs Wanted
The 4M5DX group is still looking for operators for a DXpedition to
Aves Island (with navy transport) lasting for about 7-12 days.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Kelly,N0VD, has developped the new DX cluster DX2GO for smartphones.
See also: http://m.dx2go.com

UPCOMING CONTESTS

Dec 16: AGB Party Contest
Dec 17: OK DX RTTY Contest
Dec 17: RAC Canada Winter Contest
Dec 17/18: Croatian CW Contest
Dec 17/18: Stew Perry Topband Distance Challenge
Dec 18: RTC Party
Dec 18: QRP-ARCI Holiday Spirits Homebrew Sprint

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

US Island Award: Jerry,N1QLL, will be QRV from Little River (USI: ME096S, no IOTA) working in SSB on Dec 17/18. Preferred frequencies: 10m/15m/ 20m/40m, xx.270 +/-. QSL via homecall (bureau/direct).

SA-036, Aruba, P4: Randy,P43W, president of the Aruba Radio Club, writes that the clubstation P41HQ is active from Dec 9-31 to promote a modern amateur radio law. The P4 license is not valid even in The Netherlands and there was no amateur radio exam in the past ten years.
HAM radio is very important in this country threatened by hurricanes. Please support them and send QSLs (no dollars, IRCs, SAE, even without a QS, see also QRZ.com) with the note: "SUPPORT AMATEUR RADIO IN ARUBA" direct to: Ing. Mike de Meza, Minister of Communication, L.G. Smith Boulevard #76, Oranjestad, Aruba, West Indies

DXCC Desk clarifies Russian prefixes which count for European Russia
---
For the purposes of the DXCC and WAC awards, the following Russian prefixes
count as European Russia:
Any call with the prefixes R, RA-RZ and the numbers 1/2/3/4/5/6/7
Any call with the prefixes U, UA-UI and the numbers 1/2/3/4/5/6/7
Exception:
Prefixes R, RA-RZ, U, UA-UI with the number 2 and suffixes beginning with
F or K, count as Kaliningrad. Also, some legacy calls such as UA2CZ are in
Kaliningrad.
>From Dec 1, 2011 forward, any QSO (with any date) with stations using the
following prefixes, count for European Russia:

Any call with the prefixes R, RA-RZ, U, UA-UI and the numbers 8 and 9,
followed by a suffix beginning with the letters F, G or X (Perm and Komi).
Since Russia joined CEPT, there are stations active with call signs that do
not indicate DXCC entity. These types of portable call signs will be managed
individually in the DXCC system.
Note: The prefix U5 was issued to WWII veterans in the Ukraine.

Maximum power in New Zealand increased

Don Wallace,ZL2TLL, writes on the website of the New Zealand amateur radio
clubs NZART that the "Radio Frequency Management" of the Ministry of
Economic Development in New Zealand increased the maximum power allowed
from 500 watts to 1 kW.
The Wireless Institute of Australia (WIA) is negotiating with the Australian
Communications and Media Authority (ACMA) to increase the power in Australia
as well. The club has filed a new petition to ACMA with a copy of the
New Zealand regulations.

Many thanks for contributing to this issue of the DXNL are going to:

VIA Geoff Bawden, VE4BAW:

SASKATCHEWAN is Missing! Act Quickly. The RAC Winter Day contest is
December 17, 0000 to 2359 UTC.

The great province of Saskatchewan is missing from the RAC Winter Day
contest! Traditionally VE5RAC is on the air twice a year for both the
Canada Day and Winter Day Contest but is absent this weekend. Unless
you VE5s can help.

Is there an HF qualified, RAC member out there that would like the fun
of being VE5RAC? International contacts [outside Canada] are worth 2
points, Canadian contacts are worth 10 points and an official RAC
station [VE5RAC] is worth 20 points! You will be on the right side of
the pile-up!

You can have one or there can be many operators. The rules are
available at the RAC website: www.rac.ca .

http://www.rac.ca/en/rac/programmes/contests/files/2011%20Canada%20Day%20Rules%20-%20English.pdf

will get you the rules,

http://www.rac.ca/en/rac/programmes/contests/files/RAC%20Contest%20Software.ZIP

will get you the logging software and
http://www.rac.ca/service/contesting/files/RAC%20Contest%20Entry%20Form%20(Current%20Year).pdf will get you some forms.Everyone that I know thinks
that being a RAC operator is great fun.

Use the logging software .. it will make life easy for both the
operators and the team that analyzes the results. Send the results to
me electronically. Hay-family@shaw.ca . Send me a note if you are
interested.

Act fast!

Derek Hay VE4HAY
Mid-Western Regional Director

NZART Headquarters Infoline Special Issue 31s

16 December 2011

Headquarters: Debby says…

In my last issue of HQ Info-line I advised the next circulation date would be Friday the 6th February. Not sure what calendar I was looking at when I said this, as it should have been Friday 3rd February, with the closing date for articles on Thursday 2nd February.

HQ will be closed from Saturday 24th December until Tuesday 10th January.

A Ham’s Night Before Christmas
Just in time for the Christmas season, Gary, KN4AQ, has created a video version of Clement Clark Moore's poem The Night Before Christmas. But Gary’s version has a decidedly amateur radio twist. Entitled A Ham's Night Before Christmas, it features QST magazine covers and Christmas-themed advertisements from days gone by. You can see the video at www.tinyurl.com/KN4AQ-Night-Before-Christmas

This is well worth watching and much fun, thanks Gary, RSGB and GB2RS.

Winner of the Icom T82 Handheld

Last week an Icom T82 Handheld was presented to John Moore at the Branch 30 Clubrooms at the end of the Branch AGM

The Handheld was presented by Councillor Terry Thomas ZL4TAE, to John who won the draw for payment of NZART Subs by 30 Nov 2011

A message from our ALO Don Wallace ZL2TLL

Proposed Changes Affecting the 130 to 190 kHz Amateur Band

Members may recall that the ALO asked for input regarding the MED's proposal to increase the allowable power for short range devices in the 9-190 kHz band.

Based on input from members, the following submission has been sent to the MED:

Thank you for the opportunity to comment on your proposal to increase the permitted power for short range devices in the 9-190 kHz band.

As you will be aware, the only part of the proposal that affects Amateurs is the proposed increase in power from -20 dBW (43 dBµA/m

@10m) to 3 dBW (66 dBµA/m @10m) over the sub-band 130 - 135 kHz.

After considering your proposal, we have formed the view that the proposed 23 dB increase in allowed radiated power for short range devices (which we believe are primarily used for livestock and companion animal RFID devices) will have no material effect on reception on the 130 - 190 kHz Amateur band.

We would, however, like to stress that this is based on the assumption that LF short range devices:

• will continue to be type approved and

• will not be modified by the end-user.

We are aware that it is very easy for end-users to tinker with such devices in the mistaken belief of improving performance or saving money - to the detriment of the carefully designed radiation performance. We would recommend that any agreement to increase the power is given subject to suppliers being required to include a warning of the dangers of modifying the devices with each device they supply - maybe via a warning in the instructions and the advertising for the devices.

Subject to a satisfactory mechanism for communicating the dangers of modification being put in place, NZART has no objection to the proposed increase in power.

Don Wallace

NZART Administration Liaison Officer.

year!

==> + HAM RADIO IN HOLLYWOOD: COMEDIAN TIM ALLEN STARS AS RADIO AMATEUR
ON NEW TV SHOW
```

Tim Allen -- star of Home Improvement, Toy Story, The Santa Clause and Galaxy Quest, just to name a few -- stars in Last Man Standing, an ABC comedy airing at 8 PM (EST) on Tuesday nights. Allen plays Mike Baxter, KA0XTT, a married father of three and the director of marketing at an outdoor sporting goods store in Colorado whose life is dominated by women. While Amateur Radio has not been prominently featured in the first episodes, according to John Amodeo, NN6JA -- the producer of Last Man Standing -- it is a part of the show and an important part of Mike's character. At press time, the episode that will establish Mike as a radio amateur is scheduled to air mid-January.

"Tim's character Mike is involved in creating the sales strategy for the store, including their catalog and Internet identity," Amodeo told the ARRL. "The store is like Bass Pro Shops or Cabelas. There is a strong self-sufficiency overtone to Mike's approach to life. Ham radio fits in the story as a means of emergency communication. It's not directly featured in the foreground story, but at the moment, it's a background element on the home set. Once I allow something to be put on the set, there's a chance the writers will feature it. Now that we have actually established Mike Baxter as KA0XTT, we can do more things featuring Amateur Radio." Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-comedian-tim-allen-stars-as-radio-amateur-on-new-tv-show>.

==> + DISTRACTED DRIVING: NTSB URGES STATES TO BAN CELL PHONE USE BY DRIVERS

On Tuesday, December 13, the National Transportation Safety Board (NTSB) recommended that States ban the nonemergency use of all cellular telephones and other "portable electronic devices" (PEDs) by drivers of motor vehicles. This would include hands-free cell phone operation and all text messaging while mobile. While this NTSB recommendation has been the lead story in national media, the "distracted driving" issue has been receiving serious attention for several years. A number of states and municipalities have prohibited texting and handheld cellular telephone use by all or some drivers, though none has gone so far as to outlaw all hands-free cell phone use. To avoid unintended consequences to Amateur Radio operation, the ARRL has been closely involved with this issue for several years. The full text of the NTSB report is not yet available, and it is not yet known whether the broad term "portable electronic devices" might be construed as including all or some Amateur Radio equipment.

On January 30, 2009, the Executive Committee of the ARRL Board of Directors approved and released an ARRL position paper on Mobile Amateur Radio Operation. In that paper, the ARRL encourages licensees to conduct Amateur Radio communications from motor vehicles in a manner that does not detract from the safe and attentive operation of a motor vehicle at all times, but points out that mobile two-way radio equipment has been in use for at least 70 years and is quite dissimilar from full-duplex cell phones. Read more here <http://www.arrl.org/news/ntsb-urges-states-to-ban-cell-phone-use-by-drivers>

.

==> + LEGISLATIVE NEWS: HOUSE-PASSED PAYROLL TAX BILL INCLUDES AMATEUR RADIO STUDY

The Middle Class Tax Relief and Job Creation Act of 2011 (HR 3630) -- the bill to extend the payroll tax reduction that passed the US House of Representatives on Tuesday, December 13 -- includes among its many other provisions the "Jumpstarting Opportunity with Broadband Spectrum Act" or "JOBS Act" that passed the Communications and Technology Subcommittee on December 1. The JOBS Act makes up Title IV of HR 3630. Read more here <http://www.arrl.org/news/house-passed-payroll-tax-bill-includes-amateur-radio-study>.

==> + ON THE AIR: NEW RULES FOR 60 METERS HAVE YET TO TAKE EFFECT

Last month, the FCC released <http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters> a Report & Order (R&O) detailing new rules for the 5 MHz (60 meters) Amateur Radio band. These rules have not been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. Any radio amateur who is operating under the new rules before this time is in violation of the current rules. The official date for these new rules will be announced on the ARRL website as soon as the information is available.

==> + HAM RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES GRANT FUNDING FOR TWO SCHOOLS

Earlier this month, the ARRL Executive Committee reviewed grant applications <http://www.arrl.org/etp-grants> for the ARRL's Education & Technology Program (ETP <http://www.arrl.org/education-technology-program>), awarding instructional resources valued at nearly $2000 to two schools. More than 525 schools across the country <http://www.arrl.org/etp-schools> have received support from the ETP in the form of equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology <http://www.arrl.org/teachers-institute-on-wireless-technology>. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1.

A central goal of the ETP is to develop a foundation of wireless technology literacy <http://www.arrl.org/what-is-wireless-technology-literacy> among America's teachers and students. It employs Amateur Radio to explore radio science and electronics and provide hands-on activities that engage students' minds and imaginations, opening doorways into math, science and technology curriculum topics, as well as other core curriculum areas such as geography and language arts. Read more here

<http://www.arrl.org/news/arrl-executive-committee-approves-grant-funding-for
-two-schools>.

==> DEADLINE APPROACHING FOR HAMS TO RECOMMEND UPDATES TO MICROWAVE
BAND PLAN

Attention microwavers! An ARRL Ad Hoc Committee has been tasked by the
Board of Directors with recommending updates to the ARRL band plans for
the amateur bands between 902 MHz and 3.5 GHz. If you are now active on
any of these bands or are developing plans to do so, the committee
would like to hear from you by Thursday, December 15.

The band plans for these bands may be found here
<http://www.arrl.org/band-plan-1>:

- 902-928 MHz
- 1240-1300 MHz
- 2300-2310 and 2390-2450 MHz
- 3300-3500 MHz

You can find additional background and a form for submitting
information here
<http://www.arrl.org/news/arrl-committee-seeks-microwave-band-plan-input>.

==> THE DOCTOR IS IN: GROUND CONDUCTIVITY AND RADIATION ELEVATION
PATTERNS

Stan Korzep, W8NNX, of Orlando, Florida, was wondering that if he
improved his ground conductivity, would he also improve his radiation
elevation pattern? With this in mind, he wrote to the Doctor: Late last
night as I pondered why -- with 10 meters so hot -- I was not working
any DX stations in the Asia Pacific region. My first thought was that
the competition was too great. I still use the three element trap Yagi
that was on my tower in the 1980s when I had much better luck. Thanks
to my power company, I have a far field noise source that allows a
pretty good check of antenna pattern, F/B and the ability to determine
if there is a gain compared to my other antennas. With a pretty good
SWR, and greater than 20 dB F/B, I believe that the tribander has
survived three hurricanes and two decades of use quite well.

I seem to recall a QST article ["The Antenna Elevation Pattern --
What's the Big Deal? <http://p1k.arrl.org/pubs_archive/137004>" Mar
2010, pages 39-40] that noted that the elevation angle of maximum
radiation was largely determined by the antenna's height. I wonder if
this might be a factor in my lack of success. Since my antenna is
limited to 24 feet by homeowners and county rules, the installation has
not changed in 32 years -- only the results have deteriorated. The
decline in the rainfall over the two decades here at my location (I
maintain two rain gauges in the back yard) may have changed the
apparent ground.

The ground beneath my house and antenna is what the locals call "sugar
sand," one step up from beach sand. Its ability to provide a good

ground is akin to pure distilled water. I read some time ago about the relationship of soil fertility, carbon and soil conductivity. Will improving my ground conductivity improve my radiation elevation pattern? Your thoughts would be appreciated.

Here's what the Doctor had to say:

A better ground will certainly change the elevation contour of your antennas due to reflections -- in phase for vertical antennas (reinforcing the low angle radiation) and out of phase with horizontal (tending to cancel the lowest angles); however, the major impact will occur at some distance from the antenna. The exception is for vertical antennas that use the Earth as part of their ground system -- their efficiency will improve with better conductivity near the base -- independent of the reflection part of the equation.

Your height of 24 feet is interesting for a tribander. That is about 0.35 wavelengths on 20 meters, just above 0.5 wavelengths on 15 and about 0.7 wavelengths on 10 meters. Over EZNEC's "Typical ground" (0.005 S/m conductivity, dielectric constant of 13), that gives the results in Table 1 below on the 10 and 20 meter bands based on my model of a similar tri-bander.

Band (Meters)

Peak Elevation (degrees)

Gain at Peak (dBi)

Gain at 5 degrees (dBi)

Gain at 10 degrees (dBi)

20

35

8.2

1.7

10

20

11.9

4.2

9.3

Table 1: Peak Gain and Gain at Elevation Angles for a 24 foot High Yagi over EZNEC "Typical" Ground

The results for 15 meters will be in between. If your ground is less conductive, it will actually be better (less cancellation at low angles); however, you will not get as much reinforcement at the peak angle at which the reflection is in phase. The extreme would be the "free space" case in which there is no ground at all. There the peak is at the horizon and you have the results shown in Table 2 below.

Band (Meters)

Peak Elevation (degrees)

Gain at Peak (dBi)

Gain at 5 degrees (dBi)

Gain at 10 degrees (dBi)

20

0

4.7

4.6

4.7

10

0

6.9

6.9

6.9

Table 2: Peak Gain and Gain at Elevation Angles for a 24 foot High Yagi in Free Space

Thus, with a low horizontal antenna, the long haul performance will be better with a poor ground than with one of high conductivity. This will change as the antenna gets high enough so that the angle of peak gain gets close to the optimum angle for the distance you want to work. This angle will be quite small for few hops to the Pacific -- typically a 6000 to 10,000 mile path. As seen in Figure 1, even at 5 degrees elevation, it will take two to four hops to get there. Again, this is not the ground directly under the antenna, but the ground from which the reflection takes place, some distance away. The higher the antenna is, the further the distance to the ground that will reinforce the peak of the elevation pattern.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <http://groups.yahoo.com/group/AlleghenyValleyRadio/post?postID=zpPOqQ_tDRUgz8PtrOLu7ReN8SebO3NBKYSpUQMK52ADP9llBYDxeNcBsVrABCPPnXowtP8cnIt4> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone

calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + AMATEUR RADIO BALLOON FLIGHT CROSSES ATLANTIC, SETS RECORDS

<http://www.arrl.org/images/view/News/CNSP_Track.jpg> Ron Meadows, K6RPT, and his son Lee -- leaders of the California Near Space Project -- successfully launched an Amateur Radio high altitude balloon from San Jose, California on Sunday, December 11 at 4:43 PM PST. The balloon reached a cruise altitude between 105,000 and 115,000 feet, where it continued its travel across the United States, the Atlantic Ocean and Spain and into the Mediterranean Sea. For most of its trip, the balloon traveled at about 150 miles per hour and eventually covered 6236 great circle miles in just 57 hours 2 minutes. According to the CNSP, this is a new Amateur Radio balloon flight record for both distance and duration. Read more here <http://www.arrl.org/news/amateur-radio-balloon-flight-crosses-atlantic-sets-records>.

==> HINTS AND KINKS: FOAM PCB HOLDER

Paul Jacobs, W2IOG, of Naples, New York, sent us this idea for assembling small PC boards. Contact Paul via e-mail <phjacobs@gmail.com> for more information.

Here's a simple fixture that makes assembling small PC boards a snap. A scrap piece of 1/4 inch aluminum sheet forms a base for the fixture. Mount two 1-inch standoffs about 1/2 inch farther apart than the longest dimension of the PC board to be assembled. Now cut a piece of 1 inch thick soft foam packing material to slightly larger than the size of the board so that it fits snugly between the standoffs. Mount two crimp type insulated wire terminals to the standoffs; keep the screws slightly loose.

To use the fixture, insert several components into the board, turn both the board and the fixture vertical, press the component side of the board to the foam and return both to the horizontal position. Press down on the board to compress the foam and rotate the two wire terminals to hold the board in place. The weight of the fixture keeps the board in place and the pressure of the foam holds the components firmly to the surface of the board. Soldering them in place is easy.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint in QST or The ARRL Letter, you will receive $20. Send your hints via e-mail to h&k(at)arrl(dot)org or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> + ARRL HEADQUARTERS TO CLOSE FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Monday, December 26 and Monday, January 2 in observance of Christmas and New Year's Day. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, December 22 and 29; both the Letter and Audio News will return on January 5, 2012. We wish everyone a safe and joyful holiday season and a prosperous 2012.

==> SOLAR UPDATE

Tad "Sunshine, go away today <http://www.youtube.com/watch?v=tT6VMQI8PrE>" Cook, K7RA, reports: Solar activity dropped this week, with the average daily sunspot numbers declining more than 39 points to 94.7. It's been 13 weeks since the average daily sunspot number for the week was that low or lower, when we reported an average of 91.7 in the September 16 edition of the Solar Update <http://www.arrl.org/news/the-k7ra-solar-update-182>. The latest USAF/NOAA forecast has the solar flux for December 15-17 at 130, 128 and 126, then 125 on December 18-22, then 150 on December 23-26, 140 on December 27-28, and then 145 on December 29-January 4. The predicted planetary A index is 8 on December 15, 5 on December 16-25, and 8 on December 26-29. Geophysical Institute Prague predicts quiet conditions December 16-18, quiet to unsettled December 19, unsettled December 20 and quiet December 21-22. Look for more information on the ARRL website on Friday, December 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Jonathan Edwards' Sunshine (Go Away Today) <http://en.wikipedia.org/wiki/Sunshine_%28Go_Away_Today%29>.

==> + ARRL WARNS MEMBERS TO BE AWARE OF E-MAIL SCAMS

Many ARRL members with arrl.net e-mail accounts have recently received bogus e-mails in a "phishing <http://en.wikipedia.org/wiki/Phishing>" attack. These are scams designed to scare people into e-mailing back personal information -- such as user names and passwords -- to the scammer at an unknown address. This particular attack was more sophisticated than usual, but far from unique.

"There is never a time when we would ask via e-mail for user names and passwords of arrl.net users," explained ARRL IT Manager Michael Keane, K1MK. "There is simply no need to ever do so. If you receive an e-mail asking for personal information and it looks like it originated from ARRL, please do not respond. The best thing you can do when receiving bogus e-mails is to simply add it to the spam list in your computer's e-mail program and delete it. Please don't forward it to ARRL HQ -- we will have already seen it and are already responding to it."

ARRL members -- and anyone who uses e-mail services -- should be constantly aware that e-mail is far from secure. If anyone ever asks

you for personal information via e-mail, it probably is a scam, no matter how pretty or professional their logo or graphics may appear.

==> THIS WEEK IN RADIOSPORT

This week:

- December 16 -- NCCC Sprint Ladder; Russian 160 Meter Contest; AGB-Party Contest
- December 17 -- OK DX RTTY Contest; RAC Winter Contest; Feld Hell Sprint
- December 17, 2011-January 1, 2012 -- Lighthouse Christmas Lights QSO Party
- December 17-18 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 18 -- ARRL Rookie Roundup (CW) <http://www.arrl.org/rookie-roundup>; QRP ARCI Holiday Spirits Homebrew Sprint
- December 19 -- Run for the Bacon QRP Contest

Through January 6, 2012:

- December 28 -- SKCC Sprint
- December 28-29 -- CWops Mini-CWT Test
- December 29 -- NAQCC Straight Key/Bug Sprint
- January 1 -- ARRL Straight Key Night <http://www.arrl.org/straight-key-night>; SARTG New Year RTTY Contest; AGCW Happy New Year Contest
- January 3 -- ARS Spartan Sprint
- January 6 -- NCCC Sprint Ladder

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2012 -- ARRL New York/Long Island Section Convention <http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-radio-university-2012>,
Bethpage, New York
- January 27-28, 2012 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>,
Jackson, Mississippi
- February 4, 2012 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>,
Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>,
Ladson, South Carolina

- February 10-12, 2012 -- ARRL Northern Florida Section Convention
<http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-ham
cation-1>,
Orlando, Florida
- February 17-18, 2012 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18, 2012 -- ARRL Arkansas Section Convention
<http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie,
Arkansas
- February 25, 2012 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,
South Burlington, Vermont

To find a convention or hamfest near you, click here

Amateur Radio Newsline(tm) Report 1792 - December 16 2011

Amateur Radio Newsline report number 1792 with a release date of Friday, December 16th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The National Transportation Safety Board recommends an all out ban on driving while using a cellphone; a ham radio APRS equipped balloon launched in California land in the Mediterranean Ocean; amateur radio celebrates the 50th anniversary of OSCAR One, the Russian military shows up in the 40 meter band and ham radio to become a featured player on a popular sitcom. Find out the details on Amateur Radio Newsline(tm) report number 1792 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: NTSB RECOMMENDS ACROSS THE BOARD BAN ON DRIVING WHILE USING A CELLPHONE OR TEXT MESSAGING

The National Transportation Safety Board, better known as the NTSB has called for a nationwide ban on the use of cell phones and text messaging devices while driving. If passed into law, it could also have negative ramifications on ham radio operators, CB'ers and anyone who uses any form of two-way communications from a moving vehicle. Amateur Radio Newsline's Burt Hicks, is here with the details:

--

The recommendation for a total, all-out ban on using a cell phone or texting while driving is by far the most inclusive yet issued by the National Transportation Safety Board. But at the moment, it's just that: a recommendation and nothing more.

Over the past 10 years that government agency has increasingly tried to generate laws to limit the use of all portable electronic devices while vehicles are in motion. The proposal released on Tuesday, December 13th would -- if adopted by all 50 states or at a federal level --effectively outlaw any and all non-emergency phone calls and texting by operators of every vehicle in the United States.

The law would apply to hands-free as well as hand-held units. Only devices installed in the vehicle by the manufacturer such as built-in G-P-S would still be permitted. NTSB members say the action is necessary to combat a growing safety threat posed by distracted

drivers.

And the NTSB notes that anti-cell phone laws alone will not solve the problem. Rather, they insist that such a nationwide ban must be accompanied by aggressive educational campaigns and very strict enforcement.

While the NTSB proposal is at this time only aimed at cellular telephone and texting by drivers while a vehicle is in motion, proposed laws such as this can easily grow legs. Politicians trying to ride the coat-tails of such a law could have it written as an all-encompassing umbrella regulation to cover other devices such as two-way radio gear, portable GPS receivers, or even satellite radio converters. In fact, it could include anything that the regulators feel might now or at a later date be considered a distraction to the driver. So on this one, the nation's ham radio community and its political leaders must remain vigilant.

According to the NTSB some 35 states now ban text messaging while driving; 30 states ban cell phone use by new or underage drivers and 10 ban all use of hand held cell phones by a vehicle's operator.

For the Amateur Radio Newsline, I'm Burt Hicks in Los Angeles.

--

The NTSB says that its proposal would not affect passengers' rights to use such devices. It should also be noted that the NTSB does not have the power to make laws on its own. All it can do is advise the government that regulations may be needed to keep the public safe. (Various Sources)

**

RADIO BALLOONS: TRANSATLANTIC AMATEUR RADIO BALLOON IN FLIGHT

An amateur radio balloon carrying APRS that left the United States mainland and headed across the Atlantic Ocean toward the European continent made it.

Ron Meadows, K6RPT, of the California Near Space Project launched four high-altitude balloons on at 0000 UTC on Monday, December 12th. The balloons were expected to come down somewhere in the midwest U-S but one identifying on APRS as K6RPT-11 decided to take a cruise on the jet stream.

After departing US soil over New Jersey at an altitude of 110,000 ft it crossed the Atlantic Ocean overnight, Hams in Southern Europe were asked to tune their gear to 144.390 which is the APRS channel used in the United States. They were then requested to assist in tracking K6RPT-11 on its pass over Europe.

The question at the time was where would it land. The answer came early in the morning of December 14th. At the time the balloon was out

over the Alboran Sea in the Mediterranean when APRS tracking showed it suddenly descending. The last report via EB6AOK showed it at 14,558 feet and traveling at 35 miles an hour. At that point its assumed to have fallen into the sea but not before traveling over 7,000 statute miles at well over 100,000 feet. Possibly a new record for an APRS equipped ham radio long distance balloon flight. On this point we will have to wait and see. (W6DTW, APRS.FI)

**

HAM RADIO IN SPACE: THE WORLD OF AMATEUR RADIO CELEBRATES THE 50TH ANNIVERSARY OF OSCAR 1

The world of Amateur Radio is celebrating the 50th anniversary of the orbiting of the first ever ham radio satellite known simply as OSCAR, an acronym for the words Orbiting Satellite Carrying Amateur Radio. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

For those not around back then, OSCAR, now called by many as Oscar One was carried into space at 2041 GMT, December 12th 1961. It was carried aloft by the Discoverer 36 launching vehicle from Vandenberg Air Force Base in California.

After launch the satellite went into a North-South orbit transmitting Morse on a frequency between 144.990 and 145.008. It's said to have had a tremendous signal strength on any direct, overhead pass.

Among the first to hear OSCAR One were the hams at KC4USB which was the Marie Byrd Base at the South Pole. They picked up the signal loud and clear only a few minutes after launch and this is what they heard:

--

OSCAR-1 Audio clip

--

Yes, just above the noise a radio amateur or SWL with a fairly decent receiver with a good 2 meter converter could make out the letters H and I that formed the word "hi." And soon the signal was heard by hams in Kodiak, Alaska and by KH6UK in Hawaii. All of these on OSCAR's first pass. The ARRL headquarters' station W1AW heard the first pass on the United States East coast.

Now, in celebration of the 50th anniversary of the orbiting of the OSCAR One ham satellite, AMSAT North America is re-issuing the original Project OSCAR Newsletters. According to AMSAT, the original OSCAR Newsletters were all hand typed back in 1961. Don Ferguson, KD6IRE has scanned these documents announcing OSCAR 1. They are being re-issued via the Amsat News Service bulletins on-line.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

Thanks to the efforts of AMSAT and especially KD6IRE 21st century hams world wide can read the story of the bird that opened the door to space communications to amateur radio operators around the globe. (Story material and OSCAR 1 audio courtesy of AMSAT)

**

INTRUDER WATCH: RUSSIAN MILITARY OFDM OPERATING ON 40 METERS

The IARU Monitoring System newsletter reports that the Russian military have been transmitting on 7000.8 kHz using OFDM 112 coding. The transmitter generating the unwanted noise appears to be located near the city of Severomorsk.

But Russia is not alone on the 40 meter band. The IARU also notes that Chinese Over the Horizon Radar has turned up several times on 7 MHz in the evening hours. It sometimes occupies as much as 280 kHz of spectrum and has been heard up to 7040 kHz using the well known sweep rate of 43.5 sweeps per second.

Needless to say, hams who DX near the low end of 40 meters would like to see these operations gone from the airwaves. (IARUMS)

**

RESCUE RADIO: VERIZON SENDS TEST ALERT WITH LABELING IT AS A TEST

A snafu by Verizon Wireless sent a very authentic looking but false emergency alert message to its customers in parts of New Jersey on Monday, December 12th. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

The alert to subscribers in Middlesex, Monmouth and Ocean county New Jersey told of a "civil emergency" and advised people to "take shelter now." Only there was no emergency.

According to news reports the message was meant to be a test but it wasn't labeled as such. Verizon later admitted the mistake but not before some of its network users started contacting a variety of local, county and state emergency response agencies. This to express their concerns and ask what the emergency was. At airtime its not known as to how many called in and to what agencies.

It took about an hour and a half for New Jersey State Homeland Security and emergency management offices to respond by posting to Twitter that no emergency existed. Later in an e-mail an unnamed Verizon spokesman said the company apologized for any inconvenience or concern that the erroneous message caused.

For the Amateur Radio Newsline. I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Verizon didn't say why the message was sent without being labeled as a test or whether the incident was the first time such a mistake had occurred. (CGC, Published News Reports)

PUBLIC RELATIONS: HAM RADIO TO BE FEATURED PLAYER ON LAST MAN STANDING

Ham radio is coming to network television. This as a part of the plot of the ABC situation comedy "Last Man Standing."

On the show, actor and comedian Tim Allen of Home Improvement fame plays the character of Mike Baxter. Baxter is the married father of three and the director of marketing at an outdoor sporting goods store in Colorado.

Amateur radio will come into play on the show in mid-January when its revealed that Mike Baxter is an avid radio amateur with the callsign KA0XTT. But that's not the only ham radio connection to the show.

Last Man Standing is being produced for ABC Television by John Amodeo, NN6JA. And if you pick up the December edition of CQ Magazine and turn to page 30, you will find an article by Amodeo. One that tells the story of how he challenged his staff to become licensed radio amateurs, and out of those who accepted seven have gotten licensed so far. The reward for those who succeeded was a dual band hand-held radio.

As of this report Tim Allen is not among those who have accepted John Amodeo's challenge, but he tells CQ that he is working on him.

In addition to the CQ article the ARRL has a very nice piece about Last Man Standing and how it got involved in helping Amodeo to create the KA0XTT call sign. You can read that on the news pages at www.arrl.org. (CQ, ARRL PR Reflector)

**

RADIO TO SPACE: SPACEX APPLIES FOR STA FOR DRAGON MISSION TO THE ISS

Space Exploration Technologies, better known as SpaceX, has submitted an application for Special Temporary Authority to the FCC. This for

use of frequencies in the 400 MHz and 2200 MHz bands under the callsign WF9XGI for its upcoming Dragon space transport systems first flight to the International Space Station.

The stated purpose to use these frequencies is that of communicating with and controlling its first unmanned Dragon space transport flight to rendezvous with the International Space Station. SpaceX says that the purpose of this operation is to demonstrate a low-cost, commercial capability to transport cargo to the I-S-S and return it safely to the Earth.

The current mission profile calls for launch of the capsule from Cape Canaveral into Low Earth Orbit, followed by proximity operations near the ISS and then docking with orbital outpost. The second phase of the mission will be undocking, performing de-orbit maneuvers, re-entry, and splash-down in the Pacific Ocean.

The scheduled launch readiness date for this mission is currently December 19th. More about it is on-line at www.spacex.com/updates.php (FCC)

**

ENFORCEMENT: LOUISIANA STATION FINED FOR FAILURE TO RENEW ITS LICENSE FOR 8 YEARS

A Louisiana broadcast station whose license expired nearly eight years ago but that stayed on the air has been hit with a $13,000 fine. R&M Broadcasting is being allowed to keep KJCB in the city of Lafayette in operation, but the FCC says it must pay the forfeiture after the regulatory agency found that the station response to the original citation by its sending Salesmen Performance Reports was insufficient to document hardship and inability to pay.

According to the Commission R&M was supposed to submit its license renewal back on February 1, 2004. Six years later in April 2010, the Commission mailed a letter about the expired license. In its reply the station claimed both financial hardship and that it was misinformed by its engineer regarding the renewal process.

In issuing its December 5th decision the FCC gave R&M Broadcasting the customary 30 days to pay or to file an appeal. More on this one is on-line at tinyurl.com/7ozfxa6. (FCC)

**

RADIO LAW FOLLOW-UP: LIGHTSQUAED VS CONGRESS COULD HOLD UP APPROVAL OF NEW FCC COMMISSIONERS

The ongoing saga of LightSquared versus the U.S. congress has reached a new level. This with Iowa Senator Charles Grassley pledging to block the nominations of Jessica Rosenworcel and Ajit Pai as FCC Commissioners. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the rest of the story:

--

Senator Grassley's says that his decision has nothing to do with the qualifications of the nominees. Rather he is using it as a tool to challenge the FCC's refusal to turn over to him documents related to the waiver the FCC granted to LightSquared to launch a terrestrial wireless broadband network using satellite spectrum.

As previously reported, FCC approval of the LightSquared service is conditional on it not interfering with the Global Positioning System operating in adjacent spectrum. This is an issue that LightSquared is currently trying to resolve so that its wholesale wireless service can be launched.

Senator Grassley says that he is concerned about the impact to GPS by the proposed LightSquared system. He wants to be certain that broadband deployment does not cause interference issues to the Global Positioning System and he will do all in his power to protect it.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD near Pittsburg, Pennsylvania.

--

For those not aware, a single senator can hold up nominations, and does not even have to make that public. However Senator Grassley has made no secret of his intentions to take this road unless the FCC gives in to his demands. (B&C)

**

RADIO LAW: DANISH PROSECUTORS ASK COURT TO ORDER ROJ TV OFF THE AIR

Prosecutors in Copenhagen, Denmark overseeing an investigation into Kurdish-language television station Roj TV claim that the broadcast operation is actually the on-air voice of the terrorist Kurdistan Workers' Party or PKK. They have requested a Danish court to ban the channel from broadcasting.

The PKK is considered a terrorist group by Turkey, the US and the European Union. Its members are fighting for autonomy in Turkey's southeast. This is a conflict that has killed tens of thousands of people since 1984.

According to Media Network, Roj TV has a Danish broadcasting license, but has no studios in Denmark. (Media Network)

**

HAM RADIO AND SCOUTING: JOTA 2011 A BIG SUCCESS

The Boy Scouts recent 2011 Jamboree on the Air appears to have been a major success. According to JOTA's Jim Wilson by the beginning of December they had received and posted online 67 station reports. The statistics read like this:

The total number of Scouts reported attending JOTA 2011 was 2,935. They were assisted by 273 amateur radio operators. 1,472 contacts were made with 46 countries and the International Space Station.

Wilson says that this compares very favorably to the activity reported in 2010. (ARRL)

**

HAM HELP: FREE KIT BUILDING SERVICES TO HAMS WITH PHYSICAL LIMITATIONS

Members of the Four States QRP Group centered in Arkansas, Kansas, Missouri and Oklahoma are offering kit building services at no charge. This, to hams who need assistance with their construction due to physical limitations.

Hams who wish to have kits built for them need to visit the clubs website and purchase one or more of the six kits offered. Then follow the directions on getting construction assistance.

The club says that this is a truly free service. More information on the kits that are available is on-line at tinyurl.com/kits-built. (Southgate)

**

NAMES IN THE NEWS: N7WR RELEASE NEW BOOK ON HIS DAYS AS A SHERIFF IN LA

Some names in the news. Jerry Boyd, N7WR, has just published his seventh book and once again there is a link to amateur radio. "Firestone Park: Policing South Central Los Angeles" is a collection of what Boyd describes as true "war stories" about policing one of the highest crime rate areas of the United States.

The author, a former Los Angeles County Sheriffs Deputy and Sergeant, recounts dozens of incidents from the humorous to the horrendous.

It all begins over 45 years ago because of the author's participation in the Sheriff's Disaster Communications Service, an amateur radio based program. Those who have seen it describe the book like riding in a patrol car with N7WR.

The book may be ordered on line via Amazon.com beginning on December 15th. We are told that a portion of the proceeds will benefit the National Law Enforcement Officers Memorial in Washington DC.. (Southgate)

**

NAMES IN THE NEWS: N8MH NAMED AMSAT-NA VP OF EDUCATIONAL RELATIONS

Mark Hammond, N8MH has been named as AMSAT North America Vice President for Educational Relations. According to AMSAT President Barry Baines, WD4ASW, Hammond is aptly suited for this position as he is a professor of biology and the Dean of the College of Arts and Sciences at Campbell

University in North Carolina. He is very familiar with the potential for using the amateur radio satellites as a teaching resource and understands the teacher perspective as well.

Baines noted that the subject of educational outreach was discussed at the 2011 AMSAT Symposium, based upon the paper that he himself presented as well as other talks that outlined some of the challenges that AMSAT has experienced in creating a structure for fulfilling our mission component regarding education. In his new position Hammond will help AMSAT establish and coordinate an education initiative program and serve as that organizations senior point of contact with outside organizations regarding educational outreach. (AMSAT)

**

NAMES IN THE NEWS: VE3RNH NAMED RAC NEW NARED MANAGER

Last but by no means least word that Pat Barrett, VE3RNH Manager of Radio Amateurs of Canada's National Amateur Radio Emergency Database effective immediately. According to Doug Mercer, VO1DM, who is Radio Amateurs of Canada's Vice President Field Services, VE3RNH has an extensive management background and most recently sat on the Ontario Restructuring Commission chaired by RAC Director Bill Unger VE3XT. Barrett replaces outgoing database manager Merv Halvorsen, VE3TSA. (RAC, VO1DM)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD DONALD D. ROHN

Donald D. Rohn, an industry leader in communications tower manufacturing, passed away on November 21st at age 72. This while being treated for an injury he suffered from a fall a number of months ago.

In the late1950s Donald Rohn began working at his father Dwight's tower manufacturing plant prior to graduating with a bachelor's degree in business from the University of Illinois. Founded in 1948, Rohn's primary product line was small residential television towers.

Donald Rohn was an early advocate of climber safety and created a company culture that saw Rohn provide safety climb systems before it became an industry requirement. Rohn was also the country's first

manufacturer to see the need for galvanizing their towers and built their own galvanizing plant.

Donald Rohn retired from the company presidency in 1997. He is survived by his wife Joyce of Dunlap and three sons, five grandchildren and several nieces and nephews. A memorial service was held for Donald Rohn on Saturday, Nov. 26, 2011 in Peoria, Illinois. (WB5ITT, others)

**

ON THE WWW: N0HR HAM RADIO POPULATION MAP

A new on-line map by Patrick Rundall, N0HR, shows the countries of the world resized relative to the number of amateur radio licenses. All you need do is to go to tinyurl.com/7wrxvpm and hit the circular arrow to see a graphic illustration that, for example, shows Japan as the place that has the world's largest amateur radio population at 1296059. Second place goes to the United States with Thailand at number 3. The smallest ham radio population density shown is the island Nation of Jamaica with only 84 hams at this time. N0HR's ham radio population map is based on statistical data that can be found on-line at iaru.org. (Southgate)

**

WORLDBEAT: SOME 40 SARL MEMBERS MISSING FROM THE ICASA RECORDS

Colin de Villiers, ZS6COL, has been working on bringing the South African Radio League and telecommunications regulator and the Independent Communications Authority of South Africa records in line. During the process some 40 members were found to be on the SARL records that are not in the South African Radio League Data base.

Technically speaking these hams are using their call signs illegally. So at a South African Radio League Africa quarterly liaison meeting held with the Independent Communications Authority of South the telecommunications regulator agreed to send e-mails those affected requesting that they complete an application form for an amateur license and to submit the completed form as soon as possible. This will enable ICASA to correct their records. South African hams who receive such an e-mail are requested to respond as quickly as possible. (SARL)

**

WORLDBEAT: HCJB GLOBAL TECHNOLOGY CENTER TURNS 25

International religious broadcaster HCJB Global celebrated the 25th anniversary of its Technology Center in Elkhart, Ind., on December 15th. Officially begun in 1986, the center traces its roots to an earlier cooperative 1975 project between Clarence Moore and Crown International to build a 500 kW transmitter using Crown's facilities. That effort provided the initiative for HCJB Global to develop its own technology research and custom manufacturing facilities. When formed, the mission of the center was to build energy-efficient 100 kW

transmitters for deployment by HCJB. (Southgate, Media Network)

**

HAM RADIO IN SPACE: ESA VEGA ROCKET TO CARRY NEW MICROSATS TO ORBIT IN JANUARY 2012

The inaugural launch of the European Space Agency's new Vega rocket will carry the ALMASat-1 amateur radio micro satellite and at least 6 additional CubeSats. Slated for January of 2012, the launch will take place from ESA spaceport at Kourou, French Guiana. Once lofted into space, all of the satellites will be placed into an elliptical orbit of 1450 by 300 km at an inclination of 69.5 degrees. They are expected to have a lifetime before re-entry of up to 4 years. For details of each of the birds please follow the on-line links found at tinyurl.com/vega-first-launch. (Southgate)

**

RADIO IN SPACE: NASA'S NANOSAIL-D CALLED A COMPLETE SUCCESS

After spending more than 240 days sailing around the Earth, NASA's NanoSail-D has successfully completed its planet orbiting mission.

NanoSat-D was a micro satellite that deployed NASA's first-ever solar sail in low-Earth orbit. It was launched to space in November of 2010 and deployed its sail on January 20th of 2011.

A main objective of the NanoSail-D mission was to demonstrate and test the on-orbit and de-orbiting capabilities of a large low mass high surface area sail. In the process it became a popular orbital object for sky watchers and radio amateurs alike. The mission ended on November 29th. (NASA)

**

RADIO SPORT: ARRL AUGUST 2011 UHF CONTEST SCORES POSTED

ARRL Contest Branch Manager Sean Kutzko, KX9X, says that the results for the 2011 ARRL August UHF Contest have now bee posted on-line. You can view them at www.arrl.org/contest-results-articles. (KX9X)

**

ON THE AIR: JOHNNY CASH SPECIAL EVENT STATION

On the air, word that members of the Northeast Arkansas Radio Club will be conducting their inaugural Johnny Cash Birthday Celebration Special Event Station. The happening takes place on January 26, 2012 which would have been the late Country Music Hall of Fame and Rock and Roll Hall of Fame member's 80th birthday. Operations begin at 12 noon Central U.S. time which is 18:00 UTC. More is on-line at nea-rc.org. (Via e-mail)

**

DX

In DX, word that 3D2AG will be on a Christmas holiday with his family and is planning a small stroke P from Rotuma between December 9th and January 9th, 2012. It is reported that this will be a small ecological barefoot activity on all bands from 80 through 6 meters running 100 watts using solar and battery power. QSL via his home callsign, direct only using the address listed on QRZ.com.

JI5RPT will be active as JD1BLY from Chichijima Island between December 24th and January 2nd. His operation will cover 80 through 6 meters plus several satellites. Modes to be used are CW, SSB and the Digital. There will not be any 6 meter E-M-E on this trip. QSL via JI5RPT.

AH0AJ will be active as KG4AJ from Guantanamo Bay for the next two years. QSL only via his home callsign.

DL4RDJ is operating as 5W0OJ on HF from Western Samoa. QSL only via DL4RDJ.

DC0KK will be operational as 4S7KKG from Sri Lanka though March 11th. Activity will be mainly on CW and the Digital modes. QSL via DC0KK direct or via the bureau or direct to his address listed on QRZ.com.

Lastly, N7MSU will once again be active as V31SU from Belize between February 26th and March 15th. Operations will be mainly on 40 and 20 meters using CW, SSB and PSK31. QSL via his home callsign direct or via the bureau.

(Above from various DX news sources)

THAT FINAL ITEM: UPSTATE NY CLUB ASKS SERVED TOWN TO ASSIST IN REPLACING RADIO TOWER

Ham radio operators in and around Hamburg, New York, have for a long time offered their assistance in emergencies but right now they need some help from the city in order to expand their operations to better serve the community. Jim Davis, W2JKD has more:

**

Based at Hamburg's recreation center, the Southtowns Amateur Radio Society has been serving the area for 35 years. It is now replacing its tower, and is hoping the town might be able to help erect the new one. If not, at least provide extra fencing material, if there is any left over from a previous project.

Wayne Carpus, W2ZDP is the president of the Southtowns Amateur Radio Society. He noted that the group is structured in such a way that radio amateurs can quickly move their equipment to a fire hall, town hall or scene of an emergency, and do this working off a car battery for power.

Club treasurer Keith Patterson, KC2DGC, told the Town Board that amateur radio emergency communications takes place on the VHF and UHF bands , with a repeater on the WIVB-TV tower in near-by Colden. But there is a need to expand its services and the club now wants to replace its own tower with a new one that will be 70 feet tall when first erected, and would not be more than 100 feet tall when extended.

In the end, the club got at least partial backing for the project. Supervisor Steven Walters said the town would look to see if it has extra fencing that might be appropriate to place around the new tower. He added that since he has been supervisor, the town has lost its main communications system three times.

Patterson responded that when everything collapses, we hams can provide the needed communications.

I'm Jim Davis, W2JKD.

--

Yet another instance of ham radio operators being ready to help the community where they live. (Buffalonews.com)

Attention GB2RS Newsreaders - not for reading out on the air.

You will see from the following script that there will be no GB2RS news on

Sundays 25th December and 1st January.

Some readers may, of course, wish to operate a news net on these days.

We thank all news readers for their dedication to the GB2RS News Service and wish you

a very Happy Christmas and a successful New Year.

Gordon L Adams, G3LEQ, GB2RS Manager

Elaine Richards, G4LFM, RadCom Editor

Giles Read, G1MFG, RadCom Technical Editor.

GB2RS NEWS

Sunday 18th December 2011 The news headlines:

* New version of ROS released

* A Ham's Night Before Christmas

* PW-Sat to launch in January

A new version of the ROS data software has released by author Jos&#65533;, EA5HVK. The updates include improved performance for HF NVIS communications. On 1 December the code structure of ROS HF was changed in order to support mid to low band NVIS propagation. Versions prior to 6.8.4 will be incompatible with the latest version. There is no change to the medium frequency and EME modes. You can download the new version of ROS from www.rosmodem.wordpress.com.

Just in time for the Christmas season, Gary, KN4AQ, has created a video version of Clement Clark Moore's poem The Night Before Christmas. But Gary's version has a decidedly amateur radio twist. Entitled A Ham's Night Before Christmas, it features QST magazine covers and Christmas-themed advertisements from days gone by. You can see the video at tinyurl.com/KN4AQ-Night-Before-Christmas.

PW-Sat, a 1U CubeSat to be launched on the first VEGA flight in January, will carry a 435 to 145MHz amateur radio transponder with an FM uplink and DSB downlink. More information can be found at

www.uk.amsat.org.

There are still a few places left on the 5th Bath Buildathon which takes place on Saturday 7 January in Bath. The one-day practical workshop guides first-time builders through the construction of a 20m superhet receiver kit from Walford Electronics. You do not need any experience or tools, although knowing which end of the soldering iron gets hot is a help! A number of attendees are using this as a means of completing their Intermediate projects and the Buildathon Crew will be happy to sign off the appropriate assessment forms on the day. Others are building just for the fun of it and all will be most welcome. Tea, coffee and a few biscuits will be provided. To book one of the last places available, please contact Steve Hartley, G0FUW, using the details in the current Yearbook, on QRZ.com or via email to G0FUW@tiscali.co.uk.

Bookings are now being taken for the Northern Cross Rally run by Wakefield and District Radio Society, which will take place on Sunday 12 February 2012. Full details and bookings can be accessed online at www.northerncrossrally.com or by phoning Ken, 2E0SSQ on 07900 563117, before 8pm please. The actor Tim Allen of Toy Story, The Santa Clause and Galaxy Quest fame, stars in a new American TV series called Last Man Standing. It's an ABC comedy where Tim Allen plays Mike Baxter, KA0XTT, a married father of three and the director of marketing at an outdoor sporting goods store in Colorado. No news whether it will air on this side of the Atlantic yet.

[Note to Newsreaders: if you plan to run a news net on either of the next two Sundays,

please ad-lib in the next item to tell your listeners]

This is the last GB2RS broadcast of 2011. There will be no news readings on 25 December or 1 January. But we will be back in the New Year, bringing you the all the latest amateur radio news. Transmissions re- start on Sunday 8 January. We would like to take this opportunity to send warm season's greetings to all our listeners and wish everyone a prosperous New Year.

And now for the details of rallies and events

The Friskney & East Lincolnshire Communications Club Mid-Winter Tabletop Sale and Auction will take place on 3 January at the Friskney Village Hall, Church Road, Friskney, Lincolnshire PE22 8RR. The event includes the Special Event Station GB2YR. Doors open 7pm and entry is £1.50. Tables are 2 for £4 and there will be free tea & coffee. Details from Ian Donnelly, 2E0XOD, 07554 362 020.

We have no news of any special events for the next three weeks, so now the HF DX news, compiled from 425 DX News and other sources

SM6CPY will be active as 9X0PY from Rwanda between 24 December and 7 January 2012. His operation will be holiday style on all bands but with

a focus on 20 through 10 metres. QSL to his home callsign, direct or via the bureau.

KH0UY and KH0K will be operational from Saipan in the Northern Mariana Islands between 7 and 10 January. Their activity will be on 6 to 80m, plus the satellites. QSL via their home callsigns of JO3FRH and JE4SMQ, either direct or by the bureau.

Members of the Russian Robinson Club will attempt to activate another all-time IOTA new one in Alaska, the Bethel County group, NA-240, between 5 and 8 January 2012. They will concentrate on 20, 30 and 40m.

Now the contest news

On 20 December, the 1.3GHz UK Activity Contest takes place from 2000 to 2230. Using all modes, the exchange is signal report, serial number and locator.

Spread across the four days that follow Christmas Day, the Christmas Cumulatives are an opportunity to take part in four quick-fire contests. Activity is on 6m, 4m, 2m and 70cm simultaneously on all four days, so to do well you not only need to be QRV on all four bands, you need to engage in a lot of band hopping in each of the 2-hour sessions. The 6m and microwave UKACs take place on the 27th and round out the year.

The DARC Christmas Contest takes place for 2 hours on 26 December using the 3.5 and 7MHz bands. It promises every participant a downloadable certificate. All entry categories are single-op, but the options are then low/high power and CW-only or mixed mode. It is a sprint event in which the DLs get multipliers for working different prefixes, so they will certainly be on the lookout for non-domestic QSOs. Non-DL to non-DL QSOs are valid, so for UK stations there's no need to concentrate on working Germany. 27 December sees the 50MHz UK Activity Contest and the SHF UK Activity Contest taking place from 2000 to 2230UTC. The exchange is the same for both contests, signal report, serial number and locator.

Internationally, the New Year begins with a lot of contests. On Bank Holiday Monday, 2 January, it's the ITRS 80m Counties Contest from 1400 to 1700UTC. For those not in Ireland, work EIs and GIs only, giving them a report and serial number. EI and GI stations send a report, serial number and County code, and work everyone. There are various sections to enter.

On 3 January, the 144MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

On the weekend of 7-8th, the ARRL RTTY Roundup will be making the datamode portions of the HF bands busy. Activity is on all datamodes. Work everyone, but operate for no more than 24 of the 30 hours. There are low- and high-power categories for single- and multi-operator

stations. Entrants are limited to a single transmitter, irrespective of section, and there are no single-band entries. Send a signal report and serial number. US stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code.

If Morse is your thing, on the same weekend you might like to entry the EUCW 160m CW Party. There are two 3-hour sessions, the first late on Saturday night and the second early the following morning. Members of clubs affiliated to the European CW Association send RST + name + club + membership number, while others send RST + name + `NM' for non member.

And now the solar factual data for the period from the 5th to the 11th of December, compiled by Neil Clarke, G0CAS on the 12th of December.

Numerous sunspot groups were visible every day with up to eleven groups visible on the 8th. Most were small and quiet but a few groups produced a small number of low level C class solar flares every day except for the 6th. This was the first day when solar activity was at very low levels since the 28th of August. Solar flux levels declined every day from 158 units on the 5th to 134 by the 11th. The average was 146. The 90 day solar flux average on the 11th was 146, that's two units up on last week. X-ray flux levels declined from B5.2 units on the 5th to B3.9 by the 9th, the average was B4.5 units. Geomagnetic activity was quiet every day, the most disturbed day was the 10th with an Ap index of 8 units. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 410 kilometres per second on the 5th to 280 by the 7th, after which speeds recovered to around 500 kilometres per second on the 10th and 11th. Particle densities remained low every day. Bz showed little variation on the quiet days and between minus and plus 9 nanoTeslas on the most disturbed day.

Finally, a word about these reports. Up to now they have been produced in two versions. One, for the postal version of the script, prepared by Neil, G0CAS, covering the week up to the Sunday before transmission. A second, updated, version edited by Martin, G3USF, was circulated on Saturdays. From the New Year a single version, edited by G0CAS, will carry material from the Friday to the following Thursday. This will be dispatched to HQ on a Friday morning. The Saturday version will be discontinued. However, should a major development occur on a Saturday, we will do our best to post a late revision onto the Society's website.

Many thanks are due to the organisations where we use their data on a regular daily basis, without which it would be impossible to compile this report, Also to the staff at RSGB HQ and the GB2RS newsreaders and listeners, Martin and myself would like to wish you all a very Merry Christmas and a Happy and Peaceful New Year with lots of DX. See you on the 8th of January.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission. As this script is the last one before Sunday 8 January, it contains all known events for the three weeks from

Sunday 18 December until Saturday 7 January. For some regions, this means the list is quite long.

Please use your discretion on how much to read.

For brevity, contact details have been omitted from many "club closed" announcements.]

NEWS FOR THE MIDLANDS On Monday 19 December Lincoln Short-Wave Club Lincoln Short Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 19 December South Birmingham Radio Society is on the air and having a rag chew. Contact Don, on 01214 581 603.

On Tuesday 20 December Derby & District Amateur Radio Society is holding its Christmas social. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 20 December Forest of Dean Amateur Radio Group is holding its Christmas social. Details from Adrian Lane, 2E0SDR, on 01594 549 110.

On Tuesday 20 December Loughborough & District Amateur Radio Club is having a Christmas drink at the Pied Bull. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 20 December Wythall Radio Club is discussing its Christmas contest. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 21 December Lincoln Short-Wave Club is holding a formal meeting and social night. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 21 December Midland Amateur Radio Society is closed.

On Friday 23 December South Birmingham Radio Society is closed.

On Saturday 24 December Lincoln Short-Wave Club Special is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Saturday 24 December Wythall Radio Club starts its Christmas contest. Details from Colin, M0GJM, on 07598 540 507.

On Sunday 25 December Bromsgrove & District Amateur Radio Club is holding its Christmas Day net from 10am. Contact Chris, M0BQE on 01905 776 869.

On Monday 26 December South Birmingham Radio Society is closed.

On Monday 26 December Sutton Coldfield Amateur Radio Society is closed.

On Tuesday 27 December Derby & District Amateur Radio Society is closed. On Tuesday 27 December Forest of Dean Amateur Radio Group is closed.

On Tuesday 27 December Loughborough & District Amateur Radio Club is closed.

On Tuesday 27 December Wythall Radio Club is holding its Christmas fox hunt. Details from Colin, M0GJM, on 07598 540 507.

On Friday 23 December Cambridge & District Amateur Radio Club is holding an informal meeting and will then retire to the pub. Contact Ron, G3KBR, on 01223 501 712.

On Friday 23 December Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239 371.

On Saturday 24 December Worthing & District Amateur Radio Club is running the Santa Claus 80m net on 3.650MHz SSB from 2130. Contact Phil, G4UDU, on 01903 816 684.

On Sunday 25 December Worthing & District Amateur Radio Club is running a Christmas day net on 2m FM. Contact Phil, G4UDU, on 01903 816 684.

On Monday 26 December Felixstowe & District Amateur Radio Society is closed.

On Tuesday 27 December Brede Steam Amateur Radio Society is closed.

On Tuesday 27 December Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 27 December Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 28 December Chesham & District Amateur Radio Society is closed.

On Wednesday 28 December Worthing & District Amateur Radio Club is closed.

On Thursday 29 December Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Friday 30 December Loughton & Epping Forest Amateur Radio Society is closed.

On Friday 30 December Mid-Sussex Amateur Radio Society is closed.

On Friday 30 December Wimbledon & District Amateur Radio Society is closed.

On Monday 2 January Braintree & District Amateur Radio Society is having a natter night. For more information contact John, M5AJB, on 01787 460 947.

On Monday 2 January Burnham Beeches Radio Club is planning for contests and its anniversary year. Contact Dave, G4XDU, on 01628 625 720.

On Tuesday 3 January Leiston Amateur Radio Club is having a quiz. Details from Andy, G3ZYP, on 01394 460 441.

On Tuesday 3 January North Kent Radio Society is having a natter night. More information from Dave Collings, by email to nkrs@crystaldave.com.

On Wednesday 4 January Chesham & District Amateur Radio Society is holding a general meeting. Details from Terry, G0VFW, on 01442 831 491.
On Wednesday 4 January Southdown Amateur Radio Society is operating at Hailsham. Details from John, G3DQY, on 01424 424 319.

On Thursday 5 January Cray Valley Radio Society is closed.

On Thursday 5 January Horsham Amateur Radio Club is having a bring, show and tell evening. Details are on the web at www.harc.org.uk.

On Thursday 5 January Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 5 January Reading & District Amateur Radio Club is holding a wireless workshop on making an Antenna. Details from Pete, G8FRC, on 01189 695 697.

On Friday 6 January Crystal Palace Radio and Electronics Club is having a talk on loops by Colin Butcher, M0XED. Contact Bob, G3OOU, on 01737 552 170.

On Friday 6 January Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 7 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

NEWS FOR THE SOUTH WEST On Monday 19 December Appledore & District Amateur Radio Club is holding its Christmas party. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday 19 December Thornbury & South Gloucestershire Amateur Radio Club is having its chairman's quiz and social. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 21 December Trowbridge & District Amateur Radio Club is having its final natter night of the year. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 22 December Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 22 December Yeovil Amateur Radio Club is having a mince pies evening. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 23 December North Bristol Amateur Radio Club is on the air. More information from Dick on 01454 218 362.

On Friday 23 December Torbay Amateur Radio Society is closed.

On Monday 26 December Bristol RSGB Group is on the air. Details from Robin, G3TKF, on 01225 420 442.

On Thursday 29 December Swindon & District Amateur Radio Club is closed.

On Friday 30 December North Bristol Amateur Radio Club is having a quiz night with Dick, G0XAY. More information from Dick on 01454 218 362.

On Friday 30 December Torbay Amateur Radio Society is closed. On Wednesday 4 January Cornish Radio Amateur Club is holding a committee meeting at Perranarworthal Church Hall. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday 4 January Taunton & District Amateur Radio Club is watching the South Orkney DXpedition video. More information from Peter Robinson, G0EYR, on 07811 635 819.

On Wednesday 4 January Thornbury & South Gloucestershire Amateur Radio Club is planning for the carnival with G6RAZ. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 5 January Cornish Radio Amateur Club is having its main club meeting. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 5 January Saltash and District Amateur Radio Club is planning its 2012 programme and looking at members' Christmas goodies. Contact Brian, M0BHG on 01752 844 321.

On Thursday 5 January Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 5 January Yeovil Amateur Radio Club is having a DVD evening. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 6 January Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 19 December Dragon Amateur Radio Club is holding its Christmas social. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 20 December Wrexham Amateur Radio Society is closed.

On Friday 23 December Newport Amateur Radio Society is closed.

On Thursday 29 December Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500 then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

On Monday 2 January Dragon Amateur Radio Club is planning for the AFS Contest. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 3 January Wrexham Amateur Radio Society is closed.

On Friday 6 January Newport Amateur Radio Society is having a club night. More information from Ross Clare, GW3NWS, on 01633 880 146.

On Sunday 8 January Aberystwyth & District Amateur Radio Society is holding a junk sale. Details from Ray, GW7AGG, on 01970 611 853.

1191. Kenwood repair

SARL NEWS - SUNDAY 18 DECEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it has to be announced that the keys of two radio amateurs went silent a few weeks ago.

The key of Ray Langton, ZS6EJ, went silent on 2 November 2011. The key of Andries van Wyk, ZS6CEG, became silent on the 9th December.

Our sincerest condolences to all the relatives and friends of the deceased.

(PAUSE)

In the news today:

NOVEMBER/DECEMBER RADIO ZS IS THE MAIL

TRANSATLANTIC AMATEUR RADIO BALLOON IN FLIGHT

RUSSIAN MILITARY OFDM OPERATING ON 40 METRES

RADIO TECHNOLOGY IN ACTION

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

NOVEMBER/DECEMBER RADIO ZS IS THE MAIL

Another great-read issue of Radio ZS is in the mail and available on the web. Besides all the regular columns you will find on page 6 an article written by Bert Howes, ZS6HS, which was first published in 1958 in "Kommando", the journal of the Union Defence Force. Bert who was a member of the SARL since 1932, passed away on 2 December 2011 at the

age of 96. It is an article worth reading. The edition also has information about various awards and in the RaDAR article Eddie Leighton discuss the various ways people view the RaDAR concept.

If you are not a member of the SARL yet and would like to a sample copy of the November/December edition of Radio ZS, send an email to artoday@sarl.org.za, and you will receive a PDF copy in the email inbox.

TRANSATLANTIC AMATEUR RADIO BALLOON IN FLIGHT

An amateur radio balloon carrying APRS that left the United States mainland and headed across the Atlantic Ocean toward the European continent, made it.

Ron Meadows, K6RPT, of the California Near Space Project launched four high-altitude balloons on at 00:00 UTC on Monday, 12 December. The balloons were expected to come down somewhere in the midwest US but one identifying on APRS as K6RPT-11 decided to take a cruise on the jet stream.

After departing US soil over New Jersey at an altitude of 110 000 ft it crossed the Atlantic Ocean overnight, amateurs in Southern Europe were asked to tune their gear to 144,390, which is the APRS channel used in the United States. They were then requested to assist in tracking K6RPT-11 on its pass over Europe.

The question at the time was where would it land. The answer came early in the morning of December 14th. At the time the balloon was out over the Alboran Sea in the Mediterranean when APRS tracking showed it suddenly descending. The last report via EB6AOK showed it at 14 558 feet and travelling at 35 miles an hour. At that point its assumed to have fallen into the sea but not before travelling over 7 000 statute miles 11 200 km) at well over 100 000 feet (30 500 m).

What is little known is that amateur radio experiments with balloons were first made in South Africa with a large team of radio amateurs led by Tony Reumerman, ZS6AOG, John Willescroft, ZS6EF, and Dave Woodhall, ZS6BNT. At the time ZS6AKV made a presentation at an AMSAT conference in the USA which started the ball rolling in other countries.

RUSSIAN MILITARY OFDM OPERATING ON 40 METRES

The IARU Monitoring System newsletter reports that the Russian military have been transmitting on 7 000,8 kHz using OFDM 112 coding. The transmitter generating the unwanted noise appears to be located near the city of Severomorsk.

But Russia is not alone on the 40 metre band. The IARU also notes that Chinese Over the Horizon Radar has turned up several times on 7 MHz in the evening hours. It sometimes occupies as much as 280 kHz of spectrum and has been heard up to 7 040 kHz using the well known sweep rate of 43,5 sweeps per second.

Reports from South African Radio Amateurs are invited. Please send it to ZS1FCS, email zs1fcs@telkomsa.net.

RADIO TECHNOLOGY IN ACTION

The SARL invites papers for the Radio Technology in Action Symposiums which will be held on Cape Town, Port Elizabeth, Durban and Gauteng. Please send a brief synopsis to artoday@sarl.org.za by 15 January 2012. Travel assistance is available if required. The SARL also invites suggestions of the kind of subject that you would like to learn more about. It is your opportunity to influence the programme.

SA AMSAT SPACE SYMPOSIUM

The 2012 SA AMSAT Space Symposium will be held at the University of KwaZulu-Natal on 12 May 2012. This is the second call for papers. Authors are invited to submit a brief synopsis of their proposed paper. The deadline is 31 January 2012. Send a synopsis as a word file attachment to saamsat@intekom.co.za. The theme of the conference is "50 Years of Amateur Radio Satellites" celebrating the launch of OSCAR 1 on 12 December 1961.

PROPOSED AMATEUR MF ALLOCATION RECEIVES A BOOST

The proposal to allocate a part of the medium frequency band to the amateur service at the World Radio Conference in 2012 received a boost this week with the release of the Asia-Pacific Common Proposals that were developed at the 5th Meeting of the APT Conference Preparatory Group for WRC-12.

During this meeting, the various nations of the Asia-Pacific region discussed many of the issues that will be addressed at WRC12 and attempted to come to a regional consensus position.

The proposal of interest to the amateur service is "to consider an allocation of about 15 kHz in parts of the band 415 - 526,5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services" and this proposal was supported by a comfortable margin of Asia-Pacific administrations responding to the voting request. The successful development of a regional position supporting an amateur MF allocation increases the chances that the proposal will be accepted at WRC-12.

The amateur radio service is represented at the APT meetings by delegates from Region 3 of the International Amateur Radio Union and by members of national amateur radio organisations who are part of delegations from each national administration.

CONTEST NEWS

SARL National Field Day.

The committee received 13 logs made up of 11 contest legs and 2 check logs. The 13 logs indicate that 210 South African radio amateurs took part in the contest; it is not sure what happened to the remaining 197

logs.

The winners of the various Classes are:

Class A - Field Station, Multi Operator 1st West Rand ARC, ZS6WR, 91 200 points 2nd Northern Cape ARC, ZS3NC, 64 800 points 3rd Sasolburg ARC, ZS4SRK, 40 320 points

Class B - Field Station, Multi operator - QRP No entries

Class C - Field Station, Single Operator 1st Mitchell Mynhardt, ZS6YH, 32 352 points 2nd Marius Snyman, ZR6MS, 16 380 points

Class D - Field Station, Single Operator - QRP 1st Eddie Leighton, ZS6BNE, 10 476 points 2nd Dennis Green, ZS4BS/3, 2 880 points

Class E - General Stations 1st Pieter Jacobs, ZS6XT, 23 160 points

Check logs were received from Pierre van Deventer, ZS6A, and Alan McCulloch, ZS6KU.

The West Rand ARC made many points on 15 and 10 metres with digital contacts.

The combined results of the February and November legs of the National Field Day are:

Class A - Field Station, Multi Operator 1st West Rand ARC, ZS6WR, 187 800 points 2nd Northern Cape ARC, ZS3NC, 150 480 points 3rd Sasolburg ARC, ZS4SRK, 99 720 points

Class B - Field Station, Multi operator - QRP No entries

Class C - Field Station, Single Operator 1st Wessie Wessels, ZS2A, 43 200 points 2nd Pierre van Deventer, ZS6A, 40 560 points 3rd Mitchell Mynhardt, ZS6YH, 32 352 points

Class D - Field Station, Single Operator - QRP 1st Geoffery Lotz, ZR6XZ, 56 160 points 2nd Eddie Leighton, ZS6BNE, 21 186 points 3rd Dennis Green, ZS4BS/3, 2 880 points

Class E - General Stations 1st Pieter Jacobs, ZS6XT, 60 660 points 2nd Derek Stuart, ZS2J, 9 360 points 3rd Renier Burger, ZU6HOT, 7 236 points (now ZS6HOT)

Well done to everybody who submitted a log and congratulations to the category winners. The February leg of the 2012 SARL National Field Day is scheduled for the weekend of 11 and 12 February 2012.

The complete results are available in HF Happenings 483.

LEN WELLS AMATEUR RADIO SPIRIT TROPHY

The Len Wells Amateur Radio Spirit trophy for 2011 was presented to Tom Cooper, ZS1PS, at the False Bay Radio Electronics and Computer Club end of year function on Saturday 10th December. Tom has been a dedicated

worker for his club for many years and is a committee member and the Editor of their Newsletter DIALOG. In spite of being a big C survivor, he spent many week-ends building up their club house. Tom, 80 years of age, has 60 years of unbroken membership of the SARL.

That's true Amateur Radio Spirit! Congratulations Tom, may you still enjoy amateur radio for many years to come.

PORT ELIZABETH AMATEURS ARE LOOKING FOR COASTAL VHF DX

VHF amateurs in Port Elizabeth are looking for the VHF holiday makers along the south and east coasts of South Africa. They know that a number of amateurs will be spending their holidays at the coast, and some of them will take VHF gear along with them, such as Rassie, ZS1YT, and Derek, ZS5Y, who will be holidaying on the southern coast.

Some local amateurs will monitor the southern coast while others are watching the eastern coast and will alert each other about signals. The calling and listening schedules will be in the evenings between 19:00 CAT and 20:00 CAT on 144,400 MHz FM, and from 20:00 CAT onwards on 144,200 MHz USB. Also keep an eye on hot humid days when fantastic Tropo openings can occur.

Since all the local VHF amateurs are horizontally polarized and some equipped with high gain Yagis, the minimum requirement on the other side of the VHF path will be at least a horizontal dipole. The amateurs with the big Yagis will make up for the lack of antenna gain on the other side, and contacts longer than 400 km can be expected.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is declining with no threats of strong flares. The sun's surface is still peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 83.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also active with TEP openings from time-to-time.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 January 2012 - Last day for submission of summaries of proposed papers for the Radio Technology in Action Symposiums 2012 to artoday@sarl.org.za. 31 January 2012 - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium. Also: Submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th-December, through Sunday, 18th-December there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, D6, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND. Operators Phil/G3SWH and John/G3OLU (aka EA5ARC) will be active from the Hawane Resort in western Swaziland between February 21-29th, 2012. The Hawane Resort has a well equipped station with Elecraft K3 transceivers, ICOM IC2KL amplifiers, an A4S at 24m and an A3WS at 20m,

a wire 4 square for 40m and a vertical for 80m complete with 30 x 20m long radials. Phil informs OPDX that they will use a single callsign for the DXpedition, which is yet to be allocated. Activity will be on CW only on all bands 80-10 meters. There will be no 160, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's Web site <www.g3swh.org.uk> (preferred), direct with SAE and adequate return postage, or via the Bureau. Subject to a good Internet connection, there will be an on-line log on Phil's Web site and daily uploads to LoTW. Phil will issue an update once the callsign has been issued and he has the Web site up and running.

3DA, SWAZILAND. Members of the "Fox Charlie DXpedition Team" will be active as 3DA0FC between April 4-11th, 2012. Activity will be on 80-10 meters using SSB, RTTY and PSK. Suggested frequencies are:
SSB - 3780, 7063, 14185, 18136, 21290, 24930 and 28490 kHz
RTTY - 3590, 7040, 10149, 14084, 18104, 21084, 24924 and 28084 kHz
PSK - 7038, 14072, 18102, 21072, 24922 and 28122 kHz
The current list of operators are Filip/ON4AEO and XYL Kath/ON7BK, Sid/ZS6AYC and XYL Adele/ZR6APT, Gert/ZS6GC, Jose/ON4CJK, YL Elna/ZS6EB, YL Steffi/ON3AEO, Lucas/ZS6ACT and Herman/ZS5LH. QSL via ON4CJK, direct or by the Bureau. A 3DA0FC Web site is currently under construction that will include an online log at: http://www.filipstattooshop.be/Swaziland2012

A2, BOTSWANA (Ops still needed!). Frosty, K5LBU, reports that there is still room for several more operators to join his DXpedition to Botswana in March. Currently, there is Frosty, one couple and one other operator, and two of them are planning to visit and stay 3 nights and 4 days at the Kruger Park before meeting up in Johannesburg on March 16-17th. They will arrive at the Lotsane lodge on the 18th and return to Johannesburg on the 28th and depart on the 29th. The group plans to operate as A25HQ in the CQ WPX Contest while there. If you would like to go, E-mail Frosty at: 3da0cf@gmail.com

A5, BHUTAN. Take, JA4ATV (ex-9J2FM), is now active as A52ATV from Bhutan until December 20th. Activity has been on 40/15/12 meters CW. Watch around 0800-0930z and 1930-2230z. QSL via JA4ATV.

CARIBBEAN TOUR. Tom, AA9A, will be on a Caribbean holiday tour with the family between the end of January and early March. QSL via AA9A and LoTW. His schedule is as follows:
PJ2 - Active as PJ2/AA9A from Curacao between January 21st and February 4th, 2012. Activity limited to spare time on 40-10 meters using CW and SSB.

V2 - Active as V25AA from Antigua with other operators between February 13-22nd. See details below under V2.

PJ7 - Active as PJ7/AA9A from Sint Maarten between March 3-17th. Activity limited to spare time on 40-10 meters using CW and

SSB.

CY0, SABLE ISLAND (Everything is still a go!). Murray, WA4DAN, informs OPDX (edited): "The team of Ron/AA4VK and Murray/WA4DAN are making last minute preparations for the upcoming CY0 DXpedition. Gear is currently being prepared for shipment to Maritime Air Ltd in Halifax, Nova Scotia. Some antennas are already on Sable. Because of the recent uptick in high band propagation, increased emphasis will be placed on 10 and 12 meters. Our goal is to always have one operator on 10 meters during the time that band is open to CY0. We are shipping a three element, 10-meter monoband yagi to the island. This 10-meter yagi will be mounted on top of a 30-foot tower which we will erect upon arrival on the island. It is possible we may have both CY0 stations on 10-meters at peak times. We are looking at ways to physically separate the 10 meter antennas to facilitate that possibility. We were greatly encouraged by the amount of activity in the recent 10-meter contest. We know there is high demand for CY0 on that band. We will do our best to satisfy this demand. We are scheduled to arrive in Halifax on the morning of Dec. 27th. We will confirm all of our gear made it safely and shop for last minute supplies. After an early wake-up on Dec. 28th, we will arrive at Maritime Air and eagerly await for the OIC on Sable and Maritime Air to make the GO/NO GO call on the weather and landing conditions. Landing on Sable is a little tricky as there is no runway on the island. Landing is on the sand which must be relatively firm and free of standing water. Wind speed and wind direction are also critical parameters to the GO/NO GO decision. These decisions are made by the OIC on Sable and Maritime Air. Keep a check on this Web site for more updates as we get closer to departure: <http://www.cy0dxpedition.com>.

D6, COMOROS. Fabri, IW3SQY, will lead an international team of operators to activate Comoros sometime in the coming months of 2012. More details are forthcoming.

DX-WORLD.NET'S 2011 DXPEDITION OF THE YEAR SURVEY. It is that time of the year for the DX-World.net Web site's - "DXpedition of the Year 2011". It is easy to vote on the Web page by just checking the box next to the DXpedition you want to vote for (you can vote up to five DXpeditions). After you vote, you can see the current standings. The survey is available at: http://dx-world.net/2011/dx-world-dxpedition-of-the-year-2011
The voting will close on January 15th, 2012. DX-World.net states, "The criteria behind the poll is to remind operators of the many notable DXpeditions which occurred during the last 12 months and to vote for their favorite(s)."

E4, PALESTINE (Update). Peri, HB9IQB, is now active as E44PM possibly through December 22-23rd. Activity will be mainly CW with some SSB.
For more details and updates, visit the following Web page at:
http://www.hb9iqb.ch/palestine.html
UPDATE FROM PERI (date December 16th): "Season's greetings from Bethlehem. Operation started Dec. 15th, 20.48 UTC, on 7 MHz, in CW. First Call in the Log is HB9DX, The Swiss DX Foundation, with HB9DDO at the key.

Unfortunately, terrible QRM was encountered here caused by all kind of electrical devices in the house (Neon lights, Air condition etc.), peaking S9 + 10 dB on the K2 meter. Will check possibilities today for trouble shooting, including antenna relocation. Thanks for obeying my regional instructions, excellent operating by the EU ops during JA and K/W openings.

E5, SOUTH COOK ISLANDS (Reminder). Remember to look for Andy/AB7FS (E51AND, ZK1AND and ZK2AND) and his XYL Kathy/KB7SCH (ZK1SCH) to be active again from Arorangi Beach on Rarotonga Island (OC-013) between December 19-31st. Andy will be active as E51AND. As a member of the Straight Key Century Club (SKCC #7723), he plans to operate straight key CW at or around 14050 kHz, and he will be looking especially for SKCC members. Andy states, "This is NOT a DXpedition - just a vacation with some hamming -- so frenetic issuing of signal reports will be a low priority though I'll try to make contact with those who want them. I often check into the ANZA net which meets at 0515z daily at 14183 kHz -- so that's a good place to find me for a sked or to QSY down to the CW part of the band --- or you can try E-mailing me - we'll have limited connectivity but I'll check at least every second day...and..... band conditions are MUCH improved from last December." QSL via AB7FS. Andy's E-mail address is: Kiaorana@minetfiber.com

EA/P, SOUTH SHETLAND ISLANDS. Between now and March 2012, look for Adrian, EA1CYK, to be active as EA1CYK/P during his spare time from Antarctic base "Gabriel de Castilla" (WAP ESP-02) on Deception Island, South Shetland (AN-010). If it is possible, he will visit the base "Juan Carlos I" (WAP ESP-01) on Livingstone Island (also in the South Shetland). He was heard this past weekend on 10 meters with a good signal. QSL Manager is EA7LS.

EF8, CANARY ISLANDS. Luis, EA8AY, will use the special callsign EF8USA from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-band entry. QSL via only LoTW. Visit his Web site at: http://www.ea8ay.com/ef8x

ET, ETHIOPIA. David, K3LP, informed OPDX on December 13th, that their team has concluded this trip and is headed to the airport at 7:00 PM to return home. David states, "The results of the U.S. FCC License testing for Dec. 10, 12 and 13 are as follows:
Total Number Students Tested: 62
Total Number of Amateur License Tests conducted: 161

License Types issued:
Qty 5 - Extra Class Licenses
Qty 36 - General Class Licenses
Qty 16 - Technician Class Licenses
Qty 5 - Did not receive a License

After we get our logs combined, we'll upload the results to the Logbook of the World plus post the results as a search function. QSL ET3AA and ET3SID via N2OO for December 8-13th, 2011, only. Thanks to everyone for their understanding regarding the low bands. A future goal will be set

to operate from a remote location with exceptional receive antennas."
For the complete details and up-to-date info, see:
http://www.k3lp.com/et3aa_december_2011.htm

HK0, MALPELO ISLAND (Update). Gregg, W6IZT, Co-leader of the upcoming 2012 HK0NA DXpedition, announced this past week to the 160 meter community of their Topband plans for the upcoming operation. He reports, "We will have 2 operating locations. Both locations will have 160 meters capabilities and legal limit amplifiers. The distance between the two operating locations is approximately 300 meters and the difference in elevation is almost 200 meters! Two operating locations are a necessity to provide a low take off angles in all directions. The camp lower in elevation 'OP B, or Baja' will be our main camp and is located adjacent to the military facilities. 'OP A, or Alto' will be located very close to the top of the highest point on Malpelo. The antennas for OP A will be located on top of the highest peak. The personnel operating from OP A will have to make a very difficult and dangerous 200m vertical climb on a daily basis to man the stations. OP B will be the primary 160m station for the eastern U.S., Europe, South America, and Africa. OP A will be the primary operating location for the western US, JA/Asia, and VK/ZL. Our current antenna plans call for an Inverted L for 160 at OP B, with Pennants for receive, and for OP A an Inverted V broadside to the US and JA for 160 and Pennants for receive. At 300 meters above the sea we are confident that the efforts to establish this operating location and antenna selection will result in an outstanding signal on 160 to those areas of the world that have been most challenged to work Malpelo in the past. Establishing an operating location from OP A comes at a considerable expense. We have expanded an already strong team with the addition of several experienced DXpeditioners to man the increased number of stations (from 6 to 10). This has also enabled us to extend our stay on the island. We are making every effort to minimize the risk in transit for OP B to OP A through the extensive use of safety equipment wherever possible. Fortunately, we have a commitment from the Columbian Military and the crew of our transportation vessel to assist with transporting equipment, fuel and water to the OP A site. An advance team of operators from Columbia are leaving for the island on Christmas day to begin the efforts of establishing the camp infrastructure, and setting up the antennas. One of our goals is to drop Malpelo out of the top 100 on the DXCC most wanted list from the current spot of #11 worldwide. Operations of this magnitude are expensive. This one in particular also comes with a significant element of risk. The operators are bearing the majority of the expenses. But without support from equipment sponsors, major DX organizations, clubs, and individuals this trip would not be possible. Contributions are still needed and very welcomed. Please visit our Website at <www.HK0NA.com> and click on 'how can I help'... Lastly, we have a tremendous group of equipment and DX organization sponsors, please support them whenever possible..... 73s, Happy Holidays, and hopes that we are in your log on 160!"

HS0AC HORROR STORY. For the first time since the flooding in October-November, members of the Radio Amateur Society of Thailand (RAST) were able to get out to the HS0AC club station on the campus of the Asian

Institute of Technology on December 10th, and entering their shack by forcing open a locked rusty door to get in. The water had been some two meters deep at its peak and had submerged the AIT campus for five weeks. The team entering the shack was RAST President Chaiyong/HS1QVD, Station Manager Finn/OZ1HET, Swen/HS0ZFZ, Thida/HS1ASC, Sonn/HS6NDK, Karl/HS0ZJL and his XYL, and Gerd/DK5FJ. They spent eight hours sifting through the flood damage and and documented their visit: Visit the following link to read and see photos of the damage at: http://bit.ly/9GztWh

IOTA NEWS.....
EU-008. Members of the Black Country DX & Contest Group will be active as MS0OXE from the Isle of Tiree (IOSA NH04, SCOTIA DI10, IO66ML, WAB NL94), in the Inner Hebrides Islands between September 13-21st. Operators mentioned are Simon/M0VKY, Drew/ G7DMO, Brian/G0JKY and Terry/G4MKP. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via M0URX, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. Visit their Web site at: http://ms0oxe.webs.com

NA-066. Operators Ray/N6HE, Jeff/K6JW, Joe/NZ6L, Bob/AB6SY, Clay/AB9A, Diana/AI6DF and Bill/KG6WVF will be active as K6PV/6 from Santa Catalina Island (USI CA016S, WLOTA 2912, Los Angeles County, CA) between February 23-26th, 2012. Activity will be on 20 meters SSB mostly, with some on 40 meters SSB. They will also be in the NAQP RTTY Contest (February 25-26th) and the CQWW 160m SSB Contest (February 24-26th). They also plan to be om 160/80/40/ 20/15/10 meters using CW, SSB, RTTY and possibly PSK31. QSL direct to QRZ.com address for K6PV.

JW, SVALBARD. Operators Magne/LA2XNA and Jon/LA8HGA will be active as JW2XNA and JW8HGA, repectively, from Spitsbergen Island (EU-026, WLOTA 0125) between March 16-20th, 2012. Activity will be on 160-10 meters with an emphasis on the higher bands. Look for JW2XNA to be on SSB, PSK31 and PSK63, while JW8HGA will be on CW. QSL via their home callsigns, direct or by the Bureau. Logs will be uploaded to LoTW.

KH3, JOHNSTON ATOLL (Update). "DX-World.net" is reporting that Susan's, W7KFI, QSL Manager, Stan, KH6CG, states that Susan may now push off from Hawaii a few days after January 15th. Additionally, the Northern California DX Foundation (NCDXF) is now sponsoring her KH3 activity and has sent her a banner which she has already received. Also, Susan has received her permit to access Johnston Atoll for January/February 2012. Stan states, "Her plan is to leave Honolulu on (approx) January 15, 2012, arriving KH3 some 5-7 days later, depending on wind. She'll operate for seven days setting up a tent on the pier, where it will be over land, using a 43 ft. vertical set into sand. She has informed the ARRL of this station set up so they are aware for [pending] DXCC approval. Additionally, Susan will take photos and is expecting an Elecraft banner to be sent to her soon via the company; Susan will use a K3 on CW/SSB mainly." In short, according to Susan, she should be active from about January 21st, and if there is a delay for any reason she can operate through February."

NEW WEB SITE FOR SATELLITE OP'S. A new French Web site for satellite operators has recently made its debut on the Web. The site features logbooks for all of the popular satellites including the DX bird, AO-7. It is a welcome replacement for the <planetemily.com/ao7> which went offline a few weeks ago. The main feature of the new Web site is the logbooks where you can enter QSO data that will be archived for later reference. There is a field for comments as well. Visit the Web site at: http://aar29.free.fr/sat/index.html
ADDED NOTE: Another great resource for satellite operators can be found at: http://www.papays.com/sat
It features grid maps submitted by active satellite operators as well as thousands of recordings from satellite passes over the last two years. If you would like your grid map added to the site, please contact John, K8YSE, at: k8yse@amsat.org

PACIFIC ISLAND TOUR. Vincent, F4BKV, a member of the upcoming 2012 VP6T Pitcairn team, plans to continue has activity after this operation on Pitcairn by activating the following islands and locations. His tentative schedule and callsigns are as follows:
E51BKV - February 9th; Rarotonga Island (OC-013), South Cook Islands.
E51BKV - February 10-15th; Mangaia Island (OC-159), South Cook Islands.
E51BKV - February 16th; Rarotonga Island (OC-013), South Cook Islands.
FK/F4BKV - February 18-25th; Ouvea Island (OC-033), New Caledonia.
FK/F4BKV - February 26th; Noumea (OC-032), New Caledonia.
HL2/F4BKV - February 27th; A briefly stay in Seoul, South Korea, as Vincent heads home.
Activity from all locations will be on 40-10 meters using SSB and the Digital modes (RTTY/PSK31). His equipment will include an Elecraft K3 with 500w amp, monoband VDA (vertical dipoles array) for 17/15/12/10m and monoband verticals for 40/30/20m. QSL via his home callsign and LoTW. For more details, updates and an online log search, visit: http://www.f4bkv.net

PJ7, SINT MAARTEN. A group of Polish operators are planning to be active as PJ7PT from Sint Maarten (NA-105) between March 5-18th, 2012. Operators mentioned are Wojciech/SP9PT, Bogdan/SP2EBG, YL Gala/SP2GKS, Jurek/SP3GEM,

Czeslaw/SP3HLM and Jozef/SP9-31029. Activity will be on 160-6 meters
using CW, SSB and RTTY. QSL via SP9PT. For more details and updates,
visit the PJ7PT Web site at: http://www.pj7pt.com

JX5O QSL STATUS. Members of the JX5O report that "due to unforeseen
circumstances", Stan, SQ8X, will be delaying the sending/responding
of QSLs until sometime in January at the earliest. Updates on this
issue should be forthcoming on the JX5O Web Site. Thanks for your
understanding.

KG4AJ QSL MANAGER. Buzz, NI5DX, has assumed the duties of QSL Manager for
Norm, KG4AJ, on Guantanamo Bay. A new QSL card will be designed and sent
to UX5UO for printing. It will take about 4 weeks to receive the cards
once the order has been placed. Buzz is awaiting a log transfer from
KG4AJ. Once the log transfer is made, Buzz will able to confirm all past
contacts with KG4AJ. Norm is scheduled to be in KG4 land for 2 years.

NOT THE MANAGER. Al, VE1AL, re[orts that he received a batch of cards
from his VE1 Bureau this past week, and included were two cards for
3V8S via VE1AL from the CQWWDX CW Contest in Nov. 2009. Al states, "I
am not and never have been the QSL Manager for this operation. In the
past, I have returned the cards via the Bureau system. Also, I still
receive cards for ZK2DD and VA1S. I have the logs for the ZK2DD operation
for only July 1979. If the call was re-issued, I cannot help. The VA1S
logs are no longer available. I won't return the QSLs to the senders
because of new, onerous, charges by RAC for membership and use of its
outgoing bureau."

WIN-QSL-POLICY 2.2 (Program for Windows XP, Windows Vista, Windows 7).
Manfred, DF6EX, has written a program that helps in providing info on
which QSL-Manager/DX-station you can expect a reply via the Bureau or
which DX-stations you better not work or have to spend a lot of money
to get a card. The program has a growing database and it lets you know
what stations do not QSL back or just take your green stamps.
Currently, there are 11500 managers/DX-stations listed, from information
collected over the past 20 years. The best news is that it is free.
Read more about the program at: http://www.winqsl.com
Or load directly at: http://www.winqsl.com/winqsl/?page_id=74
No fee at all. Also, there will be further updates; you just have to

register by mail.

QSL RECEIVED VIA LoTW: 3D2ML, 9N7DX, 9X0VB, A45XR, A92IO, AX0LD, C37N, CT5KAO, CT7ACG, DC0NA, E51Z, EI6IZ, EI9E, EL2LF, EL2WS, F5GGL, F6BAT, F8AKC, FY5LH, G3WW, GI0RQK, HA3HZ, HQ9R, G3Y, GJ6UW, JA1BNL, JA7DOT, JH7RTQ, JO1COV, JS1NDM, KL2R, LZ2MP, LZ9W, MD0CCE, OK2DA, OM3AG, P40K, PJ2T, PJ4LS, PJ4X, PR7AB, PV8AA, PY4XX, S58N, SA0BDK, SP2JKC, T32C, TF3Y, UA2FR, UA9MEJ, UN7PBY, UR3IFC, VA2EW, VA7RN, VA7ST, VE3RZ, VE6TL, VO1TA, VP9/K2XX, VX6WQ, VY2ZM, XE2S, XE2X, YN2CC, YO9HP, YS1JBL, YT3AA, YU1JW, Z37M, ZF2OE, ZK2V, ZM4G and ZS4TX

QSLS RECEIVED VIA MAIL: 3D2R, 4L1MA, 5C2J, 5T0JL, 8R1AK, 9H1BT, DU2/JJ5GMJ, E77A, EW8OG, FR/DJ7RJ, J69MV, JD1BMH, K4M, KC4AAC, KC4USV, ST0R, SV2ASP/A, SV5BYR, UA0SR, V26K, V63KZ, V85TL, VK9CX, VK0TH, ZA1G, ZB2B and ZD8ZZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SILENT KEYS.....
* QSL Manager Allan, G0IAS, informs OPDX with great sadness that Harry Berry, G0JMU/7Q7HB, collapsed in his home during lunchtime on December 12th and became a "Silent Key" (SK). Allan states, "I have ALL of Harry's Malawi contacts from the very first QSO he made more than 20 years ago.....I will answer the cards as they arrive, if you worked Harry and need the cards I will honor them, although at this time I feel like closing down the logs on ALL the 7Q Stations I manage. With the exception of my wife, he was the best friend I have ever had, I KNOW he has given a lot of people the pleasure of working 'a new one' and will be sadly missed. My thoughts are with his wife Elaine and his family at this time. I am sure lots of Hams will say with me a silent 'THANK YOU' Harry...REST IN PEACE OM......"

* It has been reported that Larry Amodeo, W2AX, became a "Silent Key" (SK) on November 28th, the day after the CQWW DX Contest at his home. He had been in poor health for some time and had dismantled his Vermont station a few years ago and sold the house there. Larry was a long time ARRL member and a well known DXer and contester who was one of the first to run a remote station from Readsboro, Vermont. At one point, he had worked them all and still stands at 381 on the DXCC Mixed standings. The only country missing from his list was North Korea. At the point where he stopped chasing them he had them all. He also managed to operate from some rare places in the 1950's, 1960's and 1970's including Johnston Island. He was a kind, friendly, helpful man who will be missed by the many who knew him and had a chance to operate from his Vermont station. He was a long time member of the "Order of Boiled Owls of New York" and the "Yankee Clipper Contest Club".

* Pat Parrish, K4YR (ex-K4HXF and W5PSB), became a "Silent Key" (SK) on December 15th. An avid Dxer, he was on the Honor Roll list at 391. He managed the ARRL QSL Bureau in both the 5th and 4th district for a number of years. He was 84 years old.

* OPDX and its readers would like to send out our deepest sympathy to the family and friends of 7Q7HB, W2AX and K4YR.

TC9, TURKEY (Special Event). Members of the Turkish Scouting and Guiding Federation's National Conciousness Camp, will activate special event station TC9SAM between December 23-26th. Operators mentioned are Tevfik/ TA1HZ, Hasan/TA1GE, Emrah/TA2AEM and Emre/TA1AES. Activity is in memory for the "Allahuekber Martyrs", and operations will be commemorating the fallen in Sarikamis Campaign of World War I. The special event station TC9SAM will be located in Gaziler and Kaynak villlages of Erzurum. In accordance with the camp program, they will be on the air mainly on 40 and 80m bands but will also try the other bands. You can also try to follow the team on APRS. Detailed info is available on <QRZ.com> and <www.tif.org.tr>. The QSL Nanager is TA1HZ.

TX6, FRENCH POLYNESIA (IOTA Op). Before their major VP6T operation, operators Jacques/F6BEE, Nigel/G3TXF, Gilles/VE2TZT, Michel/FM5CD and Vincent/F4BKV will be active from Tahiti Island (OC-046) and possibly from Mangreva Island (OC-063) as TX6T. Specific dates were not provided yet, but should be forthcoming. Activity will be active on all HF bands. QSL via G3TXF.

V2, ANTIGUA. Operators Tom/AA9A and Bob/W4OWY will be active from here as V25AA and V25WY, respectively, between February 13-22nd. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsign. Tom does use LoTW. ADDED NOTE: "The Daily DX" reports that Ed/N2ED (V26G) will team up with Tom and Bob for the ARRL CW DX Contest (February 18-19th). The callsign is not yet known.

VK0, MACQUARIE ISLAND. Trevor, VK0TH, has been active on 40/20/17/15/12/10 meters using SSB, PSK31 and RTTY. Activity has been mainly between 2300-1330z. Suggested frequencies are 70163, 14070, 18135, 21070, 21086, 21365, 24945, 28120 and 28400 kHz. QSL via JE1LET (direct only).

VP2V, BRITISH VIRGIN ISLANDS. Dave, GM0LVI, will be active as VP2V/GM0LVI from Cooper Island (NA-023) between January 11-21st, 2012. Activity will be holiday style on 20-6 meters using CW and SSB. He will use a FT817 with 5 watts into GP and dipoles. QSL via his home callsign.

VP6, PITCAIRN ISLAND (Update). Operators Jacques/F6BEE, Nigel/G3TXF, Gilles/VE2TZT, Michel/FM5CD and Vincent/F4BKV will be active as VP6T from famous, mythical Pitcairn Island (OC-044, CQ Zone 32) between January 20th and February 4th. From the VP6T Web page: "This DX operation from Pitcairn has a target of more than 30,000 QSOs. With good propagation forecast for early 2012, efforts will be made to give this extremely rare entity to deserving DXers on as many bands as possible, but especially on the low bands. The rarity of VP6 ensures that all operators will be kept fully occupied during our nine full days on the island. We will be travelling there by boat. We are planning to have three stations active round-the-clock." Activity will be on 160-10 meters including the 30/17/12 meter bands, using CW, SSB and RTTY. The VP6T log will be uploaded to LoTW during the operation if possible, if not immediately after the operation. They will try to update their VP6T log on "ClubLog" several

times a day during the operation. This will help you track your progress across the bands. QSL Manager is Nigel, G3TXF. In addition to the usual routes (Direct QSLing, QSLing via the Bureau and E-mail requests for Bureau cards to "QSL at G3TXF dot com"), they will also be using the new "Online QSL Request Service (OQRS) provided by ClubLog." For more details and the suggested frequencies, visit the VP6T Web site at:
http://www.vp6t.org

YX6, VENEZUELA. Members of the Radio Club of Venezuela plan to be active as YX6AJ from Angel Falls waterfall (the world's tallest - 979m) between January 3-6th, 2012. Operators mentioned are Lino/YY5FRD, Jesus/YY5CHJ, Marcel/YY5CAR, Wilmer/YY5CWM, Alfredo/YV5SSF, Edwin/YV5HUJ, Jose/YV5JF, William/YV5VE, Angel/YV5NEA and possibly one more. Activity will be on CW, SSB, Digital modes and the Satellites. QSL via YV5AJ, by the Bureau or direct.

ZF, CAYMAN ISLAND (Update). Dr. Bill, K9HZ, will be active as ZF2HZ from Rum Point, Grand Cayman Island (NA-016, WLOTA 1042, WW Loc. EK99II) between December 19-29th. Activity will be on 160-6 meters using CW and SSB. Suggested frequencies are listed on QRZ.com. QSL via his home callsign.

HPARC is sponsoring classes beginning in January 2012. The instructors need to know who is going to
take them so they can order books. Please send an email to them ASAP. Once your email is received
you will receive an email with more information about the classes.

Hazel Park ARC will host a General Class

WHEN: First Session on January 9

TIME: each week @ 7 pm to 9pm for 12 weeks

WHERE: at City of Southfield EOC

COST: FREE except for book $23

Contact: Wallace Murray KE8HR @ 248-685-8485 or email ke8hr@arrl.net

Hazel Park ARC will host an Extra Class

WHEN: First Session on January 27

TIME: each week @ 7 pm to 9pm for 16 weeks

WHERE: at City of Southfield EOC

COST: FREE except for book $23

Contact: Ron Miotke WD8MNX @ 248-246-7959 or email wd8mnx@arrl.net
http://hparc.org/

RAC Bulletin 2011-045E - Merry Christmas, Happy Hanukkah, and Happy New Year
2011-12-20

To all of our Members and our Friends across the World:

We at the Radio Amateurs of Canada hope that your 2011 was healthy and prosperous for you and yours.

We wish you the most Wondrous Holiday Season; full of family, friends and good cheer.

We wish that your 2012 will be healthy, prosperous, accompanied by many friends and that your life will continue to be meaningful and satisfying.

And we wish you many contacts.

Geoff Bawden VE4BAW
President and Chair RAC; on behalf of the RAC Board and Executive

1200. Weekly Highlights of Solar and Geomagnetic Activity, 12 - 18 December 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-20 22:30:06 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20111220223001.B5E3333C69@panix2.panix.com>
Source record: 3790
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.amateur.space,rec.radio.info

```
:Product: Weekly Highlights and Forecasts
:Issued: 2011 Dec 20 2011 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
12 - 18 December 2011

Solar activity was at very low to low levels. Region 1367 (S19,
L=076, class/area Cso/030 on 08 December) was the most active region
and produced occasional to frequent C-class flares near and beyond
the west limb during 13-15 December. Region 1376 (N20, L=306,
class/area Dro/020 on 18 December) was also responsible for
producing multiple C-class flares during 17-18 December. There were
no Earth-directed coronal mass ejections observed during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

Geomagnetic field activity was at mostly quiet levels during most of
the period, with isolated periods of unsettled levels observed at
high latitudes.

Forecast of Solar and Geomagnetic Activity
21 December - 16 January 2012

Solar activity is expected to be at low levels during the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal to moderate levels during the period.

Geomagnetic field activity is expected to be at quiet levels during
21-27 December. Activity is expected to increase to quiet to
unsettled levels during 28-29 December and 5-6 January due to
recurrent coronal hole high-speed streams. Quiet levels will prevail
30 December - 4 January and 7-16 January.
```

1201. [RAC-Bulletin] RAC Bulletin 2011-046E - New Membership rates

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-21 00:13:50 UTC
From: rac-bulletins@eton.ca

RAC Bulletin 2011-046E - New Membership rates
2011-12-20

IMPORTANT NOTICE REGARDNG MEMBERSHIPS

It has been many years but the Radio Amateurs of Canada have finally raised the membership rates.

Rates had previously been raised for United States and International Members to take into account the increased mailing costs for non-Canadian residents.

Canadian membership rates are among the lowest in the world and will remain so. A membership in the Radio Amateurs of Canada will continue to be less than a tank of gas and the increase is less than a cup of coffee for most memberships.

These price changes are now reflected on the RAC website.

Membership: Full Regular $52.00, Full Family $25.00, Full Blind $25.00, Full Maple Leaf Operator $100.00
Associate Regular $52.00, Associate Family $25.00, Associate Blind $25.00, Associate Corporate $150.00, Associate U.S. $90, Associate International $130

The above Membership Dues are subject to GST and/or HST from your province of residence.
5% - AB, MB, NT, NU, MB, PE, QC, SK, YT
12% - BC
13% - NB, NL, ON
15% - NS

****
The ARRL Contest Update

Published by the American Radio Relay League
****

December 21, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- RAEM and New Year's Winter Contests
- Straight Key Night for Friends Old and New
- New European Russian Prefix Listings
- Az-El Map-lication
- HS0AC Underwater
- All-time 10 Meter Log Record
- Pack a Topband Punch with K2AV
- A Toy Turns Pro
- Received and Understood

NEW HF OPERATORS - THINGS TO DO

Take a break! If you got into radiosport this year, you've discovered that right around the end of October, the weekends come in quick succession and test everything from your ability to withstand 160 meter static to finding just the right skew path to get that close-in state off of 10 meter backscatter. Oh, and to give the complete Sweepstakes exchange in one breath! So kick back and enjoy the bands, the holidays, and time with family and friends. See you next year!

BULLETINS

>From Dan K7SS following the ARRL 10 Meter Contest, "Welcome aboard to the many, many KC KD KE KF KG KJ etc new folks who are experiencing their first 10 meter peak.. fun, huh??" If you participated in the Dec 18th CW edition of the Rookie Roundup <http://arrl.org/rookie-roundup>, be sure to submit your score online by 2359Z today!

BUSTED QSOS

No significant erors were reported in the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

December 24-25, 2011

- DARC Christmas Contest
- SKCC Straight Key Sprint (Dec 28)
- NAQCC Milliwatt Sprint--CW (Dec 29)

December 31, 2011 - January 1, 2012

- ARRL Straight-Key Night
- New Years Snowball Contest
- SARTG New Year RTTY Contest
- AGCW Happy New Year Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Here is an excellent reason to keep your logging software's CTY files <http://www.country-files.com/cty> up-to-date for DX contesting - a new list of prefixes for European Russia published by ARRL DXCC Manager, Bill NC1L. It's on the ARRL Awards blog <http://www.arrl.org/awards-blog> - look that the item titled "DXCC and Russian Prefix Information (rev.)" Bill also notes that "since Russia joined CEPT, there are stations active with call signs that do not indicate DXCC entity, such as RA/N6TR who operated from Asiatic Russia, and RA/SM6LRR who operates from European Russia. These types of portable call signs will be managed individually in the DXCC system."

For those of you considering doing some contest operating from an IOTA-qualifying island, be advised that for QSLs to be accepted for IOTA credit, the island designator may not be handwritten. This is spelled out in the IOTA program rules <http://www.rsgbiota.org/> contained in the 2011 IOTA Directory - see rule C.4.2.

Look - up in the air! Wayyyyy up in the air! First a balloon travels all the way across the Atlantic Ocean <http://www.theregister.co.uk/2011/12/14/transatlantic_balloon/> while being tracked by ham radio technology. Then the US Air Force contracts with SETI <http://www.seti.org/node/905> to check newly-discovered planet Kepler-22b for intelligent life. Just how far did that balloon go, anyway?

Knowing what we do about wireless technology, I'm sure that many hams know why we are asked to turn off our electronic devices at takeoff and landing. For the lay audience, this Marketwatch article <http://www.marketwatch.com/story/please-turn-off-all-electronic-devices-really-2011-12-13?siteid=nwhpf> is not totally accurate in its technical descriptions but it does reinforce the message that the reason for turning off your devices is not just made up.

Who needs a dupe sheet when you can memorize 2660 random numbers per hour? Not bad - perhaps the new memory champ <http://games.yahoo.com/blogs/plugged-in/21-old-memory-champ-breaks-records-193703911.html> could be put to work at an IARU Headquarters station! (Thanks, Andy

N2NT)

The UBA International Prefix Hunt
<http://www.uba.be/hf/contest-rules/rules-of-the-uba-international-prefix-hunt>
committee has announced new rules to this interesting new contest.
(Thanks, Marc ON7SS/OO9O)

The Internet Archive project has just published nearly every issue of
defunct 73 <http://www.archive.org/details/73-magazine>magazine
<http://www.archive.org/details/73-magazine>, all the way back to
January 1961. While dominated by the editorial adventures of Wayne
Green W2NSD, the magazine also featured loads of simple (sometimes
too-simple) construction articles, expedition adventure writing by Gus
Browning W4BPD and other, and had a loyal following for many year.

You may read the material online or download PDF files. (Thanks Leigh
WA5ZNU via the QRZ.com <http://qrz.com/> website)

Why is radiosport such an attractive competitive activity to many of
us whose athletic years are behind them? Bill N5RKD/G4NDH relayed an
article from The Guardian
<http://www.guardian.co.uk/society/shortcuts/2011/dec/14/me-competitive-cant-help-50>
that summarizes research
<http://uonews.uoregon.edu/archive/news-release/2011/11/researchers-find-risk-taking-behav
ior-rises-until-age-50>
addressing the risk-taking and competition of people between the ages
of 25 and 50. It doesn't address radio contests specifically but the
parallels are clear.

Web Site of the Week - Hams love maps, map software, and
map-plications! Here's an online applet
<http://hp.vector.co.jp/authors/VA011609/azmeqdist_e/azmeqdist_e.html>
to create an simple azimuthal-equisdistant map centered on any location
you care to specify. The map can be captured to a graphic file by using
the PrntScrn key on Windows computers and made into a very nice control
or switch label. (Thanks, Wes W3WL)

WORD TO THE WISE

Here are some good words about Elmering posted by Mark WD4ELG: "I
promised my Elmer (W4ZM, SK) that I would always help those who asked
for it, and never denigrate or ridicule any question. I also promised
my Elmer that I would never be afraid to ask questions and look for
ways to learn more."

==> SIGHTS AND SOUNDS

Some may be wondering what happened to the Radio Amateur Society of
Thailand club station HS0AC in the recent round of flooding in Bangkok.
Champ E21EIC sent some photos <http://www.qsl.net/rast/> of the station
after it spent two months underwater - there will be a long rebuilding
process.

Wow - here's a serious radio location! Of course, it's on Saipan, so it might be a bit far for the annual club outing on Field Day. Nevertheless, this video <http://www.youtube.com/watch?v=X7EM0jtFtmw&feature=youtu.be> shows how AH0BT set up their station for the 2011 CQ WW CW contest. (Thanks, Steve N2IC)

Walter PP5WG sent links to some videos by PP1CZ of young contesters operating from ZX5J during the recent ARRL 10 Meter contest. (Video 1 <http://youtu.be/4oB6st0cwDc>, Video 2 <http://youtu.be/ECzOdJig_2A>, Video 3 <http://youtu.be/0gVr0FtsDz4>, Video 4 <http://youtu.be/UtC_DJm2YVo>) We will contact these operators many times in the coming years!

Here are two photos <https://picasaweb.google.com/115693317429195427637/WirelessMuseumPJStation> of the original W1BB station on display in the New England Museum of Wireless and Steam <http://newsm.org/> in East Greenwich, Rhode Island. The museum also includes a collection of radio history, including

the Massie "PJ" station, which was moved from the original Point Judith, RI location to the museum site. Dave N7RK also presents a 1947 picture of W1BB's station at the bottom of his personal web page <http://n7rk.com/w6bam.html>. (Thanks, Gus KB0YH)

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X speaks for all when he says, "It was certainly a treat for everybody to have good activity once again for the 2011 ARRL 10 Meter Contest. I'm especially happy for those of us who weren't licensed for the last solar peak around 2001 and are experiencing the pure joy of good 10 meter conditions for the first time." How good was activity? "As of 10:30 AM Monday, we have received 4,254 logs for the 2011 10 Meter Contest. This is an all-time record for this contest and we still have three weeks left until the log submission deadline!" This could be a 5000-log contest!

In other ARRL Contest news, certificates for the 2010 ARRL International EME Competition have been shipped along with ARRL Club Competition gavels.

Stew Perry log-checker, Tree N6TR writes, "One of the exciting "behind the scenes" aspects of the Stew Perry contest is seeing how the scores keep growing as more low power and QRP logs show up. Most scores have already grown 10 percent (from the claimed score)." You can find a link to the current scores on the Stew Perry web page <http://web.jzap.com/k7rat/stew.html>. This is why it is important for all of the low power and QRP stations to send in their log - to make sure those who worked them get full credit. More than 400 logs have already been submitted - perhaps the 1000-log level will be reached! Results for the October 2011 PreStew contest are also posted on the same website.

Results of the 2010 ARI DX International Contest
<http://www.ari.it/images/stories/diplomi/ARIDX-2010-DX-RESULTS.pdf>
(yes, 2010) are available with 2011 to follow shortly. (Thanks, ARI HF
Contest Manager, Bob I2WIJ)

Results for the 2011 Texas QSO Party <http://www.txqp.net/> have been
finalized and are now available on the contest website. (Thanks, TxQP
Coordinator, Chuck NO5W)

Official results for the 2011 EU HF Championship are now ready,
verified by the SCC Contest Committee and published on the SCC web page
<http://lea.hamradio.si/scc/euhf/euhfc.htm>. All UBN reports
<http://scc.hamradio.si/euhf/2011/ubn/> are publicly available as
usual, too. (Thanks, SCC Contest Manager, Robert S57AW)

The brand-new 10 Meter RTTY contest had 675 logs submitted according to
the "logs received" web page
<http://rttycontesting.com/tenmeterrttycontest/logs.html>. That's
excellent for a brand-new contest! (Thanks, Don AA5AU)

N6TV has been studying the raw data from the Reverse Beacon Network and
has prepared a tabulation of the most spotted stations
<http://reversebeacon.blogspot.com/2011/12/rbns-most-spotted-stations-in-cqwwcw.html>
from the recent CQWW CW Contest. (Thanks, Pete N4ZR)

Results of the 2011 Ukrainian DX Contest
<http://urdxc.org/results2011.php> are now available online. (Thanks,
Leo UT7CL)

OPERATING TIP

As you tune the bands next week, here are some ways to wish a Happy New
Year to your brothers and sisters around the world:

Xīn Ni�n Ku�i L� (Chinese)
Nouvelle ann�e heureuse (French)
Gl�ckliches neues Jahr (German)

==> TECHNICAL TOPICS AND INFORMATION

There's still plenty of low-band DX to be worked, even with the recent
solar activity. Guy K2AV has designed an inverted-L antenna that uses a
folded counterpoise. You can learn all the details of this antenna on
W0UCE's website <http://www.w0uce.net/K2AVantennas.html>. Those readers

living on a small lot or otherwise without a lot of space may find this design useful. Additional information can be found in the 2011 archives for the Topband reflector <http://lists.contesting.com/mailman/listinfo/topband> - search for the thread title "Best small space antennas". You can read more about propagation, particularly on 160 meters, on Carl K9LA's website <http://myplace.frontier.com/%7Ek9la/>.

Instead of looking for plastic caps that cover the end of hollow boom tubing, Don N8DE uses soft rubber balls that fit inside the end of the boom. He says that they last quite a bit longer than caps on the outside of the boom.

Rovers and portable operators may be interested in this Instructables "how-to" article <http://www.instructables.com/id/Print-Waterproof-Plastic-Maps/step9/Peel-a-Page-from-the-Clear-film/> about printing plastic maps that are waterproof and foldable. Not laminating but a process that uses sandwich and garbage bags and an ink-jet (not laser) printer. There are a number of steps involved but the process looks do-able. Also on the Instructables website is this neat collection of 24 different "radio hacks <http://www.instructables.com/id/Radio-Redux/>" that transform ordinary AM/FM receivers into completely different animals. You may find this thought-provoking for ham radio applications, too!

If you want to know why powdered-iron cores are usually specified over ferrite cores for RF transformers on the lower HF bands, Guy K2AV laid out some interesting history <http://lists.contesting.com/_topband/2011-12/msg00420.html> on the Topband reflector.

Here's an interesting story on "Big Batteries <http://www.designnews.com/author.asp?section_id=1395&doc_id=236610&cid=NL_Newsletters+-+DN+Daily>" that might get you thinking about replacing that generator! We're not talking about a pack of D-cells, here!

Paul W9AC mentioned an alternative to EZNEC - 4Nec2 <http://home.ict.nl/%7Earivoors/> - which is free from author Arie Voors. 4Nec2 will also open EZNEC files and supports the pro NEC/4 modeling engine if a license for it is purchased through Lawrence Livermore National Laboratory.

If you have a soldering iron or gun tip that is badly oxidized, the way to clean it right up is to use a sal ammoniac block (available at stained-glass window craft suppliers, for example) or a soldering iron cleaning paste such as from soldering equipment manufacturer Hakko <http://www.hakkousa.com/>. In both cases, avoid breathing the fumes given off as the tip is chemically scoured. (Thanks, Rod W7ZRC)

EDN magazine recently published a short online article by Dan KB6NU called "Build Something! <http://www.edn.com/blog/Voice_of_the_Engineer/41494-Build_something_.php>" about kit-building for ham radio. He lists several websites that provide kits and technical information. And they have also published the ever-popular Christmas tree light tester <http://www.edn.com/article/505111-Simple_tester_checks_Christmas_tree_lights.php> article, too!

A cover for your crank-up tower hoisting motor can never hurt, but if you need a replacement, Dan K0DAN recommends motors rated for "wash-down service". This is not a "submersible" motor but is rated for wet environments such as being exposed to the weather or getting spray-washed on a regular basis. Dan also notes that "even a wash-down motor can have its problems....those little compartments which contain the control relays, starter caps, etc., can leak, and should be inspected periodically, gaskets replaced, also protected with a bead of silicone caulk. If your motor is exposed to a lot of blowing rain, ice melt, etc., take steps to identify the source and protect the motor. Run the motor frequently...lack of use is a definite no-no. Change the oil in the gearbox once a year and inspect/lube pulleys, bearings, etc. A small amount of annual preventative maintenance will go a long way to extending the life of your motor, but eventually they will all need replacement."

Ken WA4MNT devised this terrific homebrew PCB holder <http://www.qrpbuilder.com/downloads/pcb_holder_you_can_build.pdf>. The dovetail groove prevents any slipping of the board from the fixture, with minimal clamping pressure. All of the building details and even a kit of machined parts for assembly are available online.

A comprehensive cross-reference for F connectors <http://www.beldenbroadband.com/pdf/LRCHB-DROP.pdf> has been published on the Belden web site. Some of the graphics don't seem to display properly but the text is OK and the connector table is fine. (Thanks, Roger N1RJ)

Another "junkyard find" was described by Ron N4XD as part of his quest to build a remote tune control for a vacuum variable. "I...was digging around...(and)...found an old broken car power antenna. Opening it I found it had a quite large motor, 12V of course. I used the large "wheel" that...gave me a slower rotation which turned out to be the perfect speed."

Many battery-powered accessories consume small amounts of power at all times, whether or not they are being used; boom mike preamps, for example. This wastes most of the battery energy but an on-off switch is often left out of the design! Pulling the batteries means a battery hunt every time you want to use the device. Here's an alternative - cut a small piece of plastic from one of those indestructible clamshell packages. Slip the plastic between one battery terminal and the battery, opening the power circuit (in most cases) - voila! Power switch! You can even close the access panel normally. If you lose the

plastic, so what? You can even use a piece of paper or cardboard in a pinch.

The end of the pre-holiday season can be a boon for hams - take a look in the lighting display bin! For example, as of 19 December, my local Target was having a 30% off sale on all electrical stuff related to decor - including a heavy-duty outdoor-rated extension cord with outlets in the middle and at each end. I immediately thought, "Field Day!"

Technical Web Site of the Week - The Design News story "Engineer's Toy Becomes a Profession <http://www.designnews.com/author.asp?section_id=1395&doc_id=235912>" will certainly bring forth a lot of old memories as it describes the discontinued building sets one couple decided to manufacture. Growing up with electricity and electronics kits were part of many ham childhoods - a parallel universe! If you hurry, there's still time for it to be delivered before Christmas morning!

==> CONVERSATION

Received and Understood

The top three US multi-op teams comprised about 36 operators and reported about 36,000 QSOs during the 48 hours of the CQ Worldwide CW contest. Add in the other multi-op teams around the world and you have a very large, very happy family making an extraordinary number of contacts. Imagine what you would see if you were watching from orbit with some "radio spectacles"!

These are wonderful experiences - if you've never participated in a big multi-op team, you should put it on your "gotta-do" list. It's a shared experience like few others in ham radio. The "gab" files of inter-station chit-chat are priceless records of the fast-paced teamwork and teasing only hinted at in the post-contest writeups. The post-contest pizza, the pre-contest repairs, stepping over the sleeping operators between shifts...it's all part of the game.

Single-op is certainly challenging and fun, too, with participants doing everything from part-time efforts to full-bore, Sunday-afternoon-sleep-deprivation-never-left-the-chair marathons. When you think about all of these different operators - thousands of them - distributed around the planet and taking to the airwaves in one big multi-band pileup...well, it is a wonderful feeling.

Although we are often solitary creatures, building and testing in our basements and shacks, when contest weekends roll around we become brothers and sisters in arms. If you think about it, probably some of the most profound personal experiences in our lives are those which take us "out of ourselves" and make us part of a much larger experience, even if only temporarily. Contesting certainly has the capability to be one of those experiences.

Writing and editing this newsletter, I'm very aware of the 25,000 readers, more-or-less, around the globe, any one or several of whom I may put in my log "on any given weekend." Hearing your familiar calls pop up out of the static is a great feeling, too, just as traveling to a multi-op builds up the anticipation I feel at seeing my friends and putting my shoulder to the wheel along with them. Perhaps this makes the Contest Update a kind of very, very large multi-op?

And I am most grateful to be part of those teams and the ham radio family in whatever capacities I can offer. There is so much we share - I hope that generous ham spirit is sprinkled into every heart during this holiday season and throughout the coming year. Ham radio is an activity in which no one can truly engage alone. There always has to be someone on the other end, doesn't there? Yes, there does have to be an essential connection, so as we close out 2011 my message to you is, QSL my friends, received and understood.

73, Ward N0AX

==> CONTESTS

December 21 , 2011 - January 3, 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Straight-Key Night--CW, from Jan 1, 0000Z to Jan 1, 2400Z. Bands (MHz): 3.5-28, 50+. Exchange: General QSO information. Logs due: Jan 31. Rules <http://www.arrl.org/straight-key-night>

RAEM Contest--CW, from Dec 25, 0000Z to Dec 25, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial and lat/long in degrees. Logs due: Jan 25. Rules <http://www.raem.qrz.ru/>

DARC Christmas Contest--Phone,CW, from Dec 25, 0830Z to Dec 25, 1059Z. Bands (MHz): 3.5-7. Exchange: RS(T) and DOK or special station code. Logs due: 3 weeks. Rules <http://www.darc.de/referate/dx/contest/xmas/en>

SKCC Straight Key Sprint--CW, from Dec 28, 0000Z to Dec 28, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the 4th Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/>

NAQCC Milliwatt Sprint--CW, from Dec 29, 0130Z to Dec 29, 0330Z. Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

New Years Snowball Contest--Phone,CW, from Jan 1, 0000Z to Jan 1, 0100Z. Bands (MHz): 3.5. Exchange: RST, serial, AGB number. Logs due: 3 weeks. Rules <http://ev5agb.com/index.htm>

SARTG New Year RTTY Contest--Digital, from Jan 1, 0800Z to Jan 1, 1100Z. Bands (MHz): 3.5-7. Exchange: RST, serial, Happy New Year in your language. Logs due: Jan 31. Rules <http://www.sartg.com/>

AGCW Happy New Year Contest--CW, from Jan 1, 0900Z to Jan 1, 1200Z. Bands (MHz): 3.5-14. Exchange: RST, serial, AGCW number. Logs due: Jan 31. Rules <http://www.agcw.org/>

VHF+ CONTESTS

ARRL Straight-Key Night--CW, from Jan 1, 0000Z to Jan 1, 2400Z. Bands (MHz): 3.5-28, 50+. Exchange: General QSO information. Logs due: Jan 31. Rules <http://www.arrl.org/straight-key-night>

SKCC Straight Key Sprint--CW, from Dec 28, 0000Z to Dec 28, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the 4th Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/>

1203. BMI Nitelogger tape recorder controller operating voltage (?)

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-21 10:48:10 UTC
From: ki4rwp@gmail.NoSpam.com
Message-ID: <4ef1b718.1404093@news.localnet.com>

Cross-posted to: alt.radio.amateur,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.misc

Perhaps someone could help.

I have an old (1990's) BMI Nitelogger (II?) and need to know the voltage used by this device. I have a Condor 9 volt 9 watt supply that I think may have been originally included with it, but am unsure and don't want to burn it up testing.

Have several different possible "wall warts", thus my problem.

Thanks.

==> ARMY MARS PHASING OUT WINLINK

The Department of the Army has announced that it has begun to take
steps to phase out the use of the WINLINK <http://www.winlink.org/>
System. The military chain of command that governs Army MARS feels that
the Internet portion of WL2K leaves the system significantly open to
possible intrusion. To deal with this it plans to replace WINLINK with
a newer military e-mail system that has extensive protection against
any form of intrusion.

To replace the WL2K system, Army MARS will be expanding on the concept
of a national network that is voice, RTTY, MIL-STD 110A and PACTOR
capable. The focus of digital communication will be MIL-STD 188-110A,
wide shift RTTY, and PACTOR III. PACTOR will become even more important
as the new areas of focus will be "Peer to Peer" and "Keyboard to
Keyboard" PACTOR communications. Amateur modes such as MT-63, OLIVIA,
and WINMOR, which cannot be used by the military will be eventually
phased out as well.

A large contingent of skilled volunteer MARS operators will be required
to make this system work effectively and this is where current and
```

prospective Army MARS members will be needed. The goal will be to help Army MARS return to what it is really supposed to be: A radio-only system to relay long haul traffic across the CONUS and OCONUS.

While these changes will affect Army MARS nationally, they are not abandoning state and local agencies. They are just moving away from giving them a winlink.org e-mail address. As they move forward, Army MARS will be able to offer these agencies the ability to relay traffic across the MARS radio-only network to anywhere across the country including such places as the Pentagon, National Guard Bureau, and the U.S. Army for requesting military support in a disaster. - Thanks, Mike Corey, KI1U, ARRL Emergency Preparedness Manager

==> ADD TELEVISION TO YOUR ARES TOOL KIT

This is a TV success story for a local ARES group. The Boulder County, Colorado, ARES group (District 11), BCARES, has experienced much success working with our county's emergency services organizations; in particular, fire and law enforcement. BCARES's tool kit includes all of the usual ham services, including HF/VHF/UHF voice communications, repeaters and various digital modes on HF plus packet on VHF/UHF with back-bone linked digipeaters. But, what Boulder County Public Safety lacked most was the specialty mode that we had to offer: television. Amateur Television (ATV) is the one BCARES capability that really excites our served agencies.

We started offering TV services 20 years ago at the encouragement of Captain Bill McCaa, K0RZ, of the Boulder County Sheriff's Office. McCaa was in charge of all of the Sheriff's communications and computer operations and the county regional 911 center. Over the past few years BCARES has received many more requests for assistance using TV than for all other communication modes.

TV offers the agency information in ways never imagined by us or them. It provides them with situational awareness, a buzzword for what is happening on the ground. It helps remove the need for many voice communication exchanges for information that is already contained in the video imagery. Television allows the Incident Commander at the Incident Command Post (ICP) to actually see what is happening at the scene(s) of the incident, be it a fire, flood, hazmat issue, riot, or SWAT operation. With this information, the Incident Commander is better able to make appropriate command decisions. Via our 2 meter, TV net controller, the Incident Commander is able to request BCARES cameras provide him with specific images and information. We are able to routinely provide television and other communication services in a completely infrastructure free manner.

Many times every year, BCARES is asked by our local law enforcement and fire departments to provide TV coverage of both real emergencies and also multi-agency training exercises. These have included large, forest fires, flash floods, hazardous materials incidents, civil disturbances, large political demonstrations and protests, Halloween on the Pearl St.

Mall, University of Colorado football games and SWAT operations. Boulder County ranks as the leading flash flood threat zone in the state of Colorado and BCARES is specifically written into County emergency planning.

BCARES' shining moment occured in September, 2010 when the worst forest fire in Colorado history broke out in Boulder County. The Four Mile Canyon fire burned over 6,400 acres of forest and destroyed 166 homes. BCARES assisted firefighters by providing live TV coverage from mountain tops back to the 911 center for a week. At the end, BCARES was credited with saving several homes. See the related article in May, 2011 QST.

When most hams think of ATV, they immediately assume its SSTV. This is not what BCARES does. Our TV is commercial grade, analog NTSC, real-time, live video with full color and sound transmissions. On the 70 cm band, we run full 6 MHz bandwidth, vestigial upper sideband (VUSB) TV transmissions. We use the same frequencies as used by cable TV. This allows our TV signals to be received directly on unmodified, cable-ready, TV receivers. For example, cable channel 57 equals 421.25 MHz, and channel 58 equals 427.25 MHz, et cetera. We also use the amateur 23 cm and 13 cm bands, for FM-TV.

A few Boulder County hams have their own home ham TV stations. With the exception of a Monday night TV net, there is little routine ham TV activity in the county. However, when we have a BCARES operation going, there may be as many as four or five TV channels lighting up and becoming active simultaneously on the 70 cm and 23 cm bands. Out of the 80+ BCARES members, about one half are TV trained and capable of operating our TV equipment.

When using TV for ARES operations, the same FCC rules and guidelines apply as for voice and data transmissions. We use common sense and decency along with the FCC rules to determine what are appropriate pictures to transmit. BCARES has turned down some requests for TV, typically for foot and bicycle races, when we determined they were for commercial, rather than bonafide public safety purposes.

BCARES uses commercial, off the shelf, consumer grade, Sony video camcorders. Our latest cameras are high-definition, but we only transmit conventional composite, NTSC, standard definition pictures. Using 1080i, high-definition cameras still results in much better quality images, even when transmitted in analog 480i, standard definition. The Sony camcorders include an infra-red, night vision mode capability, which has been found to be extremely useful for low light operations. For example, images we provided to the Fire Chief of a 2002 forest fire on the outskirts of Boulder offered extremely revealing, night time hot smoke clouds that were not at all obvious to the naked human eye. Through a long telephoto lens, the chief was able to follow the progress of his fire crews advancing up the mountainside towards the fire line.

In our 911 center equipment cache, we have several complete, portable TV transmitters packaged in backpacks. They are complete ready to go kits with Sony HD-TV camera, tripod, transmitter, antenna and battery. A Diamond SRH-999, flexible, 70 cm antenna is mounted high on the camera tripod, with a coax feed from the transmitter in the backpack. We use a 12 V, 7 amp-hour battery, which is sufficient to allow continuous, key-down, TV transmission for more than three hours.

Television has proved to be very useful to the Boulder County public safety agencies and as a result has gotten a lot more hams active in public service. There is nothing worse than having a group of dedicated ARES volunteers that never get called upon to serve. After awhile they lose interest. Then, when they are really needed, they are not there or maybe worse, they are untrained. With TV, that has happened far less to BCARES. We get called upon a lot. We recommend that other ARES groups consider adding TV to their ARES tool kits. -- Jim Andrews, KH6HTV, Boulder, Colorado ARES; TV Repeater Trustee W0BCR

==> WESTERN PENNSYLVANIA ARES: NBEMS FOR DATA COMMUNICATIONS

Narrow Band Emergency Messaging Software (NBEMS) is an open source software suite that allows Amateur Radio operators to reliably send and receive data using nearly any computer (Windows, Mac, and Linux) and any analog radio without requiring a dedicated digital infrastructure or specialized modem hardware. NBEMS works on both VHF/UHF FM and on HF. In an on-line presentation, readers can learn the basics of sending and receiving data using Fldigi, and how to verify file transfers with Flwrap. They will see how to easily send and receive verified text messages using Flmsg. NBEMS is the standard digital emcomm package for Western Pennsylvania ARES.

Advanced NBEMS

In a follow-up presentation, operators can also learn how to send and receive ICS-205, ICS-206, ICS-213, ICS-214, and ICS-216 forms in addition to ARRL Radiograms with Flmsg; and about new high speed modes in NBEMS. They can also see how to deal with large data files using Flwrap data compression and Flarq. Readers can also see real world through-put benchmarks and receive recommendations for how best to send data, and how to make a monitoring station automatically handle changes in NBEMS modes.

Click here <http://www.arrl.org/nbems/> for these on-line video presentations. - ARRL Web site

==> LETTERS: A TORNADO, AND LESSONS LEARNED

While I was unharmed and under no serious threat, I decided that having a tornado hit my street was the perfect time to test some of what I practiced with ham radio and emcomm. Several things went wrong, mostly due to my lack of preparedness. Trees were down, and so was power, cable TV, and the Internet.

I have an iPhone, and I thought I could find a hot spot. No luck: "Data services not available." The voice telephone of the iPhone worked, but only at times. Lesson: Cell phones are not reliable, even "smart" phones.

I had received an inquiry about conditions on my street and wanted to reply via e-mail. I decided I could use WL2K <http://www.winlink.org/> and WINMOR <http://www.winlink.org/WINMOR> via my HF radio as my antennas were intact. I loaded RMS Express <http://www.winlink.org/ClientSoftware> and composed my health and welfare response. I decided that I would not only send the e-mail to the friend that inquired, I would also copy it to my ARES DEC, ARRL SM, MARS commander, and other officials. But their e-mail addresses are not in my RMS Express address book, and I could not get into my e-mail account on-line to get their addresses. Another lesson learned: Have a hard copy list of important e-mail addresses.

I shrugged this problem off, and decided to send the single e-mail via RMS Express and WINMOR. I boot the modem only to receive a message informing me that it failed to initialize. Despite several attempts, I was never able to initiate a connection. Since the Internet was down, I could not simply telnet via Winlink. There is also no 2-meter nor UHF packet node within simplex distance for WL2K via packet. So, I gave up on WL2K.

I should point out that the failure was not due to WL2K; it was my failure. In two years of regular WL2K use via WINMOR, I had never made a connection with my Internet down. The problem was due to a port conflict, possibly in my router or PC firewall. The problem disappeared as soon as the Internet came back. Lesson learned: Test your WL2K capability without the Internet.

At this stage of my tornado evening, I am still a total communication failure. I considered alternatives: It was Monday night at 8:45, and I remembered that I am NCS for the 9:00 ARES/RACES net on my local wide-area UHF repeater system. What more could you need for getting a message out? The W2SB repeater was working well and my leaning antenna was still indicating an S9 signal back from the machine. I called up the net and asked for check-ins: Not a single station checked in. Despite a good active ARES group for drills, we often have difficulty getting more than 2-3 members to check in to the nets. This night of a tornado emergency, no one checked in.

I next considered PSKmail <http://pskmail.org/>. I moved to the 30-meter frequency where PSKmail servers are known to exist. I executed a "ping" via THOR 22 mode <http://www.w1hkj.com/FldigiHelp-3.20/Thor.html>. Lo and behold, two servers responded. I connected right away to the strongest one and executed the "send e-mail" command. The e-mail began to transfer but an old unsent e-mail in my outbox was sent first. I then spent the next 20 minutes in ARQ ping-pong and my health-and-welfare e-mail failed to transfer. I tried the other server and got a good connection immediately. Another twenty minutes of ARQ ping-pong and I gave up,

with the message failing to transfer. A few weeks earlier, I had discovered some issues with PSKmail and the authors had published fixes via an updated release of the software. I failed to install them when they were released, thinking I would do it "when I get time." Too late, I had no Internet to download it. Lesson learned: First, I failed to check the outbox and remove unimportant e-mail. In a real emergency, where power sources are scarce, wasting time and power due to an old unsent e-mail is not good. Second, I failed to update a software release that eliminated known communication problems. I did not get that e-mail out from my emcomm station, and I am the ARES EC! My friend eventually got a text message to me and I squeak out a reply via cell phone.

Later than night I switched to 3583 kHz and 7036 kHz where several stations were clearly audible and enjoying rag chews in digital modes. I was able to copy their QSOs and saw that most were using Fldigi <http://www.w1hkj.com/Fldigi.html>. With Fldigi I can switch to NBEMS <http://www.arrl.org/nbems> mode, and send e-mail to any station on frequency that also has Fldigi. The receiving station can relay the message on or pop it in to the Internet, an easy solution. By this time I did not need to send an e-mail, so I did not try. I had simply forgot about this option.

I then also remembered that I had missed two NTS nets that were easily within range on 80-meters. I could have sent a good ol' ARL ONE. I had forgotten this useful option, too.

Bottom Lines

I failed to fully test my station under exact conditions that would be encountered without the Internet. I failed to program my emergency communications e-mail software with important e-mail addresses. I failed to have a hard copy of my important e-mail addresses. I failed to realize that important information within a Gmail account (and other Web-based services) is not available if the Internet is down. I failed to perform critical emcomm software updates in a timely manner. I failed to write out my personal communications plan. (I had written the county ARES plan, but not my own!). Such a plan would not have caused me to forget two emcomm methods I could have easily used (NBEMS and plain old NTS). I hope your readers can learn from my mistakes. -- Andy O'Brien, K3UK <k3ukandy@gmail.com>, Emergency Coordinator, Chautauqua County, New York

==> LETTERS: COLLECTIONS OF SET SCENARIOS NEEDED

This may have been brought up in the past, but I was wondering if your readers knew of any collections of practice scenarios that could be perused by those wishing to provide an SET that is both pertinent and interesting, if not unique. It seems that it is often difficult to make up a decent incident; a pool would share good ideas, as well as spur some new ones. I would appreciate any information your readers may have. -- Jan Woldseth, KB6FMZ <jwoldseth@hotmail.com>, DEC4, Sacramento

Valley, California ARES

Training: COML -- TYPE III Communications Unit Leader

During all-hazards emergency response operations, communications among multiple jurisdictions and disciplines--including emergency medical, fire, and law enforcement services--is essential. Unfortunately, the absence of on-scene communications coordination has often compromised critical operations. To close this capability gap, the Department of Homeland Security's (DHS) Office of Emergency Communications (OEC) in partnership with the Office for Interoperability and Compatibility (OIC), the Federal Emergency Management Agency (FEMA), National Integration Center (NIC), and practitioners from across the country developed performance and training standards for the All Hazards Type III Communications Unit Leader (COML) as well as formulated a curriculum and comprehensive All-Hazards Type III COML Course.

The Type III COML course trains emergency responders to be communications unit leaders during all-hazards emergency operations, significantly improving communications across the multiple disciplines and jurisdictions responding to an incident. This COML training will qualify emergency responders to lead ICS communications units if they possess the necessary prerequisites, including knowledge of the following: local communications; communications systems; and regional, State, and local communications plans. COML responsibilities include developing plans for the effective use of incident communications equipment and facilities, managing the distribution of communications equipment to incident personnel, and coordinating the installation and testing of communications equipment.

Among other prerequisites, the COML candidate must complete the following training courses:

· IS-700 -- Explains the purpose, principles, key components, and benefits of NIMS. The course also contains Planning Activity screens, allowing participants to complete planning tasks during this course.

· IS-800b -- Introduces participants to concepts and principles of the National Response Framework.

· ICS-100 -- Introduces ICS; provides the foundation for higher-level ICS training; describes ICS history, features, principles, and organizational structure; and the relationship between ICS and NIMS.

· ICS-200 -- Provides training on, and resources for, personnel who are likely to assume a supervisory position within ICS.

· ICS-300 -- Provides training on, and resources for, personnel who are required to implement advanced application of the ICS.

NIMS Compliant: The National Incident Management System (NIMS) provides a consistent, nationwide approach for agencies to manage emergency response operations. Recognized by the FEMA/NIC as supporting NIMS, the

Type III COML course is being made available to States and localities. -- DHS/FEMA

==> R. KENT TEVAULT SCHOLARSHIP FOR EMERGENCY COMMUNICATIONS

The DuPage County (Illinois) Amateur Radio Emergency Service (ARES) has officially launched the R. Kent TeVault Scholarship In Emergency Communications. The scholarship program, which was named for the team's founder and first Emergency Coordinator, was created to further emergency communications within Amateur Radio.

The R. Kent TeVault Scholarship in Emergency Communications has been designed to offer a scholarship to encourage emcomm training in general, and for the benefit of the DuPage County ARES team specifically. This scholarship will reimburse selected Amateur Radio operators who take and successfully pass the ARRL Introduction to Emergency Communications Course (EC-001). A complete description of the program and an application can be found on the team's web site at www.dupageares.org <http://www.dupageares.org/> on the "Emcomm Scholarship" page. -- Michael J. Schulz, W9MJS, EC, DuPage County Amateur Radio Emergency Service (ARES), Illinois

==> ARRL ORANGE SECTION HAMS RECOGNIZED

On October 28, 2011, California's 62nd District Assemblywoman Wilmer Amina Carter recognized local hams at the "Third Annual Public Safety Awards" volunteer recognition ceremony at The Inland Regional Conference Center in San Bernardino, California. Representatives from Congressman Baca's office, city, county and state government offices (San Bernardino County Fire, Fontana Police Department, Rialto Fire Department) were in attendance. Each fire and police department honored their respective nominees with certificates of recognition.

The following were awarded for their communications expertise and volunteerism within their respective public safety agency:

• Jim Eason, AD6IJ, volunteer work with San Bernardino County Fire Department, club affiliation is with the Citrus Belt ARC as president.

• Jon Montgomery, K6FZZ, volunteer work with San Bernardino County Fire Department, club affiliation is with the Citrus Belt ARC as treasurer.

• Louis Johnson, K6UMX, volunteer with the Fontana PD, club affiliation Fontana ARC, ARRL VE, and Elmer.

• Joe Martinez, NJ6OE, volunteer with the Rialto Fire Department, club affiliation President, Rialto ARC, Webmaster for K6RIA.net, and ARRL VE.

Congratulations to all four, and thank you for your services to each of your communities. -- Carl Gardenias, WU6D, ARRL Orange Section Manager

==> LETTERS: WESTERN WASHINGTON SECTION WRITES INTEROPERABILITY PLAN

You published my request for "sharing of District-level and Section-level written plans that outline mutual aid agreements" in the June E-Letter. Unfortunately, I did not receive any responses from other areas of the country. As a result, District 4 in the Western Washington Section wrote an interoperability plan from scratch which has now been signed off by the Emergency Managers and Amateur Radio emcomm leaders in the four counties. This document is available here <http://radio.aberle.net/EmComm-Interop-Plan,v1.0.pdf> for those who would like to see what we came up with. Much more work on the appendices needs to be done, but at least we now have a guiding document that we can build upon. -- Steve Aberle, WA7PTM, ARRL Official Emergency Station (OES), Western Washington Section

==> HAMS HELP SAVE THE LIFE OF FELLOW HAM

It was 10:00 PM as I reached for the power button of my ham radio and call it a night. Just before my finger touched the switch I heard a faint call -- someone was lost and needed help. Naturally, I would stick around to hear more. After all, this is one of those rare moments many hams live for.

Ron, KB6UF was not only lost in the Sierra Nevada mountains but also stuck. While driving alone from Louisiana to California to visit his grandkids for the Thanksgiving holiday the 68 year old missed the exit where he was scheduled to stay at a hotel. So he turned to his GPS. It instructed Ron to turn here and go there. The road turned into a gravel road and Ron knew something was wrong. "I felt like I was going in circles," he later said. He was 8 miles from the main road.

Pitched black and no street lights for miles, Ron hit a ditch. The front wheels of his small truck were in the air and it was clear he was going nowhere fast. He checked his cell phone. No cells. He has a 2 meter radio in his truck. No answers on any local repeaters. He turned to 40 meters, remembering there are usually a bunch of hams on 7.195 MHz.

Within minutes, multiple hams were offering advice; use the low gear, fill in the hole with brush and sand, rock the truck back and forth. Somebody asked if Ron's GPS was working. It was. Ron gave out his coordinates over the air. Now as many as 100 hams monitoring the frequency knew Ron's exact location: in the hills near Mono Lake, California, near the Nevada-California border.

Dave, N5SDO in New Mexico stepped up and became net control. Everyone including Ron can hear Dave. Dave assessed Ron's predicament by asking pertinent questions: Are you alone? How much fuel do you have? Do you have food or water? Is there somebody we can call for you? Ron gave Dave an 800 number to the Sheriff's office. Dave tried the 800 number but it was a non-functioning number.

I thought about that non-working 800 number for a second. Maybe the Sheriff's office discontinued the 800 service due to budget cuts, so I Googled the 800 number and found the local dispatch number to Mono Lake

Sheriff's office in California. I called it. I had to explain I'm a ham radio operator in Chicago and I'm monitoring a man stranded and lost in hills near Mono Lake. The dispatcher said she would bring this info to her sergeant. Ten minutes later the sergeant returned my call. I quickly explained what had been happening over the past 90 minutes. "Does he need a tow or is this a search and rescue?," asked the sheriff. I relayed the question to Dave who then asked Ron. Ron said he was requesting an officer. As soon as the sheriff heard "requesting an officer" he said someone will be there in 30 minutes.

When Ron announced on the radio he could see the lights of the sheriff's car approaching, many hams monitoring the frequency cheered on air. Working together Ron doubled the nylon rope the sheriff had in an attempt to pull Ron's small truck out of the ditch. The rope snapped. Luckily, there was a piece long enough to triple fold the line and that proved strong enough to pull Ron's vehicle free. Again, hams cheered on the air as Ron was following the Sheriff back to town.

The sheriff said, "It's a good thing you had that radio otherwise we would have found you in the Spring. Nobody comes up here this time of year."

HF was the only way Ron was able to get help. Thank goodness he had a good HF mobile or he might have been out there for days (or longer). Several comments were heard stating "that does it, I was thinking about putting an HF rig in the mobile but now I'm convinced and going to do it" after listening in that night.

Thanks to all the hams that helped a fellow ham in need, especially Dave N5SDO in New Mexico, Nick W9ZXT in Illinois, Jerry N0VXE in Colorado, Dan KD0LYK in Kansas and Dave W7DBS in Nevada and of course the Mono Lake Sheriff's Office. -- Henry Schleichkorn, K9KDE, Chicago, Illinois henry@k9kde.com

==> K1CE FOR A FINAL

These are the last words I'll be writing in 2011, and I wanted to close the year out by thanking Mike Corey, KI1U, ARRL Emergency Preparedness Manager, for all of his efforts in editing this newsletter, and for his dedication and enthusiasm, expertise and experience, in managing the ARRL Headquarters' emergency response and field support functions. He does a superb job for all of us.

You can now read my deathless prose in the Public Service column in QST each month. In the January issue, I wrote about the intangibles that make or break an EC, and how to pick a good one in the first place. Check it out! And happy holidays from all of the ARES E-Letter editorial/production staff here in the executive suites tower on the ARES E-Letter corporate campus in Flagler County, Florida! 73's to all, and to all, a good night. -Rick Palm, K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

DXNL 1759 - Dec 21, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

The team of the DX Newsletter wishes its readers Merry Christmas and a
happy year 2012 with lots of DX and QSL cards! May the lived and experienced
Ham Spirit provide much pleasure for the common hobby!

9X, RWANDA
Carl,SM6CPY, will be QRV in holiday style signing 9X0PY between Dec 24
until Jan 7. QSL via homecall.

CO, CUBA, NA-015
Riccardo,IZ1GDB, is going to visit Orelvis,CO6LC, from Dec 22-28.
He may use Riccardos station which produces loud signals in Europe.
QSL via IZ1GDB, direct or via bureau.

CT3, MADEIRA ISLAND, AF-014
Dave,CT3/G3ZXX/p, is working in digital modes, ROS, Olivia and JT65 on
10m-20m (emphasis on WARC bands) from Madeira (AF-014) until Dec 25.
QSL only via e-mail. See also QRZ.com.

EI, IRELAND, EU-115
Don,W4ZYT, is active as EI2IM from Dublin mostly in CW on 80m-10m
until December 28. QSL via homecall.

HS, THAILAND
The clubstation HS0AC has been totally destroyed after the big flood
in Thailand. See also: http://www.qsl.net/rast

I, ITALY
The special event station II0UI celebrates the 150th anniversary of
the unification of Italy until Dec 31. QSL via IZ0TTE.

JD1/OG, OGASAWARA ISLAND, AS-031
Makoto,JI5RPT, will sign JD1BLY from Chichijima Island (AS-031, WLOTA
2269, JCG 10007, Loc. QL17) in CW, SSB and digital modes on 80m-6m
(also via satellite) between Dec 24 and Jan 2. QSL via homecall.

See also: http://www.ji5rpt.com/jd1 and http://twitter.com/jd1bly

R1/M, MALYJ VYSOTSKIJ ISLAND, EU-117
Malyj Vysotskij Island will probably deleted from the DXCC entity list
next year. As far as we know there is no DXpedition planned anymore.

TA, TURKEY
The OMs TA1HZ, TA1GE, TA2AEM and TA1AES are going to activate the
special event station TC9SAM mainly on 40m and 80m from Dec 23-26 to
remember the casualties of the Sarikamis campaign of World War I.
QSL via TA1HZ. See also QRZ.com and http://www.tif.org.tr/tif/en

V5, NAMIBIA
Martin,V5/DL1ZU, is on a trip in the Caprivi strip from Dec 21 until
Jan 13. He is using an IC-706 with Triple Leg and dipole. The main
operating modes will be CW plus PSK, RTTY and SSB. QSL via homecall.

VP8/SS, SOUTH SHETLAND ISLANDS, AN-010
Adrian,EA1CYK, is active from the research base "Gabriel de Castilla"
(WAP ESP-02) on Deception Island/South Shetland (AN-010) signing
EA1CYK/p during his spare time until Mar 2012. He may visit the base
"Juan Carlos I" (WAP ESP-01) on Livingston Island (also South Shetland)
as well. He has been spotted with a good signal on 10m last weekend.
QSL via EA7LS.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Kelly,N0VD, has developped the new DX cluster DX2GO for smartphones.

UPCOMING CONTESTS

Dec 25: RAEM International HF Contest CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-079, JA6, Miyako Islands: Takeshi,JS6RRR, will be QRV as JS6RRR or
JI3DST/JS6 from Miyako Island (AS-079-005, JCC#4714) between Dec 23
and Jan 5, 2012. He plans to be QRV in CW, SSB, RTTY, PSK31 and FM on
160m/80m/75m/40m/30m/20m/17m/15m/12m/10m/6m. He also plans to show up
JS6RRR/JS6 or JI3DST/JS6 for one or two times from following islands:
Ikema-jima (AS-079-001) and Kurima-jima (AS-079-003).
QSL via JI3DST (bureau/direct). See also QRZ.com.

EU-038, PA, Noord Holland/Friesland/Groningen prov. group: Marcel,PD5MVH/p,
plans to activate Vlieland Island (WLOTA 0773) from Dec 23 until Jan 6.
QSL via homecall (bureau/direct).

EU-146, PA, Zuid Holland/Zeeland Province group: Cecile,ON5TC, Ronald,ON5TQ, Michel,ON6QO, and Peter,ON8VP, will show up as PA/homecalls from Schouwen-Duiveland (WLOTA 3089) mainly in CW on 40m/30m/20m (maybe also SSB) from Dec 26-29. QSL via homecall.

NA-015, CO, Cuba: Until Jan 2 Pavel,CO7WT, is looking for other HAMs who want to make UNPROTO-QSO's via ISS and NO-44 satellites (Packet AFSK 1200 mode) with him. QSL via N2CQ.

OC-164, VK6, Western Australia State (S.W. Coast) South group: John,VK6HZ, is expected to show up as VK6ARI from Rottnest Island (WLOTA 2197) from Dec 23-30. He is working holiday style in SSB, PSK and RTTY and is possible also in CW. Listen for him on the usual IOTA frequencies. QSL via VK6HZ (bureau/direct/LoTW).

IOTA approval: The IOTA committee accepts QSLs of following DXpeditions from Sep until Nov 2011 for IOTA credit: 9M2/IZ1MHY (AS-073), 7Z7AA (AS-191) and CE4A (SA-095).

Reminder: The IOTA 50th Anniversary Marathon starts on Jan 1, 2012. More detailed information can be found on the website of RSGB IOTA.

RAC Bulletin 2011-047E - RAC Holiday Office Hours - 2011/2012
2011-12-21

The RAC office will be closed December 24, 25, 26, and 27th.

We will be open December 28, 29, and 30th, and will be available
during core hours which are 10:00 A.M. - 4:00 P.M. Eastern Standard Time.

We will also be closed January 1 and 2nd and return to our regular
hours on January 3rd.

Today is the winter solstice and the shortest day of the year.

Happy New Year, from Dave and the office volunteers, Gary, Mike, and
George.

Frank Greene
Office Manager - Radio Amateurs of Canada

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

1209. Re: BMI Nitelogger tape recorder controller operating voltage (?)

Newsgroup: rec.radio.amateur.misc

NZART Headquarters Infoline Special Issue 32s

23 December 2011

KORDIA NATIONAL SYSTEM AWARD - 2012

Branch 12 have found it necessary to make some small changes to the "Award Rules" and "How to Access the New Zealand Historic Places Register" pages. This has been brought about by a change to the NZHPT website.

To those who are planning to take part and have already downloaded the above 2 pages, please go to http://zl1ux.tripod.com/nsaward.html and download the amended pages.

Page 1 of the Award Rules has an additional item under - "Participants are requested to note the following key points:" regarding the "Advance Search" on the NZHPT website. On the "How to Access the New Zealand Historic Places Register" pages, page 1, under "Using the Register" and page 4 (Fig 4a) have some changes.

Using the previous details for searching the NZHPT website, would not have produced a list of Category 2 historic places for a particular location, a list of Category 1 & 2 historic places.

Regards
Gavin Petrie (ZL1GWP)
and
Phil King (ZL1PK)
Award Custodians

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA PRESIDENT VK3KI SPEAKS:-

At long last, and after ongoing representations by the WIA we seem to be getting
closer to Advanced licensees being allowed transmit power limits comparable to
other countries.

The ACMA has advised the WIA that it intends to accede to the WIA's request that
Advanced licensees may apply for a variation of their licence to permit higher
power from a fixed location on a trial basis from 1 March 2012. The ACMA has

stressed to the WIA that it remains concerned about the risk of interference from the use of higher power.

At the end of 12 months the position will be reviewed by the ACMA.

The ACMA has adopted this approach to enable any particular difficulties to be identified and satisfactory solutions found to, in the words of the ACMA, "enable the trial to progress to appropriate ongoing arrangements from early 2013".

The ACMA will publish the changes to the licence process and forms setting out the further information needed for an application for higher power before 1 March 2012.

While the details are still subject to discussion, the following principles will be applied:

Transmitter power outputs up to 1,000 watts PEP may be permitted, though the emission modes to which this limit will apply are still subject to consideration. It should be noted that lower power limits may be specified in some cases.

The higher power limits will only be permitted on the amateur HF bands where the amateur service is the primary service. The WIA has requested that the band 7100 to 7200 kHz be also included, and this is being considered,

Higher power will not be permitted in certain areas that will be identified by the ACMA on its website.

Licensees will continue to be obliged to comply with the EME requirements.

For the period of the trial, licensees permitted to use higher power will be encouraged to keep a full log of all transmissions on bands where the higher power is permitted, noting in each case the power in fact used.

The WIA's most recent request is fully set out in the November 2010 issue of the WIA's magazine Amateur Radio.

This is a preliminary announcement and further details will be published as they become available before March and after the Christmas break.

The WIA anticipates working closely with the ACMA on this issue.

This is Mal VK3FDSL

Just a reminder that the National Office of the WIA closed for the Christmas break at 4pm Melbourne time on Friday 23rd December. We will re-open at 10am Melbourne time on Monday 16th January 2012.

No examinations or callsign recommendation applications will be processed nor book orders dispatched before the office reopens in January.

We hope all radio amateurs are enjoying their festive season.

HAMS ACROSS AUSTRALIA.

Mt Hotham repeater in service

The Albury Wodonga Amateur Radio Club, after some years and a lot of hard work, has got the VK3RHO 2-metre repeater back on air.

The enthusiasm behind the project came at a cost including some refurbishment, sourcing power and site fees.

The Albury Wodonga Amateur Radio Club is to be congratulated in its efforts which now fills a missing gap in the repeater network in the north-east of Victoria.

It covers a wide area of the High Plains and will be useful during the annual roof-run which is a WICEN event.

If you live in the area give it a try with 147.650 MHz in and 147.050 MHz out.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

What did you find under the Christmas tree? Chances are that some time you will receive a piece of electronics for a gift. Do you realise that the new generation of components contain some very expensive mineral based materials. Most of us are aware of tantalum capacitors and rare earth magnets.

A few years ago, it was worth salvaging old electronics to recover materials such as gold. These days, it appears that what doesn't find its way to land fill gets shipped to impoverished people overseas who "recycle" without the protection of western safety regimes.

Just recently, China placed trade restrictions on the export of rare earth metals to Japan which is claimed to be the world's largest consumer. This sent shock waves around the electronics and manufacturing industries similar to the loss of

epoxy to pot semi -conductors following the Kobe earthquake, 15 years ago. Australian mining industries are gearing up to produce rare earth metals from local resources.

Perhaps the current enthusiasm for restoring "boat anchor" electronics from the valve era is very good training for working with the very rare "unobtainium" bits of the latest pocket sized toys.

I'm Geoff Emery and that's what I think...how about you?

VK5

1941, The first of four ships being built for the Australian Navy slides down the slipway of BHP's newly constructed Whyalla Shipyard.

HMAS Whyalla was commissioned for duty on January 8, 1942. She carried out escort duty on Australia's east coast and later took part in operations in the New Guinea theatre before being attached to the British Pacific fleet as a unit of the 21st minesweeping flotilla.

HMAS WHYALLA was decommissioned in 1947 and sold to the Victorian government for whom she would be employed as a lighthouse maintenance vessel until 1984.

Hearing that the ship was to be sold as scrap, she was purchased by the Whyalla City Council and brought back to Whyalla. In 1987 she was moved back up the same slipway from which she was launched 46 years earlier and relocated to become the centrepiece of the city's maritime museum.

On the weekend of January 7 and 8, 2012 the South Australian branch of the Naval Association of Australia will commemorate the 70th anniversary of the ship's commissioning and the Whyalla Amateur Radio Club will take part in the special celebration by operating from the ship using the special event callsign VI5WHY.

The station will be on air from around 2300 UTC on Saturday January 7 and is especially keen to make contact with present or former naval members. Operating frequencies and modes will be posted on the VKHAM website closer to the event.

Special QSL certificates will be sent to all stations who make contact.

So mark the date January 7 on your calendar.

This has been Alex VK5ALX on behalf of the Whyalla Amateur Radio Club.

WIA DIRECTORS Broadcast 20111225 EWAN VK4ERM

Seasons Greetings to All Listeners from the President and Board of the WIA.

Once again the past year has been an eventful one for Amateur Radio in VK culminating in the release by the WIA on last Thursday, the 22nd of December, of the proposed high power trial by the ACMA during part of 2012.

The supportive staff at our National Office at Andersen House in Bayswater, Victoria, have continued to provide friendly and efficient service to our members and the Board. It would be remiss of me not to mention our appreciation for the skilled volunteer work conducted on behalf of the WIA by very competent and experienced amateurs; we owe these dedicated people a debt of gratitude for their support.

This is a time of travel for many individuals and families to reunite with other family members by air, land or sea. Many amateurs will be among them so if you hear a mobile station calling please answer and keep them company for a while on their journey, especially if it is late at night, to help them safely on their way. There will also be others you may hear who cannot be reunited with their kin for various reasons so why not bring some cheer to their day by answering?

Those of us fortunate to be sharing our time with family and friends in the comfort of our surrounds should spare a moment to reflect on those serving our nation overseas in the Defence Force, Australian Federal Police, Customs, philanthropic organisations and many others and silently wish them a speedy and safe return.

Sadly, some families will have an empty chair at the Christmas table and the mood will be sombre as the occupier will never return.

The New Year is just around the corner and a time when many will make New Year's Resolutions. Besides resurrecting those from this year, which were not achieved, give thought to something you can resolve to achieve in 2012 for the betterment of Amateur Radio in VK.

This has been Ewan VK4ERM for the WIA Board wishing you all a Merry Christmas, a Happy and Prosperous New Year, and safe travelling.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

VK7 and NTARC congratulate Brendan Smith on passing his Foundation Licence assessment. We understand that Brendan has requested VK7FESQ as his call, so we look forward to hearing him on air soon.

Please make Brendan welcome by coming back when you hear him on air and introduce yourself.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

EU threat to Amateur Radio kits

Thilo DL9KCE, reports a threat to amateur radio kits and modified equipment arising from changes to the EMC directive.

Currently amateur radio kits and modified equipment are specifically excluded from the directive but under the proposed changes they would be fully subjected to the EMC directive. The resulting high compliance costs could make it uneconomic to develop and sell kits so killing off the kit market.

If radio amateurs wished to modify equipment it appears they would also incur additional costs and bureaucratic hassle.

IARU Region 1 will respond to it with a letter soon.

Directive 1999/5/EC see ANNEX I
http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:1999:091:0010:0010:EN:PDF

==========

NEWS FROM ARNEWSLINE USA

NATIONAL RADIO AFGHANISTAN ON 40 METERS

Uli Bihlmayer, DJ9KR, reports that National Radio Afghanistan is operating on 7 point 2 MHz in the amateur Radio 40 meter band. DJ9KR says via the IARU-Region 1 website that he monitored the station on November 28th as being centered on 7200 kHz and covering 7195 through 7205 kHz with its audio sidebands.

DJ9KR says that the best way to handle this situation is to inform your nation's telecommunications agency if you are suffering interference from National Radio of Afghanistan and ask them to file an international complaint. Another recommended procedure is to file a report with the Intruder Watch coordinator in your nation.

THE WORLD OF AMATEUR RADIO CELEBRATES THE 50TH ANNIVERSARY OF OSCAR 1

The world of Amateur Radio is celebrating the 50th anniversary of the orbiting of the first ever ham radio satellite known simply as OSCAR, an acronym for the words Orbiting Satellite Carrying Amateur Radio. Bill Pasternak, WA6ITF, is in the newsroom with more:

For those not around back then, OSCAR, now called by many as Oscar One was carried into space at 2041 GMT, December 12th 1961. It was carried aloft by the Discoverer 36 launching vehicle from Vandenberg Air Force Base in California.

After launch the satellite went into a North-South orbit transmitting Morse on a frequency between 144.990 and 145.008. It's said to have had a tremendous signal strength on any direct, overhead pass.

Among the first to hear OSCAR One were the hams at KC4USB which was the Marie Byrd Base at the South Pole. They picked up the signal loud and clear only a few minutes after launch and this is what they heard:

OSCAR-1 Audio clip

Yes, just above the noise a radio amateur or SWL with a fairly decent receiver with a good 2 meter converter could make out the letters H and I that formed the word "hi." And soon the signal was heard by hams in Kodiak, Alaska and by KH6UK in Hawaii. All of these on OSCAR's first pass. The ARRL headquarters' station W1AW heard the first pass on the United States East coast.

Now, in celebration of the 50th anniversary of the orbiting of the OSCAR One ham satellite, AMSAT North America is re-issuing the original Project OSCAR Newsletters. According to AMSAT, the original OSCAR Newsletters were all hand typed back in 1961. Don Ferguson, KD6IRE has scanned these documents announcing OSCAR 1. They are being re-issued via the Amsat News Service bulletins on-line.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

Thanks to the efforts of AMSAT and especially KD6IRE 21st century hams world wide can read the story of the bird that opened the door to space communications to amateur radio operators around the globe.

==========

WEIRD AND WONDERFUL

Milan Illinois National Guard building holds secret message

Recently, a passerby noticed something very peculiar about the addition being added on to the Illinois National Guard building in Milan.

The design in the building containing a secret message.

Dave Mayfield knows a thing or two about radios after collecting and operating them for 25 years. So, when he drove by the Illinois National Guard building a few days ago the design caught his eye.

"Took me just a second at first. I thought maybe it was a random pattern but it's not random at all. It's Morse code," said Mayfield.

But what the bricks say remains a mystery for most. It's estimated only one in thousands would know one wall says, "loyalty" and "duty", while another wall says, "respect" and "honor".

The Illinois National Guard put all seven of the Army values on new buildings built for the 2nd and 123rd Forward Support companies.

Read the full WQAD story at:
http://www.wqad.com/news/wqad-illinois-national-guard-milan-morse-code-secret-message-12162011,0,2308380.story

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

F4FOO is operating from Togo in West Africa until 4 January.
He will be on 20 - 10m using SSB.
The callsign to look for is 5V7MA and QSLs go via his F4FOO home call.

(irts)

SM6CPY is active as 9X0PY from Rwanda between 24th December and 7th January 2012.
His operation will be holiday style on all bands with a focus on 20 through
10 metres.
QSL to his home callsign, SM6CPY

Manfred, DF6EX, has written a program that helps in providing info on which
QSL-Manager/DX-station you can expect a reply via the Bureau or which DX-stations
you better not work or have to spend a lot of money to get their card.

The program has a growing database and it lets you know what stations do not QSL
back or just take your green stamps.

Currently, there are 11500 managers/DX-stations listed, from information
collected over the past 20 years. The best news is that it is free.

Read more about the program at:
http://www.winqsl.com

Or load directly at:
http://www.winqsl.com/winqsl/?page_id=74

No fee at all.

Also, there will be further updates; you just have to register by mail.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

Greek pop music blasts from Turkish Cypriot mosques

The religious affairs directorate in the Turkish controlled sector of Cyprus has
claimed that deliberate interference caused popular Greek-Cypriot radio
programmes to broadcast from mosque rooftops instead of the Islamic call to
prayer.

Due to interference in radio frequencies which link the mosques' PA systems,
Greek pop hits could be heard yesterday blasting through the air.

Where has 2011 gone! It seems that only a short time ago we were reporting the VK9NA DXpeditions and it was the Annual General Meeting season for clubs around VK7 and guess what we are back in the season.

Time flies when you are having so much fun with this great hobby of ours!

We all hope you have a safe and relaxing Christmas and New Year and see you in 2012.

this is Justin, VK7TW on behalf of the VK7 Regional News Team and VK1WIA.

PUBLIC RELATIONS: HAM RADIO TO BE FEATURED PLAYER ON LAST MAN STANDING

Ham radio is coming to network television. This as a part of the plot of the ABC situation comedy "Last Man Standing."

On the show, actor and comedian Tim Allen of Home Improvement fame plays the character of Mike Baxter. Baxter is the married father of three and the director of marketing at an outdoor sporting goods store in Colorado.

Amateur radio will come into play on the show in mid-January when its revealed that Mike Baxter is an avid radio amateur with the callsign KA0XTT. But that's not the only ham radio connection to the show.

Last Man Standing is being produced for ABC Television by John Amodeo, NN6JA. And if you pick up the December edition of CQ Magazine and turn to page 30, you will find an article by Amodeo. One that tells the story of how he challenged his staff to become licensed radio amateurs, and out of those who accepted seven have gotten licensed so far. The reward for those who succeeded was a dual band hand-held radio.

As of this report Tim Allen is not among those who have accepted John Amodeo's challenge, but he tells CQ that he is working on him.

In addition to the CQ article the ARRL has a very nice piece about
Last Man Standing and how it got involved in helping Amodeo to create
the KA0XTT call sign. You can read that on the news pages at www.arrl.org

Hams do their bit after disaster

The flooding that swept through the Philippines has claimed 800 lives after the enormous devastation left by Tropical Storm Washi.

Local hams in the disaster area are now doing their best to help out with relief efforts. The search for survivors continues along with the many burials that are needed.

The Red Cross reports the storm swept away entire coastal villages as it dumped heavy rain triggering mud slides. Some 47,000 people are in evacuation centres. President Benigno Aquino is set to visit the disaster zone.

The storm flooded a river that sent muddy floodwaters from nearby mountains that coated streets.

It has been a bad season for the country with back-to-back typhoons in September leaving many people dead in the northern Philippines.

(Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communication Committee.)

WIA PRESIDENT - THE FINAL FINAL AT CHRISTMAS TIME

The fact that this broadcast is scheduled for Christmas day gives me the opportunity to offer some special comments.

Let me look back for a moment on the year just passed.

I had thought that after the Centenary year last year, this year would be quiet and uneventful.

It hasn't turned out that way, with major issues such as station inspections, WRC 12 and all the work associated with that, and now the move toward higher power.

So many people doing so much in so many ways for amateur radio and the future of amateur radio, our Publications Committee, our contest and award managers, our Assessors and all the trainers, all those who contribute to the clubs, we really do owe much to many people.

To all of you who have contributed to the WIA and to amateur radio, I say thank you.

To all of you who have taken the trouble to tell us personally at hamfests or who have written to us appreciating the work of the WIA, I say a most sincere thank you.

To all of you, radio amateurs and interested in amateur radio, I extend on behalf of the board of the WIA, our manager Mal Brooks and on behalf of Dianne and Margaret, our very best wishes for the Festive Season and for a healthy, happy and prosperous New Year.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-12-23
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

The Team of the VHF-DX-Portal Make More Miles on VHF would like
to send you, your families and friends our best Christmas wishes
and do have a good start into the new Year 2012 - 73s MMMonVHF

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 *

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts
and VHF-DX'ers to join the new survey to identify the "The Best
VHF DX Expedition of the Year 2011". The aim of the survey is to
thank the very hard efforts of those who organized and carried out
so many nice expeditions and trips all around the world on the VHF
bands in the past year 2011. Participation period: 01. January to
31 December - Voting period: 01. January 2012 - 21. January 2012 :
Persons or Groups who organized and carried out some kind of exped.
in the 144 MHz band segment via Meteor Scatter or Earth-Moon-Earth
propagation. Expeditions / Activities have had to be spread out on
the VHF-DX-Portal Make More Miles on VHF in the year 2011 and must
have found their way into the "REVIEW" section of MMMonVHF.
You will be able to vote by selecting a maximum of 5 expeditions
alltogether in TWO categories (MS and EME) by ticking the box in
front of the expeditions. The voting page will be available by
direct link at http://www.mmmonvhf.de/voting.php from up 1 st of
January 2012 until 21 st of January 2012. Results in February 2012.

** HS0AC - Rig's submerged during century flood in HS **

The Radio Amateur Society of Thailand Under the Patronage of His Majesty the King - HS1A - The clubstation of RAST ï¿½ HS0AC ï¿½ was submerged by 2m of waters during the previous century flood ï¿½ which was in the media worldwide - I believe ï¿½ some pictures of the club station after the water tide was gone ï¿½ www.qsl.net/RAST or RAST forum.com RAST and HS0AC lost equipment worth around 200,000 USD (150.000 Euro) incl. our mainstation rig FT-1000 MK Mark V ï¿½ which is believed will not be able to be repaired. RAST settle up an account for donations to help the clubstation getting back on air soon. Donations could be done directly to the club or via paypal to donate"at"rast.co.th There is also a EME activation ï¿½E2Eï¿½ planned during April to help to raise some funds for HS0AC - have a look: http://www.mmmonvhf.de/latest.php?id=4080 (Info from DL2LAH) ï¿½ further details soon ï¿½ GD DX ï¿½ hopefully from HS0AC soon... ** NEW WEB SITE FOR SATELLITE OP'S **

A new French Web site for satellite operators has recently made its debut on the Web. The site features logbooks for all of the popular satellites including the DX bird, AO-7. It is a welcome replacement for the <planetemily.com/ao7> which went offline a few weeks ago. The main feature of the new Web site is the logbooks where you can enter QSO data that will be archived for later reference. There is a field for comments as well. Visit the Web site at: http://aar29.free.fr/sat/index.html
ADDED NOTE: Another great resource for satellite operators can be found at: http://www.papays.com/sat It features grid maps submitted by active satellite operators as well as thousands of recordings from satellite passes over the last two years. If you would like your grid map added to the site, please contact John, K8YSE, at: k8yse"at"amsat.org - SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1041

E2E EME-DXpedition in Thailand around April 2012
I am happy to announce that there will be an EME-DXpedition in
Thailand around 18th of April. A group of Expats (HS0ZFZ, HS0ZFD,
HS0ZGQ and me HS0ZIL) are planning to activate some rare squares
in northeastern Thailand daywise! The special callsign will be
"E2E". The DXpedition will take place in order to assist the "Radio
Amateur Society of Thailand (RAST)", who had lost all their
equipment at the Club Station HS0AC in BANGKOK during last flood.
So any donations for this activity are welcome and will be
transferred to RAST Treasurer. An own website and/or an DX-Blog on
http://www.mmmonvhf.de/ will be setup in the near future. Stay
tuned on these sites for further informations!!! Pictures of the
destroyed Club Station can be seen here: http://www.qsl.net/rast/

** THE K5N GRID ACTIVATION GROUP PLANS FOR 2012 **

LATEST NEWS by Marshall, K5QE, dated 2011-12-20: Hello everyone interested in the K5N Winter DXpedition to DL99-DM90. Enclosed (email at reflector) is a picture of the TV van with the two 6M5X antennas on board. We will raise the mast to about 20ft when we are in the actual operating location. Do you think we can get a permit to drive this down the highway?? It would fall under the WIDE LOAD class..... If everything works out OK, we will drive to Rocksprings, TX on Monday, Dec 26th. We will set up on Tuesday morning and start running shortly thereafter. We hope to have Internet, so look for us on PingJockey. We hope to be there.... SOURCE: 73 Marshall K5QE Member K5N Activation Group to MMMonVHF

** 3DA, SWAZILAND, qrv HF and 50 MHz (EME) **

Operators Phil/G3SWH and John/G3OLU (aka EA5ARC) will be active from the Hawane Resort in western Swaziland between February 21-29th 2012. The Hawane Resort has a well equipped station with Elecraft K3 transceivers, ICOM IC2KL amplifiers, an A4S at 24m and an A3WS at 20m, a wire 4 square for 40m and a vertical for 80m complete with 30 x 20m long radials. Phil informs OPDX that they will use a single callsign for the DXpedition, which is yet to be allocated. Activity will be on CW only on all bands 80-10 meters. There will be no 160, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's Web site <www.g3swh.org.uk> (preferred), direct with SAE and adequate return postage, or via the Bureau. Subject to a good Internet connection, there will be an on-line log on Phil's Web site and daily uploads to LoTW. Phil will issue an update once the callsign has been issued and he has the Web site up and running. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1041

** Activity from Angel Falls waterfall (WW Loc. FJ85RX) **

A 10-man team from the Radio Club of Venezuela plan to be active from the vicinity of Angel Falls waterfall (WW Loc. FJ85RX), the world's tallest (979m) from 3-6 January 2012. Look for them as YX6AJ on CW/SSB/Digi and the Satellites. Operators mentions so far include Lino YY5FRD, Jesus YY5CHJ, Marcel YY5CAR, Wilmer YY5CWM, Alfredo YV5SSF, Edwin YV5HUJ, Jose YV5JF, William YV5VE and Angel YV5NEA. QSL via YV5AJ, direct or bureau. Website: www.qrz.com/db/YX6AJ SOURCE: ICPO Bulletin (16-23 Dec.2011)

** Cambidia, XU, qrv HF and 50 MHz and SAT **

A group of JA operators plan to be active from Sihanoukville
between January 14-22nd. Operators mentioned are Masumi/JA3AVO
(XU7AVO), Takeo/JA3BZO (XU7AEN), Kunio/JA1CJA/JH3LSS (XU7CJA),
Tsuguya/JA3UJR (XU7UJR), Shozo/JA3HJI (XU7HJI pending) and
Tatsuo/JA3ARJ (XU7ARJ pending). Activity will probably be like
last time on 160-6 meters using CW, SSB and Digital modes.
Also look for satellite activity on 2m and 70cm. QSL via their
home callsigns. SOURCE: Ohio/Penn DXBulletin #1040

** PJ7, SINT MAARTEN, qrv HF and 50 MHz **

A group of Polish operators are planning to be active as PJ7PT
from Sint Maarten (NA-105) between March 5-18th, 2012. Operators
mentioned are Wojciech/SP9PT, Bogdan/SP2EBG, YL Gala/SP2GKS,
Jurek/SP3GEM, Czeslaw/SP3HLM and Jozef/SP9-31029. Activity will
be on 160-6 meters using CW, SSB and RTTY. QSL via SP9PT. For
more details and updates, visit the PJ7PT Web site at:

Amateur Radio Newsline(tm) Report 1793 - December 23 2011

Amateur Radio Newsline report number 1793 with a release date of Friday, December 23rd, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. France appears ready to modernize its Amateur Service rules; proposed Euro Zone laws could outlaw kit building and modifying ham radio gear; another major endorsement for a world-wide band at 500 KHz and the Do It Yourself Magic of Amateur Radio to premiere on the World Wide Web on December 27th. Find out the details are on Amateur Radio Newsline(tm) report number 1793 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FRENCH REGULATOR MODERNIZING HAM RADIO LAWS

France appears to be on trhe verge of modernizing its amateur service rules. Newsline's Cheryl Lasek, K9BIK, is here with what's known so far:

--

French telecommunications regulator ARCEP looks as if it is ready to permit French radio amateurs to use modern means of communication such as D-STAR. On December 14th several French ham radio groups received a draft amendment from ARCEP regarding new laws to govern that nations amateur and amateur satellite services.

If approved, these new rules will replace the Decision No. 2010-0537, which currently governs French amateur radio operations. The new rules appear to liberalize modes and interconnect options for ham radio in the digital age.

According to the latest word that we have, the rules change proposals will be available for a public discussion on the ARCEP website and those of participating amateur radio associations.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

A careful study of text is already underway by a working group of French radio amateurs to formulate a joint response by January 20,

2012. (Southgate)

**

RADIO LAW: EU ZONE THREAT TO KITS AND MODIFYING RADIOS ARISES

DL9KCE reports a threat to amateur radio kits and modified equipment in the European Union. One arising from changes to the regions electromagnetic radiation or EMC exposure limits laws.

Currently amateur radio kits and modified equipment are specifically excluded from these directives but under the proposed changes they would be fully subjected to the EMC laws. The resulting high compliance costs could make it uneconomic to develop and sell kits in the European common market zone. More significant is that should radio amateur's want to modify equipment it appears they would also incur additional costs and bureaucratic red tape.

IARU Region 1 is expected to respond with a letter letter to lawmakersa in the very neart future.

(IARU R-1, Southgate)

**

RESTRUCTURING: ANOTHER ENDORSEMENT FOR A NEW HAM BAND AT 500 KHZ

A new world wide allocation near 500 KHz has received yet another backer. Graham Kemp, VK4BB, of the WIA News reports from Down-Under:

--

The proposal to allocate a part of the medium frequency band to the amateur service at the World Radio Conference in 2012 received a boost this week with the release of the Asia-Pacific Common Proposals that were developed at the 5th Meeting of the APT Conference Preparatory Group for WRC-12.

During this meeting the various nations of the Asia-Pacific region discussed many of issues that will be addressed at WRC12 and attempted to come to a regional consensus position.

The proposal of interest to the amateur service is to consider an allocation of about 15 kHz in parts of the band 415 to 526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services" and this proposal was supported by a comfortable margin of Asia-Pacific administrations responding to the voting request.

The successful development of a regional position supporting an amateur MF allocation increases the chances that the proposal will be accepted at WRC-12.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

If the proposal is accepted and acted upon at WRC-12, among other things it will mean another place for hams world wide to experiment with many emerging digital codecs that permit long distance communications with very low power levels. (WIA News)

**

RADIO LAW: HAMS IN LEGANES SPAIN TURN TO FACEBOOK TO SAVE ANTENNAS

Hams in the city of Leganes, Spain are taking to Facebook in an attempt to try to retain the right to install and maintain their antennas.

Leganes is located about 11 km southwest of Spain's capital of Madrid. Its also where the city council has practically banned local radio amateurs from installing or retaining antenna systems. To bring this situation to the attention of the worlds of amateur radio outside Leganes, hams there have created a Facebook page at tinyurl.com/save-leganes-antennas.

The page is in Spanish but they ask that hams worldwide who have a Facebook account to go to it and click the "Like" button. The ham radio community of Leganes, Spain, hopes that a large turnout of support will help convince the town council to reverse its highly restrictive rulings. More in the Spanish language is on-line at www.fediea.org/news. (Southgate, FEDIEA)

**

HAM RADIO IN SPACE: AMSAT STARTS FOX-1 FUND RAISING CAMPAIGN

AMSAT North America has kicked off a funding drive to build and launch its Fox 1 ham radio satellite. This as a direct replacement for Amsat Oscar 51.

AMSAT Vice-President of Engineering, Tony Monteiro, AA2TX says that Fox-1 will advance single-channel FM repeater satellite operation beyond the experience of AO-51. Called the next generation of AO-51 class satellites, Fox-1 is designed for longer operational life. It also will contain technologic breakthroughs that could not be attained when AO-51 was designed.

Among the new features, Fox-1 is designed to operate in sunlight without batteries once the battery system fails. This applies lessons learned from both the AO-51 and ARISSat One operations. In case of Internal Housekeeping Unit failure Fox-1 will continue to operate its FM repeater in a basic, 'zombie sat' mode. This means that thew repeater will remain on the air.

Fox-1 is being designed as the immediate replacement for AO-51. Its UHF to VHF Mode B transponder will make it even easier to work with the most modest of equipment. This means from the ground user's perspective, the same amateur radio equipment used for AO-51 may be used for Fox-1.

For more information on this new satellite and the fund to put it in space please visit www dot amsat dot org.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ANS)

**

RADIO LAW: TOWERS VS BIRDS - AGAIN

The FCC has released interim regulations governing tower siteing that it says strike a balance between protecting migratory birds and the needs of industries that want to build communication towers, Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

For years, broadcast engineers generally have said there's no proof that towers kill migratory birds, noting that they haven't seen piles of dead birds at the base of towers. Environmentalists disagree, saying towers, lights and guy wires pose a deadly threat.

In 2006, the commission asked for comments on the issue. Now the agency says evidence in the record suggests the likely impact of towers on migratory birds increases with tower height.

As researchers and attorneys predicted, towers over 450 feet in height will face more scrutiny. This will likely include the need to conduct an environmental assessment and allowing the public time to comment on where a new tower would be sited before construction. Methods of public notification could include publishing a newspaper notice or by going through a local zoning public notice process. An environmental notice is also required if an applicant changes the lighting of an existing tower to what is being termed as a less preferred style.

There is no official lighting ranking yet, however the commission says recommendations from federal wildlife protection agencies suggest that steady-burning red lights pose the greatest risk to migratory birds. Also that the differences among flashing and blinking lights are not statistically significant.

The FCC eventually intends to rank tower lighting in its final rule making on this issue but it has not said when it expects the regulations to be completed or their effective date.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

--

Nearly four years ago, a federal appeals court told the FCC its tower registration procedures fell short of meeting its responsibilities under the National Environmental Policy Act, the Endangered Species Act and the Migratory Bird Treaty Act. The FCC says that its interim regulations address those responsibilities. (FCC, RW)

**

BREAK 1

With holiday wishes to all, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the N4MWA repeater serving South-Eastern, Kentucky.

(5 sec pause here)

**

RADIO LAW: LIGHTSQUARED VS. GPS INDUSTRY - ROUND 6

The federal government has confirmed reports that tests conducted by a joint Technical Working Group show that signals from a nationwide wireless broadband network proposed by from LightSquared interfered with the majority of commercial GPS receivers that it tested. Bill Pasternak, WA6ITF, is in the newsroom with the latest on this controversary between the government and private industry that can affect every GPS user:

--

A joint statement issued December 13th by the Department of Transportation and the Department of Defense confirms that testing did show that LightSquared signals caused harmful interference to the majority of tested general purpose GPS receivers. A separate battery of tests, conducted by the Federal Aviation Administration has shown the LightSquared like signals also interfered with Terrain Avoidance and Warning Systems. These rely heavily on GPS signals for reference to an aircraft's proximity to the ground.

In response, LightSquared executive vice-president Jeffrey Carlisle sent a letter on December 12th to FCC Secretary Marlene H. Dortch. In it, LightSquared offered to surrender authority over use of the upper part of its allotted spectrum to the National Executive Committee for Space-Based Positioning, Navigation and Timing which is a government organization of military and commercial telecommunications officials. The move would effectively shut LightSquared out from utilizing that bandwidth, which is immediately adjacent to the spectrum used by G-P-S receivers.

But here is a catch. In exchange for the concession, the company asked for immediate access to the lower 10 MHz of the spectrum initially granted to LightSquared by the FCC in December 2010. LightSquared claims signals utilizing this bandwidth will not interfere with most GPS devices, provided they are fitted with narrow bandwidth sharp cutoff filters.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in The City of Angels.

--

That proposal from LightSquared was met with suspicion from the Coalition to Save our GPS. In a statement, coalition member the National Business Aviation Association noted LightSquared's offer doesn't alleviate the overall concern that its system will still interfere with GPS signals. As such, there exists the potential of jeopardizing the safety of countless pilots and others who rely on GPS for navigation. (NABA)

**

RADIO LAW: FCC ADOPTS CALM ACT RULES TO LIMIT TV COMMERCIAL VOLUME

The Federal Communications Commission has taken what it terms as a major step toward eliminating one of the most persistent problems of the television age. That being those overly loud commercials that the public seems to hate.

On Wednesday, December 14th the Commission adopted a Report and Order that implements the 2010 Commercial Advertisement Loudness Mitigation or CALM Act. That's the statute in which Congress gave the Commission, for the first time, authority to address the problem of excessive commercial loudness.

The rules as adopted require that commercials have the same average volume as the programs they accompany. The rules also establish simple, practical ways for stations and multi-channel video programming distributors to demonstrate their compliance with the new regulations.

The CALM Act rules will become effective one year after the date of their adoption, or 13 December, 2012. This gives those broadcasters falling under the regulation until that date to be in full compliance. Equally important, it provides ample time for programmers and networks to provide their distributors with certifications stating the commercials that accompany their programming are fully compliant with these new rules.

While consumer complaints about loud commercials have diminished since 2009, the FCC expects that these new rules will reduce loudness complaints even further. (Media Network, FCC)

**

TECHNOLOGY ASSISTANCE: DISABILITY.GOV NOW ON LINE

www.disability.gov is the new federal government website for comprehensive information on disability programs and services in communities nationwide. The site links to more than 14,000 resources from federal, state and local government agencies; academic institutions; and nonprofit organizations.

In the Technology section, can be found information on assistive and accessible technologies, emergency communications systems; the accessibility features of new technologies like smart phones; and guidelines and standards related to technology accessibility for people with disabilities. Information is by State using the drop-down menu

located on the left side of any page on Disability.gov, to find local resources that can help you pay for your assistive technology needs.

Disability.gov is managed by the U.S. Department of Labor's Office of Disability Employment Policy in collaboration with 21 federal agency partners, including the FCC. (FCC)

**

HAM HAPPENINGS: SA AMSAT CALLS FOR PAPERS FOR SPACE SYMPOSIUM

The 2012 South Africa AMSAT Space Symposium will be held at the University of KwaZulu-Natal on May 12th of 2012. The theme of the conference is "50 Years of Amateur Radio Satellites" and celebrating the launch of OSCAR 1 on December 12 1961.

Authors are invited to submit a brief synopsis of a proposed paper to be presented at the symposium. The deadline for submissions is January 31, 2012. Send a synopsis as a word file attachment to saamsat (at) intekom (dot) co (dot) za. More about the symposium is on-line at www.amsatsa.org.za/ (SA-AMSAT)

**

HAM HAPPENINGS: NEW RECORD FOR LA GRANGE 6 METER BUZZARD NET

December 19th set a new record for number of check-ins to the Georgia-based LaGrange 6 Meter Buzzard Net. According to Bob Yates, W4GCB, 32 stations from Georgia and Alabama showed up to take part. The station farthest from the net control was Thomas Glasze, K4SUS, who is in the north Georgia hills above the city of Ellijay. That's about 125 Airline miles from net control.

W4GCB says that the next goal for the net is to achieve 50 check-ins. The LaGrange 6 Meter Buzzard Net meets every Monday evening at 01:30 UTC on 50.155 Mhz, upper-sideband.

W4GCB notes that one of the best ways to protect our frequencies is to use them. He adds that keeping 6 meters active is not only worthwhile but is also a lot of fun. (W4GCB)

**

NAMES IN THE NEWS: HENNING SCHULZRINNE NAMED NEW FCC CHIEF TECHNOLOGY OFFICER

Some names in the news. First up is Henning Schulzrinne who has been named as the new Chief Technology Officer at the FCC. An engineering fellow at the FCC since 2010 and a professor in the School of Engineering at Columbia University, Schulzrinne will guide the agency's work on technology and engineering issues, together with the FCC's Office of Engineering and Technology.

The Columbia University professor reports to FCC Chairman Julius Genachowski. In his new role, Schulzrinne will advise on matters

across the agency to ensure that FCC policies are driving technological innovation.

Schulzrinne is best known for development of key protocols that enable VoIP and other multimedia applications. He was a member of technical staff at AT&T Bell Laboratories, in Murray Hill New Jersey and an associate department head at GMD-Fokus in Berlin before joining Columbia University.

Schulzrinne will be based in the FCC's Office of Strategic Planning and Policy Analysis. He replaces Douglas Sicker, who was appointed to the position in June of 2010. (FCC)

**

NAMES IN THE NEWS: ENGINEERING GREAT BOB ORBAN ON TWIT.TV

And if you are a ham interested in audio processing technology, then you are likely familiar with the name Bob Orban. His work has made his company a world leader in broadcast audio processing technology some of which has been adapted into the ham radio community. In fact, it's hard to find any radio station or other broadcast outlet where one of his famed Optimod processors is not installed.

Now you can get a chance to learn a bit about the technology that Bob Orban created by watching two recent video podcasts on Leo LaPorte's TWIT dot TV internet network. On December 14th Bob Orban appeared on the shows Triangulation and This Week in Radio Tech. Both are now available for download or on-line viewing. Take your web browser to twit dot tv and use the websites search facility with the name Bob Orban to locate them. If great sounding audio is your thing, then this will be two hours well spent. (ARNewsline(tm))

EMERGING TECHNOLOGY: 137 KHZ SIGNAL GENERATED IN GERMANY SEEN IN ALASKA

Earlier on in this weeks newscast we reported on the latest support for a low-frequency ham radio allocation. Well, it's nearly 10 years since a low frequency signal from Europe has been received in Alaska. Now, the RF generated by Stefan Schaefer, DK7FC, of Heidelberg, Germany has been seen on 136.172 kHz at the remotely operated station of Laurence

Howell, KL7UK near Wasilla, Alaska.

Howell also holds the UK call sign G4DMA used Spectrumlab software to decode Schaefer's transmission. Using this system, a full callsign using dual frequency 30 second per dot CW was seen.

This is believed to be a first for this type of transpolar path as it has to cross the Auroral zone twice. Conditions have to be very stable with low geomagnetic and Proton levels, and the path only appears to be open in the deepest part of the winter.

KL7UK who is part of the WE2XPO low frequency experimental license group is using a 2 turn directional K9AY array and a remotely tuned Icom R75 receiver controlled from his residence in Bartlesville, Oklahoma. DK7FC in Germany had an Effective Radiated Power of only a few Watts.

The last signals across this path were seen were in 2003. At that time G3AQC, G3LDO and DF6NM made the rare path. More about these low frequency transmissions is on-line at kl7uk.com. (KL7UK)

**

HAM RADIO IN SPACE: THREE ASTRO-HAMS HEADED TO THE ISS

Three more hams may already be on their way to the Interrnatioal Space Station. NASA astronaut Don Pettit, KD5MDT, Russian cosmonaut Oleg Kononenko, RN3DX, and Dutch astronaut Andre Kuipers, PI9ISS were scheduled for a December 21st launch to the orbiting outpost on 13:16 UTC. By the time you hear this they will likely be on-orbit. The three hams are headed for a half-year mission aboard the I-S-S as members of Expeditions 30 and 31. (ANS, Spaceflight Now)

**

HAM RADIO IN SPACE: ARISSAT-1 MISSION MAY END DECEMBER 31

ARISSat One may fall out of orbit sooner than originally predicted. Jim De Young, N8OQ, reports via the Amsat on-line Bulletin Board that the new estimated date for the re- entry of the ARISSat One into the Earth's atmosphere is December 31st, plus or minus about three days. .

As any satellite has descended to lower altitudes the atmospheric drag has increased significantly. This latest prediction For ARISSat One's demise uses solar data through this past December 14th and only includes orbital height data gathered between December 9th and the 14th. (ANS)

**

RADIO FROM SPACE: RUSSIAN PHOBOS-GRUNT MAY DEORBIT IN EARLY JANUARY

And ARISSat One is not the only satellite expected to fall from orbit in the near future. Russia's troubled Phobos-Grunt probe, which has been stuck in the wrong orbit for more than a month, appears to be

headed for a fiery and uncontrolled fall back to Earth in early January.

Space debris tracking experts are predicting that giant Russian-built spacecraft will re-enter Earth's atmosphere on January 9th but at present, the forecast includes an uncertainty of plus or minus 5 1/2 days. In fact, some space debris analysts are even suggesting that the spacecraft could see its demise as early as January 1st or 2nd.

Phobos-Grunt was designed to land on Phobos, one of Mars two moons. The mission was slated to gather rock and soil samples from Phobos and return them to Earth in 2014.

But after shortly being boosted into space on November 9th Moscow time, the spacecraft failed to send itself toward the red planet. Russian, European and U.S. deep space network receivers were mobilized in hopes of salvaging the marooned probe, but flight controllers have struggled to regain control of Phobos-Grunt with no success to date. (SPACE)

**

ON THE AIR: HAMS IN KAZAKHSTAN CELEBRATE NATIONS 20TH ANNIVERSARY

On the air, hams in Kazakhstan are celebrating their country's 20th anniversary with the use of special callsigns as well as issuing a certificate to commemorate the event. The 48 special callsigns along with QSL routing and commemorative certificate information is listed at kw dot cqun dot kz. Kazakhstan is best known in ham radio circles as the home of the Bikenour Cosmodrome from where a number of ham radio satellites and crews to the International Space Station have been launched. (G0SFJ)

**

DX

In DX, members of the NN6NN RTTY Team will be activating PJ2N from the Signal Point Station on Curacao Island during the 2012 ARRL RTTY Round-Up. The date for this one is January 7th and 8th with the team operating as a multi-op high power entry. QSL direct to NN6NN or electronically using Logbook of the World.

A team consisting of 12 European operators will be active as HU2DX from the Capricho Beach House in El Salvador, between January 29th and February 10th. Operations will be on 160 through 10 meters with the main focus on the lower bands. QSL via DH7WW either direct or via the bureau. More information is on-line at www dot hu2dx dot de.

AA9A and W4OWY will be active from Antigua as V25AA and V25WY, respectively, between February 13th and the 22nd. Their operations will be on 160 through 6 meters using CW, SSB and RTTY. QSL via their home callsigns.

Lastly, a group of Polish operators are planning to be active as PJ7PT from Sint Maarten between March 5th to the 18th. Their operations will be on 160 through 6 meters using CW, SSB and RTTY. QSL via SP9PT. More about this operation is on-line at www.pj7pt.com

(Above from various DX news sources)

THAT FINAL ITEM: "THE DIY MAGIC OF AMATEUR RADIO" ARRL VIDEO TO BE RELEASED VIA DECEMBER 27th AND DEC 3rd NETCASTS

And finally this week, two dates to mark down on your ham radio social calendar. The first is this Tuesday, December 27th at 8:30 p.m. Eastern time. That's when the ARRL will present an on-line premiere screening of its new video titled The DIY Magic of Amateur Radio.

To accomplish this the League has teamed up with Tom Medlin, W5KUB, who will be streaming it from his website at w5kub.com. The video will also be released earlier that day on-line at the ARRL's own website at www.arrl.org and on the ARRL video pages on YouTube dot com. All three are a part of a new ARRL public relations campaign to interest the nations maker and hacker community in our world of ham radio.

Then a week later on January 3rd at 9 p.m. Eastern, the shows producer Bill Pasternak, WA6ITF, along with Director Dave Bell, W6AQ and writer Henry Feinberg, K2SSQ, will be the guests of Bob Heil, K9EID, and Gordon West, WB6NOA. This on their weekly TWIT dot TV video podcast known as Ham Nation.

Bell, Feinberg and Pasternak will give you a behind the scenes look at how the DIY Magic of Amateur Radio video was conceived as well as how it was put together using the very latest digital video production techniques. You will also get to see the video in its entirety.

Look for this live netcast at 9 PM Eastern on Tuesday, January 3rd at live.twit.tv. If you miss it, wait about 24 hours for it to be posted at twit.tv/hn. (ARRL, ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News Australia's W-I-A News and TWIT dot TV, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Burt Hicks wishing you a Merry Christmas, a Happy Chanukah, a joyous Quanza and a most preposterous New Year. 73, see you next week and we thank

you for listening.

All Hands

Be advised that the TSA considers any tool longer than seven inches in any dimension to be a weapon and they will not allow it in the passenger compartment of a common carrier aircraft. In order to save my One Hundred Twenty Dollar crimper I had to send it to myself by FedEx go back through security and dammed near miss my flight. I was unaware of this rule so the crimper was in my Radio Carry On. I would not want any radio that I was responsible for to go in with the baggage because it would be unlikely to arrive at the destination in working condition. I guess I will have to buy one of those Air Transport Cases to hold all of my tools and pay the extra fifty bucks to check it with most airlines. Security Theater strikes again.

SARL NEWS - SUNDAY 25 DECEMBER 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

137 kHz SIGNAL GENERATED IN GERMANY SEEN IN ALASKA

NEW TIME FOR AMATEUR RADIO TODAY'S MONDAY TRANSMISSION

ARISSAT-1 MISSION MAY END DECEMBER 31

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ITS CHRISTMAS

The President and Council of the South African Radio League as well as all the co-ordinators and the news team wishes all members and listeners a blessed Christmas and we wish our Jewish members and listeners a happy Hanukkah. May the spirit of this special time of the year touch you all. Happy Holidays.

137 kHz SIGNAL GENERATED IN GERMANY SEEN IN ALASKA

It is nearly 10 years since a low frequency signal from Europe has been received in Alaska. Now, the RF generated by Stefan Schaefer, DK7FC, of Heidelberg, Germany has been seen on 136,172 kHz at the remotely operated station of Laurence Howell, KL7UK near Wasilla, Alaska.

Howell also holds the UK call sign G4DMA, he used Spectrumlab software to decode Schaefer's transmission. Using this system, a full callsign using dual frequency 30 second per dot CW was seen.

This is believed to be a first for this type of transpolar path as it has to cross the Auroral zone twice. Conditions have to be very stable with low geomagnetic and Proton levels, and the path only appears to be

open in the deepest part of the winter.

KL7UK who is part of the WE2XPO low frequency experimental license group is using a 2 turn directional K9AY array and a remotely tuned ICOM R75 receiver controlled from his residence in Bartlesville, Oklahoma. DK7FC in Germany had an Effective Radiated Power of only a few Watts.

The last signals across this path were seen were in 2003. At that time G3AQC, G3LDO and DF6NM made the rare path. More about these low frequency transmissions is on-line at kl7uk.com. (KL7UK)

The 137 kHz band is available to South African Amateurs. If you are experimenting on 137 kHz we would like to hear from you. Drop an email to artoday@sarl.org.za.

NEW TIME FOR AMATEUR RADIO TODAY'S MONDAY TRANSMISSION

>From next Monday, January 2, the retransmission of Amateur Radio TODAY will change to 17:30 - 18:30 UTC which is 19:30 - 20:30 CAT. The transmission will remain in the 60 metre band on a frequency of 4 895 kHz. The transmitter power will be 100 kW feeding an omni-directional antenna. Reception reports are invited and can be emailed to artoday@sarl.org.za. All reports received of the January 2 transmission by 5 January will be participating in a lucky draw for a ARRL book on RFI. You can also fax your report to 012 991 5651.

ARISSAT-1 MISSION MAY END DECEMBER 31

ARISSat One may fall out of orbit sooner than originally predicted. Jim De Young, N8OQ, reports on the AMSAT on-line Bulletin Board that the new estimated date for the re-entry of the ARISSat is December 31st plus or minus about three days.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels with a slight chance for a M-class event. Sunspot 1 384 remains the largest visible sunspot group. The sun's surface is still peppered with smaller sunspots promising exciting HF conditions.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 92.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also active with TEP openings from time-to-time.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 January 2012 - Last day for submission of summaries of proposed papers for the Radio Technology in Action Symposiums 2012 to artoday@sarl.org.za. 31 January 2012 - Last day for submission of

nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January 2012 - Closing date for submitting papers for SA AMSAT Space Symposium. Remember also to submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

Thanks to the many individuals who sent holiday wishes to my family and me.....73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 17th-December, through Saturday, 24th-December there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E4 E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2011 CQ DX MARATHON (Only a few days left!). John, K9EL, DX Marathon Administrator, reminds OPDX readers: "The 2011 DX Marathon sponsored by CQ Magazine ends December 31st, so only a few days left to add to your total! Logs are due no later than January 31, 2012. See the DX Marathon Website for details <www.dxmarathon.com>. Also, a new Yahoo Group has been created to help share information and answer questions regarding the Marathon. Once signed into Yahoo Groups, search for 'DXMarathon'."

4T100, PERU (Special Event). Members of the Radio Club Peruano (OA4O) are now active as 4T100MP through December 31st. Activity is to celebrate the 100th anniversary of the fascinating and mysterious pre-Columbian Inca lost city of Machu Picchu. QSL via OA4O, direct or by the Bureau.

60 METERS NEWS. The ARRL is requesting input for a proposed 60-meter band plan. Read the posting at:
http://www.arrl.org/news/arrl-requests-feedback-for-60-meter-band-plan
The news item contains links to the survey E-mail "box" and a online survey.

8P, BARBADOS. Operators Larry/K3VX, Bill/W3WH and Carl/K9CS will be active from Barbados as 8P9VX, 8P9WH, and 8P9CS, respectively, between February 14-22th, 2012. Their activity will include the ARRL CW DX Contest (February 18-19th) as a Multi-Op signing 8P5Y. QSL all callsigns via K9CS.

8Q, MALDIVES. Berti, HB9SLO, will be active as 8Q7LO from the Maldives (AS-013) between December 27th and January 2nd, 2012. Activity will be holiday style on the HF bands. QSL via his home callsign.

AFRICAN TOUR. Sadao "Dan", JA1PBV, who is on a African tour for about a month, is now active as 9G5SI from Accra, Ghana. Activity has been mostly on 40 and 20 meters CW, but he also does operate on SSB and the Digital modes. He is expected to leave on December 26th. Dan is expected to go to Togo (5V) next between December 26th and January 2nd, and then on to Benin (TY) between January 2-9th. He will try to operate from both places, but has not been issued callsigns yet. QSL via JA1PBV.

AFRICAN TOUR. Luc, F5RAV, who is expected to be active as UT/F5RAV from Kiev (between December 27th and January 3rd, will once again head south to Africa and be active as 6V7T from 6W7RV's QTH in Somone, Senegal, between February 24th and March 7th, 2012. During his stay, Luc plans to be in the REF and ARRL contests. After his operation in Senegal, look for him to be active as C56/F5RAV (along with Francisco, EA1BT) from Banjul, The Gambia, between February 27th and March 2, 2012. Activity from both locations should be on SSB and PSK. QSL via his home callsign.

CT9, MADERIA. Mathieu, MJ0ASP, will be active as CT9/MJ0ASP from Madeira between December 28th and January 7th, 2012. Activity will be on 40-10 meters CW only. QSL via LoTW or via his home callsign.

CY0, SABLE ISLAND (Everything is still a go!). The latest update, dated December 22nd, states (edited): "Murray/WA4DAN and Ron/AA4VK are making final preparations for the upcoming CY0 DXpedition that starts next week. An FT-897D was purchased this week to serve as a backup rig to the two IC-756 PRO III primary stations. Antennas include Butternut HF2V and HF9V verticals, monoband Gap antennas for 20, 17, 15, 12, and 10 meters, a Yagi for 10M and various dipole antennas. Tokyo Hi-Power solid state amplifiers will provide some boost for our signals. We are scheduled to arrive in Halifax, Nova Scotia, on the morning of Dec 27th. We will confirm all of our equipment made it safely and shop for last minute supplies. After an early wake-up on Dec 28th, we will arrive at Maritime Air and eagerly await for the OIC on Sable and Maritime Air to make the final GO/NO GO call on the weather and landing conditions. Landing on Sable is a little tricky, since landing is on a 'beach runway'. The sand must be relatively firm and free of standing water. Wind speed and wind direction are also critical parameters to the GO/NO GO decision. Winds from the South tend to bring water onto the 'beach runway'." Suggested Frequencies are:

BAND	CW	SSB
160m	1.826 up (down for JA)	1.870 up
80m	3.523 (up or down)	
75m		3.781 up (and JA window)
40m	7.023 up and down	7.135 up or down
30m	10.106 up	
20m	14.023 up	14.170 up 14.190 (alternate 1) 14.240 (alternate 2)
17m	18.072 up	18.145 up
15m	21.023 up	21.295 up
12m	24.892 up	24.945 up
10m	28.023 up	28.450 up 28.650 or 28.750, if 2nd station on 10M CW
6m	50.090 up	50.125 (listening freq.)

Keep a check on this Web site for more updates as they get closer to departure: http://www.cy0dxpedition.com

DX SURVEY RESULTS (DX Magazine's 2011 Most Wanted Countries Survey). DX Magazine's has published their Most Wanted Countries. Here are the "Top 20" (in the Mixed modes) as per DX Magazine (Jan./Feb. issue):

2011 Rank	2010 Prefix	Country	2011 Rank	2010 Rank	Prefix	Country	2010 Rank
1	P5	North Korea	1	11	VK0/M	Macquarie Island	13
2	KP1	Navassa Island	2	12	HK0/M	Malpelo	12
3	3Y/B	Bouvet	3	13	FT5T	Tromelin Island	15
4	VK0/H	Heard Island	5	14	SV/A	Mount Athos	14
5	7O	Yemen	4	15	ZL9	Auckland/Campbell	16
6	FT5Z	Amsterdam	6	16	PY0S	St. Peter and Paul	18
7	FT5/W	Crozet	9	17	KH5	Palmyra	19
8	BS7H	Scarborough	10	18	KH5K	Kingman Reef	17

9 VP8/S South Sandwich 8 19 KH9 Wake Island 22
10 ZS8 Marion Island 7 20 FR/JE Juan de Nova/Europa 20

Look for the "Top 100" to be posted around January 15th, on the DX Publishing, Inc. Web site at: http://www.dxpub.com/dx_news.html

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, informs that the following operations are approved for DXCC credit:
E44PM - Palestine; 2011 Operation; Logs are expected to be uploaded to LoTW soon.

5N6/YL2SW - Nigeria; This operation has been on hold pending a review of the status of their location (In accordance with DXCC rule 8 regarding it being "land-based"). After a brief review it was determined that this was, in fact, a land based operation so it is now approved for DXCC credit: If you had credit for this operation rejected in the past, send a note to bmoore@arrl.org to have your record updated. You can see the results when the change has been done to your record by checking your LoTW account or, the DXCC daily numbers. (Due to heavy e-mail, Bill probably will not be able to reply to all requests).

FW0/TW0, WALLIS & FUTUNA (Update). Laci, HA0NAR, and two other operators will be active as FW0R from Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389, WW Loc. AH16VS) next year (2012) between Janaury 25th and February 23rd. Laci, HA0NAR, reported this past week: "Exactly one month from now, the FW0R team will start its journey to Wallis and Futuna Islands, with the first stop in Los Angeles for 2 days before taking an airplane to Nadi (Fiji), the closest international airport to Wallis. From there, we will fly to Wallis and expect to start TX around 25th of January 2012. We would like to remind you that the entire trip and stay on the island is paid in full by each of the operators and that any contribution/support will help us to reduce the high logistical costs. We would like to thank all individuals and especially the Foundations and Clubs as well as equipment suppliers that already support us. Our PayPal account is:
ha0nar@hotmail.com
Additionally, we plan to be active from Futuna Island (IOTA OC-118) with the callsign TW0F. QSL for both FW0R and TW0F are via Laci HA0NAR."
For more info, visit: http://www.ha0nar.hu

HK0, MALPELO ISLAND. With the upcoming HK0NA DXpedition to Malpelo Island in late January and into February, Wolf, OE1WHC, informs OPDX that he has put together a comprehensive Web page covering all previous operations from that island on the Vienna based "Documentary Archives Radio Communications" Web site at (English version): http://dokufunk.org/malpelo

IOTA NEWS.....
EU-128. Jan-Henrik, DG8HJ, will once again be active as homecall/p from Fehmarn Island (EU-128, GIA O-001, WLOTA 0637) between January 1-8th, 2012. Activity will be on the HF bands. QSL via his home callsign, by the Bureau or direct.

NA-065. Rick K6VVA will be active as K6VVA/7 from Vashon Island
between January 1-3rd, 2012. Activity will be mainly on
40-10 meters CW, depending on the propagation. QSL via
N6AWD. For more details and updates, check out Rick's
Web site and Twitter pages at:
http://www.k6vva.com/iota/na065
https://twitter.com/#!/k6vva

SA-024/
SA-071. Brazilian IOTA DXpedition. A Brazilian and Itlatian team will
activate both Comprida Island (SA-024) and Peruhibe Island
(SA-071) between January 30th and February 9th. The Italian
operators will sign PY/homecall while the Brazilain operators
sign homecall/p. Operators mentioned are Leopoldo/I8LWL, Paki/
IZ8GDO, Vespe/IW8EZV, Angelo/PY2VA and Toni/PY2YW. QSL via
I8LWL.

J5, GUINEA BISSAU. The Verona Section of A.R.I. (Italian Radioamateurs
Association) is organizing a group of its members called the Verona DX
Team, a DXpedition, with humanitarian and ham-radio purposes, to Guinea-
Bissau (J5), one of the poorest countries in the world. The callsign J52
is a "most wanted", especially on RTTY, CW and the Digital modes and has
never been activated in EME. The expedition will be on the air between
March 24th and April 6th, 2012. The team will operate from Cumura.
Operators mentioned are Lucio/I3LDP (Team Leader), Walter/I3VJW, Tony/
IK3ESB, Silverio/IK3IUL, Libero/IK3RBE, Enzo/IK3VVD, Milena/IK3VZJ,
Livio/IZ3BUR and Llario/IZ3STA. QSL Manager is I3LDP. For more info,
visit the J52 Web site at:
http://www.ari.verona.it/veronadxteam/en/index.htm

KH3, JOHNSTON ATOLL (Update/Clearing the Confusion). Susan, W7KFI,
informs OPDX that she will be operating from the pier that extends over
the land and the ARRL has OKed this. She states, "Sorry for the confusion.
I have a pop tent and will set it up at the end of the pier, over land,
then the verticals will go on each side with grounds extending into the
water....should result in some good signals...I hope. In any event,
being on a 'pier' over land has already been done by DXpeditions and
ARRL has approved."
LAST MINUTE UPDATE: The DX-World.net is reporting that Susan's QSL Manager,
Stan, KH6CG, spoke with Susan and confirms rumors that her KH3-Midway
planned operation has been postponed for 4-6 weeks. He states, "This is
primarily due to USF&W (Fish & Wildlife) requiring that Susan pulls
her boat out of the water and has the hull scraped, then repainted.
Permission [to land] would then be granted. The shipyard who would do
this work cannot get Susan an appointment until approx four weeks from
now, so shove off date will be beginning February at earliest. Susan
reaffirms she will definitely be going, and KH3 will happen, but now no
firm date for the moment. Her permission to operate is through February.
It's worth noting USF&W would prefer Susan to have the hull scraped and
push off date within two weeks from now, however as already mentioned the
shipyard cannot do the required work until four weeks time."

KH6BZF PROPAGATION FORECAST/REPORT (December 26th-January 1st)....
Dec/26th AN Dec/29th AN-HN Dec/31st AN-HN
Dec/27th AN-HN Dec/30th AN-HN Jan/01st AN
Dec/28th AN-HN

SOLAR REFERENCE KEYS/INDEXES AND GEOMAGNETIC REFERENCE
==========

NORMALITY	GEOMAG K Values	Alpha
AN - Above Normal	Quiet K=0-1	0-7
HN - High Normal	Unsettled K=2	8-15
LN - Low Normal	Active K=3	16-29
BN - Below Normal	Minor Storm K=4	30-49
DIS - Disturbed	Major Storm K=5	50-99
VRY DIS - Very Disturbed	Severe Storm K=6-9	100-400

SPECIAL NOTE FROM KH6BZF: ALOHA - The 27.5 solar cycle should reach a peak on/about January 4-5th, 2012, with a not so high value of SFI index perhaps between 120-130 levels.! Not a 190 units as we all hope, but one can never tell what "Olde Sol" is going to give us! It beats a lump of coal in your stocking!

QSL INFO AND NEWS.....
T32C LOTW. Don, G3XTT, states, "I can confirm that the whole T32C log was uploaded as several large files on the same day but, as expected, LoTW seems to have a degree of indigestion where large logs are concerned. John, G3WGV, will put out a status report when the number of QSOs swallowed by LoTW bears a passing resemblance to the number he thinks he's uploaded! (one of the files went missing completely - John has had quite a bit of 'to and fro'ing' with the LoTW software gurus! A Merry Christmas to all."

CHANGE OF ADDRESS. Ghis, ON5NT, reports: "Due to a reorganization of the post office boxes at my post office my 'POBox 93' is no longer valid.. The number of boxes has been decreased to 48, so no more 93. As per now, my new address is: Ghis Penny, P.O.Box 6, BE-9700 Oudenaarde, Belgium. If you have recently sent mail to POBox 93, not to worry, mail still arriving for my old p.o.box number will be dropped in my new post office box."

QSL Manager Tom, GM4FDM, reports that the first batch of direct cards for 7G7GM were posted the evening of December 18th.

Fred, IK7JWX, reports that he has responded to all requests for all of his 2011 activations (IR7ITA, IP7W, IO7DAI, 5C2J February, Djerba Island TS8P AF-083, Feb. 5C2J. 2011, Herne Island AF-068, WFF CNFF-007) via the Bureau. Every direct QSL is answered right away and Bureau QSLs will be answered about 6 months after.

U.S. POSTAGE GOING UP: The following are highlights of the new single piece First-Class Mail pricing, effective January 22, 2012 :
Letters (1 oz.) - .01 cent increase to .45 cents
Letters additional ounces - unchanged at .20 cents

Postcards - .03 cent increase to .32 cents
Letters to Canada or Mexico (1 oz.) - .05 cent increase to .85 cents
Letters to other international destinations - .07 cent increase to $1.05
Prices also will change for other mailing services, including Standard Mail, Periodicals, Package Services and Extra Services.
The announcement does not affect Express Mail and Priority Mail.

QSL RECEIVED VIA LoTW: C91NW, DS5BRE, E51MAN, E51NOU, G3OAG, IF9ZWA, J39BS, OH1F, S50XX, SM6M, SU9VB, VK4UC, VK7XX, ZK2V and ZS6GRL

QSLS RECEIVED VIA MAIL: 3D2R, 4U1ITU, 4W6R, 5W0OJ, 8P3A, B4S, DL2RM/p, EK6TA, ET3BN, FO/F6CTL, FR/DJ7RJ, K5D, PJ4/JH5GHM, PQ8XB, ST0R and ZB2LGT

QSLS RECEIVED VIA THE BUREAU: 3D20CR and YJ0HA

T8, PALAU. By the time you read this, operators Ryosei/JH0IXE, Hidenari/JA0FKK and Koji/JL3TOG will be active as T8CW, T88XC and T88KI, respectively, from Palau between now and January 8th, 2012. Activity will be on 160-6 meters using CW, SSB, RTTY, PSK31 and JT65A. QSL T8CW via JH0IXE, T88XC via JA0FKK and T88KI via JL3TOG.

T8, PALAU. Mike, T88SM, will once again be active from Palau between January 11-15th, 2012. QSL "ONLY" direct to: Hakata Radio, P.O.Box 232, Hakata, 812-8799, Japan.

T8, PALAU. Kan, JJ2RCJ/AB2RF, will be active as T88RF from Palau between April 30th and May 4th, 2012. Activity will be focused on the low bands and the Digital modes (PSK63/RTTY/Hell). QSL only via JJ2RCJ, by the Bureau or direct. Also via LoTW.

TN, CONGO. It was announced this past week that a DXpedition to the Republic of the Congo by five operators signing TN2T using three stations would take place in 2012. QSL Manager would be M0URX. More details will be forthcoming soon. Watch the following Web page for updates: http://www.tn2t.be

TX6, FRENCH POLYNESIA (Update/IOTA Op). Before and after their major VP6T operation, operators Jacques/F6BEE, Nigel/G3TXF, Gilles/VE2TZT, Michel/FM5CD and Vincent/F4BKV will be active from the following islands (dates are tentative):
Tahiti Island (OC-046) - As TX6T; January 14-16th and February 8-10th
Mangreva Island (OC-063) - As TX6T/p; February 6-7th. However, this short operation from Mangareva will depend on
the early arrival of the return boat from
Pitcairn.
Activity will be active on all HF bands. QSL via G3TXF.

V3, BELIZE. Jeff, K0UU, will be active as V31SG from St. George's Island (NA-073) between February 11-20th, 2012. Activity will be on 40-10 meters CW only. He also plans to participate in ARRL DX CW Contest (February 18-19th). QSL via LoTW or direct.

VK0, MACQUARIE ISLAND. Trevor, VK0TH, continues to be very active on various bands (40/20/17/15/12/10m) using SSB, HELL, PSK31 and RTTY, during various times. He informs OPDX: "Working very hard down here to give operators the chance to get VK0/MM in their logs. We are working on a 6m antenna and are hopeful that we can make a few contacts with this too before it is time to go home next year (End of April 2012)." QSL via JE1LET (direct only).

VP9, BERMUDA. Kei, JJ1RJR will be active as VP9/KG2A from Bermuda between December 26th and January 2nd, 2012. Activity will be on the HF bands using CW and SSB, and 100w. QSL via KG2A home address only.

VU, ANTARCTICA. By the time you read this, Bhagwati, VU3BPZ (ex-AT10BP), should be on board the "M/V Ivan Papanin" and leaving Cape Town for about an 11 day voyage to the new Antarctic research station called Bharati, located at Larsemann Hills. Bhagwati is expected to set up a HF station once his wintering tasks are completed. He is also expected to use a special callsign from the base and stay on the base until March 2013. QSL via I1HYW. More details will be forthcoming.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/High-Power entry. QSL via K6AM, direct or by the Bureau or LoTW.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th December 2011

Seasons Greetings & Happy Christmas 2011

The Officers and Committee of the Irish Radio Transmitters Society wish everyone seasons greetings and a happy Christmas. Thank you for your support in 2011 and we look forward to your continued support in 2012, as we continue to serve you in our 80th anniversary year. Good wishes to everyone for a good and prosperous New Year.

Athbhliain faoi mhaise daoibh!

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary next year. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

IRTS News Radio News Service

This is the last IRTS radio news bulletin for 2011. The next radio news bulletin will be January 8th 2012. The radio news editor thanks everyone who regularly submits items for

inclusion in the radio news service.

Revised HAREC Examination Format

Following recent consultations with ComReg on the renewal of the agreement under which IRTS administer the examinations for the HAREC qualification, we are pleased to announce that ComReg has approved a change in the format of the examination: it will, in future, consist of two sections, each containing 30 questions. The pass mark is 60% and a pass is required in each of the two main sections of the paper, Section A - Amateur Radio Regulations and Related Topics and Section B - Radio Theory and Related Topics. There have been no significant changes to

the content of the Syllabus and Notes for Candidates which was published in June 2010, however its layout has been adjusted to conform to the revised structure mentioned above. In addition, a new Annex has been included containing the principal national call sign prefixes for Europe and North America, knowledge of which is required for the examination. Intending candidates are advised to study the Syllabus carefully paying particular attention to the associated Notes for Candidates and the Annexes to the Syllabus The web page at www.irts.ie/downloads contains a link to the syllabus with the adjusted layout. This page also includes a link to an IRTS document Studying for the Harmonised Amateur Radio Examination Certificate which includes both the syllabus and a new Sample Paper. A revised CD Course Guide, which is closely aligned with the Syllabus topics and the revised examination format, is at an advanced stage of preparation and will be available in the New Year.

Tipperary Amateur Radio Group

The Tipperary Amateur Radio Group Would Like to wish all Radio Amateurs and Shortwave Listeners a Happy Christmas and a prosperous New Year and a thank you to Group members who read the news and helped out at the various events over the year.

Teenager Wins IRTS Contest Award

Lough Erne Amateur Radio Club is delighted that a teenage member, Jamie Nelson 2i0MFB won an Award in the IRTS Autumn 2 metre Counties Contest.

The results in the December issue of Echo Ireland show Jamie winning the OEI Award - best station outside EI - in the Low Power Portable section. His portable station was up on Carnmore, near the Club's Repeater GB3CP and not far from his Magheraveely home in south east Fermanagh. Lat year this same award was won by another radio amateur in that same part of the county, David Corbett MI0VKO.

Jamie at 17 years old was likely the youngest contest operator and had been a radio amateur for about 19 months at the time of the contest.

Jamie did the Club's Foundation course last year, then the examination for his Intermediate examination earlier this year. He has postponed study for the full license examination until after next summer's very important A-level examinations at Portora Royal School.

Jamie is a fine example of the kind of young people we need to recruit into amateur radio. Lough Erne Amateur Radio Club is very proud of his successes.

Global Data Traffic

An interesting statistic is that by 2014, global data traffic will increase by 39 times from current levels, reaching 3.6 exabytes (around 3.9 billion gigabytes) per month, according to wireless firm Cisco.

DX News

F4FOO will operate from Togo in West Africa during the period 19 December until 4 January. He will be on 20 - 10m using SSB. The callsign to look for is 5V7MA and QSLs go via his home call.

Gerry VE6LB is returning to Dubai in the United Arab Emirates for a 3 week stay. He will be active as A6/VE6LB from 20 December until 10 January. As before this is a part time vacation operation. He will run 100w to a G5RV antenna and concentrate mainly on working 12m and 10m. QSL is via the home call and Logbook of the World.

SM6CPY will be signing 9X0PY from Rwanda from 24 December until 7 January. Cards go via his home call.

At this time of year there are often special event stations on the air with a Christmas or New Year theme. Already on the air this year is PB11XMAS from Holland. The operator is PB5X and he will be workable until New Year's Day.

IC Chip Inventors Birthday

We celebrate the birthday of the late Robert Norton Noyce, nicknamed "the Mayor of Silicon Valley". Noyce and Gordon Moore founded Intel in 1968. The integrated circuit was one of the stepping stones toward what we take for granted today, the ubiquitous microprocessor. Noyce was born on December 12, 1927 and died in 1990 at the age of 62.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1218. [RAC-Bulletin] Industry Canada links in the December 2011 issue of the RAC report.

Industry Canada links in the December 2011 issue of the RAC report.
2011-12-27

I noticed (and a few others) noticed that the IC links that were mentioned in the December 2011 issue of RAC Report don\'t work. Further investigation by going to the IC website indicates that many of the pages (including most of the Amateur Radio pages and Spectrum Management sites) don\'t work either.

It seems files in the /eic and /epic directories have disappeared or have become unlinked (via symbolic linking). The VP-TAS, James Hay has let the persons who have contact with IC that there is a problem with the IC web site and hopefully it will corrected soon.

(e-mail: dl7voa@darc.de)

8Q, MALDIVES, AS-013
Berti,HB9SLO, is working as 8Q7LO in holiday style until January 2.
QSL via homecall.

9M2, WESTERN MALAYSIA, AS-015
Rich,PA0RRS, will be active in CW, PSK and RTTY signing 9M2MRS from
Penang Island (AS-015/WFF 9MFF-016/WLOTA 2743) from Dec 31 till Feb 13.
QSL via homecall, bureau, LoTW and eQSL.

9U, BURUNDI
Francesco,IV3TMM, will show up from Bujumbura (Loc KI46QP) signing
9U3TMM in SSB and RTTY on the HF bands from Dec 28 until Jan 4.
QSL via homecall.

CY0, SABLE ISLAND, NA-063
Ron,AA4VK/CY0, and Murray,WA4DAN/CY0, are planning to activate
Sable Island (NA-063, WLOTA 0758, CIsA NS004, WFF CYFF-001) from
Dec 29 until Jan 6. Emphasis will be put on working Japan since many
Japanese HAMs missed the last activity in March due to the earthquake.
QSLs via bureau or direct to their homecalls.
See also: http://www.cy0dxpedition.com

DL, GERMANY
The German club of Duisburg-Huckingen (DOK L16) celebrates its
30th anniversary on May 7. Thus the special event station DL1630Y will
be activated in all modes on all bands in 2012. They will also hand out
the special DOK 30L16 from May 1 until July 31. QSL via bureau.
For more information see http://www.darc.de/l16

FY, FRENCH GUYANA, SA-020
F4ACR, F4CRE, F4DNU, F5OQK, F6AIM, FY5LH and maybe also other HAMs
will show up as TO5G from Ile Royale (SA-020) in CW/SSB/RTTY/PSK on
160m-6m from Jan 2-7. QSL via F5KDR. See also: http://f5kdr.free.fr

JD1/OG, OGASAWARA ISLAND, AS-031
Hiroyuki "Harry",JG7PSJ, will be QRV in CW, SSB and RTTY on 160m-10m signing JD1BMH from Chichijima (AS-031) between Dec 30 and Jan 7. QSL via JD1BMH (bureau) or JG7PSJ (direct).
See also: http://sapphire.es.tohoku.ac.jp/jd1bmh

K, USA
The Straight Key Century Club (SKCC) celebrates its 6th jubilee with the special event station K3Y in January.

OA, PERU
Members of the Radio Club Peruano (OA4O) are activating the special event station 4T100MP until Dec 31 to celebrate the 100th anniversary of the discovery of Machu Picchu. QSL via OA4O.
See also: http://www.oa4o.org

OZ, DENMARK
Denmark takes over the presidency of the European Union from Jan 1 until Jun 30, 2012. The special callsign 5P12EU will be put on the air during this period of time.
QSL request via OQRS, LoTW, eQSL, direct QSLs via OZ0J - it is not necessary to send your own QSL.
Logsearch and awards programme are available at: http://www.5p12eu.dk

T8, PALAU, OC-009
Eugene,RA0FF, will be QRV as T88OW from Koror (IOTA OC-009, Loc PJ77FI) on 160m-6m between Dec 30 and Jan 8. QSLs only direct via homecall.

JH0IXE (T8CW, until Jan 8), JA0FKK (T88XC, until Jan 7) and JL3TOG (T88KI, until Jan 6) chose Palau as their destination as well. They are working in CW, SSB, RTTY, PSK31 and JT65A on 160m-6m. Please be aware that power failures are common between 1100 UTC and 1500 UTC. QSLs via homecalls.

TR, GABON, AF-089
Thorbjorn,SM7RME, is hitting the airwaves in CW on 17m as TR0A/p from Port Gentil on Mandji Island (AF-089). The length of his stay is not known. QSL via SM7EHU.

UT, UKRAINE
Luc,UT/F5RAV, is working from Kiev until January 3. QSL via homecall.

VP9, BERMUDA ISLANDS, NA-005
Kei,KG2A/JJ1RJR, is QRV as VP9/KG2A from Bermuda (NA-005) until Jan 1. He runs 100 watts in SSB/CW. QSL via KG2A, unfortunately only direct.

YV, VENEZUELA
10 HAMs of the Radio Club of Venezuela will be active from the vicinity of the world's highest waterfall (Angel Falls, 979m high, loc. FJ85RX) from Jan 3-6. YX6AJ will be QRV in CW, SSB, digital modes and via satellites. QSL via YV5AJ.

AFRICAN TOUR
Sadao "Dan",JA1PBV, is on a one-month-trip through Africa. He has been

spotted as 9G5SI from Accra/Ghana in CW/SSB/digital modes on 40m-20m.
His next destinations are Togo (5V) from Dec 26 until Jan 2 and later
Benin (TY) until Jan 9. Callsigns are not known yet. QSL via JA1PBV.

CQ DX MARATHON
During the CQ DX Marathon you have to work as many DXCC entities and
CQ zones as possible in one year regardless of band and mode.
The scores for 2011 have to be claimed until January 31, 2012.
See also: http://dxmarathon.com

UBA INTERNATIONAL PREFIX HUNT
During the UBA International Prefix Hunt you have to work as many
prefixes as possible in one year:
http://www.uba.be/hf/contest-rules/rules-of-the-uba-international-prefix-hu
nt

DXCC: If the DXCC Desk did not accept your QSL of 5N6/YL2SW for DXCC credit
please send an e-mail to Bill (bmoore@arrl.org) asking for an update.
The QSLs are accepted now, as well as those of the E44PM DXpedition.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jan 1: SARTG New Year RTTY Contest
Jan 1: AGCW-DL Happy New Year Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-014, CT3, Madeira: Mathieu,CT9/MJ0ASP, will stay on Madeira (DIP MA-001,
PIP MD-001, WLOTA 0053) from Dec 28 until Jan 7. He will work holiday
style only in CW on 40&#65533;10m. The logs will be uploaded to LoTW and eQ
SL.
QSL via MJ0ASP (bureau/direct/LoTW).

EU-128, DL, Schleswig-Holstein State East: Jan,DG8HJ/p, is going to work
from Fehmarn Island (GIA O-001, WLOTA 0637) from Jan 1-8.
QSL via homecall (bureau/direct).

NA-065, W7, Washington State North group: Rick,K6VVA/7, plans to activate
Vashon Island (WLOTA 2572, USi WA060S) from Jan 1-3 for the start of
the IOTA Marathon. Main emphasis will be put in CW on 40m-10m.
More information is available at: http://www.k6vva.com/iota/na065
QSL only via N6AWD (bureau/direct).

1220. Weekly Highlights of Solar and Geomagnetic Activity, 19 - 25 December 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-27 22:30:05 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20111227223001.D5BAA33C9B@panix2.panix.com>

:Product: Weekly Highlights and Forecasts
:Issued: 2011 Dec 27 1952 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
19 - 25 December 2011

Solar activity was at very low levels on 19 December and increased
to low levels from 20-24 December, and finally ending the period (25
December) at moderate levels. Region 1376 (N19, L = 308, class/area
Dko/440 on 22 December) was the most active group with frequent B-
and C-class flare production until 25 December when new Region 1387
(S22, L = 226, class/area Dai/440 on 22 December) began producing
multiple C-class flares and one M-class flare. On 22 December at
0208 UTC, Region 1381 (S18, L = 263, class/area Dai/180 on 22
December) produced a C5/Sf flare associated with weak Types II and
IV radio sweeps and a faint CME, determined to be non-geoeffective.
Region 1386 (S17, L = 147, class/area Esi/200 on 26 December)
produced a C5/Sf flare at 24/0839 UTC. Region 1376 produced a
long-duration C4 flare on the west limb at 24/1236 UTC associated
with a non-Earth-directed CME. On 25 December at 1816 UTC, Region
1387 produced an M4/1N flare that was accompanied by Type II
(1019km/s) and Type IV radio emissions.

A slight proton enhancement was observed at geosynchronous orbit on
25 December and achieved a max flux of 3 pfu at 26/0135 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

The geomagnetic field was at predominately quiet levels during most
of the period.

Forecast of Solar and Geomagnetic Activity
28 December - 23 January 2012

Solar activity is expected to be at low to moderate levels until 31
December when Region 1387 is forecast to rotate off the disk.
Activity is expected to return to low levels with a slight chance
for isolated M-class activity for the remainder of the period.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during the period.

Geomagnetic field activity is expected to be at active levels from 28-29 December due to CME arrivals. Diminishing effects from said CME’s are expected to bring geomagnetic field activity to unsettled levels on 30 December. Mostly quiet conditions are predicted on 31 December, 3-4 and 7-23 January. Activity is expected to be at predominately quiet to unsettled levels 1-2 and 5-6 January due to recurrent coronal hole high speed streams.

1221. Ohio/Penn DX Special Bulletin #1042.1

Newsgroup: rec.radio.amateur.misc
Date: 2011-12-28 22:29:27 UTC

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1042.1
BID: $OPDX.1042.1
December 28, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Relayed from Murfreesboro, TN

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network G3SXW, K3LR, LU9ESD, N7NG and WA4DAN for the following DX information.

CY0, SABLE ISLAND (Update). Murray, WA4DAN, sent the following:
"Greetings From Halifax, Nova Scotia!
Ron AA4VK, and Murray WA4DAN, arrived safely in Halifax, Nova Scotia on Tuesday, Dec 27th, around noon local time (AST) in preparation for the Sable Island DXpedition. All gear appears to have arrived safely at the Maritime Air Charter terminal. We drove over to Maritime Air later in the afternoon and delivered additional gear. We purchased additional food items and have those boxed and ready to load onto the plane just before the flight.
The weather is not looking good for a flight on Wednesday, Dec 28th. VFR conditions must exist at both Halifax and Sable Island for the flight to occur. Ceiling heights are critical as well as wind and wind direction. It looks like the ceiling heights will be below the criteria for a flight. It also appears that the wind speed will be above the limits. Al Wilson, the current Officer-in-Charge on Sable, will be checking the beach landing conditions at first light on Wednesday morning. Currently, we are most concerned with the wind direction and the possibility that the strong winds will push water onto the sand 'runway'.
The CY0 DXpedition team has full confidence in the OIC on Sable and Maritime Air to make the correct GO/NO GO call. These are really good people to work with and are true professionals. If we are unable to make it to Sable on Wednesday, the same sequence of events will take place on Thursday in attempting a flight.
This will probably be the final e-mail notification before the flight. Please check our website for the latest updates. <www.cy0dxpedition.com>

Thanks and 73,
Ron AA4VK

Murray WA4DAN"

Update afternoon Wednesday, December 28th:
"Hi Everyone-
We just got an update from Al Wilson, the Officer-in-Charge on
Sable Island. Waves this afternoon and evening will approach levels
that may breach the dunes and cause significant flooding of the landing
area. Al will do a visual observation tomorrow morning at 1200Z.
We met with Debbie, our pilot with Maritime Air this morning. We
did a weather assessment for the period Wednesday - Friday.
The winds are very strong in Halifax. It is very difficult to walk
outside with this strong winter gale. Rain and snow are blowing side-
ways! A commercial airline crew is staying at our hotel and they commented
on how rough it was even in a large airliner. No doubt the right call
was made today.
Since we have a lot of free time, we will keep everyone posted.
<www.cy0dxpedition.com>
73,
Ron AA4VK
Murray WA4DAN"

HK0, MALPELO ISLAND (HK0NA - The advanced team arrives at Malpelo).
The following was provided by Manu, LU9ESD: "Four members of the team
(HK1N, HK1T, HK6F and HK1MW) has departed from the Pier of the Navy
Base BAHIA MALAGA aboard the Patrol Boat JOSE MARIA PALAS on Dec 12.
The team arrives safe to Malpelo today at 1400z.
The target of this advanced team called THE FANTASTIC FOUR is to set
up all the 11 stations, in 2 camps, wireless network and safety stuff
in order to have everything ready when the main group arrive on Jan 21,
2012. To this 4 brave mens who are going to spend 43 days on the island
and have sacrifice the Holidays away from his families, we want to say
our admiration and gratitude.
We still need the help of the HAM community to achieve the sucess of
this difficult and expensive DX-pedition.
Please visit: <www.hk0na.com>
We appreciate your help."

2012 DXU (Press Release). Roger/G3SXW and Wayne/N7NG provided the following:
DX University
First Session: The Holiday Inn, Visalia, California
Friday 20 April, 2012

Press Release Nr 1
For Immediate Release
Enhance your DXing adventure!At last, here is your opportunity to
directly benefit from the skills and experience of some of the world's
best-known DXers.
We all know about the wonderful success of Contest University (CTU),
developed in recent years by K3LR and others, and rolled out inter-
nationally. Over 1,000 contesters have attended. DX University (DXU) is
the twin, providing high-caliber offerings for beginning and experienced

DXers alike.
The all-day program will take place on the Friday of Visalia weekend, 20th April 2012. Among the lecturers are AA7A, G3SXW, K4UEE, K9LA, N7NG, W3UR, W6OAT, W9KNI and XE1KK, many of whom are inductees of the CQ DX Hall of Fame. Learn the secrets of operating techniques for working DX, optimizing stations & antennas for DXing, about propagation, information sources, awards, and ethics, remote operating, QSLing and much more. You will also get the DXpeditioner's view of how DXers should operate to get into the log.
Student places are limited. The early registration fee is only 50 USDs, including lunch and breaks. Sign up beginning January 2, 2012 at: <www.dxuniversity.com>
Further information from Wayne Mills, N7NG@arrl.net or Roger Western, G3SXW@btinternet.com
Main Sponsor -- Elecraft
DX University - International DX Convention,
Visalia, California - April 20 2012

2012 DAYTON CTU. Tim Duffy, K3LR, states, "I am pleased to announce that early bird registration (lowest fee until Jan. 31, 2012) is now open for 2012 Dayton Contest University ("CTU") to be held on May 17, 2012, at the Crowne Plaza in Dayton, Ohio.
Five different countries hosted CTU in 2011. USA, Germany, Italy, England and the newest CTU in Brazil. Nearly 1000 students attended these five CTUs with more than 50 Professors sharing their contest experience.
Contest University started as a small gathering by the Yankee Clipper Contest Club (KC1F & others) many years ago. Then the Potomac Valley Radio Club held a Contesting Seminar in 2005. Dayton CTU started in 2007. It is truly amazing to be a part of the explosive growth in contest knowledge sharing.
2012 will be the sixth year for CTU Dayton. The 2012 topics are listed on the CTU web site at: http://contestuniversity.com
There are several excellent 2012 CTU Professor's that will be presenting for the first time this year - N6TR, K3NA, K7NV, XE1KK, W5WZ and K2RD. Also past Professors - who will give new papers this year are W3LPL, K1DG, W0YK, NC0B, W5ZN, W8WWV, K3LR and N6TV.
Details and early bird discounted registration information is on the web site at: http://contestuniversity.com
Important - as mentioned at CTU Dayton last year - if you want to sign up for CTU 2012 Dayton and you have given (or will give by Dayton 2012) a talk about Amateur Radio Contesting to any club, hamfest or group since May 20, 2011 - you qualify for a $10.00 registration fee discount. Please choose the 'Registration w/Discount' option above to get the $10.00 discount. Spreading the word about contesting is lots of fun and can save you money!
Thanks to all of the CTU sponsors for making CTU possible. Icom America, Superbertha.com, DX Engineering, CQ Magazine and INRAD. Special thanks to Scott, KA9FOX from QTH.com for hosting and constructing the CTU web site.
Happy New Year and Very 73,
Tim K3LR"

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-12-29
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

****

** Editor change at the NEWSLETTER of Make More Miles **

After about more or less 10-15 years Guido, DL8EBW, who did spread
out the VHF News in more or less regular ways like to inform you
about a change of the TEAM and the Newsletter - now the time have
come that some fresh wind will come to the Newsletter! From begin
of the year 2012 Lins, PA3CMC will be taking over that part together
with Frank PA4EME - They will have much more time for the
hobby nower days than Guido and so please welcome their work. The
people who have read the NL will not find too much different
because both are excellent radio amateur and experiecend on
the VHF and UHF bands - they will have much more time for the
hobby nower days than Guido and so please welcome his work ...
Your NEWS and INFO are still very welcome and the way you spread
it will be not be changed: >>> www.mmmonvhf.de/contact.php
INPUT of VHF-ACTIVITIES: >>> www.mmmonvhf.de/newsuser.php
INPUT of UPDATES to NEWS: >>> www.mmmonvhf.de/newsuserup.php
Thanks in advance and have a good start into the new year 2012

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 *

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts
and VHF-DX'ers to join the new survey to identify the "The Best
VHF DX Expedition of the Year 2011". The aim of the survey is to
thank the very hard efforts of those who organized and carried out
so many nice expeditions and trips all around the world on the VHF
bands in the past year 2011. Participation period: 01. January to
31 December - Voting period: 01. January 2012 - 21. January 2012 :
Persons or Groups who organized and carried out some kind of exped.
in the 144 MHz band segment via Meteor Scatter or Earth-Moon-Earth
propagation. Expeditions / Activities have had to be spread out on
the VHF-DX-Portal Make More Miles on VHF in the year 2011 and must
have found their way into the "REVIEW" section of MMMonVHF.
You will be able to vote by selecting a maximum of 5 expeditions
alltogether in TWO categories (MS and EME) by ticking the box in
front of the expeditions. The voting page will be available by
direct link at http://www.mmmonvhf.de/voting.php from up 1 st of
January 2012 until 21 st of January 2012. Results in February 2012.

>Subject: Looking for Amateur Radio Operators for the Canadian Ski Marathon 2012 - February 11-12, 2012 in Western Quebec/Ottawa Valley 2011-12-29

The Canadian Ski Marathon will be held on February 11-12, 2012 and the group that organizing radio communications is looking for volunteers right now. Contact Harold Hamilton, VA3UNK for more information. Here is the information from Harold as received by me on Thursday morning:

>Subject: Looking for Amateur Radio Operators for the Canadian Ski Marathon 2012 ??? February 11-12, 2012 in Western Quebec/Ottawa Valley
>From: Harold Hamilton, VA3UNK

I would appreciate it if you would help me by spreading the word throughout your local ham radio communities. We are looking for radio operators.

Once again the Canadian Ski Marathon (CSM) is spooling up. This year is the 46th anniversary for the CSM. Radio is a few years behind that.

The CSM depends on ham radio volunteers to provide important and timely safety and logistical communication for the benefit of the skiers. The amateur radio CSM web page (http://www.radio-1.ca/) is up and running with 2012 information. The event runs between Buckingham and Lachute (eastbound) in western Quebec, snow or shine.

If you would like to volunteer this year, please email Harold VA3UNK (radio1@admin2.ca). Although I can't promise anything, assignment requests are generally first-come, first-served.

Please join me the second weekend in February (11th-12th) and help make 39th our best year yet!

Bye for now,

Harold VA3UNK

Amateur Radio Newsline(tm) Report 1794 - December 30 2011

Please note that this is an extended year end newscast and contains three breaks.

Amateur Radio Newsline report number 1794 with a release date of Friday, December 30th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur radio is called out as a North Sea winter storm hits Norway and a tropical storm floods the Philippines; the Australian government gives its blessing to CODEC 2; hams world-wide are asked to assist in the rebuilding of flood ravaged Thai station HS0AC; Kids Day 2012 is coming and a video guide to help new hams make their first contact over a repeater. All this and more on the final Amateur Radio Newsline(tm) report of 2011 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS CALLED OUT AS NORTH SEA STORM HITS NORWAY

A powerful North Sea storm that hit Norway and northern Sweden on December 25th and 26th knocked out power lines, halted transportation and isolated some communities from the rest of the world. And that's when ham radio was called out as part of an effort to create a temporary communications network. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Reporting via QRZ.com, LA9XSA, in Overhalla, Norway, said that amateur radio operators and the Norwegian military had been called up to provide backup communications. This as his nation coped with its damaged infrastructure and communications failures following the storm.

Posting a relay from LA5FRA; LA9XSA said that 3.715 MHz on 80 meters was the first frequency to have been activated. On 160 meters that 1.902 MHz was viewed as an alternative. He also noted that LE1AE was net control on 80 and 160 meters until these nets secured operation on Wednesday, December 28th.

LA9XSA's post also said that during the emergency the regional LA5OR repeater had been put in linked operation. On it LE1AB had served as the net control.

Also, the Norwegian Radio Relay League's emergency communication service did put out a clear frequency request. It asked other radio amateurs to please avoid using any frequencies where storm related communications had been ongoing.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

LA9XSA noted that the worst communication emergency reported had been in the municipality of Vagsoy (PRON: VAY GA SOY). There the mayor was reported to have been using the satellite phone on board a fishing boat to communicate with the outside world. (LA9XSA, QRZ.com, AFP, Shanghai Daily, others)

**

RESCUE RADIO: TROPICAL STORM HITS THE PHILIPPINES

The search for survivors continues in the Philippines following flooding and devastation brought on by severe Tropical Storm that hit on December 16th. Almost 1500 people are now known to have died in flash floods that struck the southern part of that nation. Hundreds more are still missing.

According to Jim Linton, VK3PC, local hams in the disaster area are now doing their best to help out with relief efforts. Linton, who is the Chairman of the I-A-R-U Region 3 Disaster Communication Committee, reports that that the storm triggered massive flooding in the D-U-9 call district.

Meantime, Eddie Valdez, DU1EV, says that prior to the storm hitting the Philippines the group known as Ham Emergency Radio Operators activated response nets on 40 and 2 meters but no specific frequencies were mentioned.

Also, as of airtime there has not been any call for protected frequencies coming from any Filipino ham radio emergency response group or that nations telecommunications regulatory agency.

There is also speculation that some radio amateurs in the devastated areas who might want to lend assistance could themselves be victims of the flooding.

The Red Cross reports the storm swept away entire coastal villages as it dumped heavy rain triggering mud slides. It also flooded a river that sent muddy water from nearby mountains that coated streets. Some 47,000 people are believed to be in evacuation centers at this time. (VK3PC, DU1EV, IARU-R3, BBC, others)

**

RESCUE RADIO: CHANGING TIMES - ARMY MARS PHASING OUT WINLINK

The Department of the Army has announced that it has begun to take steps to phase out the use of the WINLINK System. This is because of possible security breaches that might be incurred in the Internet aspect of transmissions using the mode. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

According to the December 21st ARRL ARES E-Letter, the military chain of command that governs Army MARS feels that the Internet portion of WINLKINK leaves the system significantly open to the possibility of intrusion. To deal with this it plans to replace WINLINK with a newer military e-mail system that has extensive protection against any form of hacking or any other form of incursion.

To accomplish this, Army MARS will be expanding on the concept of a national network that is voice, RTTY and PACTOR capable under MIL-STD 110A. It says that PACTOR will become even more important as the new areas of focus will be peer to peer and keyboard to keyboard PACTOR based communications.

Amateur modes such as MT-63, OLIVIA, and WINMOR, which cannot be used by the military, will be eventually phased out as well.

The ultimate goal of this change will be to help Army MARS return to what it is really supposed to be. That of a radio-only system to relay long haul traffic as it has done very successfully in the past.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

While these changes will affect Army MARS nationally, it is not abandoning state and local served agencies. Army MARS says that it is moving away from providing them a winlink.org e-mail address. (ARRL ARES E-Letter)

**

RADIO LAW: AUSTRAILIA SAYS OK ON CODEC 2 INTERNATIONAL COOPERATION

An emerging technical development is safe down-under. This with word from David Rowe, VK5DGR, that he has received confirmation that the amateur radio Codec 2 project is not controlled under the Australia's Defense Strategic Goods List.

For those of you not aware, Codec 2 is an open source low bit rate speech codec designed for communications quality audio at 2400 bits per second and below. Applications include low bandwidth HF and VHF digital radio and VoIP trunking.

Concerns had been raised that Codec 2 might be subject to Australian government restrictions. As reported in the past, some countries impose severe limitations on certain aspects of amateur radio

international cooperation in the area of technical experimentation. A good example is that of the amateur radio satellite community which has been negatively affected by United States Federal Government International Traffic in Arms Regulations. These threaten radio amateurs with heavy fines or even jail sentences if they collaborate with other radio hams in the rest of the world on certain aspects of ham radio satellite projects. It was feared Codec 2 might also be affected.

Now however, Rowe writes on the Codec 2 reflector that he has received an e-mail from the Australian agency that deals with export control. It says that the specifications of CODEC 2 have been assessed as not controlled under the that nations Defense Strategic Goods List. Also that a Control Status Advice stating this will be released shortly.

While this clears the way for Australian cooperation on the CODEC 2 project it also begs the question of what other nations might decide to place CODEC 2 under its strategically prohibited information exchange list. Ultimately, the amateur radio community in every nation involved in CODEC 2 and other technical development projects may have to sort this out on a case by case basis. More about CODEC 2 is on line at codec2.org. (Southgate, others)

**

BREAK 1

Getting the word out 52 weeks a year, every year, since 1976, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the 4Z5AB Echo-Link VHF gateway serving Rechovot, Israel.

(5 sec pause here)

**

RADIO RULES: VK ADVANCED HAMS GRANTED LIMITED 1 KW OPERATION

Still in V-K land, word that some hams may soon be able to join the kilowatt power out club. Michael Owen, VK3KI, is the President off the wireless Institute of Australia:

--

"At long last, and after ongoing representations by the WIA we seem to be getting closer to Advanced licensees being allowed transmit power limits comparable to other countries.

"The ACMA has advised the WIA that it intends to accede to the WIA's request that Advanced licensees may apply for a variation of their licence to permit higher power from a fixed location on a trial basis from 1 March 2012. The ACMA has stressed to the WIA that it remains concerned about the risk of interference from the use of higher power.

"At the end of 12 months the position will be reviewed by the ACMA.

"The ACMA has adopted this approach to enable any particular difficulties to be identified and satisfactory solutions found to, in the words of the ACMA, `enable the trial to progress to appropriate ongoing arrangements from early 2013.' "

"This is Michael Owen, VK3KI."
--

The higher power limits will only be permitted on the amateur High Frequency bands where the amateur service holds a primary status for those allocations. The Wireless Institute of Australia has however requested that the band 7100 to 7200 kHz be also included and at airtime this is being considered, (WIA News)

**

RESCUE RADIO: DONATIONS AND COORDINATION ASSISTANCE NEEDED TO HELP REBUILD RAST STATION DEVASTATED BY FLOODING

Ham radio groups from around the world are being asked to assist the Radio Amateur Society of Thailand which is seeking help to rebuild its headquarters station, HS0AC. This following massive flooding that recently hit that nation not long ago. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

According to Dick Flanagan, K7VC, in Minden, Nevada, there have already several offers of equipment to the Radio Amateur Society of Thailand from members of the Northern California Contest Club. Also Rusty Epps, W6OAT, reports that the Yasme Foundation sent the Radio Amateur Society of Thailand a $2,000 donation to assist in the HS0AC rebuilding effort. But that will be only the beginning of what's required to bring the station back on the air.

Flanagan says that what is probably needed most right now is someone or some organization to coordinate the assistance effort, solicit the offers and manage the shipping and paperwork. He speculates that perhaps that administrative role could be taken on as a cooperative effort between the Northern California Contest Club, the Northern California DX Club, the International DX Association and perhaps the ARRL.

K7VC notes that this would be a wonderful way for individuals and clubs to express their holiday feelings of generosity to our fellow hams in need, He adds that we can use this opportunity to demonstrate to our Thai ham radio brothers and sisters what a coordinated effort can do to help them rebuild their wonderful station. Those with suggestions can contact Dick Flanagan by e-mail to dick (at) k7vc (dot) com.

For the Amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

--

Photos of the devastation that the flooding brought to HS0AC at on-line at www.qsl.net/rast. (K7VC, ARNewsline, others)

**

RADIO EDUCATION: ANRITSU DONATES USED HT'S TO NORCAL BSA

The Anritsu Company has donated 26 handheld radios to the Boy Scouts of America that will be used by Boy Scouts seeking to get involved with amateur radio and earn their Radio Merit Badge. The donation made possible by an upgrade to Anritsu's onsite two-way radio system and is part of Anritsu's on-going global commitment to foster wireless technology education and support worthy community organizations.

Don Mulder, is Anritsu Senior Vice President and General Manager of the Microwave Measurements Division. He says that the Boy Scouts of America have a strong legacy of teaching youth. He notes that scouts who were first exposed to radio communications during their pursuit of a Radio Merit Badge have gone on to make numerous contributions in the fields of science and engineering.

Mulder said that the company's donation is a sign of our appreciation to the work done by the Boy Scouts, as well as an investment in an organization that will continue to help inspire future engineers.

BearCom, a nationwide wireless equipment dealer and integrator who worked with Anritsu to complete the onsite radio system upgrade, also participated in the donation, which was given to the Boy Scouts of America Santa Clara County California Council. Scout leaders and volunteers who are amateur radio operators will modify the handheld radios for use on amateur radio bands, so that scouts may use them during events and camps held by the Santa Clara County Council.

David Witkowski, W6DTW, led the project at Anritsu to upgrade their onsite radio system to the MotoTRBO system. He said that one of his goals from the onset was to get the old FM radios donated to the Boy Scouts of America for use by scouts seeking to obtain their Radio Merit Badge. W6DTW says that thanks to Anritsu executives and help from BearCom, it all became a reality. (Anritsu, W6DTW)

**

RADIO LAW: FCC SAYS NO TO VANITY CALL REQUEST

The FCC has affirmed an earlier decision in which it has refused to permit Wesley M. Mays, N5HK, of Coppell, Texas, to make another callsign change.

Back on March 17, 2011, Mays was issued an amateur station license with sequential call sign AE5XC. On April 4, 2011, Mays filed a vanity call sign application to modify his license. The application was granted and on April 22nd his license was modified to list call sign WM2W.

On June 1, 2011, Mays filed another vanity call sign application to modify his license to either N5HK or W5LH. Then on June 14, 2011, Mays

filed yet another vanity call sign application to modify his license to list call sign N5TD. The earlier application was granted and his license was modified to list call sign N5HK on June 21st.

On July 2nd, Mays application for call sign N5TD was dismissed as defective. A few weeks later on July 11, 2011, Mays requested reconsideration of the dismissal. He argued that the dismissal was improper because the application for call sign N5TD was filed appropriately and in good faith. He then requested that the selection process for call sign N5TD be reopened.

But in its December 22nd order turning away Mays motion for reconsideration the FCC concluded that the application was properly dismissed. It noted that a vanity call sign application is an application to modify an amateur radio station license. As such Section 97.19(d)(1) of the Commission's Rules states, among other things, that the applicant must request that the call sign shown on the license grant be vacated and provide a list of up to 25 call signs in order of preference. It said that at the time of Mays application requesting call sign N5TD was processed, that he was licensed under call sign N5HK and that the call sign on the application, WM2W, was no longer the call sign shown on the license grant. (FCC)

HAM HAPPENINGS: SKN ON OSCAR 2012 DEDICATED TO W1JSM

Straight Key Night on OSCAR takes place January 1st 2012 from 0000 to 2400 UTC. As always, Straight Key Night on OSCAR is simple and informal. Just operate CW through one or more satellites using a straight hand key.

There is no need to send in a log, but all participants are encouraged to nominate someone they worked for Best Fist. Send your nomination to w2rs (at) amsat (dot) org. A list of those nominated will appear in the Amsat News Service in early February.

By the way: This year's Straight Key Night on OSCAR is dedicated to the memory of Don Brown, W1JSM. Brown who passed away in 2011 at age 90 was a well known longtime VHF/UHF and satellite operator. (ANS)

**

HAM HAPPENINGS: KIDS DAY OPERATING EVENT: JAN. 8 2012

The first of two Kids Day operating events for 2012 takes place on Sunday January 8th. Kids Day is a twice yearly on-the-air happening to encourage young people, licensed or not, to learn about our wonderful world of amateur radio and the fun it has to offer.

Kids Day is not a contest. Rather, it is a way to tell young people worldwide about the magic and mystery of two way hobby radio communications. To accomplish this, amateur radio stations are being asked to devote this short time window to promote both terrestrial and satellite operations to youngsters by providing a place to make contacts with other Kids Day stations around the world.

More information about Kids Day is on-line at www.arrl.org/kids-day. And many of us from Amateur Radio Newsline hope to be on the air to assist in making this first Kids Day of 2012 as big of a success as is possible. We hope to talk to you and the kids at your stations, during the event. (Various)

**

HAM HAPPENINGS: CADXA TO USE K7UGA CALL FOR ARIZONA CENTENNIAL

The Central Arizona DX Association will operate special event station K7UGA the week of February 13th to the 19th. This, in celebration of the Arizona Centennial.

During this time Individual club members will be operating from their home stations using the K7UGA call. However, only special operating locations in Tucson, Prescott and Phoenix will be on the air on Tuesday, February 14th celebrating the states actual 100th anniversary.

Operations will be on all 160 through 2 Meters using SSB, CW, RTTY, PSK31 and satellite modes. QSL requests with an self addressed stamped envelope go to Bob Davies, K7BHM, 1623 North Los Altos Ct. Chandler, Arizona, 85224.

And less we forget: If the call letters being used for this commemorative operation seem a bit familiar to you its because for many years that call belonged to Arizona's native son; the later United States Senator Barry M. Goldwater, K7UGA. (CADXA)

**

HAM RADIO BUSINESS: YAESU MUSEN NAME TO BE REACTIVATED JAN. 1

Yaesu will soon be Yaesu once again. In a letter from Vertex-Standard president Jun Hasegawa dated January 27th, it was announced that that after four years of operating as a joint venture with Motorola, it has been decided to transfer the Vertex Standard Land Mobile Radio business to Motorola and for his company to focus on amateur, marine and air-band communications gear.

In his letter, Mr. Hasegawa says that the company name will revert to Yaesu Musen. This he says is a name business partners have been familiar with for over 50 years. He goes on to say that he believes that the amateur radio community will be delighted to once again see this famous name active.

There will be no staff or operational changes at the United States based facilities located in Cypress, California. The effective date for this reorganization will be January 1, 2012. (Yaesu)

**

HAM HAPPENINGS: ICOM ANNOUNCES D-STAR QDO PARTY WINNERS

Icom has announced the 15 lucky winners of the recent D-STAR QSO Party. Each winner will receive an ID-31E UHF Digital D-STAR transceiver.

In its announcement Icom says that it hopes many organizations will host D-Star contests and QSO Parties in the future. It adds that it anticipates many similar events being held and bringing what it calls a bright future for D-Star and all D-Star operators around the globe.

You can see if you are among the winners of an ID-31E transceiver by taking your web browser to tinyurl.com/7ee7jrg. (Icom)

NAMES IN THE NEWS: IARU REGION 1 MEDAL AWARDED TO DJ9KR

Some names in the news. First up is Ulrich Bihlmayer, DJ9KR, whom the IARU Region 1 Executive Committee has awarded its Region 1 Medal. This, for his longtime and outstanding work in the IARU Monitoring Service.

DJ9KR joined IARU Monitoring Service in 1975 and is the present coordinator of Deutscher Amateur adio Club's intruder monitoring operation. He also serves as vice-chairman of the Region 1 IARU Monitoring Service's Working Group.

Presentation of the medal will take place at Ham Radio 2012 in Friedrichshafen, Germany, next spring. (IARU Region 1 News)

**

NAMES IN THE NEWS: THE DIY MAGIC OF AMATEUR RADIO ON HAM NATION JAN 3

And a reminder the producer, director and writher of the new ARRL motivational video titled "The DIY Magic of Amateur Radio" will be guests of Bob Heil, K9EID, and Gordon West, WB6NOA, on the January 3rd edition of the netcast Ham Nation. Bill Pasternak, WA6ITF, Dave Bell, W6AQ, and Henry Feinberg, K2SSQ, will be there live to host a screening of the video as well as to give you a behind the scenes look at how it was conceived and put together.

Ham Nation airs live every Tuesday night at 9 P.M. Eastern, 6 P.M. Pacific on Leo LaPorte's TWIT dot TV Internet network. To tune in just take your web browser to live.twit.tv. If you miss the live show, it

will be available for download or screening about 24 hours later at twit.tv/HN.

The video is also available right now for on-line screening on YouTube at tinyurl.com/arrl-diy-movie. You can also watch it or download it at www.arrl.org/DIY. (ARNewsline(tm))

HAM RADIO IN SPACE: STUDENT CUBESATS SET FOR VEGA LAUNCH

The first student built amateur radio CubeSats to be sponsored by European Space Agency's Education Office have passed their Acceptance Review and have been deemed space worthy.

The seven tiny birds have been declared ready for launch on board the maiden flight of the new ESA Vega launch vehicle. The university-built picosats, each weighing only 1 kilogram, have already been integrated with Poly-Picosatellite Orbital Deployer devices that will carry them during launch.

The single-unit CubeSats, whose development represented a unique hands-on learning experience for the university students that were involved, were developed by teams from 6 different European countries. The launch window for this first Vega lift-off opens on January 26th and ends in the first week of February, 2012. (ESA)

**

WORLDBEAT: RAC DUES STRUCTURE TO INCREASE

Radio Amateurs of Canada has raised its membership cost.

Rates had previously been raised for United States and International Members to take into account the increased mailing costs for non-Canadian residents. These price changes are now reflected on the RAC website however the society says that domestic Canadian membership rates are among the lowest in the world and will remain so.

By way of example, the group says that a membership in Radio Amateurs of Canada will continue to be less than a tank of gas in Canada. Also that the increase is less than a cup of coffee for most memberships. More is on line at www.rac.ca. (RAC)

**

WORLDBEAT: NEW UK RULES ON LICENSE FREE DEVICES

UK telecommunications regulator Ofcom has published new regulations that permit the use of a range of new devices on a license free basis. These include the use of personal locator beacons on land; wireless road safety systems; wireless access terminals in the 3400 to 3800 MHz band and mobile satellite services operating in the 2 GHz band. Also included are wireless mobile terminals connecting to the 2012 London Games Tetra Network. More on this Ofcom decision is on-line at tinyurl.com/uk-license-free. (RSGB)

**

ON THE AIR: NEW TEXAS VERTICALLY POLARIZED 2 METER SSB NET

A new SSB net in South East Texas and South Wwest Louisiana is now active on 144.25 MHz using vertical rather than horizontal polarization. The idea is to interest newly licensed hams who may have access to a sideband radio a way to join the fun without putting up a separate horizontally polarized antenna. More information on this net is available from contact K5HCS at his QRZ.com e-mail or USPS address. (WB5ITT)

**

DXCC NEWS: 5N6/YL2SW APPROVED FOR DXCC

Bill Moore, NC1L at the ARRL's DXCC Desk reporters that the 5N6 stroke YL2SW operation from Nigeria has been approved for DXCC credit. Moore says accreditation od the operation had been on hold pending a review of the status of their location to be certain that it was land based. This, in accordance with DXCC rule 8.

If you had credit for this operation rejected in the past, send a note to bmoore (at) arrl (dot) org to have your record updated. You can see the results when the change has been done to your record by checking your Logbook of the World account or the DXCC daily numbers. (ARRL-DXCC)

**

DXCC NEWS: MALYJ VYSOTSKIJ ISLAND MAY BE DELETED FROM DXCC

Robert Busch, DL7VOA at Germany's DX News Letter reports that there is a good chance that Malyj Vysotskij or MV Island will probably be deleted from the DXCC entity list next year. As of this moment the DX News Letter has not heard of any further DXpeditions being planned for that location. (DL-DXNL)

**

DX HAPPENINGS: BOTSWANA DXPEDITION STILL SEEKING OPERATORS

K5LBU reports that there is still room for several more operators to join his DXpedition to Botswana in March. The current team consists of K5LBU, one couple and one other operator. The plan is for the group to meet in Johannesburg on March 16th and 17th and then travel to Lotsane Lodge on March 18th and return to Johannesburg on the 28th. If you would like to join this operation, please e-mail Charles Frost to 3da0cf (at) gmail (dot) com. (various)

**

DX

In DX, JI5RPT will sign JD1BLY from Chichijima Island through January 2nd. Listen out for him using CW, SSB and digital modes on 80 through 6 meters. Possibly some satellite operation as well. QSL to JI5RPT.

SM6CPY, will be on the air from Rwanda in a holiday style operation signing 9X0PY through January 7th . QSL via SM6CPY.

DL1ZU is on a trip in Namibia through Jan 13th using an Icom IC-706. His primary operating modes will be CW plus PSK, RTTY and SSB. QSL via his home call.

EA1CYK/P will be operational from Deception Island in the South Shetland group during his spare time until March of 2012. He has been spotted with a good signal on 10 meters QSL via EA7LS.

G3SWH and G3OLU will be active from the Hawane Resort in western Swaziland between February 21st to the 29th. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Operation will be on CW only on 80 through 10 meters. QSL via G3SWH

Lastly, An international group of operators plan to visit Pitcarin Island and operate as VP6T between January 20th and February 4th. According to a web posing the operation hope to make at least 30,000 contacts while on the island. Operations will be on 160 through 10 meters including the 30, 17 and 12 meter bands. Modes to be used include CW, SSB and RTTY. The VP6T log will be uploaded to Logbook of the World during the operation if possible. QSL Manager is G3TXF. In addition to the usual routes they will also be using the new Online QSL Request Service provided by ClubLog. For more details and the suggested frequencies please visit www (dot) vp6t (dot) org.

(Above from various DX news sources)

**

THAT FINAL ITEM: HOW TO GET A NEW HAM ON A 2 METER REPEATER

And finally this week, if you are new to ham radio and are sitting with a brand new HT or 2 meter mobile you got for Christmas but afraid to make a first contact, then we have just what you need. Simply take your web browser to tinyurl.com/new-on-two. That's where you will find a video produced and hosted by Tyler Pattison, N7TFP, of Gig Harbor,

Washington that takes you step by step through making your first contact over a local 2 meter VHF repeater.

In his video, N7TFP, explains every aspect of getting on a repeater including what a repeater really is:

--

N7TFP audio: Here it by downloading the MP3 version of this weeks newscast from www.arnewsline.org

--

In the video, N7TFP is joined in on the air contact demonstrations by Aaron Taht, N7FSM, and Rick Taylor, K7CAH. Together the three show the newcomer what a simple, every day on-the-air contact sounds like. We should add that the lessons taught in this video are applicable to most repeater operation on other bands as well.

Tyler Pattison, N7TFP, has several well produced getting started videos posted on YouTube but at this time of year this one on making a first contact seems very apropos. If you know someone who is new to the hobby and unsure of how to make that very first contact over a repeater, we highly recommend that you send them to this short and friendly video. Again the direct route to it is tinyurl.com/new-on-two. Whomever you send there will likely be happy that you did. (ARNewsline(tm), Southgate)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all there is for this year from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the deadline is fast approaching for nominations for the 2012 Dayton Hamvention Amateur of the Year, Special Achievement, Technical Excellence and Club of the Year awards. Nominations must be received by January 15th 2012. Additional details on these awards and a nomination form are available on the Dayton Hamvention Website www dot Hamvention dot org. Nominations also are accepted via regular mail to the Dayton Hamvention Awards, PO Box 964, Dayton, Ohio, 45401. The winners will be recognized at the 2012 Hamvention, which runs May 18th to the 20th.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Davis, W2JKD, in sunny Vero Beach, Florida, wishing you a Happy New

Year from the Amateur Radio Newsline. 73 and as always, we thank you for listening.

WIANEWS WEEK COMMENCING JANUARY 01 2012 FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JANUARY 1 2012.

VK5ZEA

VK5ZEA is one of 15 lucky winners in this years ICOM D-STAR QSO Party

Just the one lucky winner from VK, who will receive an ID-31E UHF Digital D-STAR
transceiver.

Plans are underway to organise many more D-STAR contests and QSO Parties in the
future and anticipate many similar events around the globe.

In-house BPL product is withdrawn

As the interference prone technology BPL has enough problems comes news that
NETGEAR has withdrawn from sale its product, on safety grounds.

The Powerline AV+ Ethernet adaptor with pass-through power socket for additional
devices, rated as 240 volts, has been removed from Australian sale.

It was the Model No. XAV2501 and the adaptor coloured white and is supplied
as part of kit XAVB2504, which also contains an adaptor.

NETGEAR warns that the 240V AC will be present on the Earth terminal of the pass-through socket outlet, and the Active terminal will be grounded to Earth. This may present the danger of an electrical shock.

Affected products were sold nationally through Optus between June and November this year.

NETGEAR is investigating whether any products sold through other retailers may be affected. It was been marketed it as a solution to home networking.

French Island on air next weekend

Three members of the Scout Radio & Electronics Service Unit using the scout callsign VK3SAT for the Keith Roget Memorial National Parks Award, wants to make as many contacts as possible from French Island OC-136 the IOTA group.

Peter Fraser VK3ZPF, Matt Gledhill VK2ADF and Kevin Bedford VK3KAB will be battery powered from the Fairhaven camping ground on January the 7th and 8th on the 80m, 40m, 20m, 15m and 10m bands, QRV Saturday afternoon and evening and Sunday morning.

The team will carry most of the gear in backpacks and will be joined by three or four others who will be kayaking across from Stony Point.

With additional batteries coming across by kayak VK3SAT hopes to make many contacts.

More details about the Keith Roget Memorial National Parks award can be found on the Amateur Radio Victoria web site www.amateurradio.com.au

Listen for VK3SAT and be part of the action next weekend.

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.....

The party season has fallen over the land and the retailers are encouraging us to share our plastic for their merchandise. For us in the hobby sector there are the thoughts of present giving and completing the station spring clean.

Checking out the good value offered by the WIA Bookshop - see the adds in December "Amateur Radio" magazine and on line at www.wia.org.au. Maybe to those of us in clubs we could make a simple project to help our local amateurs. For many reasons some individuals can't properly do the tasks of maintenance. Some willing seasonal muscle and friendship could ensure that antennas and stations are safe and working properly with a small band of helpers.
Give an amateur a hug time!

On another matter, the matter of our Sunday News broadcasts, I would like to offer my deep appreciation to all who make it possible. The correspondents, the rebroadcasters and clubs who keep the Queensland news coming. Especially I thank our inveterate News Editor, Graham, VK4BB who with his support crew spend many volunteer hours on making it happen. Home life and work manage to allow our broadcast team to follow the Amateurs code, somehow keeping life in balance.

Many thanks to you all and to our listeners - may you enjoy the best festive season offerings and all the New Year can offer.

Just one final thought.....if your club news is good enough for your website then it is good enough for QNEWS.

For QNEWS, I'm Geoff VK4ZPP and that's what I think....how about you?

TOWNSVILLE does Australia Day

Get out your corked hats and throwing thongs - TARC will be out in the field for Australia Day (provided the venue does not get too aquatic) at the famous Loam Island ARDF Grounds and Shelter from 11-30am Thursday January 26th.

BYO everything and engage in aussie fun and mirth - and even do some radio things too ! Bring the family, bring the lagerphone, bring the esky but don't bring the mozzies !

VK7

http://groups.yahoo.com/group/vk7regionalnews/

Annual General Meeting

The annual general meeting for NTARC will take place on 8 February 2012 at the Skills Institute Alanvale, commencing at 7:30pm. As usual AGM will be followed by a general meeting.

All office holder and committee positions fall vacant at the AGM.

Therefore nominations for President, Vice-President, Secretary, Treasurer and Committee member are sought.

Members are reminded that they will need to have paid their 2012 subscription before being able to vote at the Annual General meeting.

DISCUSSION POINT

What use is an f-call?

Recently I participated in my first amateur radio contest. In short, it was a blast!

One thing I noticed was that several amateurs I speak to on-air regularly were not there and I'd heard a few people say that "Contesting is not my thing". I respect that, but I'm also a little disappointed by it because it was a lot of fun.

I started thinking about it a little and wondered what else might be occurring that could account for some of this. I'm sure that part of it is that you might not actually have ever participated in a contest and it might be that you have no idea how it works, so you feel left out before you begin.

Let me give you a
fly-over view of a contest, not a specific one, just the notion of what's happening on air.

The idea is that you count and log your contacts. Every time you make a new contact, you log the time and date, frequency and mode and of course the call-sign of the station you contacted. You also give the other station a unique number and they give you one in return. The number is the count of contacts you've done at that time. You log the number with each contact.

For example, and I'm stressing here that this is just an example. If I go on air and say: CQ Contest, CQ Contest, vk6flab listening. I'll get back a call, vk6bdo. I'll say, vk6bdo, this is vk6flab with 012 for you. The response will

come back: vk6flab, vk6bdo, QSL 012, I give you 413. I'll say QSL 413, Happy Hunting, vk6flab listening.

What I've just done is sent 012 to vk6bdo and they've sent 413 back to me. My next number will be 013 and theirs will be 414.

That's it.

I should note that contests have rules that are published prior to the event, such as how points are allocated, whom you're allowed to talk to in which mode on what frequency, etc. Each contest is different, all dependent on why the contest is being held.

Now I've said that this is an example. You'll note that there are some extra words in the interaction. I say for example, "Happy Hunting" That's completely superfluous. If you're a die-hard contester, you'll probably be horrified. My take on it is that to become a die-hard, you need to start somewhere and you need to realise that there are humans on the end of each contact.

One of the things I took away from my contest participation is a sense of community. I spoke with 70 different stations within 24 hours. Some contacts were strictly business, others were more involved. I got compliments for hitting my first 10 contacts, my first 50, etc. There was an ongoing camaraderie that encouraged people to participate. I spoke with stations towards the end of the contest who had just made 4 contacts, and I was one of them. I felt humbled by their participation. Of course there were stations with over 600 contacts, and talking to them was a different kind of thrill.

While I completely understand that "Contesting is not your thing", I'd encourage you to participate and have a go, you might be surprised.

I'm Onno, vk6flab.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

SOUTH AFRICA'S AMATEUR RADIO SPIRIT TROPHY

The Len Wells Amateur Radio Spirit trophy for 2011 was presented to Tom Cooper, ZS1PS, at the False Bay Radio Electronics and Computer Club end of year function on Saturday 10th December. Tom has been a dedicated worker for his club for many years and is a committee member and the Editor of their Newsletter DIALOG. In spite of being a big C survivor, he spent many week-ends building up their club house. Tom, 80 years of age, has 60 years of unbroken membership of the SARL.

That's true Amateur Radio Spirit! Congratulations Tom, may you still enjoy amateur radio for many years to come.

(SARL)

Raspberry Pi moves towards production

30 years after the BBC Microcomputer, a new UK-developed low price home computer, the £16 ($25) Raspberry Pi, is about to go into production.

Its processing capability coupled with low price may appeal to radio amateurs.

The Pi is produced by the Raspberry Pi Foundation, a UK registered charity which exists to promote the study of computer science and related topics, especially at school level, and to put the fun back into learning computing.

The Cambridgeshire developed Pi uses a 700 MHz ARM11 chip similar to that found in mobile phones and is intended to run a version of the Linux open source operating system.

The idea for Raspberry Pi came from video game veteran David Braben who was searching for a way to inspire young people to start a career in technology. He got his start in games thanks to the BBC Micro on which he, and school friend Ian Bell, created pioneering computer game Elite.

Marconi ruins surface in Wellfleet

The ocean has revealed a big piece of Cape Cod history in Wellfleet: ruins of the Marconi station which sent the first transatlantic wireless message from the USA to the UK.

January 18, 1903, President Theodore Roosevelt's message to King Edward VII was tapped out in Morse code from South Wellfleet to the station at Poldhu in Cornwall. It was to be the first wireless telegram between America and the United Kingdom. The message read:

His Majesty, Edward VII. London, Eng.

In taking advantage of the wonderful triumph of scientific research and ingenuity which has been achieved in perfecting a system of wireless telegraphy, I extend on behalf of the American People most cordial greetings and good wishes to you and to all the people of the British Empire.

Signed THEODORE ROOSEVELT

Wellfleet, Mass., Jan. 19, 1903

==========

NEWS FROM ARNEWSLINE USA

TRANSATLANTIC AMATEUR RADIO BALLOON IN FLIGHT

An amateur radio balloon carrying APRS that left the United States mainland and headed across the Atlantic Ocean toward the European continent made it.

Ron Meadows, K6RPT, of the California Near Space Project launched four high-altitude balloons at 0000 UTC on Monday, December 12th. The balloons were expected to come down somewhere in the midwest U-S but one identifying on APRS as K6RPT-11 decided to take a cruise on the jet stream.

After departing US soil over New Jersey at an altitude of 110,000 ft it crossed the Atlantic Ocean overnight, Hams in Southern Europe were asked to tune their gear to 144.390 which is the APRS channel used in the United States. They were

then requested to assist in tracking K6RPT-11 on its pass over Europe.

The question at the time was where would it land. The answer came early in the morning of December 14th. At the time the balloon was out over the Alboran Sea in the Mediterranean when APRS tracking showed it suddenly descending. The last report via EB6AOK showed it at 14,558 feet and traveling at 35 miles an hour. At that point its assumed to have fallen into the sea but not before traveling over 7,000 statute miles at well over 100,000 feet. Possibly a new record for an APRS equipped ham radio long distance balloon flight.

On this point we will have to wait and see.

FRENCH REGULATOR MODERNIZING HAM RADIO LAWS

France appears to be on the verge of modernizing its amateur service rules. Newsline's Cheryl Lasek, K9BIK, is here with what's known so far:

French telecommunications regulator ARCEP looks
as if it is ready to permit French radio amateurs
to use modern means of communication such as
D-STAR. On December 14th several French ham radio
groups received a draft amendment from ARCEP
regarding new laws to govern that nations amateur
and amateur satellite services.

If approved, these new rules will replace the
Decision No. 2010-0537, which currently governs
French amateur radio operations. The new rules
appear to liberalize modes and interconnect
options for ham radio in the digital age.

According to the latest word that we have, the
rules change proposals will be available for a
public discussion on the ARCEP website and those
of participating amateur radio associations.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

A careful study of text is already underway by a
working group of French radio amateurs to
formulate a joint response by January 20.

FCC ADOPTS CALM ACT RULES TO LIMIT TV COMMERCIAL VOLUME

The Federal Communications Commission has taken
what it terms as a major step toward eliminating
one of the most persistent problems of the
television age. That being those overly loud
commercials that the public seems to hate.

On Wednesday, December 14th 2011 the Commission
adopted a Report and Order that implements the
2010 Commercial Advertisement Loudness Mitigation or CALM Act.
That's the statute in which Congress

gave the Commission, for the first time,
authority to address the problem of excessive commercial loudness.

The rules as adopted require that commercials
have the same average volume as the programs they
accompany. The rules also establish simple,
practical ways for stations and multi-channel
video programming distributors to demonstrate
their compliance with the new regulations.

The CALM Act rules will become effective one year
after the date of their adoption, or 13 December,
2012. This gives those broadcasters falling under
the regulation until that date to be in full
compliance. Equally important, it provides ample
time for programmers and networks to provide
their distributors with certifications stating
the commercials that accompany their programming
are fully compliant with these new rules.

While consumer complaints about loud commercials
have diminished since 2009, the FCC expects that
these new rules will reduce loudness complaints
even further.

ENGINEERING GREAT BOB ORBAN ON TWIT.TV

And if you are a ham interested in audio
processing technology, then you are likely
familiar with the name Bob Orban. His work has
made his company a world leader in broadcast
audio processing technology some of which has
been adapted into the ham radio community. In
fact, it's hard to find any radio station or
other broadcast outlet where one of his famed
Optimod processors is not installed.

Now you can get a chance to learn a bit about the
technology that Bob Orban created by watching two
recent video podcasts on Leo LaPorte's TWIT dot
TV internet network. On December 14th Bob Orban
appeared on the shows Triangulation and This Week
in Radio Tech. Both are now available for
download or on-line viewing. Take your web
browser to twit dot tv and use the websites
search facility with the name Bob Orban to locate
them. If great sounding audio is your thing, then
this will be two hours well spent.

August 11-12 VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

SKN on OSCAR 2012 in memory of W1JSM

You are cordially invited to participate in Straight Key Night on OSCAR 2012, conducted by AMSAT for all radio amateurs throughout the world.

This year's event is dedicated to the memory of Don Brown, W1JSM, who passed away in 2011, aged 90. Don was a long-time, enthusiastic VHF/UHF and satellite operator and one of our most frequent Best Fist winners.

As always, SKN on OSCAR is simple and informal.

Just operate CW through one or more satellites on 1 January 2012 (0000 to 2400 UTC), using a straight hand key.

There is no need to send in a log, but all participants are encouraged to nominate someone they worked for Best Fist. Your nominee need not have the best fist of anyone you heard, only of those you worked.

Send your nomination to w2rs@amsat.org

AWARDS

RSGB Commonwealth Century Club Jubilee Award 2012

2012 is the Queen's Diamond Jubilee and mindful that the Queen is the head of the Commonwealth of Nations we are pleased to announce a new operating award for 2012.

To qualify for an attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from www.beru.org.uk/CCCaward/CCCindex.html

G3PJT@btinternet.com

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

VK7 Sewing Circle Net Meet the Voice BBQ and Auction

The Sewing Circle Net "Meet the Voice BBQ" is set for Sunday 18 March, at Ross. Put the date in your calendar now and organise a day out in Ross. Make sure you bring the family.

This year will see the addition of an auction of quality equipment. As in previous years, all funds raised at the BBQ event will go towards repeater maintenance.

The Sewing Circle Net is looking for suitable items that you are able to donate for the auction. As an indication of what type of equipment can be donated, they have as the first donation a fast, modern HP computer system, complete with LCD monitor, that has been refurbished for use as a ham shack computer. It comes loaded with XP pro operating system and lots of software. This includes many ham radio software programs, along with a ham library of over 400 books, including current handbooks, antenna handbooks and books on almost any ham related subject that you could imagine.

The "Circle" encourage you to make a big effort and consider what equipment you have that you no longer use, and donate it to the auction. Remember, every dollar raised goes towards repeater maintenance around Tasmania.

(From Vince VK7VH and all the crew on the Sewing Circle Net)

HAMS IN KAZAKHSTAN CELEBRATE NATIONS 20TH ANNIVERSARY

On the air, hams in Kazakhstan are celebrating
their country's 20th anniversary with the use of
special callsigns as well as issuing a
certificate to commemorate the event. The 48
special callsigns along with QSL routing and
commemorative certificate information is listed at kw.cqun.kz

Kazakhstan is best known in ham radio circles as the home of the
Cosmodrome from where a number of ham radio satellites and crews
to the International Space Station have been launched.

KH0UY and KH0K will be operational from Saipan in
the Northern Mariana Islands between January 7th
to the 10th. Their activity will be on 80
through 6 meters, plus the satellites. QSL via
their home callsigns of JO3FRH and JE4SMQ, either direct or by the bureau.

1941, The first of four ships being built for the Australian Navy slides down the slipway of BHP's newly constructed Whyalla Shipyard.

HMAS Whyalla was commissioned for duty on January 8, 1942. She carried out escort duty on Australia's east coast and later took part in operations in the New Guinea theatre before being attached to the British Pacific fleet as a unit of the 21st minesweeping flotilla.

HMAS WHYALLA was decommissioned in 1947 and sold to the Victorian government for whom she would be employed as a lighthouse maintenance vessel until 1984.

Hearing that the ship was to be sold as scrap, she was purchased by the Whyalla City Council and brought back to Whyalla. In 1987 she was moved back up the same slipway from which she was launched 46 years earlier and relocated to become the centrepiece of the city's maritime museum.

On the weekend of January 7 and 8, 2012 the South Australian branch of the Naval Association of Australia will commemorate the 70th anniversary of the ship's commissioning and the Whyalla Amateur Radio Club will take part in the special celebration by operating from the ship using the special event callsign VI5WHY.

The station will be on air from around 2300 UTC on Saturday January 7 and is especially keen to make contact with present or former naval members. Operating frequencies and modes will be posted on the VKHAM website closer to the event.

Special QSL certificates will be sent to all stations who make contact.

So mark the date January 7 on your calendar.

This has been Alex VK5ALX on behalf of the Whyalla Amateur Radio Club.

INTRUDER WATCH - ENFORCEMENT ZONE

Region 1 medal for DJ9KR

By decision of the IARU Region 1 Executive Committee Ulrich Bihlmayer, DJ9KR is awarded the IARU Region 1 medal for his long-time outstanding work in the IARU Monitoring Service.

DJ9KR joined IARU MS in 1975, is the present co-ordinator of DARC-MS and serves as vice-chairman of the Region 1 IARU MS Working Group.

His dedication is an example for us all.

The presentation of the medal will take place at Ham Radio 2012 in Friedrichshafen.

3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Norwegian Storms - Radio Hams on Standby

The emergency communications group of NRRL are on standby (Dec.27) because of storms that hit the south of the country.

A communications network was established on 3720 MHz (+/- QRM) every three hours between 0900-2400 Norwegian Time (GMT+1).

No formal request to assist has yet been received from the authorities but the standby net is being run as a precaution.

'Dagmar', believed to be the third-largest storm recorded in Norway for 50 years, hit the country, Sunday last with wind speeds as high as 125 mph (201 kmh).

SPECIAL INTEREST GROUPS - LOW DOWN

137 KHZ SIGNAL GENERATED IN GERMANY SEEN IN ALASKA

Recently Michael Owen VK3KI our Wireless Institute of Australia President advised on the weekly broadcast of how the plans were progressing with Region 3 and the latest support for a low-frequency ham radio allocation.

Well, now, RF generated by Stefan Schaefer, DK7FC, of Heidelberg, Germany has been seen on 136.172 kHz at the remotely operated station of Laurence Howell, KL7UK near Wasilla, Alaska.

Howell also holds the UK call sign G4DMA.

He used Spectrum lab software to decode Schaefer's transmission. Using this system, a full callsign using dual frequency 30 second per dot CW was seen.

This is believed to be a first for this type of transpolar path as it has to cross the Auroral zone twice. Conditions have to be very stable with low geomagnetic and Proton levels, and the path only appears to be open in their deepest part of the winter.

KL7UK who is part of the WE2XPO low frequency experimental license group is using a 2 turn directional K9AY array and a remotely tuned Icom R75 receiver controlled from his residence in Oklahoma.

DK7FC in Germany had an Effective Radiated Power of only a few Watts.

SARL NEWS - SUNDAY 01 JANUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In this first SARL NEWS for 2012:

CHANGES AT ICASA

ADVANCED AUSTRALIAN LICENSE HOLDERS MAY GET MORE POWER

ARRL KIDS DAY ON JANUARY 8

JOIN THE SARL THIS WEEK AND RECEIVE A COMMEMORATIVE MOUSE PAD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

On this first day of 2012 we wish you a happy and prosperous New Year. May all your wishes come true and your new year resolutions include more time on the air.

CHANGES AT ICASA

The ICASA General Manager Engineering and Technology has resigned and left ICASA on 31 December 2011. Dumisa Ngwenya chaired the ICASA - SARL Liaison Committee. There is no indication of who will be acting in this position until a new person is appointed. A new appointment is long process as the post has to be advertised.

In anticipation of his resignation the SARL lodged, in mid December, an Appeal to the Chief Executive Officer of ICASA, Themba Dlamini, to investigate the long delay in the publication of the corrections to the regulations which became effective on 1 April 2011. To date the SARL has not received a response other than that the legal department are reviewing the corrections. The SARL requested the CEO to separate the Amateur regulations from the rest of the corrections as they seem to be

delaying the process. The SARL has also requested a meeting with the CEO.

ADVANCED AUSTRALIAN LICENSE HOLDERS MAY GET MORE POWER

After ongoing representations by the Wireless Institute of Australia it seems if Advanced licensees will be allowed transmit power limits comparable to other countries.

The ACMA has advised the WIA that it intends to accede to the WIA's request that Advanced licensees may apply for a variation of their licence to permit higher power from a fixed location on a trial basis from 1 March 2012. The ACMA has stressed to the WIA that it remains concerned about the risk of interference from the use of higher power. At the end of 12 months the position will be reviewed by the ACMA.

The ACMA has adopted this approach to enable any particular difficulties to be identified and satisfactory solutions found to, in the words of the ACMA, `enable the trial to progress to appropriate ongoing arrangements from early 2013.'

Michael Owen, VK3KI, WIA President, said "The higher power limits will only be permitted on the amateur High Frequency bands where the amateur service holds a primary status for those allocations". The Wireless Institute of Australia has however requested that the band 7 100 to 7 200 kHz be also included. In October 2005 Australia introduced an advanced grade syllabus following a more advanced syllabus of study. Australia has three license grades, a Foundation, a Standard license and an Advanced license.

ARRL KIDS DAY ON JANUARY 8

The first of two Kids Day operating events for 2012 takes place on Sunday January 8th. Kids Day is a twice yearly on-the-air happening to encourage young people, licensed or not, to learn about our wonderful world of amateur radio and the fun it has to offer.

Kids Day is not a contest. Rather, it is a way to tell young people worldwide about the magic and mystery of two way hobby radio communications. To accomplish this, amateur radio stations are being asked to devote this short time window to promote both terrestrial and satellite operations to youngsters by providing a place to make contacts with other Kids Day stations around the world.

More information about Kids Day is on-line at www.arrl.org/kids-day.

JOIN THE SARL THIS WEEK AND RECEIVE A COMMEMORATIVE MOUSE PAD

If you are not yet a member of the SARL, is it not time that you did join? The first twenty new members who join in January 2012 will receive a commemorative mouse pad. The pad has the IARU 2011 IARU Conference logo printed on it and is a collector's piece. To join visit www.sarl.org.za or call Mariska on 011 675 2393. The office reopens on Tuesday 3 January.

NEW TIME FOR AMATEUR RADIO TODAY'S MONDAY TRANSMISSION.

>From tomorrow, January 2, the retransmission of Amateur Radio TODAY will change to 17:30 - 18:30 UTC which is 19:30 - 20:30 CAT. The transmission will remain in the 60 metre band on a frequency of 4 895 kHz. The transmitter power will be 100 kW feeding an omni-directional antenna. Reception reports are invited and can be emailed to artoday@sarl.org.za. All reports received of the January 2 transmission by 5 January will be participating in a lucky draw for the ARRL RFI handbook 2.You can also fax your report to 012 991 5651.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is expected to be at low to moderate levels. Sunspot 1389 produced some moderate M-class flares on Thursday and Friday. During 2009 there were 260 spotless days, 51 in 2010 and only 2 spotless days during 2011.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 95.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. 6 m is also active with TEP openings from time-to-time.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

8 January - ARRL Kids Day events, information on www.arrl.org/kids-day. 15 January - Last day for submission of summaries of proposed papers for the Radio Technology in Action Symposiums 2012 to artoday@sarl.org.za. 31 January - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January - Closing date for submitting papers for SA AMSAT Space Symposium. Remember also to submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX
